Executive Summary

This report analyzes the progress APEC member economies have made toward reaching IFAP implementation goals. The Policy Support Unit (PSU) was asked to assist the Investment Experts Group (IEG) in preparing an analysis of the progress that APEC has made in implementing the agreed-upon IFAP principles and a review of APEC completed projects that are related with IFAP. To meet this goal, two templates were circulated:

- Investment Facilitation – Menu of Actions and Measures: Voluntary submission by member economies; and
- Investment Facilitation Actions Already Under Way: Submission by APEC Secretariat, to reflect new APEC projects and initiatives that are relevant to IFAP.

The PSU received and analyzed sixteen submissions from member economies (Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Russia; Singapore; Chinese Taipei; Thailand; United States and Viet Nam) and drew from secondary sources¹ as an informative tool on international best practice and benchmarking. The submissions were of mixed quality with some members providing detailed information corresponding to the specific actions under each of the eight IFAP principles, while other economies provided information corresponding to only one or two specific actions out of the 50 agreed specific actions under the eight IFAP principles.

The results show that reporting economies have made substantial progress toward implementing several IFAP principles while progress on others has been less fruitful. Some of the findings based on the voluntary submissions are provided as follows:

Principle 1: Most of the reporting economies have in place a Foreign Investment Promotion Act which sets out the laws and regulations pertaining to foreign investment in their economies. The laws, rules, regulations and/or amendments relating to foreign investment are usually published in an Official Gazette, and/or on the relevant government agency's website. Most economies also have a trade and investment agency to help promote and facilitate foreign investment.

Principle 2: Most economies have a system of land ownership registration in place. Economies also generally have established effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions.

Principle 3: The investment promotion agencies of most reporting economies implement actions related to Principle 3. Most economies accord 'national treatment' to foreign investment, an important component of IFAP and international best practice.

Principle 4: Economies have reported efforts to streamline foreign investment applications and registration, licensing, and taxation procedures for foreign businesses.

Principle 5: Most reporting economies have taken steps toward building constructive stakeholder relationships both as a means of direct policy action and to further integrate relations between the public and private sectors.

¹ Some of these secondary sources do not cover all 21 APEC economies.

Principle 6: The adoption of new technology has improved the investment climate in all economies who reported progress toward principle 6. New processes have also been implemented which greatly simplify international direct investment.

Principle 7: Reporting member economies showed a commitment to maintaining up-to-date investment policies through continuous monitoring.

Principle 8: Economies volunteering IFAP submissions report extensive international cooperation.

Secondary sources, such as UNCTAD's World Investment Report and World Investment Prospects Survey, demonstrate the importance of implementing policy changes in order to foster a welcoming environment for international investment and maximize it as a tool for economy-wide development goals. Secondary sources are included in the analysis of each IFAP Principle as a reference.

The report concludes with an analysis of on-going and completed projects undertaken toward fulfilling IFAP goals of capacity building and empirical analysis.

1. INTRODUCTION

Since its endorsement in 2008, IFAP has been a highly valuable and well-received component of APEC's trade and investment agenda and an integral planning tool around which many of the activities of the Investment Experts Group (IEG) are based. As a planning tool, it has provided critical guidance to the IEG's work on investment facilitation. At the same time, its comprehensive prescription of actions that can be taken across a range of policy areas has been commended by stakeholders as a valuable reference tool for improvement of the APEC investment climate.

IFAP's initial phase of implementation was envisioned as spanning three years, from 2008 to 2010. In order to sustain the work that has resulted from IFAP, to solidify IFAP's role as a component of APEC Strategy for Investment, and to ensure that IFAP remains a credible initiative in the eyes of the stakeholder community, APEC economies have undertaken to address two important issues: (1) how IFAP will be implemented in the years ahead; and (2) how APEC can demonstrate progress in its IFAP implementation.

The IEG has agreed (2011/SOM3/IEG/010) to review IFAP implementation progress, and decide which areas of IFAP should be the focus of collective APEC actions from 2012 to 2014. At the same time, the IEG has agreed to refocus IFAP activities towards areas with strong analytical and empirical foundations; activities that seek to incorporate hard lessons from previous APEC projects; and activities that produce concrete, tangible outcomes that can be widely distributed. The IEG has further agreed that rigorous capacity-building should remain an essential component of IFAP implementation.

The PSU was asked to assist the IEG to:

1. Describe IFAP implementation progress, which includes reviewing information such as the number of investment promotion agencies in the APEC region, and the number of international investment agreements among APEC economies.
2. Analyze the pattern and trends of foreign investment (mainly FDI), focusing on inter-regional and intra-regional FDI flows, and the sectoral composition of FDI flows (depending on data availability).
3. Design templates to be circulated among member economies to support the voluntary reporting of individual IFAP implementing actions being undertaken by member economies, as well as reporting by the APEC Secretariat of collective IFAP implementing actions.

Building on the existing template proposed by Australia under Doc 2012/CTI2/IEG/008 attachment E, the PSU assisted the IEG in designing two templates: (1) Investment Facilitation – Menu of Actions and Measures (see Appendix I); and (2) Investment Facilitation Actions Already Underway (see Appendix II).

The APEC Secretariat circulated the two agreed templates to the members of the IEG on 4 June 2012, requesting the member economies to fill out and return the completed templates to the Secretariat. The PSU has received fourteen responses at the time of this writing. The quality of the information provided by the economies were mixed – some economies provided detailed

information corresponding to the specific actions under each of the eight IFAP principles, while other economies provided information corresponding to only one or two specific actions out of the 50 agreed specific actions under the eight IFAP principles.

This report (Part I) contains analysis of the information collected from the IFAP voluntary reporting and from secondary sources to describe IFAP progress. Chapter 2 will describe the implementation progress of the specific actions under the eight IFAP principles. Chapter 3 will describe the investment facilitation actions already under way.

2. INVESTMENT FACILITATION – MENU OF ACTIONS AND MEASURES

IFAP Principle 1

Promote accessibility and transparency in the formulation and administration of investment- related policies

Table 1 Principle 1 Actions

Specific Actions	Economies Reporting Implementation of Specific Actions
Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Adopt centralized registry of laws and regulations and make this available electronically.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; United States; Viet Nam
Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; Thailand; United States
Following establishment of an Investment Promotion Agency (IPA), or similar body, and make its existence widely known.	Australia; China; Chile; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Make available to investors all rules and other information relating to investment promotion and incentive schemes.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru;

	Philippines; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Allow investors to choose their form of establishment within legislative and legal frameworks.	Australia; China; Chile; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; United States
Ensure transparency and clarity in investment-related laws.	Australia; China; Chile; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; Thailand; United States
Improve upon the APEC-wide website (e-portal) to replacing the hard copy publication of the APEC Investment Guidebook (IEG).	Chile; China; Hong Kong, China; Indonesia; Japan; Peru; Chinese Taipei; Thailand; United States
Encourage on-line enquiries and on-line information on all foreign investment issues.	Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations and conformance requirements.	Australia; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Philippines; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
To the extent possible, provide advance notice of proposed changes to laws and regulations and provide an opportunity for public comment.	Australia; Hong Kong, China; Japan; Korea; Malaysia; Philippines; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Explore the possibility of using the international benchmarks on a voluntary basis as a reference point for peer dialogue and measuring progress.	Australia; Chile; Hong Kong, China; Korea; Malaysia; Singapore; Chinese Taipei; Thailand

Summary

Most reporting economies have in place a Foreign Investment Promotion Act which sets out the laws and regulations pertaining to foreign investment in its economy. The laws, rules, regulations

and amendments relating to foreign investment are usually published in an Official Gazette (e.g. Japan, Peru, the Philippines, Singapore and Viet Nam), and/or on the relevant government agency's website (e.g. Australia; China; Hong Kong, China; Japan; Korea; Chinese Taipei; Thailand and the United States).

Most economies have a trade and investment agency to help promote and facilitate foreign investment, such as Austrade and the Foreign Investment Review Board in Australia; the Foreign Investment Committee in Chile; Investment Promotion Agency of MOFCOM in China; Invest-HK in Hong Kong, China; BKPM in Indonesia; Invest Japan Office and Japan External Trade Organization (JETRO) in Japan; Invest Korea; Malaysia Investment Development Authority (MIDA); Peru's Proinversio; the Philippines' Board of Investment and Philippine Economic Zone Authority; the Economic Development Board in Singapore; InvesTaiwan Service Center in Chinese Taipei; Thailand's Board of Investment and the US's SelectUSA.

In exploring the possibility of using the international benchmarks on a voluntary basis as a reference point for peer dialogue and measuring progress, Singapore mentioned that it keeps a lookout for economies which have improved in their rankings and conduct research on these economies especially in the area of business reforms. Chinese Taipei is also exploring the World Investment Report as a reference to adjust or revise their measures of investment policies.

Expected outcomes

The expected outcomes from the specific actions under IFAP Principle 1 are to:

- Ensure all investors are properly informed of the laws, rules and regulations, and related changes pertaining to foreign investment so they can plan and operate projects smoothly
- Increase transparency and accessibility to all foreign investment-related information
- Enhance predictability and security for foreign investors
- Enhance international credibility of the host economy
- Maximize return-on-investment for investors

Information from Secondary Sources

1. World Bank's Doing Business indicators

The Doing Business (DB) indicators could be used to describe the progress of IFAP implementation for many of the actions under the IFAP principles. The DB reports assess regulations affecting domestic firms in 183 economies and ranks those economies in 10 areas of business regulation: starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting investors, paying taxes, trading across borders, enforcing contracts, and resolving insolvency.

Using the latest measure from the DB 2013 report which is called the 'Distance to Frontier'², shows how APEC's simple average for the new measure has shown consistent improvements

² This new measure shows the distance of each economy to the "frontier," which represents the highest performance observed on each of the indicators across all economies included in Doing Business since each indicator was included in Doing Business. An economy's distance to frontier is indicated on a scale from 0 to 100, where 0 represents the lowest performance and 100 the frontier. For example, a score of 75 in DB 2012 means an economy

since 2005 to 2012, from 68.17 to 72.59. It shows that APEC as a whole is making significant progress and the gaps between member economies are narrowing as shown by the declining standard deviation values from the individual economies' figures.

Figure 1 APEC's progress in Doing Business Indicators, using the 'Distance to Frontier' measure, 2005-2012

Source: Own calculation from World Bank data (2013).

2. UNCTAD's World Investment Report (WIR)

The World Investment Report (WIR) focuses on trends in foreign direct investment (FDI) at the world, regional and economy-specific levels and looks at emerging measures to improve its contribution to development. The Report contains analysis of the trends in FDI during the previous year, with special emphasis on the development implications; a ranking of the largest transnational corporations in the world; in-depth analysis of a selected topic related to FDI; and policy analysis and recommendations.

The FDI Attraction and Potential Indices in the WIR are examples of two indicators that provide information relevant to implementation progress of the specific IFAP actions. The Inward FDI Attraction Index creates a rank of all economies by using an average of the FDI they receive in absolute terms and relative to their economic size. For example, the WIR 2012 looks at FDI flows over the 2009–2011 periods. The Inward FDI Potential Index captures four key economic

was 25 percentage points away from the frontier constructed from the best performances across all economies and across time. A score of 80 in DB 2013 would indicate the economy is improving. In this way the distance to frontier measure complements the yearly ease of doing business ranking, which compares economies with one another at a point in time. More information about the measurement is available at: <http://www.doingbusiness.org/~media/GIAWB/Doing%20Business/Documents/Annual-Reports/English/DB13-Chapters/Ease-of-doing-business-and-distance-to-frontier.pdf>

determinants of the attractiveness of an economy for foreign direct investors: the attractiveness of the market (for market-seeking FDI), the availability of low-cost labor and skills (to capture efficiency-seeking FDI), the presence of natural resources (resource-seeking FDI), and the presence of FDI-enabling infrastructure. Economies can be ranked according to their attractiveness for FDI on each of these broad determinants using a range of proxy indicators. The index includes only economic determinants and indicators in order to facilitate its use as a tool for measuring policy effectiveness.

To illustrate, Figure 2 compares the performance of economies in attracting FDI over the past three years, captured by the FDI Attraction Index, with the FDI Potential Index. As shown in Figure 2, sixteen of the twenty one APEC economies are in the top 25 percentage of the rankings for the FDI Potential Index. Of those APEC economies, fourteen economies scored highly on the FDI Attraction Index.

Figure 2 Attraction of FDI vs FDI Potential Index Matrix, 2011 (Quartiles)

		Above expectations	In line with expectations	Below expectations	
FDI Attraction Index	High	Chad, Liberia, Madagascar, Niger	Albania, Bahamas, Congo, Congo (Democratic Republic of), Equatorial Guinea, Jordan, Lebanon, Luxembourg, Mongolia, Mozambique, Zambia	Bulgaria, Ghana, Ireland, Israel, Nigeria, Norway, Panama, Turkmenistan, Uruguay	Australia, Belarus, Belgium, Brazil, Chile, China, Colombia, Hong Kong (China), Kazakhstan, Malaysia, Peru, Poland, Russian Federation, Saudi Arabia, Singapore, Switzerland, Ukraine, United Kingdom, Viet Nam

3. UNCTAD's World Investment Prospects Survey

UNCTAD conducts an annual survey of a sample of company executives selected among the largest non-financial transnational corporations (TNCs), which complements its analysis of FDI trends in its annual World Investment Reports. The survey, published as World Investment Prospects Survey (WIPS), aims at providing insights into FDI patterns over the subsequent three years. Rather than providing a quantitative projection, it offers an assessment of respondents' views at the time the survey was undertaken.

For example, the top fifteen most attractive economies for the location of FDI for the periods 2009-2011 are presented in Figure 3. Despite some common factors, such as market growth and size, other location determinants differ quite significantly by economy. The most favorable location factors for the 15 most attractive economies for FDI (based on the responses to WIPS) are as follows:

- For market growth, developing and transition economies are generally favored, such as China, the Russian Federation, Indonesia, Viet Nam, and Thailand
- For market size, the largest economies are favored including developed economies such as the United States and Canada or emerging markets such as China and the Russian Federation
- For access to regional markets, economies that are integrated into large markets, or which are close to large and growing economies, are favored, such as Mexico and Viet Nam
- For presence of suppliers, mostly developed economies are favored, such as the United Kingdom, Germany and France, and, to a slightly lesser extent, some developing economies such as India
- For their business environment (including government effectiveness, stability and quality of infrastructures), developed economies such as the United States and Australia are favored
- For skills and talent, developed economies such as the United States are favored, but also some developing economies, such as Thailand within the APEC region
- Cheap labor is cited for favoring developing economies, mostly in Asia and including China, Viet Nam, Indonesia and Thailand
- For access to natural resources, economies with rich resource endowments such as Canada, Australia and Indonesia are favored
- Access to capital markets is frequently mentioned as an asset for the United States and Canada as their deep, well-functioning financial systems allow easier access to credit
- Incentives are frequently mentioned for Australia and Viet Nam

**Figure 3 The 15 most attractive economies for the location of FDI 2009-2011
(Percent of responses)**

Source: UNCTAD (2009).

Note: This percentage is calculated as the number of times the economy was mentioned, divided by the number of the responding companies. Figures may add up to more than 100% due to the possible multiple responses. Number into brackets indicate last year's ranking

IFAP Principle 2**Enhance stability of investment environment, security of property and protection of investment****Table 2 Principle 2 Actions**

Specific actions	Economies Reporting Implementation of Specific Actions
Establish timely, secure and effective systems of ownership registration and / or property use rights for land and other forms of property.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Malaysia; Peru; Philippines; Russia; Singapore; Chinese Taipei; Thailand; Viet Nam
Create and maintain an effective register of public or state owned property.	Chile; Hong Kong, China; Indonesia; Japan; Malaysia; Peru; Singapore; Chinese Taipei; Thailand; United States
Ensure costs associated with land transactions are kept to a minimum including by fostering competition.	Hong Kong, China; Indonesia; Japan; Singapore; Chinese Taipei; United States
Foster the dissemination of accurate market reputation information including creditworthiness and reliability.	Hong Kong, China; Indonesia; Singapore; United States
Explore the possibility of using the World Bank <i>Doing Business</i> indicator “Enforcing Contracts” as the basis for peer dialogue and benchmarking and measuring progress across APEC.	Chile; Peru; United States
Encourage or establish effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions, such as judicial, arbitral or administrative tribunals or procedures.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Russia; Singapore; Chinese Taipei; United States; Viet Nam
Encourage and facilitate the use of arbitration and other means of alternative dispute resolution for the settlement of international commercial disputes between private parties.	Chile; China; Hong Kong, China; Indonesia; Malaysia; Philippines; Singapore; Chinese Taipei; United States; Viet Nam
Facilitate commercial dispute resolution for foreign investors by providing reasonable cost complaint-handling facilities, such as complaint service centres, and effective problem-solving mechanisms.	China; Hong Kong, China; Korea; Peru; Russia; Singapore; Chinese Taipei; United States; Viet Nam
Take steps to accede to an arbitral convention.	Chile; China; Hong Kong, China;

	Japan; Malaysia; Peru; Philippines; Singapore; United States; Viet Nam;
--	---

Summary

Economies have, in general, a system of ownership registration in place. Most provide examples in terms of land registration and ownership. More details are necessary in order to see whether the system in place is actually timely, secure and effective.

Examples of effective public property registers along with their online reporting systems include Singapore Land Authority's State Property Information Online and the United States' Bureau of Land Management and General Services Administration. Hong Kong, China reported that the market force of competition has continued to push down conveyancing fees and their Land Registry costs are minimal. Japan mentioned its Land General Information System, implemented in April 2006, which provides investors a fair, competitive land price. In respect of the transparency with land transactions, Chinese Taipei has established the website: http://www.moi.gov.tw/chi/chi_house/house.aspx

On the fostering the dissemination of accurate market reputation information including creditworthiness and reliability, United States mentioned that it has a robust private market for credit rating agencies and consumer reporting agencies, as well as laws in place that promote the accuracy of market information and the development of a broad array of tools for weighing creditworthiness and reliability. BKPM's website publicly displays Indonesia's credit rating by Fitch, S&P, and Moody's.

Chile and Peru (through the Competitiveness Council of the Ministry of Economy and Finance) and the United States have reported action under "Explore the possibility of using the World Bank Doing Business indicator "Enforcing Contracts" as the basis for peer dialogue and benchmarking and measuring progress across APEC".

Economies, in general, also have established effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions. Russia and Korea cited the example of having Ombudsman in place to mediate disputes, while Peru mentioned that it has established a Special Commission that is responsible for addressing plaintiffs' concerns. The Philippines' Office for Alternative Dispute Resolution aims to develop and expand the use of Alternative Dispute Resolution in the private and public sector through means such as arbitration, mediation, conciliation, early neutral evaluation, mini-trial, or a combination thereof.

Related with the use of arbitration, Malaysia provided the example of the Investment Guarantee Agreements (IGAs) which include provisions for investor-state dispute settlement through arbitration using the International Centre for Settlement of Investment Disputes (ICSID), United Nations Commission on International Trade Law (UNCITRAL), Kuala Lumpur Regional Centre for Arbitration (KLRCA) and other fora. The Hong Kong International Arbitration Centre provides services and facilities in dispute resolution mechanisms including arbitration and mediation (<http://www.hkiac.org/>); in addition the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards is also application to Hong Kong, China. Indonesia's National Board of Arbitration (BANI) provides a range of services in arbitration, mediation,

binding opinion and other forms of dispute resolution. Singapore has established the Singapore International Arbitration Centre (www.siac.org.sg) and the Singapore Mediation Centre (www.mediation.com.sg) to support alternative dispute resolution.

Related with complaint-handling facilities, Peru provided the example of National Agency for the Defense of Competition and Protection of Intellectual Property – INDECOPI. It is the competent body in case foreign investors lodge a claim for actions that affect the right participation of economic agents in the market. Investors can attend public INDECOPI hearings on market access issues to ensure transparency is included in the process. It also considers distortions in competition between suppliers of goods and services, distortions in accessing or leaving the market, actions against the respect of intellectual property rights, copyrights and patent rights.

Russia cited the example of the Foreign Investment Advisory Council (FIAC). FIAC has two main work streams: (1) assistance in resolving specific issues encountered by foreign investors in their relations with federal executive bodies and executive bodies of constituent entities of the Russian Federation; (2) expert support of priorities in work of the government, including the regulatory and legal framework.

The United States provided an example of the SelectUSA program, which encourages and facilitates foreign investment in the United States by, among other things, serving as an ombudsman to facilitate the resolution of issues involving federal programs or activities related to pending investments (<http://selectusa.commerce.gov/>).

On complying with arbitral convention, Peru mentioned that it has ratified the Convention of the Settlement of Investment Disputes between the States and Nationals of other States (ICSID) (September 8, 1993), the Inter-American Convention on International Commercial Arbitration, signed in Panama in 1975 (June 21, 1989), and the 1958 New York Convention on Recognition and Enforcement of Foreign Arbitral Awards (October 5, 1988).

Viet Nam is currently studying accession to the Washington Convention to help settle investment disputes between the state and foreign entities.

Expected outcomes

The economies have provided the following expected outcomes for implementing this principle:

- To make investors feel secure that their investments will be protected in the host economy
- To enhance security and predictability
- To reduce the time taken to obtain building permission; to improve the business environment; and to assist investors in resolving any particular problems

Information from Secondary Sources

The recent APEC Best Practices Guidebook³ which promotes capacity-building to help ensure appropriate and prompt consideration of investors' complaints to improve the investment climate within APEC, provides the following practices on (pre-court) dispute resolution mechanisms:

Table 3 Practices on dispute resolution mechanisms of some APEC economies

Economy	Practices
Chile (through the FIC-Foreign Investment Committee)	<p>Consultations:</p> <ol style="list-style-type: none"> 1. The Complaint can be received through different means; <ul style="list-style-type: none"> - Direct contact with FIC; - Through diplomatic channels, where contact is made through the Chilean Embassy or its Ambassador to the Economy of which the Investor is resident, who will then inform FIC. 2. Once the complaint is filed, FIC will proceed to contact the investor who filed the complaint and seek an alternative and amicable solution to the problem.
China (using the Administrative Reconsideration Law of the PRC, 1999)	<p>Filing a complaint:</p> <p>Any citizen, legal person or any other organization, who considers that a specific administrative act has infringed upon his or its lawful rights and interests may file an application for administrative reconsideration within 60 days from the day when he or it knows the specific administrative act, except that the time limit prescribed in laws, exceeds 60 days.</p>
Hong Kong, China	<p>Arbitration Process: The new Arbitration Ordinance came into operation on 1 June 2011, establishing a unitary regime for arbitration which is based on the UNCITRAL Model Law on International Commercial Arbitration (Model Law) adopted by the UNCITRAL.</p> <p>Mediation Process: The Mediation Bill was gazetted on 18 November 2011 and is expected to be enacted within 2012⁴. The purpose of the Bill is to provide a regulatory framework for the conduct of mediation and to address some areas in which the law is uncertain, such as confidentiality and admissibility of mediation communication in evidence.</p>

⁴ Latest update: The Mediation Bill was enacted in June 2012.

<p>the “Improvement of the Business Environment” Chapter/Article under the EPAs/BITs.</p>	<p>1. A liaison office is designated to transmit to the relevant authorities complaints, inquiries, and requests submitted by enterprises. The liaison office also forwards responses from the relevant authorities to the enterprises and provides the enterprises with necessary information and advice.</p> <p>2. Business representatives are invited, when necessary, to the (Sub-) Committee for discussion on a more favorable business environment.</p> <p>Encourages the Governments to address the issues:</p> <p>3. Based on findings regarding the business environment reported by the liaison office, the (Sub-) Committee, composed of representatives of both Governments and private sector, discusses the issues and makes recommendations for measures to be taken by the Governments.</p> <p>4. Responding to recommendations from the (Sub-) Committee, the Governments address the issues facing business enterprises.</p>
<p>Korea (using the Foreign Investment Promotion Act)</p>	<p>Foreign investor filing a grievance: A foreign investor may file a complaint via email, phone, fax, SNS etc. or by requesting a visit of Home Doctors, or the Foreign Investment Ombudsman’s civilian consultants, to the workplace. The investor also may file a grievance through the American Chamber of Commerce in Korea, the European Union Chamber of Commerce in Korea or other relevant organizations.</p> <p>Home Doctor’s review and investigation on the reported complaint: When a grievance is filed, a Home Doctor is assigned to the case to review and investigate the problem.</p> <p>Grievance resolution: After investigation of the case, the Home Doctor settles the issue in cooperation with relevant government agencies by providing legal consulting services, etc. If the revision of regulations is necessary or administrative actions need to be taken, the Home Doctor gives the authority recommendations based on his expert opinion and the Ombudsman’s final review.</p> <p>Report on the results: The Home Doctor reports the results to the Ombudsman and the foreign investor.</p>
<p>Mexico</p>	<p>First, the mechanism is based on spreading the knowledge at the different levels of government (including the municipalities) on international rules and Mexico’s Free Trade Agreements and Bilateral Investment Treaties, particularly on the investment disciplines.</p> <p>During the second phase the federal government proposes an Agreement of formal cooperation in order to exchange information on the current legal framework that municipalities are implementing and their consistency with international commitments.</p> <p>Additionally, the investment promotion agency, ProMexico, has an alternative mechanism for resolving issues previous to the presentation of the “notice”, which is based also on a series of meetings with high level authorities when the State or the Municipalities are involved in a problem with an established or potential investor in order to identify possible solutions through good offices and constructive discussions.</p>
<p>Russia (through the Russian Government Order No. 1298-r of 2 August 2010)</p>	<p>Filing a complaint</p> <ol style="list-style-type: none"> 1. An investor sends a complaint by any means convenient; 2. The complaint is registered and filed; 3. Investor is given access to the status of complaint; 4. An official responsible for problem resolution is determined.

<p>(Federal level) and The President's directive, 2011 (Regional level)</p>	<p>Initial evaluation</p> <ol style="list-style-type: none"> 1. Official makes a preliminary expertise of the communicated problem (including determination of the fact of investor's rights violation) 2. Official determines the type of the problem from a list: customs regulation, immigration regulation, administrative barriers, exceeding of authority by public officials, shortcoming of the Russian legislation, taxation, trade activities regulation, property rights protection, discrimination of companies; 3. The official defines the interested agencies; 4. The official requests additional information from all pertaining government agencies; (The results are presented to the regional ombudsman within one day) <p>Resolving the problem</p> <ol style="list-style-type: none"> 1. The official formulates a plan of action, with stages and deadlines, if necessary a Work Group is created; 2. If the problem is caused by the legislation shortcoming, the ombudsman office prepares the proposals on the legislative changes; 3. If the problem exceeds regional level, the official is entitled to engage the federal level, such as department of investment policy and development of public-private partnerships. <p>Report the results</p> <ol style="list-style-type: none"> 1. The results are sent to the investor; 2. The investor submits a statement as to the effect of being satisfied with the decision; 3. Ministry of Economic Development of the Russian Federation assesses the measures undertaken; 4. Regional ombudsman present their reports on the work accomplished at regular periods.
<p>Singapore (using the Singapore Mediation Centre)</p>	<p>Request for Mediation: The parties contact the SMC to make the initial request. There is no formality for this request. SMC can also assist a party to contact the other parties in the dispute.</p> <p>Agreement to Mediate: When all parties agree to mediate their dispute, SMC prepares the Mediation Agreement to be signed, designates a date, time and place for mediation, appoints a mediator and attends to all other administrative matters.</p> <p>Mediation Process: The mediator will help facilitate a conversation between parties to guide parties through a problem-solving process. The lawyers of the parties will attend to play an important role of assisting the mediator and advising the parties throughout the settlement process. More than 90% of cases that settle are concluded within a day and SMC's overall settlement rate for mediations is 75%.</p> <p>End of Mediation: The parties usually reduce the terms of their settlement into writing with the assistance of their lawyers at the end of the mediation. This is a binding contract between parties.</p>
<p>Chinese Taipei (through the Coordination Office for Investment Promotion – COIP)</p>	<ol style="list-style-type: none"> 1. In a case where the obstacles encountered by major investment projects cannot be solved by the Investment authority, it may be transferred to the General Affairs Division of COIP for further coordination. If the nature of the case is beyond the sole jurisdiction of the General Affairs Division, the Division will coordinate with such other Divisions as Water and Electricity, Environmental Protection and Conservation, Transportation, and Land Acquisition for resolution. Those cases that need further coordination will be submitted to the COIP Director to convene a "COIP Meeting" or to the Minister, depending on the extent and nature of the

	<p>problem.</p> <p>2. Those cases that have been submitted directly to the COIP, without first submitted to the Investment authority for handling, will being relayed to the agencies concerned. A notification will be sent to the applicant. COIP will convene a meeting if a case calls for coordination.</p> <p>3. Ad hoc committees will be convened to decide on important cases that relate to policy making or coordination among ministerial agencies.</p> <p>4. COIP will provide consulting assistance to enterprises regarding questions on investment related administrative laws and regulations. It may also refer the inquiries to the agencies concerned.</p>
<p>United States (using the The President's Executive Order 13577— “Establishment of the SelectUSA Initiative,” June 15, 2011)</p>	<p>1. An investor shares the complaint by any means convenient. A SelectUSA staff member promptly interacts with the investor to further understand the nature of the complaint and its potential impact on investment, and advises the investor of next steps.</p> <p>2. SelectUSA staff works with the relevant Federal bureau/ agency to understand the case and advises the investor of its findings. If needed, SelectUSA may determine additional follow-up steps (e.g., facilitating a meeting between the investor and the relevant agency).</p> <p>SelectUSA does not have the authority to mandate a particular outcome from a Federal agency. The purpose of SelectUSA's ombudsman function is to help facilitate an investment project through the Federal regulatory process.</p>

Issues on registering property are also one of the topics covered under the World Bank's Ease of Doing Business report. The World Bank noted that property owners with registered titles are more likely to invest since they have better access to credit when using their property as collateral. Land registration would also benefit the government for assessing and collecting tax revenue and would also be useful for city or regional planning purposes.

The World Bank's DB 2012 report provided the following Good Practices in making it easy to register property:

Table 4 Good Practices around the world in making it easy to register property

Practice	Economies	Examples
Using an electronic database for encumbrances	108	Jamaica; Sweden; United Kingdom
Setting effective time limits for registration	54	Botswana; Guatemala; Indonesia
Offering cadastre information online	50	Denmark; Lithuania; Malaysia
Offering expedited procedures	16	Azerbaijan; Bulgaria; Georgia
Setting fixed transfer fees	15	New Zealand; Russian Federation; Rwanda

Source: Doing Business Database, DB 2012 report.

Note: Among 183 economies surveyed.

Russia was cited in the DB 2012 report as one of the economies that has made registering property easier in 2010/11 through combined or reduced procedures. Malaysia was cited in the DB 2013 report as it has implemented a new caseload management system in the land office, enabling clerks to process property transfer applications 34 days faster.

The 2010 edition of APEC's Guide to Investment Regimes has information on 18 APEC economies and includes a section titled 'Mechanism to review decisions and settle disputes' that describes the available procedures and mechanism (including arbitration processes) to settle disputes. In general, foreign investors have access to the same courts and tribunals as domestic investors and are also able to access a range of alternative dispute resolution mechanisms, such as international arbitration through the International Centre for Settlement of Investment Disputes (ICSID).

Some of the actions under this principle are similar with the OECD Investment Policy Reviews questions, in which the following information is extracted for APEC economies:

- **Viet Nam:** "Changes to management of land accessible by foreign investors have been made available by the government by empowering provincial authorities to make land allocations and leases. In respect of businesses, the law rules that all enterprises are equal in the use of land". (OECD 2010: 47). Viet Nam has also established an International Arbitration Centre in Ho Chi Minh City (OECD 2010: 51). Viet Nam has signed and acceded to various investment-related bilateral and multilateral agreements, including bilateral agreements on investment facilitation and protection, with 55 economies and regions, agreements on avoidance of double taxation with 46 economies and regions, the ASEAN Framework Agreement on Investment (AIA), MIGA and the New York Convention (OECD 2010: 54). Under the 2005 Investment Law, Viet Nam allows foreign investors to use foreign arbitration or use and apply foreign laws as specified by the relevant Vietnamese laws (OECD 2010: 55).
- **Indonesia:** "If a dispute arises between the government and the investor, the Investment Law (25/2007) provides for a dispute settlement mechanism in Article 32, including mutual understanding through discussion (*musyawarah*) and arbitration (with the consent of both parties). The government has also ratified several conventions concerning alternative dispute resolution mechanisms, such as the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958) and the Convention on the Settlement of Investment Dispute between States and Nationals of other States (1965)... BANI is Indonesia's permanent court of arbitration. It provides a range of services covering arbitration, mediation, binding opinion and other forms of dispute resolution. The process is expedited by the absence of appeals or the possibility of the ruling being overturned by a higher court. BANI has developed its own rules and procedures for both domestic and international arbitration taking place in Indonesia, although other rules chosen by the parties (such as UNCITRAL Arbitration Rules) may also be applied." (OECD 2010: 73)

The latest 2011 Infrascopie report commissioned by the ADB assesses the capacity of economies in the Asia-Pacific region to carry out sustainable PPP. The report notes the value of a solid legal and regulatory framework including an assessment on dispute-resolution mechanisms. The report noted that: "There are a number of challenges associated with dispute-resolution in the courts that are more pronounced in developing economies—delays, concerns over judicial independence and issues of capacity related to complex, technical cases. These lead to a wide range of mechanisms being deployed such Alternative Dispute Resolution (ADR) which includes conciliation, renegotiation and arbitration..." (EIU&ADB 2011: 14)

IFAP Principle 3**Enhance predictability and consistency in investment-related policies****Table 5 Principle 3 Actions**

Specific actions	Economies Reporting Implementation of Specific Actions
Increase use of legislative simplification and restatement of laws to enhance clarity and identify and eliminate inconsistency.	Australia; Hong Kong, China ⁵ ; Korea; Malaysia; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Reduce the scope for discriminatory bureaucratic discretion in interpreting investment-related regulations	Australia; China; Hong Kong, China; Indonesia; Japan; Malaysia; Philippines; Singapore; Chinese Taipei; Thailand; United States
Maintain clear demarcation of agency responsibilities where an economy has more than one agency screening or authorizing investment proposals or where an agency has regulatory and commercial functions	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Malaysia; Philippines; Chinese Taipei; Thailand; United States
Establish and disseminate widely clear definitions of criteria for the assessment of investment proposals	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Malaysia; Philippines; Chinese Taipei; Thailand

⁵ To enhance clarity and transparency, all primary and subsidiary legislation are published and available on the internet and decisions of the courts in Hong Kong, China, are generally published and made publicly available. Judgments of the Court of Final Appeal, the High Court and so on which are of significance as legal precedents on points of law, practice and procedure of the courts and of public interest are available on the internet. The specific action on restatement of laws, however, is not applicable in Hong Kong, China.

Establish accessible and effective administrative decision appeal mechanisms including, where appropriate, impartial “fast-track” review procedures.	Australia; Chile; China; Hong Kong, China; Japan; Malaysia; Chinese Taipei; United States; Viet Nam
--	---

Summary

Some of these actions were implemented through revisions of economies’ Foreign Investment Promotion Acts. The investment promotion agencies of most reporting economies implement actions related to IFAP Principle 3 while according most foreign investors ‘national treatment’⁶ as specified by the WTO.

For example; Hong Kong, China maintains that equal treatment will be given to all applications so long as any relevant statutory requirements are in compliance. Peru’s constitution stipulates that domestic and foreign investors are subject to the same conditions. The Board of Investment of Thailand provides equal treatment to all investors. The United States is party to over 50 BITs and FTAs and uses ‘national treatment’ as the principle for their international investment regime. The United States also does not screen or otherwise require authorization for foreign investment.

In keeping with providing equal treatment for all investors, Singapore currently has 40 IGAs and 14 FTAs with Investment Chapters in force. These treaties contain provisions provided non-discriminatory protection for investors.

Expected outcomes

Based on the information submitted by the reporting economies, the expected outcomes from the specific actions under IFAP Principle 3 are to enhance predictability, consistency, accountability and transparency so as to promote private domestic and foreign investment.

Information from Secondary Sources

The OECD has created an FDI Regulatory Restrictiveness Index⁷ to document the extent to which economies restrict market access in three major areas: limitations on foreign ownership, screening or notification procedures, and management and operational restrictions. Their intent is to determine if regulatory restrictions keep economies from meeting ‘national treatment’ guidelines. The index monitors performance in the areas of business services, telecommunications, construction, distribution, finance, hotels and restaurants, transportation, electricity, and manufacturing. APEC member economies who are members of the OECD have received index scores on their openness to foreign investment on a scale from 0 (completely open to FDI) to 1 (closed to international competition.) This framework could be extended to non-OECD economies within the APEC region as a way to benchmark a member economy’s progress toward low-cost, transparent investment policies.

⁶ ‘National treatment’ is a principle in international law which essentially means treating foreigners and locals equally.

⁷ See <http://www.oecd.org/investment/fdiindex.htm>

The Foreign Direct Investment Confidence Index⁸ is a regular survey of global executives conducted since 1998 by A.T. Kearney, a consultancy. The Index provides a unique look at the present and future prospects for international investment flows by assessing the impact of political, economic, and regulatory changes on the FDI intentions and preferences of global MNC leaders. Companies participating in the survey account for more than \$2 trillion in annual global revenue.

The 2012 survey examines future prospects for FDI flows as the world seeks to recover from the global recession and comes amidst continued economic uncertainty in Europe and the United States. Respondents included thirteen APEC economies among the top 25 best places to invest globally. This survey can act as another tool to determine market sentiment toward a host economy's investment climate.

⁸ See <http://www.atkearney.com/gbpc/foreign-direct-investment-confidence-index> . It should be noted that, as the author of the report mentioned: “while the FDI Confidence Index provides a sense of investor attitudes about the future, it is not designed to reveal specific reasons for the results. The study reflects upon likely causes for upward or downward changes, but the conclusions must be regarded only as considered judgment on the part of A.T. Kearney's Global Business Policy Council”. (Source: http://www.atkearney.com/gbpc/foreign-direct-investment-confidence-index/full-report/-/asset_publisher/PHesJ9DLURrR/content/cautious-investors-feed-a-tentative-recovery/10192)

IFAP Principle 4

Improve the efficiency and effectiveness of investment procedures

Table 6 Principle 4 Actions

Specific actions	Economies Reporting Implementation of Specific Actions
Simplify and streamline application and registration, licensing and taxation procedures and establish a one-stop authority, where appropriate, for the lodgment of papers	Australia; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Russia; Philippines; Singapore; Chinese

⁹ According to the report, if taken separately from China, Hong Kong, China would rank 3rd in the index

	Taipei; Thailand; Viet Nam
Simplify and reduce the number of forms relating to foreign investment and encourage electronic lodgment	Australia; China; Hong Kong, China; Japan; Malaysia; Philippines; Singapore; Chinese Taipei; Thailand; Viet Nam
Shorten the processing time and procedures for investment applications.	Australia; China; Hong Kong, China; Japan; Malaysia; Philippines; Singapore; Chinese Taipei; Viet Nam
Promote use of “silence is consent” rules or no objections within defined time limits to speed up processing times, where appropriate	Australia; Chile; Malaysia; Peru;
Ensure the issuing of licenses, permits and concessions is done at least cost to the investor	China; Hong Kong, China; Japan; Philippines; Singapore; Chinese Taipei; Thailand; United States
Simplify the process for connecting to essential services infrastructure	China; Japan; Russia; Singapore; Chinese Taipei; Thailand
Implement strategies to improve administrative performance at lower levels of government.	China; Indonesia; Korea; Philippines; Viet Nam
Facilitate availability of high standard business services supporting investment	Chile; Hong Kong, China; Japan; Indonesia; Malaysia; Philippines; Singapore; Chinese Taipei; United States

Summary

Economies have reported efforts to streamline application and registration, licensing, and taxation procedures. Chinese Taipei abolished their uniform certification system in 2009, allowing businesses to begin operation immediately after completing registration and reducing delays from the certification process. Malaysia cited the example of MIDA as the coordinating body as well as introducing a ‘fast track’ mechanism. Japan cited the example of IBSC (Invest Japan Business Support Center) and Thailand cited BOI as having established One Start One

Stop systems to facilitate investment by gathering all related investment agencies in one location. Russia reported various tax cuts and incentives.

In reducing number of forms and electronic lodgment, Malaysia provided the example of on-line applications that are available on the MIDA website whereby companies can apply for Manufacturing Licenses, Tax Incentives, Expatriate Posts and Import Duty Exemptions on Machinery and Raw Materials. They have also imposed a two-day turnaround goal for issuing manufacturing licenses.

China further delegated examination and approval authority as below: threshold of foreign investment projects requiring central government approval had been raised to US\$300 million (as total investment including expansion) under ‘encouraged’ & ‘permitted’ category of Catalogue for the Guidance of Foreign Investment Industries. Unless otherwise specified, relevant departments under the State Council may delegate approval authorities to local governments. Establishment of foreign investment enterprises in service sectors (except financial sector and telecommunication services) are examined and approved by local governments according to related regulations. China also further streamlined approvals through wider application of online licensing/administration system. The Regulation on National Security Review Relating to Mergers & Acquisitions by Foreign Investors was promulgated, which provides the transparency on handling such issues. China had allowed foreign investors to invest offshore with Renminbi and provided investment facilitation to reinvestment activities of established investment (holding) companies with foreign investment. Lastly, China revised the Catalogue for The Guidance of Foreign Investment Industries and released on December 24, 2011 and took into effect on January 30, 2012.

For the ‘silence is consent’ rules, Peru cited The Positive Administrative Silence Law issued in 2008 which stipulates that if a public entity has failed to respond to a request within 30 days, such request is considered to be accepted. This law replaced the rule which accorded the absence of reply by the administration within 30 days as a denial. Chile has also implemented ‘silence is consent’ rules to facilitate processing of foreign investment.

The United States ensures that licenses and permits are supplied at the least cost to the investor by making this principle a basis of their pricing model, using tools such as cost-benefit analysis to balance investor needs with public welfare. Common practice is to base fee-levels on the cost to government of processing an application. The United States also does not require prior approval, or maintain any general authorization procedures, for foreign investment; such that several actions under this principle would be inapplicable.

Under the “Simplify the process for connecting to essential services infrastructure” measure, Russia provided an example of the special procedure for connecting small businesses to the power system. Singapore’s Bizfile website allows investors to register with multiple agencies simultaneously, streamlining the start-up and connection process.

Indonesia’s BKPM has made considerable progress toward improving administration at lower levels of government. They have worked with 6 other agencies in establishing 130 one-stop shops throughout the economy that provide a standard, consistent level of service. The Philippines’ Nationwide Streamlining of Business Permits and Licensing Systems Reform creates a unified business registration form for all cities and municipalities, consolidating the

information needed by local and domestic agencies. The Trouble-free Registration with BOI (TURBO) Program simplifies the procedures and “strips down” the existing BOI application forms and requirements, such that number of days in processing the application is reduced from twenty (20) working days to just five (5) days.

For providing high standard business services supporting investment, Malaysia cited MIDA’s efforts in facilitating existing companies in overcoming operational problems faced. In Hong Kong, China; Invest-HK provides information to overseas and mainland companies and investors to facilitate starting or expanding their operations.

Expected Outcomes:

The following are the expected outcomes resulting from implementing Principle 4 of IFAP:

1. To avoid delays in provide administrative formalities by government agencies.
2. To make it easier of doing business for investors.
3. To raise awareness of opportunities for investment within APEC economies, for example in Renewable and Clean Energy sector.
4. To make overall business process easier, faster, cheaper and to enhance predictability and understandability; to improve efficiency of government agencies to serve investors.
5. To build up cooperation with investors, especially foreign ones; to facilitate the procedure for business set-up; to stimulate the renovation of industrial capacities by providing tax incentives.

Information from Secondary Sources

Based on the Doing Business 2012 report, five APEC economies are included in the list of top ten for making it easier to start a business. Some of the good practices that are common among the 10: offering one-stop shops; charging only a fixed registration fee—regardless of company size—that is limited to the administrative cost of providing the registration services; use standard registration forms; require nominal paid-in minimum capital or none at all; assigning unique company identification (ID) numbers and adopting technology to facilitate the delivery of a range of business start-up procedures; review formalities to ensure that they still fulfill their intended purpose.

Some of the actions under this principle are similar with the OECD Investment Policy Reviews questions, in which the following information is extracted for other APEC economies:

- **Viet Nam:** “Provincial government authorities have made a great effort to set-up a “one-stop shop” system. However, every provincial investment promotion agency has tried to implement the procedure in a different way and with different levels of success”. (OECD 2009: 59). The weakest link in the services provided by Viet Nam’s investment promotion agencies is dealing with problems that arise after the Investment Certificates have been granted. (OECD 2009: 60).
- **Indonesia:** Establishing a one-stop integrated services centre (Pelayanan Terpadu Satu Pintu, PTSP) has been on the government’s agenda for several years but has been an uneven process across Indonesia’s 524 autonomous regions... As a follow-up in 2009, the government instructed government departments and institutions to delegate their

authority to the Chairman of BKPM, or the head of a respective regional body responsible for investment. As of March 2010, 15 Ministers had delegated their licensing authority to the Chairman of BKPM, and two Ministers have placed their officials in BKPM to implement the PTSP. . (OECD 2009: 92-93)

IFAP Principle 5

Build Constructive Stakeholder Relationships

Table 7 Principle 5 Actions

Specific actions	Economies Reporting Implementation of Specific Actions
To the extent possible, establish a mechanism to provide interested parties (including business community) with opportunity to comment on proposed new laws, regulations and policies or changes to existing ones prior to their implementation.	Australia; China; Hong Kong, China; Indonesia; Japan; Malaysia; Philippines; Russia; Singapore; Chinese Taipei; Thailand; United States; Viet Nam
Continue to share APEC member economies' experiences of successful stakeholder consultative mechanisms.	Australia; China; Hong Kong, China; Japan; Russia; Singapore; United States
Promote the role of policy advocacy within IPAs as a means of addressing the specific investment problems raised by investors including those faced by SMEs.	Australia; China; Hong Kong, China; Indonesia; Malaysia; Philippines; Russia; Singapore; Chinese Taipei; United States; Viet Nam
Continue to share APEC member economies' experiences of successful public private dialogue to take advantage of the information on successes and problems encountered by established investors.	Chile; China; Hong Kong, China; Indonesia; Japan; Peru; Singapore; United States
Promote backward investment linkages between businesses, especially between foreign affiliates and local enterprises including through the promotion of industry clusters.	Chile; Indonesia; Philippines; Japan; United States
Encourage high standards of corporate governance through cooperation aimed at promoting international concepts and principles for business conduct, such as APEC's programs on corporate governance and anti-corruption.	Hong Kong, China; Indonesia; Japan; Korea; Peru; Singapore; Chinese Taipei; United States
Examine and share APEC member economies' experience with responsible business conduct instruments.	Hong Kong, China; Japan; Peru; Singapore

Summary

Most reporting economies have taken steps toward building constructive stakeholder relationships both as a means of direct policy action and to further integrate relations between the public and private sectors.

Malaysia convenes the Ministry of International Trade and Industry's Annual Dialogue which brings together private sector representatives with government officials to add their input to the policy making process.

The Philippines promotes openness and transparency by inviting the public to participate in the hearings on proposed laws, rules, and regulations or changes thereto and by encouraging them to submit position papers to effectively articulate their concerns. Both Peru and Australia have embraced the OECD Guidelines for Multinational Enterprises, following international best practices in the public/private realm.

Russia has turned private sector recommendations into public policy by simplifying the process of hiring skilled expatriate workers, improving customs administration, and implementing their Developing Financial Markets strategy to open securities markets to foreign firms and facilitating access between foreign issuers and Russian investors.

Singapore works closely with APEC and encourages agencies to share their experiences of successful stakeholder engagement.

The United States is also heavily involved in APEC activities, hosting many public private dialogues including the inaugural APEC Public-Private Dialogue on Investment in 2011.

Hong Kong, China cited the Hong Kong Ethics Development Centre as one of its agencies involved in encouraging high standards of corporate governance by promoting business and professional ethics as the first line of defense against corruption.

Indonesia has continued to update their Code on Good Corporate Governance since inception in 1999, encouraging the spread of sound corporate governance practices throughout the economy.

Japan has a Public Comment System to garner opinions from public and also convenes a public private dialogue, when necessary, to add their input to the policy making process.

Thailand holds seminars where private sector actors are able to share their experiences and ideas with policy makers.

Chile promotes backward investment linkages between foreign investors and domestic firms, encouraging technological spillovers and productivity growth as domestic firms learn from multinationals.

Information from secondary sources

Many domestic and international bodies cite the importance of public-private partnerships in general and specifically the collaboration between the business community and government actors in the area of economic regulation. A particular World Bank study titled “Competitiveness Partnerships – Building and Maintaining Public-Private Dialogue” by

Benjamin Herberg and Andrew Wright, 2005 examines the outcomes experienced by 40 nations and recommends best practices for future collaboration. In their report, they cite several reporting economies and highlight their successful government-business relationships.

In **Malaysia**, the internationally-acclaimed Penang Skills Development Center (PSDC) arose from collaboration between government, industry and academia; industry provides most of the funding for the center through a membership scheme.

Regional approaches can often profitably be combined with an industry cluster approach; the U.S. Agency for International Development (USAID) in particular has focused on promoting dialogue in regional industry clusters, with considerable success. The high-value agriculture sector in Western **Thailand** has seen dialogue lead to the adoption of rules on “Good Agricultural Practices”

IFAP Principle 6

Utilize new technology to improve investment environments

Table 8 Principle 6 Actions

Specific actions	Economies Reporting Implementation of Specific Actions
Promote the introduction and use of new technologies aimed at making the investment process simpler and faster	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Malaysia; Philippines; Russia; Singapore; Chinese Taipei; Thailand; Viet Nam
Maintain adequate and effective protection of technology and related intellectual property rights	Chile; China; Hong Kong, China; Indonesia; Japan; Philippines; Russia; Singapore; Chinese Taipei; United States; Viet Nam
Where possible, give effect to international norms for property protection	Hong Kong, China; Japan; Malaysia; Singapore; Chinese Taipei; United States

Summary

Most reporting economies noted how their adoption of new technology had improved the investment climate.

Australia; Chile; Hong Kong, China; Japan; Malaysia and Thailand have all moved applications online, facilitating foreign investment.

New processes have been implemented which greatly simplify international direct investment. The Philippine Business Registry allows investors to access an online 'one-stop shop' which links various agencies' computer systems into one portal, eliminating the need to physically register documents at each government office and reducing business registration from two weeks to 30 minutes.

Chile; Hong Kong, China; Indonesia; Japan; Philippines; Russia; Singapore; Chinese Taipei; United States and Viet Nam all shown a commitment to implement intellectual property protection. For example, Hong Kong, China has shown this commitment through, among others, adhering to major international intellectual property treaties including the Paris Convention, Berne Convention, Patents Cooperation Treaty, Phonograms Convention and the WTO TRIPS Agreement.

Russia reduced administrative barriers for business registry by creating an online communication connection between agencies and the registering firm and developed an exhaustive list of regulations needed to register a business.

Malaysia implemented the BLESS system for approving applications which reduces processing time.

Following international guidelines for the protection of intellectual property is also important for securing international investment. Peru adheres to the Paris Convention for the Protection of Industrial Property and the Inter-American Convention for the Protection of Trademarks and Commerce.

The Philippines has created an Intellectual Property Office to ensure the effective use of the intellectual property system in the economy.

The United States has fully implemented the WTO TRIPS Agreement obligations, as well as following the Berne Convention on copyright protection.

IFAP Principle 7

Establish monitoring and review mechanisms for investment policies

Table 9 Principle 7 Actions

Specific actions	Economies Reporting Implementation of Specific Actions
Conduct periodic reviews of investment procedures ensuring they are simple, transparent and at lowest possible cost	Australia; Chile; China; Indonesia; Japan; Malaysia; Philippines; Russia; Singapore; Chinese Taipei; Thailand; Viet Nam

Summary

Reporting member economies showed a commitment to maintaining up-to-date investment policies through continuous monitoring.

Australia, Japan, Malaysia, Chinese Taipei, and Singapore review their policy framework to ensure the lowest possible costs to investing firms.

Chile monitors the implementation of their Foreign Investment Statute so that rules are properly and uniformly applied.

The Philippines reviews the Foreign Investment Negative List (FINL) every two years and/or as the need arises. Further, the Philippines' Board of Investment (BOI) annually formulates the Investment Priorities Plan (IPP) to identify the economy's priority investment areas. Thailand's Bureau of Investment provides free, current information on the commercial environment to potential investors.

Russia is currently developing a set of criteria and indicators to assess the effectiveness of institutional actions on encouraging foreign investment.

Information from secondary sources

UNCTAD provides a list of potential indicators to measure investment policy effectiveness in its World Investment Report 2012. These indicators can be used to measure a variety of potential impact areas including economic value added, job creation and sustainable development. This listing provides economies with the opportunity to determine their own economy-wide goals, how international investment can best assist in the attainment of those goals, and benchmark their progress toward liberalizing and welcoming foreign investment.

IFAP Principle 8

Enhance international cooperation

Table 10 Principle 8 Actions

Specific actions	Economies Reporting Implementation of Specific Actions
To the best extent possible, accede to, or observe, multilateral and/or regional investment promotion and facilitation conventions.	Australia; Chile; China; Hong Kong, China; Indonesia; Japan; Korea; Malaysia; Peru; Philippines; Russia; Singapore; Thailand; United States; Viet Nam
Make use, where appropriate, of international and regional initiatives aimed at building investment facilitation and promotion expertise, such as those offered by the World Bank, UNCTAD and OECD.	China; Hong Kong, China; Indonesia; Japan; Malaysia; Peru; Philippines; Singapore; Viet Nam
Ensure measures exist to ensure effective compliance with	Chile; Hong Kong, China;

commitments under international investment agreements.	Japan; Korea; Philippines; Singapore; Chinese Taipei; United States
Review existing international agreements and treaties to ensure their provisions continue to create a more attractive environment for investment.	China; Hong Kong, China; Japan; Malaysia; Philippines; Singapore; Chinese Taipei; United States; Viet Nam

Summary

Economies volunteering IFAP submissions report extensive international cooperation.

Korea, Indonesia, and Australia are members of multiple international organizations focused on trade and investment liberalization.

Chile's Competition Tribunal and its National Economic Prosecutor Office participate in international forums that address competition policy issues to enhance cooperation across agencies and implement best international practices.

In Hong Kong, China efforts are being made by relevant bureaus/departments to ensure that any measures that they introduce would not be in conflict with Hong Kong, China's international obligations under Investment Promotion and Protection Agreements (and other international agreements). In addition, each of Hong Kong, China's Investment Promotion and Protection Agreements can be amended for improvement if the two Contracting Parties agree to do so.

Peru has recently issued decrees on a wide-range of international financial issues such as banking and stock market regulation, arbitration, tax, and intellectual property regulations.

Thailand regularly attends international workshops to develop their policies in line with accepted global norms.

Russia is involved extensively with the European Bank for Reconstruction and Development while Malaysia participates in the OECD Investment Policy Peer Review.

The Philippines has developed a Model Investment Agreement used while negotiating international investment treaties. Philippines also ensure compliance with its commitments under various international agreements through a system of periodic review and monitoring.

Singapore has committed to the ASEAN Comprehensive Investment Agreement which enhanced liberalization and protection elements with the aim of bolstering investor confidence in the region.

Chinese Taipei explores its measures of investment periodically to ensure sufficient measures existed to maintain effective compliance with commitments under international investment agreements. To date, Chinese Taipei has signed 31 BIAs and 4 FTAs to create a more attractive environment for investment.

The United States has published a revised Model BIT which maintains high standards of investor protection while preserving the government's ability to regulate in the public interest. The United States also maintains a number of mechanisms to ensure compliance with international commitments.

Viet Nam has signed agreements on investment protection and promotion in preparation for the upcoming Trans-Pacific Partnership agreement.

Information from Secondary Sources

UNCTAD maintains a database of all bilateral investment treaties signed between nations, including those implemented as part of a preferential trade agreement¹⁰. This source allows member economies the opportunity to monitor the international investment relationships which exist between states and determine potential action they may need to take to further court foreign investment and match international best practices.

3. INVESTMENT FACILITATION ACTIONS ALREADY UNDER WAY

The following matrix outline examples of ongoing and recently completed APEC projects related with IEGs. The key findings of particular actions and how they will help facilitate investment in the Asia-Pacific region are presented below.

“Investing Across Borders: An Important Diagnostic Tool to Assist in IFAP Implementation (APEC 2011)” was the first stage in a multi-year collaboration between APEC member economies and the World Bank. The study uses four World Bank IAB indicators – Investing Across Sectors, Starting a Foreign Business, Accessing Industrial Land, and Arbitrating Commercial Disputes - to compare the state of investment policies within APEC with the investment climate of other regional groupings. Designed to analyze policies which can be implemented and measured in the short-term and provide quick results, the World Bank describes their indicators as “actionable because they identify specific impediments to FDI in the legal, regulatory, administrative, and institutional frameworks of each economy covered. The indicators are reform-oriented because they identify problems that can be addressed in the short and medium term to strengthen an economy’s investment climate.” (APEC 2011: 10). The study found that 24% of APEC economies require state approval before FDI is allowed, a policy which directly hinders international investment (APEC 2011: 13). This compares favorably with a 21% global average but falls behind other regional groupings such as Latin America and the Caribbean and high-income OECD nations. Additional findings show that while APEC member economies rank second globally providing court assistance with arbitration proceedings (APEC 2011: 17), 14% of APEC economies lack institutional capacity to handle arbitration cases entirely, leaving scope for additional investment policy implementation and liberalization.

Seminars and capacity building activities constitute a majority of recently completed IFAP actions. Ten of the projects focused on capacity building and sharing of regulatory experiences and best practices in the investment environment generally and a variety of area-focused topics more specifically. Examples include CTI 35-2008T – ‘Doing Business - Investment at the Sub-National Level to Promote Economic Integration’ and TWG 01-2008T ‘Capacity Building on Tourism Satellite Accounts as a Basis for Promoting Liberalization and Facilitation on Tourism Services.’

Remaining projects consisted of empirical studies analyzing the regulatory framework currently in place in the APEC region. Examples include HRD 02/2008T ‘Measures Affecting Cross-Border Exchange and Investment in the APEC Region’, EC 03/2008T ‘Measuring the Ease of Doing Business in APEC’, and CTI 04/2008A ‘APEC UNCTAD Joint Capacity Building Project for Addressing Knowledge Gaps in the Use of FDI (Stage 2)’. These studies provide the theoretical and practical framework for future capacity-building seminars.

Table 11: Matrix of completed APEC Projects under IEGs

Project Name	Number	Objectives	Key findings
Recent Trends on Investment Liberalization and Facilitation in Transport and Telecommunication Infrastructure	CTI 09/2008T	The Seminar sought to explore the performance of agencies engaged in the promotion of private investment in infrastructure. Especially regarding the implementation of infrastructure development policies in APEC member economies, focusing on the best practices applied, including financing schemes, and, on the improvement of regional connectivity through multimodal infrastructure projects.	Providing participants from public and private sector the opportunity to discuss and exchange experiences about the measures and practices currently applied in the APEC region in order to facilitate the participation of private investment for the improvement of economic infrastructure, focusing on transport and telecommunications. Analyzing best practices provided for the promotion of private investment in the improvement of regional connectivity through multimodal infrastructure projects.
Capacity Building for International Investment Agreements	CTI 02/2008T	The purpose of this project is to improve understanding among APEC member economies of the scope and content of high-standard international investment agreements (bilateral investment treaties and investment chapters of trade agreements), and to enhance the capacity of member economies to negotiate and implement these agreements.	The seminars afforded participants broad insights into the issues being discussed, from the perspectives of those who negotiate investment agreements, those who study them, those who might bring investor claims against a State, those who would defend States against such claims, and those who might serve as arbitrators in tribunals established to consider such claims
“Recent Trends on Investment Liberalization and Facilitation in Transport and Telecommunication Infrastructure ”	CTI 09/2008T	The Seminar sought to explore the performance of agencies engaged in the promotion of private investment in infrastructure. Especially regarding the implementation of infrastructure development policies in APEC member economies, focusing on the best practices applied, including financing schemes, and, on the improvement of regional connectivity through multimodal infrastructure projects.	Providing participants from public and private sector the opportunity to discuss and exchange experiences about the measures and practices currently applied in the APEC region in order to facilitate the participation of private investment for the improvement of economic infrastructure, focusing on transport and telecommunications.

Capacity Building for International Investment Agreements	CTI 02/2008T	The purpose of this project is to improve understanding among APEC member economies of the scope and content of high-standard international investment agreements (bilateral investment treaties and investment chapters of trade agreements), and to enhance the capacity of member economies to negotiate and implement these agreements. The project was executed over two one-week workshops, each of which was instructed by a faculty consisting of investment arbitration lawyers and legal scholars, arbitrators, and experienced officials of APEC governments.	Each one-week workshop afforded participants broad insights into the issues being discussed, from the perspectives of those who negotiate investment agreements, those who study them, those who might bring investor claims against a State, those who would defend States against such claims, and those who might serve as arbitrators in tribunals established to consider such claims. Workshop topics were presented in terms of both theory and practice – the second week included a ‘mock arbitration’ conducted at the World Bank facilities where arbitral hearings under the ICSID Convention are held.
Capacity Building for Sharing Success Factors of Improvement of Investment Environment	CTI 32/2008T	This project is conceived to respond to the instructions from Ministers to implement capacity-building customized for each APEC member based on its economic progress, and it is also designed to cater to ABAC’s calls for substantial improvements in the business climate.	The dialogue will focus on three or four investment-related areas each year and share successful experiences of increased investment (new investment, reinvestment, capacity-widening investment, replacement investment, etc.).
Doing Business - Investment at the Sub-national Level to Promote Economic Integration	CTI 35 - 2008T	Phase 1 of this project involved the completion of 2-3 case studies at the sub-national ¹¹ level of successful efforts to overcome behind-the-border barriers to investment. The project drew on the World Bank’s expertise in using its Ease of Doing Business indicators as a diagnostic tool for improving economy-wide performance to the level of better practice of high growth states/provinces (rather than to international best practice) on the assumption that better practice may be more achievable and deliver very significant growth outcomes. The lessons drawn from case studies contribute to improving member economies understanding of the elements of a sound investment climate.	The project objectives were successfully achieved. Two complete case studies were undertaken (Mexico and the Philippines) and also covered was information on similar work undertaken in China in 2008 and forthcoming in 2009 in Indonesia. This seminar included broad discussion on the two completed studies and presentations about Viet Nam and Indonesia and its sub national reform programs.

¹¹ Sub-national refers to a district level of administration.

Measures affecting cross border exchange and investment in the APEC Region.	HRD 02/2008T	Identify positive and negative measures affecting exchange and investment in higher education across four modes of supply (cross-border, consumption abroad, commercial presence and presence of natural persons) amongst APEC member economies.	Project final report, produced from analysis of survey responses and desk research, met the qualities and requirements detailed in the Contract and associated Request For Proposal
Human Resources Development Working Group-Capacity Building Network (HRD-CBN)	HRD 01/2007T	To raise the capacity of both public and business sector people who are involved in domestic legislation, policy making and social system development in the field of foreign direct investment.	Eleven cases in total by 13 experts from 8 economies were developed. The case development started in August 2007, drafts reviewed by the peer experts and editors, draft finalized in September 2008.
Measuring the Ease of Doing Business in APEC	EC 03/2008T	This was a study on the positive impact of regulatory reform on a range of macro-level economic indicators such as economic growth, inward FDI and job creation, as well as the regulatory burden's impact on firm level indicators like job creation and investment. Eight case studies of successful reforms in member economies illustrated the impacts and learning principles from specific reforms in specific economies. The study findings reiterated the urgency of reducing regulatory burden and identifying priorities for reform, thereby giving further impetus to the regulatory reform agenda in APEC.	This project had fulfilled its key objective of using empirical analysis to study the positive economic impact of regulatory reforms on key macroeconomic and microeconomic firm-level indicators. Complementing this empirical analysis was a set of case studies that documented the impact of specific reforms on economic outcomes in individual economies
APEC UNCTAD Joint Capacity Building Project for Addressing Knowledge Gaps in the Use of FDI (Stage 2)	CTI 04/2008A	The purpose of this study (Stage 2) was to produce consolidated case studies' reports that conducted comparative analysis in two issue areas; integration of FDI in skills development process and creating benefit from foreign affiliate-domestic SME linkages in two economies each. Each case study's report analyzed best practices in one developing economy and one developed economy, which could provide a framework for member economies to draw on when considering infrastructure development and the potential use of FDI.	Stage 2 produced a consolidated case studies report (published on-line) that conducts comparative analysis in two issue areas: Best Practices in Investment for Development: Case Studies in FDI – How to Integrate FDI in the Skills Development Process <u>and</u> How to Create Benefit from Foreign Affiliate – Domestic SME Linkages

Core Elements Project (Phase II)	CTI 34/2008T	The purpose of this project was to expand the process of identifying core elements by examining the content of a larger sample (100) of intra-APEC investment agreements together with a sample of 100 IIAs from other regions of the world, including all (or almost all) remaining intra-APEC IIAs	The output became the subject of separate capacity building projects aimed at creating an APEC-wide understanding amongst investment treaty negotiators and investment policy makers of how regional approaches to core elements compared and a clear understanding of investment principles (CTI 31/09T, etc).
Capacity building on Tourism Satellite Accounts as a basis for promoting liberalization and facilitation on tourism services.	TWG 01/2008T	The project was divided into two phases. In the first phase consultants were commissioned to develop a survey tool to gauge the development of TSA to international standards in the APEC region. The survey results were used to develop an understanding of best practice and areas for continuing improvement. The second phase was the design and delivery of four in-economy workshops with an aim of bringing together key stakeholders to discuss capabilities, issues and use the consultants experience and the handbook to formulate a path towards TSA implementation.	An important outcome for the project came through the involvement of organizations and government departments related to the Tourism industry in the workshops, such as central banks and immigration/border control departments. It gave these organizations a practical understanding of the importance of a TSA is and how its development can only occur as a result of all stakeholders ensuring the provision of high quality and timely data to feed into a TSA.
Good Governance on Investment Promotion	CTI 10/ 2008 T	Speeches of the Seminar speakers, pointed the role of good governance through investment policies and measures required to improve the APEC investment environment.	Experiences shared by APEC economies and international organization provided to seminar participants new ideas to improve investment promotion. Particular interest was shown for future workshops on good governance, policy advocacy, investor aftercare services, corporate governance and corporate social responsibility.

<p>APEC UNCTAD Joint Capacity Building Project for Addressing Knowledge Gaps in the Use of Foreign Direct Investment</p>	<p>CTI 03 /2008A</p>	<p>This project is part of a joint IEG – UNTAD targeted capacity building framework intended to make a significant contribution to the development of the ‘narrowing of economic gaps’ pillar of APEC’s Investment Facilitation Action Plan requested by Ministers and Leaders in Sydney. The multi stage framework addresses gaps in APEC’s investment liberalization and facilitation agenda through the creation of an inventory of best practice case studies on foreign direct investment (FDI). In Stage 1 (the subject of this proposal), four APEC member economies are selected as examples of best practice and case studies are produced by UNCTAD</p>	<p>UNCTAD reported the success of the project to IEG and advised that the outcomes from the studies undertaken had been promulgated widely and had been well received. Further questions and practical solutions to the many issues raised in the case studies (which were well-researched) gave rise to considerable scope for linkages from this work to other planned capacity building activities.</p>
<p>Investing Across Borders: An important diagnostic tool to assist in IFAP implementation</p>	<p>CTI 43/2009T</p>	<p>This project is Stage 1 of a multi-year project which commenced in the first quarter of 2010. This project seeks to use the World Bank’s (WB) Investing Across Border (IAB) Indicators to improve APEC member economies strategies to implement the Regional Economic Integration (REI) agenda. The Report will provide information about key REI goals – transparency, reducing investor risk through providing more certainty, and simplifying business regulation. The study reports would provide data for all APEC economies over the life of the IFAP. Stage 2 of the project will be recommended to IEG –CTI when the WB/IFC are able to undertake the research (probably late 2012).</p>	<p>The report presents for each member economy fact based benchmarking data on laws and regulations in selected policy areas affecting entry and operations of foreign direct investors</p>

4. CONCLUSION

The results from voluntary submission by member economies show that reporting economies have made substantial progress toward implementing several IFAP principles while progress on others has been less fruitful. Some of the findings based on the voluntary submissions are provided as follows:

Principle 1: Most of the reporting economies have in place a Foreign Investment Promotion Act which sets out the laws and regulations pertaining to foreign investment in their economies. The laws, rules, regulations and/or amendments relating to foreign investment are usually published in an Official Gazette, and/or on the relevant government agency's website. Most economies also have a trade and investment agency to help promote and facilitate foreign investment.

Principle 2: Most economies have a system of land ownership registration in place. Economies also generally have established effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions.

Principle 3: The investment promotion agencies of most reporting economies implement actions related to Principle 3. Most economies accord 'national treatment' to foreign investment, an important component of IFAP and international best practice.

Principle 4: Economies have reported efforts to streamline foreign investment applications and registration, licensing, and taxation procedures for foreign businesses.

Principle 5: Most reporting economies have taken steps toward building constructive stakeholder relationships both as a means of direct policy action and to further integrate relations between the public and private sectors.

Principle 6: The adoption of new technology has improved the investment climate in all economies who reported progress toward principle 6. New processes have also been implemented which greatly simplify international direct investment.

Principle 7: Reporting member economies showed a commitment to maintaining up-to-date investment policies through continuous monitoring.

Principle 8: Economies volunteering IFAP submissions report extensive international cooperation.

Looking at the content of the IFAP principles; principle 1, 2, 3 and 4 contains key elements that any investors would see as critical factors when making their investment decisions. Principle 5, 7, 8 are also important for new or existing investors as well as for governments to make sure that the current investment policies and regulations are well suited to attract and maintain new as well as existing FDI flows and activities. Principle 6 is particularly important to further reduce business and regulation costs as well as to encourage business to invest in new technologies.

Secondary sources, such as the World Bank's Ease of Doing Business and UNCTAD's World Investment Report and World Investment Prospects Survey, demonstrate the importance of implementing policy changes in order to foster a welcoming environment for international investment and maximize it as a tool for economy-wide development goals.

EXECUTIVE SUMMARY

This report analyzes foreign direct investment within the APEC region over the years 2000-2010. We focus on intra-APEC flows in order to judge the level of cooperation and integration which exists between APEC member economies. When data permits, the report analyzes those intra-regional investments by sector, looking at the industries of most interest to firms and how those investments impact other economic policy goals.

We examine the eight IFAP principles from a business perspective, looking at how each reduces either the costs or risks faced by foreign investors. Taken as a whole, IFAP helps improve an economy's business environment and facilitates the entry of foreign investment.

Special Highlight sections focus on Investment Promotion Agencies (IPAs) and International Investment Agreements (IIAs). All APEC economies have an active IPA; the insert discusses best practices and how IPAs can improve. 58% of bilateral APEC relationships are covered by IIAs, primarily in the form of bilateral investment treaties (BITs). BITs offer a promising area for progress on the international front.

US\$ 4.8 trillion of foreign direct investment flowed into APEC economies during the last decade, equivalent to an average of \$179 per person per year for each APEC citizen. However, only 40% of these funds were intra-APEC investments. Fifty-nine percent of that \$4.8 trillion flowed into industrialized economies, confirming the idea that firms invest where they can minimize cost and risk, validating IFAP's premise that simply improving the investment climate is not sufficient for attracting FDI and highlighting the importance of economy-wide competitiveness.

Intra-APEC FDI into developing economies showed a counter-cyclical trend as these economies maintained their regional support when firms from other areas showed interest, providing evidence of strong regional connections.

Our analysis showed positive correlations between per capita GDP and FDI, further demonstrating the importance of economy-wide improvements to better attract foreign funding.

Recent trends show that APEC firms are keen to invest within the region; over 5,000 intra-regional projects have been announced since the beginning of 2010. Many of these new projects are in services sector, surpassing manufacturing as the most common industry for international investors, with most citing the region's growing market size as their primary motivation to invest.

INTRODUCTION

The Investment Facilitation Action Plan (IFAP) seeks to improve APEC's investment climate by providing a framework of actionable policy guidelines which can help economies understand where their current investment policies stand in relation to international best practices and acting as a tool to plan future policy implementation. This paper, in conjunction with a concurrent study analyzing the progress member economies have reported in meeting IFAP goals, hopes to offer a more nuanced picture of where international investment within the APEC region stands at the present moment and where it can go in the future.

Our report's primary contribution is a database compiled by the author which breaks down foreign direct investment within the APEC region by sector and source economy. With this data, we can better analyze which sectors within an economy are most open to international investment, which sectors can improve, how foreign investments have changed over time, and how deep investment cooperation runs between APEC members.

With the data already compiled and hopeful future contributions from members who have not yet submitted their reports, the Policy Support Unit will be able to run more sophisticated analyses to determine which policy actions have the largest impact on attracting foreign direct investment and what additional steps can be taken to strengthen intra-regional ties. Requests have been sent to each member's domestic agency responsible for compiling official FDI data – the central bank, finance ministry, or central statistics department. The statistics presented represent only those economies whose data was publicly available or who submitted responses to our formal requests. The Policy Support Unit appreciates the effort of those economies which shared their data.

The analysis will begin by describing IFAP goals in more detail and why implementation of the eight major themes is important as APEC members develop their future investment policies. Special highlighted sections on Investment Promotion Agencies and International Investment Agreements are included.

Following this introductory section, a description of the database will be presented including how it was constructed and which sources were used. An analysis portion follows including sections on the sectoral breakdown of foreign direct investment and volumes emanating from fellow APEC members. A final section on announced investment projects in 2011 and 2012 concludes.

IFAP GOALS

Many factors drive a firm's decision to invest abroad: the investment climate¹, size of the foreign market, access to export markets, stable political and economic systems, a skilled workforce, openness to trade, transparency and lack of corruption among others.² Firms will consider all of these dimensions before choosing where to place their investment, so economies hoping to attract more foreign investment would be wise to carefully analyze all these variables when formulating a wider economic policy.

IFAP's goals are more limited. Instead of attempting to address the comprehensive list of all these factors, it aims to address only one: the investment climate. IFAP provides eight principles to facilitate investment and make economies more attractive to FDI. Drawing from extensive stakeholder consultation on the impediments faced by firms operating in a foreign business environment, IFAP aims to mitigate two important factors:

- **Cost:** Time is one of the most important factors in a foreign firm's decision on where to invest their funds. An overly-onerous regulatory process that requires months of regulatory approval will discourage firms from even considering investment in a potential host economy. It is important for policymakers to balance the public interest with efforts to make the investment process more efficient and effective, primarily by encouraging transparency, consistency and accessibility in their business and investment regulations.
- **Risk:** Managing risk is an investor's primary business. Regulatory risk is the main area IFAP hopes to address, making the regulatory process clear and easily understood. These risks are particularly important since foreign investors may be unfamiliar with the domestic regulation environment.

To understand how these policy recommendations correct market failures, support the investment climate and help firms make more informed investment decisions, this section will examine each of the eight IFAP principles in turn and describe how they impact either cost or risk calculations.³

Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies

Information relevant to potential investors should be readily available, easily accessible, and accurate. While this goal is a valuable target for all levels of government, it is especially important as firms decide whether or not to invest their resources in a long-term international

¹ The investment climate could be defined by three broad set of variables: macroeconomic policies such as fiscal, monetary and trade policies; governance institutions; and infrastructure. (OSCE 2006)

² Multilateral Investment Guarantee Agency (MIGA) 2012 Annual Report

³ This section draws from a previous PSU-sponsored report "Measuring Progress in Implementing APEC's IFAP" - prepared by the Centre for International Economics, October 2009

project. Inconsistent or unavailable information can cause investors to question the ability of a foreign economy to meet basic requirements and leave both cost and risk decisions unclear. The World Bank⁴ noted that over 70% of economies may miss out on investment opportunities because they are unable to provide the basic business information that companies need during the site selection process. Principle 1 is particularly important for investors deciding among competing investment destinations during the site selection process.

HIGHLIGHT: Investment Promotion Agencies

PSU research found that all APEC member economies have an investment promotion agency (IPA), the first point of contact for most firms conducting due diligence on potential hosts. These agencies reduce both cost and risk for investors by aggregating all necessary information in an accessible central source, reducing the time-cost spent searching for documents and, by enumerating the processes required to operate a business in the host economy, reducing the risk of unexpected impediments arising once operations have begun.

The World Bank's Global Investment Promotion Best Practices 2012 found that the best performing IPAs carry out two key roles:

- Maintain strong websites complete with all data investors need to perform their analyses
- Respond quickly, accurately, and professionally to investor outreach

Their report highlights Australia's Austrade website as a leading example of how IPAs can structure their internet presence to maximize data availability while retaining an inviting visual appeal.

Canada was noted as a leader in responsiveness. The evolution of Invest Canada from a reactive institution responding to company requests into a proactive body seeking out potential investors was highlighted as a demonstration of the potential IPAs can have in meeting wider economic goals.

Principle 2: Enhance stability of investment environments, security of property and protection of investors

Stable operating environments increase the likelihood that a firm's foreign investment will produce viable, long-term benefits for both the investor and the host economy. As such, implementing this IFAP principle can be seen as a risk-reduction step of an economy's investment policy especially after foreign firms have begun operating in the host economy.

Dispute resolution is an important demonstration of how stability affects a firm's investment decision. Disagreements will inevitably arise while doing business and foreign firms desire to know that the rule of law will be imposed fairly and uniformly. Bilateral investment treaties

⁴ World Bank Group, "Global Investment Promotion Benchmarking: Summary Report" 2009

(BITs) fill this role, ensuring that foreign firms have the right to settle disputes in binding international arbitration outside the host economy's judicial system. Evidence shows that having BITs in place increases the amount of FDI flowing between economy pairs.⁵

HIGHLIGHT: IIAs and BITs

International investment agreements are important tools an economy can use to improve its investment climate, specifically bilateral investment treaties (BITs). BITs seek to create a more welcoming environment for foreign investors by providing legal protections and freedom from expropriation, often by allowing disputes to be settled by an independent international arbiter such as the International Center for the Settlement of Investment Disputes. In this way, BITs can be viewed from the same business perspective as IFAP: acting to reduce an investor's cost and risk.

Within the APEC region, 120 international investment agreements have been agreed between member economies, covering 58% of bilateral pairings according to the World Bank's International Center for the Settlement of Investment Disputes.

Economies around the world have embraced BITs as a centerpiece of their investment policy: 2,833 are currently in force along with more than 300 preferential trade agreements (PTA) which generally contain clauses similar to those found in BITs.

Several studies (Kerner 2009, Neumayer and Spess 2005) have employed robust statistical techniques across global databases and concluded that BITs are effective in attracting foreign investment, especially for developing economies seeking investment from the industrialized world. In this light, BITs represent an area where rapid progress could be made on the regional front, encouraging investment through a demonstrable commitment to security and stability for investors.

Principle 3: Enhance predictability and consistency in investment-related policies

Investors are drawn to an environment where policies and laws are applied predictably and consistently, reducing the risk that they will encounter unforeseen hurdles. Arbitrary application of the law and other forms of corruption discourage investors with an existing presence from expanding their operations and sends a strong negative signal to potential investors that projected costs may increase, dissuading investment from ever entering the economy.

Transparency is the best way to ensure predictable, consistent policy application. IFAP guidelines remind economies of the importance of transparency in every step of the investment process, yet the impetus for ensuring that transparency is applied instead of implied ultimately rests with each domestic government.

⁵ Eric Neumayer and Laura Spess, "Do bilateral investment treaties increase foreign direct investment to developing countries?" May 2005.

Policymakers should keep in mind that foreign investors make their initial investment assessments from a distance unless they have previous operational experience in the targeted host economy. As such they often rely on media reports or analysis from trusted international organizations for their first impressions of the host's regulatory environment in addition to the information presented by IPAs. Once they have entered a host economy and gain more first-hand experience in dealing with the domestic regulation, predictable and consistent policy application becomes even more important. If these firms encounter too many challenges or the risk of unexpected policy changes becomes too high, they may decide to divest their positions and move operations to a new location.⁶ Actions such as this set a bad precedent and send negative signals to other potential investors about an economy's investment environment, providing further evidence of the importance of predictable, consistent policy application.

Principle 4: Improve the efficiency and effectiveness of investment procedures

Excessive burdens add additional cost to foreign investors. Multiple administrative forms, unnecessarily-long processing times, and burdensome procedures for connecting to infrastructure such as power and water place additional cost-layers on a firm's investment decision, reducing their incentive to invest in these overly-burdensome economies.

World Bank Ease of Doing Business indicators as well as the Investing Across Borders series highlight the costs associated with inefficient investment policies. The international best practice described by these agencies constitute much of the content in IFAP capacity building projects, so policymakers should familiarize themselves with the concepts to better understand the underlying rationale behind the IFAP principles.

Principle 5: Build constructive stakeholder relationships

By establishing a rapport with all players affected by investment policies – the business community, consumers, international organizations, and other branches of domestic government – policymakers open communication channels with all interested parties, ensuring that each has an opportunity to voice concerns and allowing government officials to effectively describe the benefits behind their changes.

Open communication between government and the business community lowers the risk that unexpected policy changes will negatively affect investors as well as acting as a valuable tool for governments to generate feedback from the business community. This can be seen as a commitment to transparency – in line with principle 3 – and a strong signal to potential investors that they will have the opportunity to voice their concerns and have those concerns incorporated into future policy decisions.

⁶ Imad Moosa, "Foreign Direct Investment: Theory, Evidence, and Practice", 2002

Principle 6: Utilize new technology to improve investment environments

Technology speeds up the investment process, making it easier and faster for foreign investors to enter new markets and thereby reducing opportunity cost.

For the government, the benefits of using technology come through simpler, more efficient processes, not in the technology itself. Economies need not invest in the most expensive or complicated technology to woo potential investors; rather they should focus on using technology to simplify their investment process and reducing the cost faced by investors.

The best-practices cited from the experience of successful IPAs show the usefulness of technology in terms of fostering transparency and accessibility of investment policies. The 2012 Ease of Doing Business report describes how economies are making business regulation and the regulatory process more accessible, helped in many cases by e-government initiatives.

Principle 7: Establish monitoring and review mechanisms for investment policies

Reviewing investment policies as a stand-alone action is unlikely to persuade firms to invest in any given economy. Instead, much like technology, the action of reviewing existing policies demonstrates a willingness by leaders to take a proactive approach to the policy environment. By ensuring that the existing rules are still appropriate for the current environment, policymakers reduce firms' perceived risk of overly-rigid or stagnant rules. Applying IFAP principles 5 and 6 would support an effective review of investment policies.

Principle 8: Enhance international cooperation

Another signaling device, being an active, responsible member of the international community demonstrates that economies are committed to international best practice and the rule of law and lowers the risk a firm takes in making their investment decision.

FDI DATA

Now that we better understand the reasoning behind IFAP and how it interacts with the investment environment, our analysis will shift toward examining the empirical evidence of FDI within APEC member economies. We begin by describing our project mandate and data.

The Policy Support Unit was tasked with analyzing the pattern and trends of foreign investment (mainly FDI), focusing on inter-regional and intra-regional FDI flows, and the sectoral composition of FDI flows.

This is an area of the FDI literature which has lacked extensive investigation in the past, mostly due to a lack of high-quality data. Taking the opportunity to fill a unique niche in the field and build on the cooperation inherent in APEC's mission, the PSU has built a proprietary database consisting of sectoral FDI flows within the APEC region over the years 2000-2010.

The PSU would like to note the importance of making investment data publicly available, a step toward meeting the key IFAP goal of transparency. All APEC member economies agreed that the PSU should proceed with this analysis and even then many failed to provide information on their international investment positions. A foreign firm looking for the same data would face large time costs searching for the sources and, if they failed to find even basic information on an economies' investment policy, may deem the risk too high to proceed. To avoid these potential problems in the future, the PSU strongly encourages all APEC members to be more forthcoming with their FDI data in line with the IFAP principles.

Our data are sourced directly from the domestic agencies responsible for aggregating and reporting FDI data – either central banks, finance ministries, or domestic statistical agencies, the same bodies used by UNCTAD to compile their foreign direct investment reports.⁷ By using these sources, we have done our best to ensure that the data have been assembled using international best practice and are of the same quality demanded by comparable international organizations. This includes using a minimum threshold of 10% foreign ownership of a company as well as calculating the reported figures on a balance-of-payments basis. Where possible, we have compared the total FDI flows reported to us with the figures published in UNCTAD's World Investment Report to ensure that the data we received matches that used by official United Nations sources.

Here we must note the difficulty of making accurate classifications of what constitutes foreign direct investment. It can be challenging for economies to know where foreign investors are based, which industry a newly-acquired company should be classified under, and what value to assign to a given asset. As such, FDI data are subject to large corrections once initial reports have been updated and amended.

⁷ For additional information on data compilation, please see the UNCTAD Training Manual on Statistics for FDI and the Operations of TNCs, Volume I

For this reason, the PSU chose to study the period 2000-2010. We were able to analyze a long time period which has already been subject to revisions, allowing a stable source of data that should not change with future corrections.

The sectoral and source-economy breakdowns were reported by each member based on their own internal classification system. This naturally raises concerns about how accurately we are able to draw conclusions across economies without a uniform system in place. As such, the PSU took a series of corrective actions to address these short-comings and ensure that our data are as accurate and reflective as possible.

First, we rely only on sources which use international best practice in their FDI compilation. By providing their reports in good-faith we believe these calculations represent an accurate representation of the FDI picture within each economy. Also, by comparing the sum total of FDI reported to us with internationally recognized figures reported in the UNCTAD World Investment Report, we are able to conclude that the data are in line with reports to other internationally-respected bodies.

Second, PSU researchers compiled each economy's response into 8 aggregate categories – total FDI, agriculture, construction, finance and investment⁸, manufacturing, mining, trade and logistics, and services. In this way, we were able to control the variation which existed between various reporting economies. For example, many economies reported foreign investment in their financial sector and insurance sector as separate classifications, while others did not report an insurance category. Though we were unable to determine the extent of overlap in those not reporting such a breakdown, by combining similar groupings into consistent, broader categories we ensured this non-uniform raw data did not alter our final results.

Finally, we did not attempt to draw conclusions from data which were not reported, choosing instead to leave those categories blank until additional inputs are shared. For example, Japan provided data from the years 2005-2010, not covering the earlier portion of our request, while many economies have yet to respond in any way to our requests. PSU researchers chose to leave those categories blank during this initial analysis and hope that a more detailed breakdown can be offered in the future.

We acknowledge that this system is not perfect and leaves room for minor discrepancies across reporting economies. However, it is the most detailed breakdown of FDI data that our research has been able to uncover in the Asia-Pacific region and, since it was compiled from sources using international best practice and standardized by PSU researchers, we believe these data represent the most accurate reflection available of intra-APEC FDI flows.

⁸ This grouping includes investment categorized under 'real estate' by reporting economies. Roughly half of those reporting included real estate as a separate component and half did not. Rather than omitting this data, PSU decided to include real estate under the finance and investment heading which includes more traditional areas such as banking and insurance. Though the PSU was unable to determine the intended usage of those land investments, we assumed they were used for investment purposes and not another usage such as purchasing land to build a factory. If this assumption holds, then the value-added motivation of the foreign firm is to earn investment profits from their land acquisition which is consistent with inclusion under the financial heading.

FOREIGN DIRECT INVESTMENT IN APEC

US\$ 4.8 trillion in foreign direct investment flowed into APEC economies during the last decade, equal to 1.83% of total GDP or an average of \$179 per person per year. These headline numbers match up well with global averages but conceal extensive regional variability. Our analysis will explore each APEC economy's investment portfolio in as much detail as possible, revealing a more nuanced story of how connections, investment, development and policy intermingle in the broader economic context.

Our initial findings were surprising but perfectly in line with the IFAP guidelines and economic theory: APEC members with a high per-capita GDP and large developing economies received a majority of FDI flows. Examining these flows at the sectoral level allowed the PSU to explore the areas foreign investors found promising and where policymakers attempted to channel these investments. We found that not all sectors are created equal, with wide discrepancies in funding levels to various sectors reported around the region. Further, only 40% of those funds were intra-APEC - originating in one APEC economy and destined for another - leaving additional room for further regional investment initiatives. All figures are in nominal US dollars following UNCTAD practice.

Industrialized APEC Economies

The five industrialized APEC economies – Australia; Canada; Japan; New Zealand; and the United States – are both the primary sources and destinations of foreign investment in the Asia-Pacific region. Combined they received a total of \$ 2.78 trillion in foreign investment from 2000-2010, 59% of total APEC inflows for that period.

Most of these funds were sourced from outside APEC: only 31% or \$866 billion came from other APEC members. Even within this intra-APEC flow, we begin to see a hierarchy: 77% or \$759 billion originated in one of the other industrialized APEC members. This figure means that

65% of all investment flowing out of industrialized APEC economies went to other industrialized economies.

These results confirm the idea that firms invest abroad for a wide range of issues and seriously examine both the cost and risk factors involved. Instead of the classic notion of foreign companies investing in less-developed economies to take advantage of cheaper factors of production and developing economies benefitting from the hoped-for technological spillover effects, we instead see firms from developed economies choosing to operate in other developed economies. This seems to validate IFAP's premise that simply improving the investment climate is not sufficient for attracting FDI and highlights the importance that economy-wide improvements in competitiveness can bring.

We also begin to see the correlation between per capita GDP and per capita FDI. Richer economies attract more FDI on average than less affluent economies. While it's difficult to determine whether more FDI causes higher per capita GDP or vice versa, there exists a clear association between the two factors, specifically for developing economies. Using a global dataset of developing economies, a World Bank analysis⁹ found that for every

1% increase in per capita GDP, FDI increased by 1.27%, showing the strong positive association between the two variables. Our analysis looks at this variable for many APEC economies and finds a similar trend. Unfortunately, due to our data limitations the empirical evidence in our analysis is rather weak even though our result shows a similar, positive trend. Econometric regression analysis which includes more economies would allow us to make more accurate assessment of the importance of this and other key variables.

Australia received US\$304 billion during the last decade, equivalent to \$1,449 per capita each year or 4.22% of total GDP. Of this, 53% or \$160 billion came from other APEC members. Australia was an active investor in APEC as well with their firms investing \$62 billion in other APEC economies. A strong majority of these funds, 83%, flowed to other industrialized APEC economies.

Canada received \$436 billion in total foreign investment from 2000-2010, 46% coming from other APEC members. This number highlights the close relationship Canada shares with the United States: 97% of these intra-APEC flows came from American firms. Annual per capita FDI averaged \$1,225 for every Canadian, equal to 3.62% of total GDP.

⁹ Mansoor Dailami, "Mobilizing International Resources for Development: Foreign Direct Investment and Other Private Flows", 2008.

Canadian firms were active investors primarily in the United States, sending \$207 billion or 84.5% of their total \$245 billion in intra-APEC funds to their southern neighbors. Intra-APEC funding accounted for 53% of Canada's total outward FDI of \$465 billion.

The PSU received Japanese data for the 2005-2010 period, so our analysis will focus only on these 6 years. During that time, Japan received nearly \$74 billion in foreign investment, of which over \$40 billion or 55% came from other APEC members. We can see less openness to outside investors when examining these numbers on a per capita and percentage of GDP basis: annual FDI was only \$97 per person or 0.26% of GDP from 2005-2010.

Japanese firms were much more active in the region, investing \$319 billion in other APEC economies. This was equivalent to 54% of their total external investment of \$590 billion. The United States received the largest share of these funds, absorbing \$135 billion or 41% of Japan's total intra-APEC investment followed by China with \$41 billion.

The strong bilateral relationship New Zealand shares with Australia can be seen in New Zealand's FDI numbers: of the \$23 billion in outside investment received over the last decade, nearly \$20 billion or 86% came from Australian firms. 46.5% of New Zealand's outward investments within the APEC region flowed to Australia as well.

Coming to the United States, we find the real engine of investment in APEC. The US received over \$1.9 trillion in outside investment in the years 2000-2010, equivalent to 40% of total FDI entering APEC. While APEC firms were active investors in the US market, we see that the United States appealed to global firms: only 22% of these funds came from other APEC members. Within that 22%, the numbers are skewed heavily toward just a handful of economies: Australia; Canada; Japan; Korea; Mexico; and Singapore accounted for over 97% of the total \$440 billion APEC investment in the United States.

US companies were also active in APEC, entering deals worth \$538 billion or 28% of total intra-APEC FDI.

Developing APEC Economies

Examining the investment position of all developing APEC economies is a difficult task. The Policy Support Unit was able to secure data on total FDI broken down by APEC member economy for only 10 of the 16 developing economies. Of these 10, only 5 – Chile; Mexico; the Philippines; Singapore; and Thailand – followed through on PSU requests for data on sectoral investment. Our analysis covers only those economies who submitted data or whose official statistical agencies publicly provided the necessary breakdowns.

Developing APEC economies recorded over \$2 trillion in foreign investment in the decade ending 2010, 42% of APEC's total; approximately \$1 trillion was sourced from other APEC members. Interestingly, 61% of this intra-APEC investment came from other developing APEC members which highlight strong regional connections.

Intra-APEC FDI has shown a counter-cyclical trend as demonstrated in Figure 4 above. The percentage of intra-regional flows into developing APEC economies are at their lowest when foreign investment flows are at their peak. Conversely, when investors from other regions reduce their funding, intra-APEC flows reach their highest level in percentage terms, demonstrating APEC's resilient connections and commitment toward regional development. While this finding is positive for the region as a whole, the benefits of FDI are not uniformly spread.

The differences between developing APEC economies can be rather stark. Average per capita FDI among all 10 reporting economies is \$1,361. If Singapore and Hong Kong, China are removed along with their average per capita FDI of \$5,229, the total for all remaining developing APEC members falls to \$211. Clearly, understanding the intricacies of foreign investment in these economies requires a more detailed breakdown.

China experienced the most dynamic investment growth of any APEC member that reported data during the last decade. Starting in 2002, China received FDI flows that more than doubled in volume on an annual basis, increasing from \$52 billion to \$114 billion in 2010. This represented

the largest percentage and actual increase among APEC members and made China APEC's second largest destination for international investment after the United States. Yet on a per capita basis, China lags behind other APEC economies in attracting foreign investment, averaging only \$60 per person. These measures show both the size and dynamism of the Chinese economy and how extensive reforms need to be in the future in order to fully meet IFAP goals of openness and transparency.

Externally Chinese firms have become much more active, increasing their outward FDI flows from \$6 billion in 2000 to over \$68 billion in 2010. A majority of these funds, 71%, have stayed within the APEC region.

Hong Kong, China attracted

US\$453 billion of FDI inflows, equivalent to 22% of its total GDP (one of APEC's highest) or an average of US\$5,994 per capita during this period. 44% of these FDI inflows came from within the APEC region. In particular, HKC showed a strong investment relationship with China: US\$161 billion or 36% of its total FDI came from Chinese firms, which is equivalent to 80% of HKC's cumulated FDI inflows from the APEC region.

Hong Kong, China also played a predominant part in facilitating intra-regional FDI flows. For the years 2000-2010, FDI outflows amounted to US\$483 billion, equivalent to 23% of its total GDP during this period, 63% of which went to the APEC region. Eighty-six percent of these FDI outflows to the APEC region went to China, once again reflecting the close investment relationship between HKC and China. Such outflows amounted to US\$257 billion, equivalent to 55% of HKC's total FDI outflows.

Chinese Taipei recorded over US\$73 billion in FDI inflows during the years 2000-2010 with 39% coming from other APEC economies. We were able to gather data on investment from the People's Republic of China for the years 2009 and 2010. During those two years, Chinese firms invested US\$131 million in Chinese Taipei, nearly as much as Australia recorded in the entire decade. With more complete data on Chinese FDI, it's likely that APEC's share of total FDI within the Chinese Taipei economy would increase. The United States and Japan were the most active reported APEC economies with their firms investing \$12 billion and \$8 billion respectively.

Externally, firms from Chinese Taipei invested US\$ 36 billion in the APEC region.

Korean firms were more active investors than recipients in the APEC region during the last decade, receiving \$35 billion in FDI while investing \$62 billion. These numbers also show a

higher degree of progress still available in meeting IFAP goals as FDI accounted for only 0.76% of GDP, one of the lowest totals in APEC.

Southeast Asian economies submitted at the lowest rate of all APEC members, with only Malaysia; the Philippines; Singapore; and Thailand responding to PSU requests for data. However, the Philippines; Singapore; and Thailand all provided detailed breakdowns by source economy and sector as requested. Their assistance is greatly appreciated by PSU staff.

These four economies reported \$425 billion in total FDI during the years 2000-2010, 44% of which came from other APEC members. Of the \$179 billion in intra-APEC investment, the Southeast Asian economies were the most well-balanced between industrialized and developing APEC investment with 52% coming from industrialized economies and 48% from developing members. These headline numbers mask deep differences, however, which we will explore in more detail in the economy-specific breakout below.

Malaysia received \$135 billion in FDI from around the world during the last decade, most of which came from outside APEC. Japan; Singapore; and the United States accounted for a combined \$45 billion of foreign investment in Malaysia, 81% of total APEC funds flowing in to the economy. Total FDI accounted for an average of 9.2% of GDP, however, showing that Malaysia has made considerable progress opening their market to foreign investment even if regional firms are less active investors.

The global outlook shows in Malaysia's external investment as well with only 30% of its \$64 billion in outward FDI invested in the APEC region.

The Philippines reported data for the years 2005-2010. In that period, they received a total of \$23 billion in foreign investment for an average of \$3.8 billion per year. APEC economies were quite active, accounting for over 70% of that total. Japan; Korea; Singapore; and the United States combined for \$14 billion of FDI, good for 61% of total investment and 88% of APEC funding. The Philippines lags other economies as an FDI destination, receiving an average of only \$43 per capita or 1.29% of total GDP.

Singapore is a global destination for foreign funding, attracting over \$215 billion during that last decade or an average of \$4,366 per capita. Singapore's openness to foreign investment is reflected in the percentage of FDI to GDP, second to HKC at 14.5%. However, this openness to the global marketplace also leaves Singapore open to global fluctuations and their FDI numbers reflect this, rising during the boom years before the recession in the early 2000s, and showing the same pattern in the run-up to the Global Financial Crisis in 2008. Still, Singapore did not experience a net withdrawal of funding at any point during our period of analysis, showing that their commitment to the IFAP goals and broader economic stability were rewarded with higher levels of foreign investment.

Thailand, like the Philippines, reported data for the years 2005-2010. During this period they received over \$51 billion in foreign investment, 63% of which came from other APEC economies. Thailand was relatively open to foreign investment with FDI averaging over 3.6% of

GDP for the period as a whole and nearly 4% if data from 2009 and the dip related to the Global Financial Crisis are removed.

We will examine the sectoral breakdowns of the Philippines; Singapore; and Thailand in the next section.

Chile and Mexico were the Latin American economies reporting data and each offered a complete sectoral breakdown along with their headline numbers. These numbers will be analyzed more closely in this section with additional sectoral reporting to follow in the next section.

Chile reported nearly \$37 billion in FDI during the 2000s, equaling an average of \$206 per capita or 3.13% of GDP. Intra-APEC investment is dominated by the industrialized economies, led by Canada and the United States each with over \$7 billion invested.

Nearly one-third of total foreign investment went to the mining industry with APEC economies providing over 70% of that total. Canadian firms led this sector with over \$4.5 billion invested in mining alone. Both Australia and Japan accounted for roughly \$1 billion in Chilean mining investment as well. The construction industry and trade and logistics sectors were also receptive to foreign investment, accounting for a combined 50% of total FDI in Chile. The agricultural and financial sectors were the most closed, combining for only approximately 10% of total FDI.

Mexico received over \$255 billion in foreign investment in the last decade, equal to \$218 per capita or 2.9% of GDP, roughly similar with Chile's reported figures. The United States is easily the largest source of international funding flows into Mexico, with 50% of total FDI and 89% of intra-APEC flows during the last decade. Of these intra-APEC flows, a majority went to the financial and manufacturing sectors which combined for nearly \$100 billion in foreign investment.

SECTORAL BREAKDOWN

This section will explore sector-specific investment outcomes, how they differ across the region, and variations between economies at various levels of development. With this data, we will be able to examine the level of intra-APEC cooperation in more detail and analyze how open specific sectors within each member's economy are to international capital markets. We begin with the industrialized APEC economies that provided data for our report, the United States and Japan.

The United States offered breakdowns into four sectors that we analyzed: finance, manufacturing, services, and trade. They did not have a breakdown into agriculture, construction, or mining, making it impossible for the PSU to analyze these sectors. From the data available we can tell that the United States is rather open to investment from APEC member economies in the trade, manufacturing, and financial sectors with \$90 billion, \$102 billion, and \$103 billion in each respective category during the years 2000-2010. Canada and Japan dominate the manufacturing sector with their firms investing a combined \$87 billion or 85% of total APEC funding into American firms. These two economies see their share rise to 93% or \$84 billion in the trade, logistics, and communication sector. Canada alone shines through in the finance, real estate, and insurance sectors with over \$77 billion invested in the United States over this period, 75% of total intra-APEC investment.

In the service sector, though, America receives considerably less investment from APEC members. Again Japanese and Canadian firms supply a majority of the investment with 96% of total intra-APEC funding, but the total volume is only slightly more than \$12 billion over the decade to 2010, significantly less than the other reported categories. From our data it is not possible to determine if this reduction is due to high barriers to entry or that other APEC firms are less simply competitive than their American counterparts.

FDI into Japan was a more nuanced picture with many foreign firms divesting their holdings in Japanese companies over the last decade. The financial sector received over \$33 billion from APEC members, though American firms invested \$35 billion in total. Many other firms from APEC economies reversed their positions and moved out of the Japanese market. In the manufacturing sector we see an absolute removal of \$2.8 billion from APEC economies, while in the service sector and trade and logistics, a majority of economies show little net growth or outright reversals in the investment holdings. Both sectors show gains amongst other APEC members but those are heavily bolstered by Singaporean and US firms, responsible for a combined 74% and 78% of each respective sector.

In the agriculture, construction, and mining sectors, Japan reported minimal investment from any APEC members. Primary resource extraction is not a major component of the Japanese economy and many Japanese construction firms are world-leaders who seek out and win contracts abroad, so low numbers in the mining and construction sectors are in line with expectations. However, our research found few economically-efficient causes for limited investment in the agricultural sector. Reforms which ease investment into agriculture could offer strong gains for the Japanese economy.

Singapore attracted more FDI from other APEC member economies during the years 2000-2010 than Japan drew globally, notching up over \$74 billion from the region. 64% of APEC funding came into the financial sector, demonstrating Singapore's push to become a financial center and its position as a safe haven in the region. For example, Indonesia and Chile combined to invest over \$11 billion in the sector, more than Australia; Canada; Japan; and New Zealand combined. Trade and logistics also showed strong gains of over \$15 billion, highlighting Singapore's strength as a global trading hub.

Singapore showed their openness to regional investment in other areas as well, with services and manufacturing showing strong gains and even mining and agriculture, not major drivers of the Singaporean economy, ending the decade with a positive investment. The only sector showing declines over our period of examination was the construction sector. Again, our data does not allow us to determine if this occurred due to few investment opportunities arising because of Singapore's competitive domestic firms or if other barriers to investment hinder regional entry. If barriers are the main culprit, welfare gains could stand to be gained by their removal.

The most interesting sectoral analysis available from our current data comes in examining FDI entering the Philippines and Thailand. Both are developing Southeast Asian economies which draw approximately 58% of their intra-APEC FDI from industrialized economies and 42% from other developing APEC members. Also, each reported sector-level data for the years 2005-2010, allowing us to make robust comparisons of their results. By examining the way each economy accepts and utilizes foreign investment, we will attempt to analyze the benefits FDI can have on developing economies' growth strategy.

Before examining the FDI numbers, however, we will begin by analyzing each economy's nominal per capita GDP. The Philippines per capita GDP rose from \$2,697¹⁰ in 2000 to \$3,560 in 2010, equivalent to 2.6% annual growth. Thailand, by contrast, enjoyed an 8.2% annual growth rate in per capita GDP as the average wage rose from \$1,943 in 2000 to \$4,614 in 2010. Thailand's economic development model has been more effective in raising average wages during the 2000s. Building on the earlier premise that FDI increases along with per capita GDP, we'll now explore the differences between each economy's FDI bundle to examine in more detail how foreign investors impact economic development.

¹⁰ All data in this paragraph are drawn from the World Bank's World Development Indicators via StatsAPEC. Nominal GDP is used so that measurement units are consistent for both FDI and GDP statistics.

Thailand has attracted the most FDI into its manufacturing, finance, and trade and logistics sectors, drawing \$28 billion, \$13 billion, and \$8 billion in respective intra-APEC investment. Their agriculture, construction and service industries have received relatively little attention from Asia-Pacific investors, drawing in only \$61 million, \$255 million, and \$1.2 billion over the last decade.

Investment in the Philippines, by contrast, has followed an opposite path. Manufacturing, construction, and services are the largest recipients of international investment, drawing in \$10.5 billion, \$2.5 billion, and \$1.7 billion respectively. The financial sector and trade and logistics industry drew in only \$606 million and \$475 million in intra-APEC investment over the same period.

In their World Investment Report, UNCTAD lists one of the primary challenges when integrating investment policy into a larger development strategy as “channeling investment to areas key for the build-up of productive capacity and international competitiveness.”¹¹ Economies seek out foreign investment in hopes of achieving knowledge spillovers in industries they would like to develop into productive drivers of growth. In this light, it would seem that both Thailand and the Philippines view manufacturing as an area where they can be competitive on the international stage. Both have attracted the largest share of intra-APEC FDI into their manufacturing sectors.

Other sectors, however, show a clear divergence in FDI growth. Thailand has received investment into the trade and logistics sector as well as finance, high value-added industries which appear poised to grow in importance in a globalized world. The Philippines have received investment in their construction industry along with the service sector, areas which are generally more focused on domestic consumption. Finance and trade lag behind other industries.

This divergence could arise because of many factors:

- Different growth strategies: export-led vs. domestic consumption
- Difficulty channeling FDI toward desirable industries
- High barriers to entry for foreign firms

¹¹ UNCTAD World Investment Report 2012.

Regardless of the reasons why, it is clear that Thailand and the Philippines appeal to foreign investors for very different reasons, though they share common economic development goals and a similar mix of inflows from both industrialized and developing APEC economies.

PROJECTS ANNOUNCED SINCE 2011

5,218 intra-APEC investments totaling \$330 billion have been announced since the beginning of January 2011, according to the Financial Times fDi Markets database.¹² Firms from industrialized APEC economies have sourced a majority of these foreign ventures with American, Japanese, and Canadian firms pledging to invest in a combined 3,728 projects, 71% of total intra-APEC activity.

China has been the largest destination for pledged intra-APEC investment in the last two years, followed by the United States, Indonesia, Canada, and Mexico. Over \$214 billion in investment has been announced in these five economies, corresponding to 65% of the total intra-APEC value.

The services sector has seen the largest number of announced projects in the last two years, led by the sales, marketing and support segment. Manufacturing was the second most common recipient of foreign investment, followed by trade led by the logistics, distribution, and transportation segment.

48% of firms announced that the destination economy's growth potential was a prime motivating factor in their investment decision, while 34% noted proximity to markets of customers as a reason to invest.

The two preceding points – which sectors of the economy are receiving the most attention and the motivating factor behind a firm's decision to invest abroad – are important to consider when shaping an economy's investment policy. No matter what strategy policymakers implement to attract FDI, they will not be successful unless foreign firms believe that their investment will be viable and profitable.

A strong plurality of firms noted that the growth potential of the Asia-Pacific region was a factor in their decision to invest in the region. Their actions reflect that belief with the services and trade sectors growing in importance as foreign firms seek to position themselves to sell to host-economy consumers instead of simply relying on them for low-cost inputs or factors of production. Policymakers who incorporate these facts into a more comprehensive investment policy will be best positioned to take advantage of the gains foreign investment can offer in the future.

¹² The fDi Markets database records announced foreign investment projects, not necessarily projects that are implemented in any given time period. These numbers should be used for illustrative purposes only and as a signal of which markets are active sources and destinations of intra-APEC FDI.

CONCLUSION

APEC economies were magnets for foreign investment over the last decade, attracting over \$4.8 trillion from global firms. These trends show no sign of reversing or slowing. Foreign firms remain positive on the APEC region, announcing over \$330 billion in new investment in the last 2 years and cite growing markets and close proximity as their primary motives. Foreign firms believe that the benefits of investing in the Asia-Pacific region outweigh both the cost and risk of doing so, decisions made easier by a more transparent, accessible investment climate facilitated by the eight principles laid out in the IFAP agenda.

However, these gains were not spread equally. Six APEC economies – Canada; China; Hong Kong, China; Mexico; Singapore; and the United States – garnered 84% of those flows with the United States alone receiving over 40% of total APEC FDI. A majority of internal flows were sourced in a handful of APEC economies as well, indicating that the gains from these investments are going to a small number of economies, but also signaling that many APEC members have substantial opportunity to advance their own positions within the regional investment field.

We also found evidence of positive counter-cyclical resilience in intra-APEC FDI flows, specifically for developing APEC economies. When others retrench and reduce their investments, APEC members maintain their support and continue to invest in the region, a demonstration of the commitment and strong connections which exist between member economies.

Another trend we were able to identify is the positive correlation between per capita GDP and per capita FDI. On trend, those economies with higher per capita GDP also attract more foreign investment per capita. Assigning causation to this trend is difficult without more complete data and, even then, sophisticated statistical techniques would be needed to properly account for strong endogeneity bias. Despite these short-comings, there is evidence that richer economies attract more foreign investment.

Economies also face difficult challenges directing those funds toward sectors in line with their broader economic agendas and adapting the policy environment to match. Yet opportunities exist for nimble, proactive economies that recruit foreign investors and understand the changing dynamics of firm demand. Service sector investment has moved past manufacturing as the area where foreign firms seek to channel their investments, offering recipient economies the opportunity to rise up the global value chain as international connectivity increases.

As a cooperative body, APEC offers substantial room to grow in the investment arena. Only 40% of international funds invested in the region came from other APEC member economies and only 58% of the region is covered by bilateral investment treaties or other international investment agreements. As an established forum seeking common understanding and progress on international economic issues, APEC offers a strong starting position for economies seeking to strengthen their position in the international investment field. IFAP offers a solid policy foundation to enhance an economy's investment climate.

Areas where future APEC cooperation could provide further benefits in facilitating international investment are in access to export markets, openness to trade, and transparency, areas which firms have identified as important factors as they analyze international investment positions and the core focus and strength of APEC. Directing future effort toward these issues could help further enhance APEC economies as a choice destination for foreign investment.

measuring progress

The law of competition (DL 211) states that the National Economic Prosecutor Office is a decentralized public service, with legal personality and independent from any agency or service. It is subject to the supervision of the President of the Republic through the Ministry of Economy, Development and Tourism.

The National Economic Prosecutor is the head of the agency and practices both senior leadership as well as judicial and extrajudicial representation of National Economic Prosecutor Office. The President of the Republic, after a public and open contest, nominates the lawyer who serves a 4 years term as National Economic Prosecutor. Its removal, however, is not under the discretion of the President of the Republic, since it requires the approval of the Supreme Court and should be grounded on specific legal causes.

The Competition Tribunal (TDLC) is a judicial body in charge of adjudicating and solving disputes regarding competition law and issuing decisions in non-adversarial proceedings in competition matters. Competition Advocacy refers to the activities performed by the National Economic Prosecutor Office and the Competition Tribunal not directly implying law enforcement; Competition authorities in Chile conduct activities to advocate competition, in the strict sense, through three approaches: the FNE can persuade in favor of regulatory reform

		<p>directly before the regulator; the FNE can, indirectly through its complaints or reports, request the TDLC measures such as recommendations to regulators or propose regulatory modifications; lastly, the TDLC can formulate recommendations or propose regulatory reforms.</p> <p>As to the task of creating a culture of competition, i.e., to expand support from the community in general to market competition,, the FNE diffuses through various activities the benefits of competition and collaboration with other government agencies in the development of public policies affecting the economic order. Some competition advocacy initiatives include::</p> <ul style="list-style-type: none"> -Market Studies: The FNE performs or outsources market researches in order to increase its knowledge and understanding of markets and economic activities in particular to assess the conditions of competition in a particular sector or industry. -Promotional Materials: Contains materials prepared by the FNE on various issues related to competition. -National Cooperation Agreements: Contains the framework agreements concluded by the FNE with other government agencies and universities to develop joint activities aimed at promoting the benefits of competition. 	<ul style="list-style-type: none"> -Make available to investors all rules and other information relating to investment promotion and incentive schemes -Allow investors to choose their form of establishment within legislative and legal frameworks. -Encourage on-line enquiries and on-line information on all foreign investment issues
--	--	--	---

		<p>The Foreign investment Committee is the Chilean Investment Promotion Agency since March 2012. The Foreign Investment Committee (FIC) is the body representing the State of Chile in their dealings with foreign investors and supports Chile's positioning as a highly attractive destination for foreign investment and international business role in matters related to the administration and dissemination of relevant legal regulations, development of promotional activities of various kinds and the development of relevant information on foreign investment for foreign investors and potential investors.</p> <p>In this regard the Foreign investment Committee:</p> <ul style="list-style-type: none"> -Develop all kinds of initiatives to communicate, promote, coordinate and implement activities designed to foster the entry of Foreign Direct Investment to the country. -Provides general information about Chile, its social and economic environment, the legal framework and policies on foreign investment, providing specific information on starting a business as well as the procedures and regulations for every investor should adhere to enter direct foreign investment to the country. -Ensures proper implementation of the Foreign Investment Statute (Decree Law 600) in order to safeguard the rights of the State, as foreign investors through the dissemination of its content and administration of legal procedures linked to it: analysis 	<ul style="list-style-type: none"> -Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations and conformance requirements -provide advance notice of changes to laws and regulations.

		<p>applications, contracts, authorization of consignments.</p> <p>-Post a record date and accurate statistical welcome foreign investment to Foreign Investment Statute, by systematizing the information on contracts as capital flows that are incurred against them, in order to safeguard the interests investors as well as statistical reporting for public use.</p> <p>Regularly publishes reports on the business climate and Chile and specific investment opportunities in both public and private projects and coordinates business meetings, conferences and seminars.</p> <p>-Coordinates the defense and representation of the Republic of Chile in arbitration court which is demanded by foreign investors, through the Defense Program in Foreign Investment Arbitration.</p>	
IFAP Principle 2 Enhance stability of investment environments, security of property and protection of investments			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Establish timely, secure and effective systems of ownership registration and / or property use rights for land and other forms of property • Create and maintain an effective register of public or state owned property. • Ensure costs associated with land transactions are kept to a minimum including by fostering competition. • Foster the dissemination of accurate market reputation information including creditworthiness and reliability • Explore the possibility of using the World Bank <i>Doing Business</i> indicator “Enforcing Contracts” as the basis for peer dialogue and benchmarking and measuring progress across APEC • Encourage or establish effective formal mechanisms for 	<p>In Force</p> <p>In Force</p> <p>Not in place</p> <p>Not in place</p> <p>In Force</p> <p>In Force</p>	<p>The Chapter XIV of the Central Bank’s Compendium of Foreign Exchange Regulations establishes rules for investment, capital contributions, and foreign credit. Under Chapter XIV, the Central Bank is not allowed to reject foreign investments, although it may impose conditions based on its monetary policy on the transfer of funds into and out of Chile, such as a one-year retention requirement. Once the investments are materialized, investors should provide information to the Central Bank</p>	<p>Invariability of Income Tax Regime</p> <p>Invariability of Indirect Taxes</p>

<p>resolving disputes between investors and host authorities and for enforcing solutions, such as judicial, arbitral or administrative tribunals or procedures</p> <ul style="list-style-type: none"> • Encourage and facilitate the use of arbitration and other means of alternative dispute resolution for the settlement of international commercial disputes between private parties • Facilitate commercial dispute resolution for foreign investors by providing reasonable cost complaint-handling facilities, such as complaint service centres, and effective problem-solving mechanisms • Take steps to accede to an arbitral convention 	<p>In Force</p> <p>-</p> <p>In Force</p>	<p>under Chapter XIV</p> <p>On the other hand, Decree Law 600, Foreign Investment Statute, of the Ministry of Economy, Development and Reconstruction, published in the Official Gazette on December 16, 1993.</p> <p>Any foreign individual or legal entity, as well as Chileans with residence abroad, can invest through D.L. 600. Under this mechanism, investors enter into a legally binding contract with the Chilean State, which cannot be modified unilaterally by the State or by subsequent changes in the law. However, investors may, at any time, request the amendment of the contract to increase the amount of the investment, change its purpose or assign its rights to another foreign investor.</p> <p>In regard to this principle Decree Law N°600, established:</p> <p>Special Advantages for Foreign Investors: Although Chile's Constitution is based on the principle of non-discrimination, D.L. 600 offers some tax advantages for foreign investors. These are not "tax breaks" or "tax holidays", but are intended to provide a stable tax horizon, acting as a form of "tax insurance". D.L. 600 offers several different tax options, but basically allows the investor to lock into the tax regime prevailing at the time an investment is</p>	<p>Special Regime for Large Project</p>
--	--	---	---

made.

Invariability of Income Tax

Regime: All Chilean companies have to pay a First-Category Tax (or Corporate tax) equivalent to 17% Under Chile's Common Tax Regime, a 35% tax is currently levied on distributed or remitted profits. Interest paid to non-residents is also subject to a 35% additional withholding tax, however, interest on loans granted by foreign banking or other financial institutions is subject to a 4% tax, provided that excess indebtedness provisions do not apply. Under DL 600, a foreign investor can opt to lock into an effective fixed overall tax rate of 42% on taxable income for up to ten years, or -under article 11 bis- for up to twenty years in the case of industrial and extractive investments of US\$ 50 million or more. The investor, thereby, acquires immunity from any tax increases in the Common Tax Regime that may occur during that period. The lock-in can be waived at any time, but an investor cannot subsequently revert to the guaranteed 42% rate. The First-Category payment of 17% can be set against tax returns under both the Common Tax and Invariable Tax Regimes.

Invariability of Indirect Taxes:

D.L. 600 states that foreign investments brought into the country in the form of tangible assets are subject to the general

		<p>VAT taxation regime and customs regulations. However, foreign investors are entitled to include a clause in their contracts giving them access to a regime that freezes Value Added Tax (currently at 19%), as well as import tariffs on capital goods for the project, at their rate at the date of the investment. This special regime applies throughout the period authorized for carrying out the investment. Additionally, imports of some of these capital goods such as machinery or equipment are exempt from VAT in the case they are not produced in Chile and are on a list compiled, prepared and published by the Ministry of Economy's Foreign Trade Department. The current list was approved by Decree 204 of the Ministry of Economy, published in the Official Gazette ("Diario Oficial") on December 12, 2002, and is available at the Ministry of Economy's website.</p> <p>Foreign investors who sign a D.L. 600 contract are exempted from VAT on other technology imports, providing they appear on this list compiled by the Foreign Trade Department. The products currently listed include accounting and data processing machines, TV cameras, lasers and magnetic resonance imaging diagnostic equipment (MRI), among several others.</p> <p>Special Regime for Large</p>	
--	--	--	--

		<p>Projects: Under article 11 bis of D.L. 600, investments in new industrial or extractive activities, including mining, are entitled to additional tax benefits, providing they have a value of at least US\$ 50 million. Currently, the Foreign Investment Committee is revising its policy regarding article 11 bis, and new contracts under this regime are not being approved at this time. This policy is subject to change in the future.</p> <p>Expropriation is not defined directly under Chilean law. The Chilean Constitution makes reference to expropriation in article 19.24, which states: "In no case may anyone be deprived of his property, of the assets affected or any of the essential faculties or powers of ownership, except by virtue of a general or a special law which authorizes expropriation for the public benefit or the national interest, duly qualified by the legislator. The expropriated party may protest the legality of the expropriation action before the ordinary courts of justice and shall, at all times, have the right to indemnification for patrimonial harm actually caused, to be fixed by mutual agreement or by a sentence pronounced by said courts in accordance with the law".</p> <p>National jurisprudence has established that expropriation is</p>	Protect Property
--	--	---	------------------

		<p>an administrative act undertaken by virtue of the powers given directly by the legislation to the competent authorities, which must comply with a series of conditions, as set out in the Constitution.</p> <p>Further, Article 19, Nº 24, paragraph 1 of the Constitution guarantees to all persons: “The right of ownership in its diverse aspects over all classes of corporeal and incorporeal property. Only the law may establish the manner to acquire property and to use, enjoy and dispose of it, and the limitations and obligations derived from its social function. Said function includes all the requirements of the Nation’s general interests, the national security, public use and health, and the conservation of the environmental patrimony.”</p> <p>Therefore, limitations to property that can be established by means of an expropriation act can only be carried out by virtue of their social function. The Constitution has not defined this social function, but has rather described in detail its components: the Nation’s general interests, national security, public welfare and health, and the conservation of the environment.</p>

Appendix I: Investment facilitation – menu of actions and measures (Voluntary submission by member economies: Hong Kong, China) (as at 22 August 2012)

IFAP Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies

Specific Actions	Time Table (The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)	Details of implementation (How were the actions being implemented? Or How will the actions be implemented?)	Expected outcomes (Describe the expected outcome within this principle)
<ul style="list-style-type: none"> ▪ Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates. 	On-going	<p>Hong Kong, China (HKC) maintains websites providing updated information. For example, the Government Gazette (available at http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=e&agree=0) and the Bilingual Laws Information System of the Department of Justice (available at http://www.legislation.gov.hk/eng/index.htm) provide up-to-date information on laws and regulations. Judicial decisions are uploaded within 3 working days to the Judiciary website (http://www.judiciary.gov.hk/en/legal_ref/judgments.htm).</p>	Increased accessibility and transparency.
<ul style="list-style-type: none"> ▪ Adopt centralised registry of laws and regulations and make this available electronically. 	On-going	<p>Laws, regulations and administrative procedures are made transparent and accessible in HKC.</p> <p>All primary and subsidiary legislation are published in the Government Gazette and in the Laws of HKC. They are also available freely on the internet.</p> <p>See input provided above under “Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates”.</p>	Increased accessibility and transparency of laws and regulations.

<ul style="list-style-type: none"> Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest 	On-going	<p>Invest Hong Kong (InvestHK) handles inward investment-related enquiries from overseas/ Mainland companies and investors seeking to establish or expand their business operations in HKC. Details of its services are available at http://www.investhk.gov.hk/how-we-can-help.html.</p> <p>Commerce, Industry and Tourism Branch of the Commerce and Economic Development Bureau is responsible for policies on promotion of foreign investment.</p>	
<ul style="list-style-type: none"> Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business 	On-going	<p>HKC maintains one of the world's most liberal, open and transparent investment regimes. In general, there are no special legislations, regulations or administrative guidelines governing foreign investment in HKC, except for broadcasting where the residency requirements concerning ownership of investment are on par with international standards.</p> <p>These regulatory requirements are subject to constant review by the Government, and have been progressively relaxed. There are no restrictions on foreign exchange transactions, capital movement or repatriation of capital and returns related to foreign investments. A level playing field is provided for both foreign and local investors in HKC. Laws and regulations affecting investment are published and made available online in the Bilingual Laws Information System of the Department of Justice (available at http://www.legislation.gov.hk/eng/index.htm).</p>	Increased accessibility and transparency of investment-related regulations.
<ul style="list-style-type: none"> Following establishment of an Investment Promotion Agency (IPA), or similar body, and make its existence widely known 	Implemented	InvestHK is the IPA of HKC responsible for foreign direct investment (FDI). It aims to spearhead HKC's efforts in attracting FDI and promoting HKC's advantages as an international business hub.	

<ul style="list-style-type: none"> Make available to investors all rules and other information relating to investment promotion and incentive schemes 	On-going	<p>InvestHK provides free and customised advice and facilitation services to companies seeking to establish in HKC.</p> <p>InvestHK's website and publications have outlined HKC's uniqueness, competitive edge and advantages.</p>	
<ul style="list-style-type: none"> Allow investors to choose their form of establishment within legislative and legal frameworks. 	On-going	<p>Requirements for establishing a business in HKC are simple and straightforward.</p> <p>Every investor has a wide range of business vehicles to choose when doing business in HKC.</p>	
<ul style="list-style-type: none"> Ensure transparency and clarity in investment-related laws 	On-going	See input provided above under "Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business".	Increased accessibility and transparency in investment-related laws.
<ul style="list-style-type: none"> Improve upon the APEC-wide website (e-portal) to replacing the hard copy publication of the APEC Investment Guidebook (IEG) 	Implemented	HKC welcomes any initiatives that can improve upon the APEC-wide website (e-portal) including replacing the hardcopy of the Guidebook on the APEC website with the electronic version.	Guidebook more accessible to the public.
<ul style="list-style-type: none"> Encourage on-line enquiries and on-line information on all foreign investment issues 	On-going	<p>InvestHK encourages on-line enquiries from overseas and Mainland companies who are seeking to establish or expand their business operations in HKC.</p> <p>Also see input under "Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest".</p>	
<ul style="list-style-type: none"> Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations 	On-going	Changes will be announced by relevant government agencies through the established channels.	

and conformance requirements			
<ul style="list-style-type: none"> To the extent possible, provide advance notice of proposed changes to laws and regulations and provide an opportunity for public comment 	On-going	<p>See input provided above under “Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business”.</p> <p>Legislative proposals (i.e. Bills) are also published in the Government Gazette and available on the internet at http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=e&agree=0. Public consultations are held for certain legislative proposals. Past consultation papers and related documents are available online at http://www.gov.hk/en/residents/government/publication/consultation/archives.htm.</p> <p>Industry consultations and public consultations will be conducted as appropriate. For example, advance notice of proposed changes to banking regulations or launch of new regulations will be provided.</p>	<p>Enhanced opportunities for public comment and increased transparency.</p> <p>Comments received from the public and/or industry will be taken into consideration when finalising the regulations.</p>
<ul style="list-style-type: none"> Explore the possibility of using the international benchmarks on a voluntary basis as a reference point for peer dialogue and measuring progress 	On-going	HKC welcomes exploring the using of international benchmarks on a voluntary basis for peer dialogue and measuring process.	
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> _____ _____ 			

IFAP Principle 2 Enhance stability of investment environments, security of property and protection of investments

Specific Actions	Time Table (The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)	Details of implementation (How were the actions being implemented? Or How will the actions be implemented?)	Expected outcomes (Describe the expected outcome within this principle)
<ul style="list-style-type: none"> Establish timely, secure and effective systems of ownership registration and / or property use rights for land and other forms of property 	On-going	<p>HKC maintains a timely, secure and effective land registration system under the Land Registration Ordinance. The land register is open for public search at www.iris.gov.hk.</p> <p>For enhancing the security of property interests and simplifying conveyancing process, the Land Titles Ordinance (LTO) was enacted in 2004. An amendment bill to LTO is being prepared before its commencement. Consultation with stakeholders on the amendments is under way.</p>	The security of property interests enhanced and conveyancing process simplified.
<ul style="list-style-type: none"> Create and maintain an effective register of public or state owned property. 	On-going	<p>The Government Property Agency collates a register of government sites permanently allocated to the Agency, and all government-owned and leased accommodation for an effective management of government accommodation.</p> <p>Information on any land, with or without buildings, which are available for disposal could be obtained from Lands Department's website (http://www.landsd.gov.hk).</p> <p>Housing Department has maintained a computerized record on all Housing Authority's domestic and non-domestic properties.</p>	Effective management of government accommodation.
<ul style="list-style-type: none"> Ensure costs associated with land transactions are kept to a 	On-going	In HKC, solicitor's remuneration for land conveyancing is negotiable. The market force of	

minimum including by fostering competition.		<p>competition has continued to push down conveyancing fees. The Land Registry costs are minimal, cost per land search is HK\$25 or less and cost for registration of a land transaction is HK\$450 or less.</p> <p>While property investors are required to pay stamp duty on conveyancing instruments, the introduction of e-Stamping services in 2004 has greatly enhanced the efficiency of property stamping. Indeed, when comparing the costs of investing in HKC property market vis-à-vis those in other competing markets, it should be borne in mind that HKC does not impose capital gains tax on property investment.</p>	
<ul style="list-style-type: none"> Foster the dissemination of accurate market reputation information including creditworthiness and reliability 	On-going	<p>Relevant data are being provided on the internet (http://www.hkma.gov.hk/eng/market-data-and-statistics/economic-and-financial-data-for-hong-kong.shtml) and frequent dialogues with credit rating agencies are being engaged.</p>	Promotion of accessibility and transparency of HKC's reputation and creditworthiness.
<ul style="list-style-type: none"> Explore the possibility of using the World Bank Doing Business indicator "Enforcing Contracts" as the basis for peer dialogue and benchmarking and measuring progress across APEC 		<p>HKC welcomes APEC to explore the use of indicators from international organizations as the basis for peer dialogue and benchmarking and measuring progress.</p>	
<ul style="list-style-type: none"> Encourage or establish effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions, such as judicial, arbitral or administrative tribunals or procedures 	On-going	<p>Pre-court dispute resolution in connection with a foreign investment may be achieved in HKC through mediation and arbitration.</p> <p>To further enhance investor protection, the Financial Dispute Resolution Centre (FDRC) has been in operation since June 2012.</p>	Promotion of cost-effective and efficient resolution of disputes and enforcement of solutions between investors and host authorities.

		<p>The FDRC administers an independent and impartial dispute resolution scheme with an aim to resolve monetary disputes between individuals and financial institutions through “mediation first, arbitration next”.</p> <p>See the Annex for further details.</p>	
<ul style="list-style-type: none"> Encourage and facilitate the use of arbitration and other means of alternative dispute resolution for the settlement of international commercial disputes between private parties 	On-going	<p>As regards trade disputes between private parties, the Hong Kong International Arbitration Centre provides services and facilities in arbitration, mediation and conciliation.</p> <p>The New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards is also applicable to HKC.</p> <p>See the Annex for further details.</p>	Promotion of cost-effective and efficient resolution of international commercial disputes between private parties.
<ul style="list-style-type: none"> Facilitate commercial dispute resolution for foreign investors by providing reasonable cost complaint-handling facilities, such as complaint service centres, and effective problem-solving mechanisms 	On-going	See input provided above.	Promotion of cost-effective and efficient resolution of disputes for foreign investors.
<ul style="list-style-type: none"> Take steps to accede to an arbitral convention 	Implemented	The New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards is applicable to HKC.	Promotion of cost-effective and efficient resolution of disputes.
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> _____ _____ 			

IFAP Principle 3 Enhance predictability and consistency in investment-related policies			
Specific Actions	Time Table (The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)	Details of implementation (How were the actions being implemented? Or How will the actions be implemented?)	Expected outcomes (Describe the expected outcome within this principle)
<ul style="list-style-type: none"> Increase use of legislative simplification and restatement of laws to enhance clarity and identify and eliminate inconsistency. 	N/A	<p>Unlike some common law jurisdictions, in general, common law principles developed by HKC courts are not codified or restated in the legislation of HKC.</p> <p>See the Annex for additional information.</p>	Decisions of HKC Courts are published.
<ul style="list-style-type: none"> Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment 	On-going	<p>See input provided above under “Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business”.</p> <p>Equal treatment will be given to all investors in assessing the application so long as any relevant statutory requirements are complied with. For example, any person who intends to acquire 10% or more of the share capital of an authorized institution (AI) incorporated in HKC is required to obtain the prior approval of the Hong Kong Monetary Authority (HKMA) under section 70 of the Banking Ordinance. HKMA will assess the fitness and propriety of the applicants such as financial soundness and integrity in line with international best practices.</p>	Actions being implemented in accordance with the law, where applicable.
<ul style="list-style-type: none"> Reduce the scope for discriminatory bureaucratic discretion in interpreting 	On-going	The Office of the Ombudsman investigates complaints against administrative decisions or acts of public bodies and Government	Establishing an accessible and effective administrative appeal or

investment-related regulations		(http://www.ombudsman.hk/index.shtml). Appeals against certain administrative decisions can be made to the Administrative Appeals Board (http://www.admwing.gov.hk/eng/links/aab.htm). An aggrieved party may also apply for judicial review of administrative decisions made by the Government and public bodies (previous judgments are available at http://www.judiciary.gov.hk/en/legal_ref/judgments.htm).	review mechanism.
<ul style="list-style-type: none"> Maintain clear demarcation of agency responsibilities where an economy has more than one agency screening or authorising investment proposals or where an agency has regulatory and commercial functions 	On-going	<p>In general, there is no screening on investment proposals in HKC.</p> <p>See input provided above under “Establish a single window or special enquiry point for all enquiries concerning investment policies” and “Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment”</p>	
<ul style="list-style-type: none"> Establish and disseminate widely clear definitions of criteria for the assessment of investment proposals 	On-going	<p>HKC has, in general, no restrictions on inward or outward investment, except for very limited regulatory requirements concerning investment in certain sectors. Neither do we set criteria for assessment.</p> <p>For example, for broadcasting sector, the criteria for assessment are clearly set out in the relevant guidance notes on licence application, which are available at http://www.coms-auth.hk/en/licensing/broadcasting/apply/television/index.html and http://www.coms-auth.hk/en/licensing/broadcasting/apply/radio/index.html.</p> <p>For banking sector, any institution which intends to establish a bank branch or subsidiary in HKC is required to meet all licensing criteria specified in the Banking Ordinance. The HKMA has also issued a</p>	Actions being implemented.

		<p>guideline setting out various matters which will be considered in evaluating these applications. The guideline is posted on the HKMA website and available in both English and Chinese. (http://www.hkma.gov.hk/eng/key-functions/banking-stability/guide-authorization.shtml). Also see input provided above under “Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment”.</p>	
<ul style="list-style-type: none"> ▪ Establish accessible and effective administrative decision appeal mechanisms including where appropriate impartial “fast-track” review procedures 	On-going	<p>HKC does not have a designated investment ombudsman establishment. Pre-court dispute resolution in connection with a foreign investment may be achieved in HKC through mediation and arbitration.</p> <p>Also, the Office of the Ombudsman investigates complaints against administrative decisions or acts of public bodies and Government (http://www.ombudsman.hk/index.shtml). Appeals against certain administrative decisions can be made to the Administrative Appeals Board (http://www.admwing.gov.hk/eng/links/aab.htm), and an aggrieved party may also apply for judicial review of administrative decisions made by the Government and public bodies (previous judgments are available at http://www.judiciary.gov.hk/en/legal_ref/judgments.htm).</p> <p>For banking sector, the Banking Ordinance specifies clearly under what circumstances the HKMA shall decline to give consent to establish a bank branch or subsidiary in HKC (i.e. by serving a notice of objection to the applicant). It also sets out clearly that any person aggrieved by the HKMA’s decision to serve a notice of objection may appeal to the Chief Executive in Council against the decision. Also see input under “Establish and disseminate widely clear definitions of criteria for</p>	

		the assessment of investment proposals”.	
Any voluntary actions in addition to the above: <ul style="list-style-type: none"> ▪ _____ ▪ _____ 			
IFAP Principle 4: Improve the efficiency and effectiveness of investment procedures			
Specific Actions	Time Table (The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)	Details of implementation (How were the actions being implemented? Or How will the actions be implemented?)	Expected outcomes (Describe the expected outcome within this principle)
<ul style="list-style-type: none"> ▪ Simplify and streamline application and, registration, licensing and taxation procedures and establish a one-stop authority, where appropriate, for the lodgement of papers 	Implemented	<p>In general, there are no specific forms / licences for foreign investment in HKC.</p> <p>For banking sector, any investor who intends to acquire 10% or more of the share capital of a locally incorporated AI and any institution seeking for authorization in HKC is required to obtain the consent of the HKMA under the Banking Ordinance by submitting a prescribed application form.</p>	
<ul style="list-style-type: none"> ▪ Simplify and reduce the number of forms relating to foreign investment and encourage electronic lodgement 	On-going	See input provided above under “Simplify and streamline application and, registration, licensing and taxation procedures and establish a one-stop authority, where appropriate, for the lodgement of papers”.	
<ul style="list-style-type: none"> ▪ Shorten the processing time and procedures for investment applications. 	On-going	<p>See input provided above under “Simplify and streamline application and, registration, licensing and taxation procedures and establish a one-stop authority, where appropriate, for the lodgement of papers”.</p> <p>For banking sector, the HKMA will handle each</p>	Actions being implemented in accordance with the law, where applicable.

		case (see input under “Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment” relating to the banking sector) expeditiously though the processing time will vary depending on the completeness and complexity of each application.	
<ul style="list-style-type: none"> Promote use of “silence is consent” rules or no objections within defined time limits to speed up processing times, where appropriate 		Efforts are constantly made to streamline procedures where applicable with a view to facilitating investment.	
<ul style="list-style-type: none"> Ensure the issuing of licences, permits and concessions is done at least cost to the investor 	On-going	For banking sector, Authorized Institutions are required to pay license or registration fees annually and such fees are at least cost to the investors.	
<ul style="list-style-type: none"> Simplify the process for connecting to essential services infrastructure 			
<ul style="list-style-type: none"> Implement strategies to improve administrative performance at lower levels of government. 			
<ul style="list-style-type: none"> Facilitate availability of high standard business services supporting investment 	On-going	InvestHK provides information to overseas/Mainland companies and investors to facilitate their setting up or expanding their operations in HKC.

Other voluntary actions in addition to the above: <ul style="list-style-type: none"> ▪ _____ ▪ _____ 			

Key Points on the Legal System and Dispute Resolution in the HKSAR

This note sets out the key points on the legal system and dispute resolution in the HKSAR:

- Laws, regulations and administrative procedures are made transparent and accessible in the HKSAR. All primary and subsidiary legislation are published in the Government Gazette and in the Laws of Hong Kong. They are also available freely on the internet. The Government Gazette is available online at <http://www.gld.gov.hk/cgi-bin/gld/egazette/index.cgi?lang=e&agree=0>, and the Laws of Hong Kong at the Bilingual Laws Information System of the Department of Justice (available at <http://www.legislation.gov.hk/eng/index.htm>).
- Judgments of the Court of Final Appeal, the High Court (Court of Appeal and Court of First Instance), District Court, Family Court and the Lands Tribunal which are of significance as legal precedents on points of law, practice and procedure of the courts and of public interests are available on the internet (http://www.judiciary.gov.hk/en/legal_ref/judgments.htm).
- The text of major bilateral agreements of HKC, including Investment Promotion and Protection Agreements (IPPAs) and CEPA, are also available on the internet. Hyperlinks to external websites containing texts of most of the multilateral treaties applying to HKC have been created. These are available at <http://www.legislation.gov.hk/choice.htm>.
- For settling trade disputes between governments, HKC follows the WTO dispute settlement procedures. Where the other government is not a WTO member, we seek to settle trade disputes by consultation. In addition, HKC has concluded a number of bilateral IPPAs with its major economic partners, each of which provides a mechanism for settling investment disputes through consultation or arbitration under international rules.
- In respect of trade disputes between government and private entities, the ICSID (Washington) Convention and the MIGA Convention are applicable to HKC. A Review Body on Bid Challenges was set up in December 1998 pursuant to the WTO Agreement on Government Procurement (GPA) to receive bid challenges on alleged breaches of the GPA during government tenders (see http://www.tid.gov.hk/english/trade_relations/tradefora/reviewbody/reviewbody.html). The IPPAs also provide mechanism for the government to settle investment disputes with private parties of the other contracting parties through consultation and arbitration under international rules. The Hong Kong International Arbitration Centre (HKIAC) provides services and facilities in arbitration, mediation, and conciliation (<http://www.hkiac.org/>). The Office of the Ombudsman investigates complaints against administrative decisions or acts of public bodies and Government (<http://www.ombudsman.hk/index.shtml>). Appeals against certain administrative decisions can be made to the Administrative Appeals Board (<http://www.admwing.gov.hk/eng/links/aab.htm>). An aggrieved party may also apply for judicial review of administrative decisions made by the Government and public bodies (previous judgments are available at http://www.judiciary.gov.hk/en/legal_ref/judgments.htm).

- As regards trade disputes between private parties, the HKIAC also provides services and facilities in arbitration, mediation and conciliation. HKC also applies the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards.
2. Recent major developments:
- The new Arbitration Ordinance (Cap 609) came into operation on 1 June 2011 (available at <http://www.legislation.gov.hk/eng/index.htm>). The new Ordinance establishes a unitary regime for arbitration in HKC, abolishing the distinction between the domestic arbitration regime and international arbitration regime under the repealed Arbitration Ordinance (Cap 341). The new unitary regime is based on the United Nations Commission on International Trade Law (UNCITRAL) Model Law on International Commercial Arbitration as adopted by the United Nations Commission on the International Trade Law on 21 June 1985 and as amended by that Commission on 7 July 2006.
 - The Mediation Task Force was set up by the Secretary for Justice in November 2010 to implement the recommendations in the Report of the Working Group on Mediation. More details can be found at <http://www.doj.gov.hk/eng/public/mediation.htm>.
 - Legislation on mediation in HKC: The Mediation Ordinance was enacted on 22 June 2012, and will take effect on a day to be announced.
 - The promotion of mediation was enhanced by a Department of Justice's Announcement in the Public Interest ('API') on mediation. The API was broadcast on television and radio from 22 December 2011. The television announcement can be viewed at http://www.doj.gov.hk/eng/api/tv_20120208b.htm.
 - Establishment of the Joint Mediation Helpline Office by major mediation service providers in July 2010 to provide mediation referral services for people in need of mediators (see <http://www.jointmediationhelpline.org.hk/>).

**Appendix I: Investment facilitation – menu of actions and measures
(Voluntary submission by member economies: Indonesia)**

IFAP Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> ▪ Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates. 	Already implemented.	Available through: - BKPM website at www.bkpm.go.id - Bureau of Legislation and Public Relations BKPM	Make all investment-related laws and regulations widely available for public.
<ul style="list-style-type: none"> ▪ Adopt centralised registry of laws and regulations and make this available electronically. 	Already implemented.	General laws and regulations of the Republic of Indonesia is available at the State Secretariat website: www.setneg.go.id Applicable laws and regulations related to investment are available at BKPM website.	Make all investment-related laws and regulations widely available for public.
<ul style="list-style-type: none"> ▪ Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest 	One-Stop-Shop has been implemented since 2009. Investor Relations Unit (IRU) has been running since 2010.	Investors can reach BKPM Investor Relations Unit (IRU) by phone +6221-52921334 or email info@bkpm.go.id during office hours for all investment enquiries. For further consultation & application process enquiries, investors may also consult with BKPM's One-Stop-Shop officers at BKPM front office.	Investors receive direct and comprehensive assistance on investment policies and application procedures.
<ul style="list-style-type: none"> ▪ Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business 	Already implemented.	Investment guide in simple and clear steps as well as information on investment-related regulation are available at BKPM website www.bkpm.go.id both in English and Indonesian Language.	Make all investment-related laws & regulations widely available for public.
<ul style="list-style-type: none"> ▪ Following establishment of an Investment Promotion Agency (IPA), or similar body, and make its existence widely known 	Already implemented.	BKPM actively promotes itself and investment potentials in Indonesia. This task is carried out by the Deputy of Investment Promotion. It carries out	- Wider dissemination of information on BKPM as Indonesia's IPA as well as investment potentials in

			<p>promotional and investment marketing activities such as promoting investment potentials through BKPM international representatives (or IIPC, Indonesia Investment Promotion Centres) in 7 economies; targeted promotion by sector and by area; integrated investment promotion activities; rebranding through media and global economic meetings and business associations; investment mission facilitation and matchmaking; bilateral promotion; global seminar and exhibitions.</p>	<p>the country, both domestically and worldwide. - Comprehensive investment promotion and facilitation.</p>
<ul style="list-style-type: none"> ▪ Make available to investors all rules and other information relating to investment promotion and incentive schemes 	Already implemented.	Available at BKPM website www.bkpm.go.id	Make all investment-related laws & regulations widely available for public.	
<ul style="list-style-type: none"> ▪ Allow investors to choose their form of establishment within legislative and legal frameworks. 	Since 2007	<p>Foreign investors must establish a limited liability company (PT, or Perseroan Terbatas) in order to invest in Indonesia, as stated in Law No. 25/2007 on Investment. Further regulations on limited liability company is stipulated in Law No. 40 of 2007 on Limited Liability Company. On the other hand, in oil and gas upstream sector, foreign companies may take their home country's form of establishment.</p>	-	
<ul style="list-style-type: none"> ▪ Ensure transparency and clarity in investment-related laws 	Already implemented	Every new policies related to investment will be disseminated to all stakeholders both in central and local government.		
<ul style="list-style-type: none"> ▪ Improve upon the APEC-wide website (e-portal) to replacing the hard copy publication of the APEC Investment Guidebook (IEG) 	In progress	Continuously update APEC Investment Guidebook for future updates when the portal is ready.		

▪	Encourage on-line enquiries and on-line information on all foreign investment issues	Refer to IRU stated above.		
▪	Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations and conformance requirements	Already implemented.	Available through: - BKPM website at www.bkpm.go.id - Investor Relations Unit (IRU)	Make all investment-related laws & regulations widely available for public.

Appendix I: Investment Facilitation – Menu of Actions and Measures (Voluntary submission by member economies: Philippines)

IFAP Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and updates. • Ensure transparency and clarity in investment-related laws. • Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations, and conformance requirements. 	Ongoing	<ul style="list-style-type: none"> • As a requirement for effectivity, all laws, rules, regulations and/or amendments thereto must be published either in the Official Gazette or in a newspaper of general circulation. 	
	Ongoing	<ul style="list-style-type: none"> • The Official Gazette is the Philippine Government’s official journal and main publication. It contains the following information: <ul style="list-style-type: none"> ○ all important legislative acts and resolutions of a public nature of the Congress of the Philippines; ○ all executive and administrative orders and proclamations, except those that have no general applicability; ○ decisions or abstracts of decisions of the Supreme Court and the Court of Appeals as may be deemed by said courts of sufficient importance to be so published; ○ such documents or classes of documents as may be required so to be published by law; and, ○ such documents or classes of documents as the President of the Philippines shall determine from time to time to have general applicability and legal effect, or which he may authorize so to be published. 	

	Ongoing	<ul style="list-style-type: none"> Public hearings/consultations are conducted before any laws, rules or regulations are finalized or amended/revised. 	
	Ongoing	<ul style="list-style-type: none"> As required under Article 31 of the Omnibus Investment Code of 1987, the Board of Investments' (BOI) annual Investment Priorities Plan (IPP) is published in a newspaper of general circulation. The IPP shall take effect fifteen (15) days after publication. 	
	Ongoing	<ul style="list-style-type: none"> The BOI regularly conducts orientation seminars for the private sector that cover updates on the rules and regulations of the BOI, the Securities and Exchange Commission (SEC) and the Bureau of Internal Revenue (BIR). 	
<ul style="list-style-type: none"> Adopt centralized registry of laws and regulations and make this available electronically. 	Ongoing	<ul style="list-style-type: none"> The UP Law Center is mandated to be the central depository of all laws, rules and regulations in the country Copies of the Philippine laws may be accessed through the online version of the Official Gazette launched on 26 July 2010. 	
	2012	<ul style="list-style-type: none"> The Official Gazette website will be converted into a Single Portal for Government Information that will serve as a one-stop source for information and service delivery. The website will be expanded to comprehensively contain information on government agencies and the services they provide; laws, executive directives and other official documents of the Republic of the Philippines; and an online feedback mechanism for citizens. 	

	Ongoing	<ul style="list-style-type: none"> The Philippine Reports and the Supreme Court websites are online research tools which compile all the cases decided by the Supreme Court of the Philippines promulgated from 1975 to present. 	
<ul style="list-style-type: none"> To the extent possible, provide advance notice of proposed changes to laws and regulations and provide an opportunity for public comment. 	As the need arises	<ul style="list-style-type: none"> Public hearings/consultations are always conducted before any laws, rules or regulations are finalized or amended/ revised. For instance, in the process of formulating the BOI's Investment Priorities Plan (IPP), consultations are being conducted wherein other government agencies, industry associations, non-government organizations and foreign chambers are invited to provide comments and recommendations and/or submit position papers on the proposed IPP. 	<ul style="list-style-type: none"> This ensures that the private sector is properly informed of any changes in laws, rules and regulations and that the result is always a consolidated effort of the government and the private sector.
<ul style="list-style-type: none"> Following the establishment of an Investment Promotion Agency (IPA), or similar body and make its existence widely known. 	Ongoing	<ul style="list-style-type: none"> The Philippines has a network of Investment Promotion Agencies (IPA) which is comprised mainly of the Board of Investments (BOI), Philippine Economic Zone Authority (PEZA), Clark Development Council (CDC), and Subic Bay Metropolitan Authority (SBMA). 	
<ul style="list-style-type: none"> Make available to investors all rules and other information relating to investment promotion and incentive schemes. 	Ongoing	<ul style="list-style-type: none"> The BOI's web portal features doing business and the cost of doing business in the Philippines, industry profiles, value propositions, investment-related laws, and downloadable forms, among others. 	
	Ongoing	<ul style="list-style-type: none"> The Investment Priorities Plan, which is the primary investment promotion and incentive scheme of the BOI, is published in a newspaper of general circulation for easier accessibility and wider readership. 	
<ul style="list-style-type: none"> Allow investors to choose their form of establishment within legislative and legal frameworks. 	Ongoing	<ul style="list-style-type: none"> There are several types of business enterprises an investor can choose from in establishing operations in the Philippines. These include the following: 	

		<p><i>(under Philippines Laws)</i></p> <ul style="list-style-type: none"> ○ Sole proprietorship ○ Partnership ○ Corporation (i.e., stock and non-stock) <p><i>(under foreign laws)</i></p> <ul style="list-style-type: none"> ○ Branch office ○ Representative office ○ Regional Headquarters/Regional Operating Headquarters(RHQs/ROHQs) 	
<ul style="list-style-type: none"> • Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business. 	Ongoing	<ul style="list-style-type: none"> • The Philippines uses a clear and universally accepted language (i.e., English) in order to ensure transparency and clarity of all of its investment-related regulations. 	<ul style="list-style-type: none"> • Facilitation in the setting-up of businesses in the country.
IFAP Principle 2: Enhance stability of investment environments, security of property and protection of investments			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Establish timely, secure and effective systems of ownership registration and / or property use rights for land and other forms of property. 	Ongoing	<ul style="list-style-type: none"> • The Land Registration Authority (LRA) is currently implementing its Land Titling Computerization Project (LTCP). It is envisioned that a query on the status of a land title can be made anywhere, anytime from any of the various Registries of Deeds nationwide; that there will be a shift from largely paper-based to a largely paperless system. 	<ul style="list-style-type: none"> • Securing tighter control over land titles and hasten the turnaround time in the generation and issuance of land title, among others.
<ul style="list-style-type: none"> • Encourage or establish effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions, such as judicial, arbitral or administrative tribunals or procedures. 	Ongoing	<ul style="list-style-type: none"> • The Philippines now has the Office for Alternative Dispute Resolution (OADR), which is an attached agency of the Department of Justice (DOJ). The OADR aims to develop and expand the use of Alternative Dispute Resolution (ADR) in the private and public sector. This includes 	

<ul style="list-style-type: none"> Encourage and facilitate the use of arbitration and other means of alternative dispute resolution for the settlement of international commercial disputes between private parties. 		<p>arbitration, mediation, conciliation, early neutral evaluation, mini-trial, and any combination thereof.</p> <ul style="list-style-type: none"> The Philippines also does have a Construction Industry Arbitration Commission (CIAC) which shall perform, among others, the following functions: <ul style="list-style-type: none"> to formulate and adopt an arbitration program for the construction industry; to enunciate policies and prescribe rules and procedures for construction arbitration; to supervise the arbitration program, and exercise such authority related thereto as regards the appointment, replacement or challenging of arbitrators; and, to direct its officers and employees to perform such functions as may be assigned to them from time to time. 	
<ul style="list-style-type: none"> Take steps to accede to an arbitral convention. 		<ul style="list-style-type: none"> The Philippines is signatory to WTO, ICSID and UNCITRAL. 	<ul style="list-style-type: none"> More venues for the effective resolution of disputes through arbitration.

IFAP Principle 3: Enhance predictability and consistency in investment-related policies

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment. 	Ongoing	<ul style="list-style-type: none"> The Philippines treats investors and investments equally, whether foreign or local, provided that such treatment is allowed under its laws, rules and regulations. 	
<ul style="list-style-type: none"> Reduce the scope for discriminatory bureaucratic discretion in interpreting 	Ongoing	<ul style="list-style-type: none"> Republic Act No. 9485, otherwise known as the “Anti-Red Tape Act of 2007” aims to promote transparency in the government 	Facilitation in the setting-up of businesses in the country.

investment-related regulations.		<p>with regard to the manner of transacting with the public by requiring each agency to simplify frontline service procedures, formulate service standards to observe in every transaction and make known these standards to client.</p> <ul style="list-style-type: none"> • Section 6 of RA No. 9485 provides for the setting up of service standards known as the “Citizen’s Charter” in all government agencies including departments, bureaus, offices, instrumentalities, or government-owned and/or controlled corporations, or local government or district units. The Citizen’s Charter shall be in the form of information billboards which should be posted at the main entrance of offices or at the most conspicuous place, and in the form of published materials written either in English, Filipino, or in the local dialect, that detail: <ul style="list-style-type: none"> a. The procedure to obtain a particular service; b. The person/s responsible for each step; c. The maximum time to conclude the process; d. The document/s to be presented by the customer, if necessary; e. The amount of fees, if necessary; and f. The procedure for filing complaints. 	
<ul style="list-style-type: none"> • Maintain clear demarcation of agency responsibilities where an economy has more than one agency screening or authorizing investment proposals or where an agency has regulatory and commercial functions. 	Ongoing	<ul style="list-style-type: none"> • The Philippines’ various government agencies involved in the evaluation of investment project proposals have clear mandate which allows proper demarcation of responsibilities in screening and/or authorizing project proposals. 	Facilitation in the setting-up of businesses in the country.
<ul style="list-style-type: none"> • Establish and disseminate widely clear definitions of criteria for the assessment of investment proposals. 	Ongoing	<ul style="list-style-type: none"> • The country’s various agencies involved in the evaluation of investment proposals such as the Board of Investments (BOI) publishes 	Facilitation in the setting-up of businesses in the country.

		electronically its sets of criteria for project registration and incentives availment, e.g. Investments Priorities Plan (IPP). For projects not qualified for incentives, the other government agencies involved in project registration such as the Securities and Exchange Commission (SEC) also has established criteria which can be accessed electronically.	
IFAP Principle 4: Improve the efficiency and effectiveness of investment procedures			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Simplify and streamline application and, registration, licensing and taxation procedures and establish a one-stop authority where appropriate for the lodgement of papers. 	Ongoing	<ul style="list-style-type: none"> • The Business One-Stop Shop Action Center (BOSSAC) provides business counseling and information to investors inquiring on how to do business in the Philippines. It provides a one-stop processing center to assist investors on their pre-operating stages. 	<ul style="list-style-type: none"> • More effective and efficient delivery of investment services to facilitate business start-ups.
<ul style="list-style-type: none"> • Simplify and reduce the number of forms relating to foreign investment and encourage electronic lodgement. • Shorten the processing time and procedures for investment applications. • Ensure the issuing of licences, permits and concessions is done at least cost to the investor. • Implement strategies to improve administrative performance at lower levels of government. 	Ongoing	<ul style="list-style-type: none"> • The Philippine Business Registry (PBR) is a government project that integrates the services of all agencies involved in business registration, such as the Department of Trade and Industry (DTI), Securities and Exchange Commission (SEC), Bureau of Internal Revenue (BIR), Social Security System (SSS), Home Development Mutual Fund (Pag-IBIG), Philippine Health Insurance Corporation (PhilHealth), Local Government Units (LGUs) and other permit/license-issuing agencies. <p>Each of the agencies' computerized registration systems will be interlinked so that applicants need not physically go to each agency to register their businesses (i.e., Business Name Certificate Number;</p>	<ul style="list-style-type: none"> • Eliminate the need for investors to go physically from one government agency to another • Cut down business registration to 30 minutes from 1 to 2 weeks

<ul style="list-style-type: none"> Facilitate availability of high standard business services supporting investment 		Taxpayer Identification Number; Employer's Registration Number; Employer's Registration Number; Employer's ID Number).	
	Ongoing	<ul style="list-style-type: none"> The Trouble-free Registration with BOI (TURBO) Program simplifies the procedures and "strips down" the existing BOI application forms and requirements to the barest minimum. 	<ul style="list-style-type: none"> Number of days in processing the application is reduced from twenty (20) working days to just five (5) days.
	Ongoing	<ul style="list-style-type: none"> Nationwide Streamlining of Business Permits and Licensing Systems (BPLS) Reform Project for LGUs. 	<ul style="list-style-type: none"> With the BPLS, all cities and municipalities shall use a single unified form in processing new applications for business permits and business renewals to consolidate all the information about a business registrant needed by various local and national agencies. Further, the BPLS observes standard procedures and processing time (i.e., new business permits will take only 5 days and one day or less for renewals).

IFAP Principle 5: Build constructive stakeholder relationships

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> To the extent possible, establish a mechanism to provide interested parties (including business community) with opportunity to comment on proposed new laws, regulations and policies or changes to existing ones prior to their 	As the need arises	<ul style="list-style-type: none"> The public is invited to participate in the hearings of proposed laws, rules and regulations or changes thereto. They are also encouraged to submit position papers to effectively articulate their concerns. 	<ul style="list-style-type: none"> This ensures that the private sector is properly informed of any changes in laws, rules and regulations and that the result is always a consolidated effort of the government and the private

implementation.			sector.
<ul style="list-style-type: none"> Promote the role of policy advocacy within IPAs as a means of addressing the specific investment problems raised by investors including those faced by SMEs. 	Ongoing	<ul style="list-style-type: none"> The “Doing Business in Free Trade Areas” (DBFTA) Program is a trade advocacy and information campaign aimed at increasing exporters’ awareness of the Philippines’ free trade agreements. Organized by the DTI, the DBFTA sessions/seminars are held nationwide in collaboration with the academe, business organizations, and industry experts. 	
<ul style="list-style-type: none"> Promote backward investment linkages between businesses, especially between foreign affiliates and local enterprises including through the promotion of industry clusters. 	Ongoing	<ul style="list-style-type: none"> The Philippines through the BOI promotes backward and forward linkages of investment projects in support of the country’s industrial development plan. Further, as part of its strategic framework for industry development, the country shall also undertake “clusterization” of its target industry sectors. 	The promotion of forward and backward linkages is expected to promote stronger industry network and development of value chain.
IFAP Principle 6: Utilise new technology to improve investment environments			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Promote the introduction and use of new technologies aimed at making the investment process simpler and faster. 	Ongoing	<ul style="list-style-type: none"> The Philippine Business Registry (PBR) is a web-based system that shall serve as a one-stop shop for investors who need to transact with several agencies to be able to start operating a business. Each of the agencies’ computerized registration systems will be interlinked so that applicants need not physically go to each agency to register their businesses. 	<ul style="list-style-type: none"> Eliminate the need for investors to go physically from one government agency to another Cut down business registration to 30 minutes from 1 to 2 weeks

	Ongoing	<ul style="list-style-type: none"> The Philippine National Single Window (NSW) is a computerized internet-based system that allows parties involved in trade to lodge information and documents with a single entry point to fulfill all import, export, and transit-related regulatory requirements. <p>There are about 40 government agencies involved in the issuance of import and export licenses, permits and clearances for trade facilitation over Philippine borders.</p>	<ul style="list-style-type: none"> Lower business costs Faster trade documentation process and release time Easier trader compliance More effective and efficient deployment of resources Increased transparency and predictability of government processes. Business transactions to be performed with government agencies regardless of time and location via internet and mobile phone.
<ul style="list-style-type: none"> Maintain adequate and effective protection of technology and related intellectual property rights. 	Ongoing	<ul style="list-style-type: none"> Republic Act No. 8293, otherwise known as the “Intellectual Property Code of the Philippines” was enacted to strengthen the country’s intellectual and industrial property system and created the Intellectual Property Office (IPO), which is the government agency mandated to ensure the effective use of the Intellectual Property System in the Philippines. 	
IFAP Principle 7: Establish monitoring and review mechanisms for investment policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Conduct periodic reviews of investment procedures ensuring they are simple, transparent and at lowest possible cost. 	Once every two (2) years or as the need arises	<ul style="list-style-type: none"> The Regular Foreign Investment Negative List (FINL) has two component lists: List A (enumerates the areas of activities reserved to Philippine nationals by mandate of the 	

		Constitution and specific laws), and; List B (contains areas of activities and enterprises where foreign ownership is regulated pursuant to law). List A is being reviewed and/or amended at any time to reflect changes, if any, to the Constitution and specific laws. On the other hand, List B is regularly being reviewed and/or amended once every two (2) years.	
	Once a year	<ul style="list-style-type: none"> Being the government's anchor investment promotion program, the BOI's IPP is being reviewed annually to identify priority investment areas for economic development. 	
IFAP Principle 8: Enhance international cooperation			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> To the best extent possible, accede to, or observe, multilateral and/or regional investment promotion and facilitation conventions. 	Ongoing	<ul style="list-style-type: none"> The Philippines is signatory to several investment agreements (bilateral and regional) and is in negotiations with several others. 	
<ul style="list-style-type: none"> Make use, where appropriate, of international and regional initiatives aimed at building investment facilitation and promotion expertise, such as those offered by the World Bank, UNCTAD and OECD. 	Ongoing	<ul style="list-style-type: none"> The Philippines participates in such exercises, most recently several officials participated in a best practices forum under the auspices of the AANZFTA – Economic Cooperation Work Program. 	<ul style="list-style-type: none"> This would result to an improved investment promotion and facilitation practice in the country.
<ul style="list-style-type: none"> Ensure measures exist to ensure effective compliance with commitments under international investment agreements. 	Ongoing	<ul style="list-style-type: none"> The Philippines ensures that its Agreements are compliant with its existing laws. 	<ul style="list-style-type: none"> The commitments made are consistent with its laws thereby ensuring transparency and stability.
	Ongoing	<ul style="list-style-type: none"> The Philippines ensures that it complies with its commitments under various international 	<ul style="list-style-type: none"> The Philippines' compliance with obligations under the

		agreements through a system of periodic review and monitoring of the implementation of the same.	different investment treaties/agreements.
<ul style="list-style-type: none"> Review existing international agreements and treaties to ensure their provisions continue to create a more attractive environment for investment. 	Ongoing	<ul style="list-style-type: none"> A review of all the Philippines' existing Agreements resulted in the creation of the 2009 PH Model Investment Agreement which is now used in current negotiations and the continuous evaluation of investment agreements. 	<ul style="list-style-type: none"> This provides clear and defined commitments thereby creating a predictable investment environment.

Appendix I: Investment facilitation – menu of actions and measures (Voluntary submission by member economies: Russia)

IFAP Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> ▪ Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates. ▪ Adopt centralised registry of laws and regulations and make this available electronically. ▪ Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest ▪ Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business ▪ Following establishment of an Investment Promotion Agency (IPA), or similar body, and make its existence widely known 1. <i>The Russian Direct Investment Fund (RDIF)</i> 2. <i>The Strategic Initiatives Agency (ASI)</i> 3. <i>Russian Agency for Export Credit and Investment Insurance (EXIAR)</i> ▪ Make available to investors all rules and other information relating to investment promotion and incentive schemes ▪ Allow investors to choose their form of establishment within legislative and legal frameworks. 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)</p> <ol style="list-style-type: none"> 1. <i>Was created in 2011 under the leadership of President Dmitry Medvedev and Prime Minister Vladimir Putin</i> 2. <i>Was established in May 2011</i> 3. <i>Established in September 2011 following the recent dedicated federal law</i> 	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ol style="list-style-type: none"> 1. <i>The Direct Investment Fund is mandated to co-invest alongside some of the largest and most sophisticated investors globally – thus acting as a catalyst for direct investment in Russia.</i> <p>CO-INVESTMENT MODEL</p> <hr/> <p><i>In every transaction it enters into, RDIF is mandated to co-invest with an international investor. The minimum ratio of co-investment by qualified co-investors and RDIF is 1:1, meaning that, for every dollar invested by RDIF, at least one dollar must be invested by a co-investor.</i></p> <p><i>To qualify, prospective co-investors must have either assets under management exceeding \$1 billion (for financial investors) or revenues over \$1 billion (for strategic investors).</i></p> <p>INVESTMENT PROCESS</p> <hr/> <p><i>Aside from its co-investment requirement, RDIF will behave like</i></p>	<p>(Describe the expected outcome within this principle)</p> <ol style="list-style-type: none"> 1. <i>To maximize return on investment</i> <ul style="list-style-type: none"> • <i>To contribute to economic modernization</i> • <i>To catalyze foreign investment</i> • <i>To spur innovation and the exchange of ideas</i> • <i>To act transparently and exercise good stewardship of funds</i> 2. <i>Elimination of administrative barriers and co-investment attraction in future commercial, social and infrastructure projects. The main goal is to facilitate investment environment particularly at the regional level.</i> 3. <i>Enhancement and support for Russian technology and</i>

<ul style="list-style-type: none"> ▪ Ensure transparency and clarity in investment-related laws ▪ Improve upon the APEC-wide website (e-portal) to replacing the hard copy publication of the APEC Investment Guidebook (IEG) ▪ Encourage on-line enquiries and on-line information on all foreign investment issues ▪ Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations and conformance requirements ▪ To the extent possible, provide advance notice of proposed changes to laws and regulations and provide an opportunity for public comment ▪ Explore the possibility of using the international benchmarks on a voluntary basis as a reference point for peer dialogue and measuring progress 		<p><i>any other private equity firm. It will make investments, in some cases making use of leverage, with a time horizon to exit of five to seven years.</i></p> <p><i>RDIF's investments will range in size from \$50 million to \$500 million – implying a total equity commitment of at least \$100 million to \$1 billion, given the co-investment requirement..</i></p> <p><i>2. The main areas of the ASI are: “New business”, “Young professionals”, and “Social projects”.</i></p> <p><i>Within the framework of the “National business initiative” there are 22 roadmaps on different sphere of government regulation under development. These roadmaps provide legal framework enhancement and implementation of measures aimed at achieving the effects provided by the legislative initiatives.</i></p> <p><i>At present a lot of work has been done to formulate roadmaps on the four priority areas. There are: simplification of procedures for obtaining building permits, increasing the availability of energy infrastructure, customs administration and foreign markets access support.</i></p> <p><i>ASI has developed a Regional Policy Standard for the development of business environment, which is currently being implemented in several</i></p>	<p><i>equipment export</i></p> <ul style="list-style-type: none"> - <i>Insurance support for Russian exporters entering new and risky markets</i> - <i>Progressive implementation and adaptation of the best international practices and standards in export credit insurance in the Russian system of financial export support</i> - <i>Enhanced access to financing</i> - <i>Increased exports to new markets</i> - <i>Support for private banks in financing Russian exporters</i> <p><i>EXIAR targets covering USA 10 billion new export sales in 2012-2014</i></p> <p><i>According to the Ministry of Economic Development, the work of the EXIAR will provide insurance support for almost 17, 6% of total Russian export machinery, equipment and vehicles, construction and engineering services.</i></p>

Appendix I: Investment facilitation – menu of actions and measures (Voluntary submission by member economies: Singapore)

IFAP Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> ▪ Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates. ▪ Adopt centralised registry of laws and regulations and make this available electronically. ▪ Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest ▪ Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business ▪ Following establishment of an Investment Promotion Agency (IPA), or similar body, and make its existence widely known ▪ Make available to investors all rules and other information relating to investment promotion and incentive schemes ▪ Allow investors to choose their form of establishment within legislative and legal frameworks. ▪ Ensure transparency and clarity in investment-related laws ▪ Improve upon the APEC-wide website (e-portal) to replacing the hard copy publication of the APEC Investment Guidebook (IEG) ▪ Encourage on-line enquiries and on-line information on all foreign investment issues ▪ Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations and conformance requirements ▪ To the extent possible, provide advance notice of proposed changes to laws and regulations and provide an opportunity for public comment ▪ Explore the possibility of using the 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)</p> <ul style="list-style-type: none"> • To facilitate the publication of laws, judicial decisions and administrative rulings, the online database of Singapore's legislation was launched in November 2001. • To establish a single window for all enquiries concerning investment in Singapore, the Singapore Economic Development Board (EDB) was formed in 1961. • To provide an opportunity for public comment on proposed changes to laws and regulations, Singapore launched the REACH (reaching everyone for active citizenry @home) initiative in October 2006. 	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • In November 2001, the Attorney-General's Chambers (AGC), together with the Ministry of Law and the Ministry of Finance, launched the online database of Singapore's legislation. The online database is provided and maintained by AGC, and is updated on a monthly basis. • Singapore has a regulatory investment environment based on clarity, fair competition and sound business practices. There are minimal investment regulations. • The Economic Development Board (EDB) was formed in 1961 with a budget of \$100 million and the objective of convincing foreign investors that Singapore was a good place for business. • To date, EDB maintains a comprehensive website that provides a helpful "Guide to Investing in Singapore". This online guide that provides a repository of useful links and some information on how to invest in Singapore. This includes registering a business, finding business premises, recruitment and training of staff, and on other business-related aspects to consider such as Singapore's taxation regime and the Singapore Stock Exchange. In this regard, EDB continues to act as a one-stop agency which facilitates and supports local and foreign investors in both manufacturing and services sectors, as they move up the value chain to achieve higher sustainable returns and seek out new business opportunities. • Public consultations are conducted through various channels including ministries websites. REACH became an additional platform through which public consultations and announcements could be made. EDB also maintains constant communication with Singapore companies, which allows EDB to provide advance notice of proposed changes to laws and regulations, and to provide an opportunity for business' comments if and when possible. • To allow investors their choice of establishment within legislative and legal frameworks, Singapore introduced the Limited Liability Partnerships in 2005 and Limited Partnerships in 2009. The addition of these 2 new business vehicles i.e. Limited Liability Partnership and Limited Partnership gives would-be entrepreneurs a wider choice of business vehicles to choose from, when they decide to register a business with ACRA. • In terms of using international benchmarks as a reference point, Singapore 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • The official Singapore government website for online publication of legislation can be found at http://statutes.agc.gov.sg. The website contains: (i) the current versions of Singapore's legislation; (ii) advanced searching and browsing features; and (iii) a subject index. • Singapore's investment regulations and procedures are promptly published or made available online. Relevant websites include: <ul style="list-style-type: none"> ○ http://www.enterpriseone.gov.sg ○ http://www.acra.gov.sg ○ http://www.sedb.com • The EDB (http://www.edb.gov.sg) is the lead government agency charged with developing and implementing strategies to enhance Singapore's position as a global business centre, including through acting as a one-stop-shop for local and foreign investors. • This "Guide to Investing in Singapore" may be found at: http://www.edb.gov.sg/edb/sg/en_uk/index/why_singapore/Guide_to_Investing_in_Singapore.html • Contact information for the EDB Head Office and its numerous business centres worldwide is also available at: http://www.edb.gov.sg/edb/sg/en_uk/index/ContactEDB.html. Investors/ Clients may enquire with EDB at: To contact EDB via email: clientservices@edb.gov.sg. • Singapore promotes feedback and consultation with the public on proposed investment measures. Public agencies post consultation payers to seek feedback and ideas on the government online consultation portal, REACH (http://www.reach.gov.sg). REACH is the lead agency for engaging and connecting with the people, and continues to encourage and promote public participation in shaping government policies. Upon request, the Singapore government endeavors to promptly provide information and respond to queries on actual or proposed investment measures. There are several legal

IFAP Principle 2 Enhance stability of investment environments, security of property and protection of investments

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Establish timely, secure and effective systems of ownership registration and / or property use rights for land and other forms of property • Create and maintain an effective register of public or state owned property. • Ensure costs associated with land transactions are kept to a minimum including by fostering competition. • Foster the dissemination of accurate market reputation information including creditworthiness and reliability • Explore the possibility of using the World Bank <i>Doing Business</i> indicator “Enforcing Contracts” as the basis for peer dialogue and benchmarking and measuring progress across APEC • Encourage or establish effective formal mechanisms for resolving disputes 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP’s actions)</p>	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • To establish an effective system of ownership registration for property and land rights, Singapore has implemented a system of registration of titles which is guaranteed by the government since 1960. Under this system, a Land Titles Register is maintained. This register shows who owns the land and whether there are encumbrances, such as mortgages or charges affecting the land. Registration is mandatory to effect the transfer of an estate or interest in land. • Singapore also has a coordinated cadastral survey system that could identify definitively the boundaries of the property. • In 1995, the Singapore Titles Automated Registration System (STARS) was implemented. STARS is an online registration and public search system for private properties. • In 1998, the Integrated Land Information Services (INLIS) was implemented. INLIS is a one-stop portal for industry, professionals, businesses and the general public to obtain land-related information via the internet. • In 2003, the STARS eLodgment System (ELS) was implemented. ELS allows 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • With these systems in place, a secure land registration system and an authoritative record of land transactions is guaranteed by the Government. There is also faster turnaround time for registration and greater accessibility and affordability of land information. • These schemes intend to promote Singapore as an investment destination. Relevant websites include: <ul style="list-style-type: none"> ○ http://www.inlis.gov.sg ○ http://www.stars.gov.sg • Relevant websites for SPIO and onemap are as follows: <ul style="list-style-type: none"> ○ http://www.spio.sla.gov.sg ○ http://www.onemap.sg • In terms of formal mechanisms for resolving disputes, investors have access to a range of effective formal mechanisms for resolving disputes such as litigation in the Singapore High Court or the District Court, arbitration, mediation and conciliation. Below are some examples:

<p>between investors and host authorities and for enforcing solutions, such as judicial, arbitral or administrative tribunals or procedures</p> <ul style="list-style-type: none"> • Encourage and facilitate the use of arbitration and other means of alternative dispute resolution for the settlement of international commercial disputes between private parties • Facilitate commercial dispute resolution for foreign investors by providing reasonable cost complaint-handling facilities, such as complaint service centres, and effective problem-solving mechanisms • Take steps to accede to an arbitral convention 		<p>the electronic lodgment of documents in respect of land transactions over the internet. Documents can be lodged anywhere via the internet as long as the lodger holds a digital certificate to authenticate his identity over the internet. ELS also safeguards the integrity of the land-register as registration of documents is based on information entered at source by the law firms without the need to re-enter the data thereby ensuring greater accuracy.</p> <ul style="list-style-type: none"> • Under the Singapore Land Authority (SLA), Singapore also manages a diverse portfolio of State land and buildings. The buildings include commercial complexes, residential and shop-house units, and former government buildings converted for commercial, institutional and other uses. • The State Property Information Online (SPIO), implemented in 2002, is a one-stop portal providing information relating to State properties managed by SLA which are available for rental or tender. The LandQuery feature in OneMap allows a member of the public to enquire whether a piece of land is state-owned or privately owned. If a piece of land is state-owned, the name and contact number of the government agency maintaining the property will be shown. • In terms of reasonable costs for land transactions, Fees payable in Singapore are:- <ul style="list-style-type: none"> (a) stamp fees; (b) registration fees; (c) search fees; and (d) solicitors' professional fees <ul style="list-style-type: none"> ○ The stamp fees are under the purview of IRAS. ○ Registration fees and search fees payable to SLA are prescribed under the Land Titles Rules and based on cost recovery principle. ○ Search fees also include fees payable in respect of a bankruptcy search, winding-up search, etc. These fees are under the purview of IPTO and ACRA respectively. ○ Solicitors' professional fees are paid to the solicitors acting for the parties in the land transactions. <p>With the abolishment of scale fees in Feb 2003, such fees are now based on open market competition.</p> <ul style="list-style-type: none"> • In terms of market reputation for Singapore, Singapore's international rankings and the relevant facts and figures are available online at: http://www.edb.gov.sg/edb/sg/en_uk/index/why_singapore/singapore_rankings.html • In terms of mechanisms to resolve disputes between investors and host authorities, Singapore has signed Investment Guarantee Agreements (IGAs) with many countries. IGAs generally provide for upfront consent by 	<ul style="list-style-type: none"> ○ For Arbitration: Establishment of the Singapore International Arbitration Centre (www.siac.org.sg) <p>For Mediation: Singapore Mediation Centre (www.mediation.com.sg), Primary Dispute Resolution Centre at the Subordinate Courts (app.subcourts.gov.sg/civil/page.aspx?pageid=3779)</p> <ul style="list-style-type: none"> • According to global indicators (e.g. World Competitive Yearbook, Global Competitiveness Report), Singapore has been highly ranked by global indicators for our efficient legal framework and fair administration of justice. • The growth of international arbitration has been encouraged in Singapore with the ratification of international conventions, enactment of supporting laws and the creation of arbitration and mediation bodies. • Singapore's notable developments in this area include: <ol style="list-style-type: none"> The launch of Maxwell Chambers, in Jan 2010, providing world-class hearing rooms and facilities for dispute resolution, and co-locating key arbitration institutions. Singapore has had an Agreement with the Permanent Court of Arbitration (the "PCA") since Sept 2007 which establishes a PCA Facility in Singapore to handle cases arising out of Asia. Through this arrangement, the PCA would be able to offer their expertise in dispute resolution to countries in this region in a more effective manner, especially in legal issues and disputes pertaining to matters such as investment treaties. Singapore is the first country in the region to have a PCA Facility. The establishment of the SIAC in 1991. The establishment of Singapore Mediation Centre in 1997. Singapore organized the "Arbitration Dialogue 2011" in November last year to discuss and gather feedback on the upcoming changes to Singapore's International Arbitration Act ("IAA Act"). Singapore organised another "Arbitration Dialogue" in June this year for a select group of top arbitrators around the world to discuss the development of Singapore's legal and arbitration sector and Singapore's IAA Act. Singapore hosted the launch of the very first UNCITRAL Digest of Case Law event in June this year. Singapore hosted the International Council for Commercial Arbitration (ICCA) in June 2012. Singapore will be setting up an academy later this year with the view of developing this into a world-class centre of excellence in international arbitration.
---	--	---	---

		<p>parties to resolve disputes through compulsory dispute settlement mechanisms, including negotiations and arbitration. This ensures that investors have an avenue to settle their disputes with the other contracting state. The list of IGAs is publicly available on MTI's website.</p> <ul style="list-style-type: none"> • Moreover, Singapore has also established the Singapore International Arbitration Centre (www.siac.org.sg) and the Singapore Mediation Centre (www.mediation.com.sg) to support alternative dispute resolution. Where appropriate, parties may also seek recourse, including enforcing their arbitral awards, through our domestic court system. • For the resolution of international commercial disputes between private parties, Singapore ratified the ICSID Convention which established the International Centre for Settlement of Investment Disputes (ICSID) to provide facilities for the conciliation and arbitration of disputes between member countries and investors who qualify as nationals of other member countries in 1968. • Singapore acceded to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (the New York Convention) in 1986. Singapore joined ASEAN to strengthen the available formal dispute settlement mechanism with the ASEAN Protocol on Enhanced Dispute Settlement Mechanism signed in November 2004. • Singapore enacted: <ul style="list-style-type: none"> (a) the Arbitration Act to provide for the conduct of arbitration; (b) the Arbitration (International Investment Disputes) Act to implement the International Convention on the Settlement of Investment Disputes between States and Nationals of other States; and (c) the International Arbitration Act to make provision for the conduct of international commercial arbitrations based on the Model Law on International Commercial Arbitration adopted by the UNCITRAL and conciliation proceedings and to give effect to the New York Convention. • The Singapore International Arbitration Centre was established in 1991 as an independent non-profit organization to meet the demands of the international business community for a neutral, efficient and reliable dispute resolution institution. The Singapore Mediation Centre was set up in 1997 as a non-profit organization to promote mediation and to provide a full range of alternative dispute resolution services. • Maxwell Chambers was launched in January 2010 to provide one-stop, best of class facilities and services for the conduct of Alternative Dispute Resolution activities in Singapore. Maxwell Chambers houses top international alternative dispute resolution institutions under one roof. • Singapore organized the "Arbitration Dialogue 2011" in November last year to discuss and gather feedback on the upcoming changes to Singapore's International Arbitration Act. 	<ul style="list-style-type: none"> • Singapore also hopes to provide an environment that is conducive and attractive for commercial dispute resolution. • Singapore is a signatory to the United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York Convention) and member of ICSID. The provisions of the ICSID Convention are incorporated into domestic law through the Arbitration (International Investment Disputes) Act (Chapter 11); and the provisions of the New York Convention as well as the UNCITRAL Model Law on International Commercial Arbitration are incorporated through the International Arbitration Act (Chapter 183A).
--	--	--	---

	<ul style="list-style-type: none"> In terms of an arbitral convention, Singapore has been a signatory to the New York Convention, and a member of ICSID, since November 1986. 	<ul style="list-style-type: none"> Singapore also hosted the International Council for Commercial Arbitration (ICCA) in June 2012. Singapore continues to develop its arbitration sector in the legal scene. The Ministry of Law (MinLaw), in collaborate with partner agencies and stakeholders, including the Singapore International Arbitration Centre (SIAC), AGC, Singapore Academy of Law (SAL), Law Society, the Courts, and Maxwell Chambers has sought to create an environment that is conducive and attractive for arbitration hearings. In addition, Singapore has in place domestic procedures (e.g., Appeals Board, Copyright Tribunals) to provide for prompt and fair review of measures. Singapore allows for various dispute resolution mechanisms, including mediation, arbitration and litigation which investors can resort to. There are also Tribunals/ Appeals Boards established to provide prompt and fair review of administrative decisions which may affect investors. For example, the Appeals Board (Land Acquisition) hears appeals from any landowner whose land has been acquired and who is dissatisfied with the compensation awarded and the Copyright Tribunal which is a forum for resolving disputes between copyright owners and users of their material. Singapore's legal framework and laws are regularly updated to support international arbitration and be aligned with international practices. The International Arbitration Act – which is based on the UNCITRAL Model Law of 1985 – was amended in 2009, and in 2012 to enhance the framework supporting international commercial arbitration, and keeping pace with international developments.

IFAP Principle 4: Improve the efficiency and effectiveness of investment procedures

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Simplify and streamline application and, registration, licensing and taxation procedures and establish a one-stop authority, where appropriate, for the lodgement of papers • Simplify and reduce the number of forms relating to foreign investment and encourage electronic lodgement • Shorten the processing time and procedures for investment applications. • Promote use of “silence is consent” rules or no objections within defined time limits to speed up processing times, where appropriate • Ensure the issuing of licences, permits and concessions is done at least cost to the investor • Simplify the process for connecting to 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP’s actions)</p> <ul style="list-style-type: none"> • In terms of establishing connection to essential services, EDB has continuously maintained its role as a one-stop-shop for investors, fielding a website containing relevant links connecting investors to other essential agencies, 	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • For efficient and effective investment procedures, Singapore has implemented such electronic schemes: <ul style="list-style-type: none"> ○ Bizfile (www.bizfile.gov.sg) is Accounting and Corporate Regulatory Authority of Singapore (ACRA)’s online filing and information retrieval system, serving as a one-stop facilitator for businesses. With the integration of e-services with multiple agencies, business owners can be GST-registered, activate their customs account, among other business processes. ○ The Inland Revenue Authority of Singapore (IRAS) and the Singapore Land Authority (SLA) have streamlined the electronic lodgement process such that it is no longer necessary to present Stamp duty certificates when documents are lodged electronically with the Land Titles Registry. Examples include mortgages, transfers and leases. From 6 Mar 2012, law firms no longer need to present Stamp duty Certificates when the documents are lodged electronically with the Registry. Law firms just need to provide the “stamp duty Certificate Reference” in the relevant section of the documents which they then lodge electronically. 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • To promote Singapore as an investment destination.

SINGAPORE (as of 24th Sept 2012)

<p>essential services infrastructure</p> <ul style="list-style-type: none"> • Implement strategies to improve administrative performance at lower levels of government. [Note: This guideline does not apply as Singapore has a single level of government.] • Facilitate availability of high standard business services supporting investment 	<ul style="list-style-type: none"> • There has also been continuous endeavour by EDB to facilitate the availability of high standard business services supporting investment, through the process of encouraging investors to come to Singapore. 	<ul style="list-style-type: none"> • In terms of transaction/ administration costs, there are also general guidelines in place for agencies in the setting of reasonable fees to the public. • In terms of connectivity, as mentioned above, EDB maintains a comprehensive website that provides a helpful “Guide to Investing in Singapore”, which provides useful information on how to register a business, find business premises, and recruit and train staff. 	<ul style="list-style-type: none"> • The EDB is the lead government agency charged with developing and implementing strategies to enhance Singapore’s position as a global business centre, including through acting as a one-stop-shop for local and foreign investors. • Over the years, Singapore has also strong trade and investment links and is a lead provider of services such as international banking, trade finance, maritime finance, insurance, treasury operations, and asset and wealth management in the region.
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> ▪ _____ – ▪ _____ – 			

IFAP Principle 5: Build constructive stakeholder relationships

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • To the extent possible, establish a mechanism to provide interested parties (including business community) with opportunity to comment on proposed new laws, regulations and policies or changes to existing ones prior to their implementation • Continue to share APEC member economies’ experiences of successful stakeholder consultative mechanisms • Promote the role of policy advocacy within IPAs as a means of addressing the specific investment problems raised by investors including those faced by SMEs • Continue to share APEC member economies’ experiences of successful public private dialogue to take advantage of the information on successes and problems encountered by established investors • Promote backward investment linkages between businesses, especially between foreign affiliates and local enterprises including through the promotion of 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP’s actions)</p> <ul style="list-style-type: none"> • As mentioned above, to provide an opportunity for public comment on proposed changes to laws and regulations, Singapore launched the REACH (reaching everyone for active citizenry @home) initiative in October 2006. 	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • As mentioned above, public consultations are conducted through various channels including ministries websites. REACH became an additional platform through which public consultations and announcements could be made. • At APEC, Singapore will continue to encourage relevant agencies to share successful stakeholder consultative mechanisms, where applicable and appropriate. We will also encourage Singapore investors/ agencies to share and participate in public private dialogues organized at the sidelines of APEC, where applicable and appropriate. • Through APEC, Singapore will help ensure high standards of corporate governance in Singapore, and encourage Singapore agencies to share experience with responsible business conduct, where applicable and appropriate. 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • As mentioned above, Singapore promotes feedback and consultation with the public on proposed investment measures. Public agencies post consultation payers to seek feedback and ideas on the government online consultation portal, REACH (http://www.reach.gov.sg). REACH is the lead agency for engaging and connecting with the people, and continues to encourage and promote public participation in shaping government policies. Upon request, the Singapore government endeavors to promptly provide information and respond to queries on actual or proposed investment measures. • Through APEC, Singapore hopes to understand the successes and problems encountered by established investors in the region and to further enhance the investment climate of the APEC region on a whole.

SINGAPORE (as of 24th Sept 2012)

<p>industry clusters</p> <ul style="list-style-type: none"> • Encourage high standards of corporate governance through cooperation aimed at promoting international concepts and principles for business conduct, such as APEC's programs on corporate governance and anti-corruption. • Examine and share APEC member economies' experience with responsible business conduct instruments 			
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> ▪ _____ – ▪ _____ – 			

IFAP Principle 6: Utilise new technology to improve investment environments

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Promote the introduction and use of new technologies aimed at making the investment process simpler and faster • Maintain adequate and effective protection of technology and related intellectual property rights • Where possible, give effect to international norms for property protection 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)</p> <ul style="list-style-type: none"> • Singapore has been maintaining a system of intellectual property (IP) rights protection since before its independence in 1965, and continues to do so through regular reviews and initiatives, in line with Singapore's vision of being an IP hub of Asia. 	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • In terms of the use of new technologies for faster processing, our points above under 'IFAP principle 4', illustrate some of Singapore's ongoing efforts on this front. • The Intellectual Property Office of Singapore (IPOS) is a statutory board responsible for, among other things, the administration of systems for the protection, and the promotion of public awareness and effective use, of IP. • In terms of legislative framework, Singapore has an extensive network of laws dealing with a broad range of IP rights. Some of the key pieces of legislation are the:- <ul style="list-style-type: none"> ○ Copyright Act; ○ Patents Act; ○ Trade Marks Act; ○ Geographical Indications Act; ○ Layout Designs of Integrated Circuits; ○ Registered Designs Act; and ○ Plant Varieties Protection Act. <p>Copies of the above legislation, as well as an explanation of Singapore's IP regime, are available on IPOS's website.</p> <ul style="list-style-type: none"> • Singapore participated in the negotiation of the Anti-Counterfeiting Trade 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • To provide the infrastructure, build expertise and grow the ecosystem, in support of the greater creation, protection and exploitation of IP, with a view to being an IP Hub of Asia.

		<p>Agreement (ACTA), signed on October 2011.</p> <ul style="list-style-type: none"> • Singapore is also a signatory to numerous international conventions such as the Paris Convention, the Berne Convention, the Madrid Protocol, etc. The full list of international conventions is available at http://www.ipos.gov.sg/AboutUs/WhatDoWeDo.aspx. • These obligations are implemented through the legal framework highlighted above. 	
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> ▪ _____ – ▪ _____ – 			

IFAP Principle 7: Establish monitoring and review mechanisms for investment policies

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • Conduct periodic reviews of investment procedures ensuring they are simple, transparent and at lowest possible cost 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)</p>	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • Through interaction with investors, EDB Singapore provides feedback to other government agencies to ensure that infrastructure and public services remain efficient and cost-competitive. 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • To ensure that Singapore maintains a premier pro-business environment.
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> ▪ _____ – ▪ _____ – 			

IFAP Principle 8: Enhance international cooperation

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> • To the best extent possible, accede to, or observe, multilateral and/or regional investment promotion and facilitation conventions • Make use, where appropriate, of international and regional initiatives aimed at building investment facilitation and promotion expertise, such as those offered by the World Bank, UNCTAD and OECD 	<p>(The timeframe within which APEC economy has implemented or expect to implement these IFAP's actions)</p> <ul style="list-style-type: none"> • In ASEAN, the ACIA has been implemented since its entry into force on 29 	<p>(How were the actions being implemented? Or How will the actions be implemented?)</p> <ul style="list-style-type: none"> • The ASEAN Comprehensive Investment Agreement (ACIA), which entered into force on 29 Mar 2012, has taken into account international best practices from various sources, such as the North America Free Trade Agreement (NAFTA), the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises, ASEAN Plus One FTAs and the United Nations Conference on Trade and Development (UNCTAD)'s assessment on international investment agreements. The ACIA 	<p>(Describe the expected outcome within this principle)</p> <ul style="list-style-type: none"> • The ACIA is expected to contribute to boosting investors' confidence in the region. The enhancements under the ACIA include a robust mechanism for Investor State Dispute Settlement, clearer definitions and new articles on Prohibition of Performance Requirements (TRIMS) and Senior Management and Board of Directors (SMBD).

SINGAPORE (as of 24th Sept 2012)

<ul style="list-style-type: none"> • Ensure measures exist to ensure effective compliance with commitments under international investment agreements • Review existing international agreements and treaties to ensure their provisions continue to create a more attractive environment for investment. 	<p>Mar 2012.</p>	<p>is also consistent with the WTO Agreement on Trade Related Investment (TRIMS) in the commitments made by ASEAN Member States.</p> <ul style="list-style-type: none"> • To ensure compliance under international investment agreements, domestic agencies and stakeholder consultations are conducted before and during the negotiations of our international investment agreements. Singapore takes a “Whole of Government” approach with regard to our international commitments. Ministries and Statutory Boards are aware of Singapore’s international obligations, and regular circulars are shared to remind them of Singapore’s obligations at the WTO and our FTAs. Inter-ministerial committees are also formed, as necessary, to discuss on Singapore’s proposed and existing trade-related measures. • At ASEAN, the ASEAN Investment Area (AIA) Council oversees the implementation of commitments under the ASEAN investment agreements and initiatives to promote and facilitate investment. The AIA Council is assisted by the ASEAN Coordinating Committee on Investment (CCI). For the ASEAN Plus One FTAs, the respective Joint Committees on Investment oversee the implementation of these FTAs. • To maintain an attractive investment climate, Singapore conducts reviews of our existing FTAs with the aim of greater trade liberalization. To date, we have conducted reviews for the following FTAs: <ul style="list-style-type: none"> <i>i.</i> Singapore-Australia FTA <i>ii.</i> China-Singapore FTA <i>iii.</i> India CECA <i>iv.</i> Korea-Singapore FTA <i>v.</i> Japan-Singapore Economic Partnership Agreement <i>vi.</i> US-Singapore FTA • And at ASEAN, under the ACIA’s built-in work agenda for ASEAN Member States, Singapore is required to (i) undertake further liberalization based on the Modality to Eliminate Impediments to Investments and/or Improve Investment Regimes and (ii) look into progression from WTO TRIMS to WTO TRIMS Plus in its commitments. 	<ul style="list-style-type: none"> • To ensure that Singapore’s trade-related measures are WTO and FTA consistent. • At ASEAN, this ensures that trade-related measures by ASEAN Member States, and Parties to the ASEAN Plus One FTAs are consistent with their commitments. • To maintain Singapore’s extensive trade links to provide companies with greater market connectivity through the reduction of tariffs and non-tariff barriers. • Singapore has also signed 35 investment guarantee agreements (IGAs), designed to help protect investments made by Singapore-based companies in other countries against non-commercial risks.

Appendix I: Investment facilitation – menu of actions and measures (Voluntary submission by member economies: United States)

IFAP Principle 1: Promote accessibility and transparency in the formulation and administration of investment-related policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> ▪ Publish laws, regulations, judicial decisions and administrative rulings of general application, including revisions and up-dates. 	Completed	The United States publishes these measures as a matter of law and practice, and has undertaken international commitments to do so through obligations in BITs and FTAs.	
<ul style="list-style-type: none"> ▪ Adopt centralised registry of laws and regulations and make this available electronically. 	Completed	Laws of the United States Congress are available in a centralized electronic registry, accessible at http://thomas.loc.gov . Federal government regulations are consolidated annually within the <i>Code of Federal Regulations</i> , available electronically at http://www.gpo.gov/fdsys/ .	
<ul style="list-style-type: none"> ▪ Establish a single window or special enquiry point for all enquiries concerning investment policies and applications to invest 	Completed	The United States does not screen foreign investment, or maintain any general “application” procedures for the entry of foreign investors. However, the Department of Commerce’s SelectUSA program serves as a single point of contact for general enquiries about investing into the United States.	
<ul style="list-style-type: none"> ▪ Make available all investment-related regulations in clear simple language, preferably in languages commonly used by business 	Completed	All U.S. federal regulations, whether investment-related or otherwise, are available online and in English. In 2011, the President, through Executive Order 13563, established principles for the U.S. regulatory system, including that it “must ensure that regulations are accessible, consistent, written in plain language, and easy to understand.”	
<ul style="list-style-type: none"> ▪ Following establishment of an Investment Promotion Agency (IPA), or similar body, and make its existence widely known 	Ongoing	SelectUSA, the U.S. Government’s investment promotion initiative, is a broadly publicized program that promotes business investment in the United States through worldwide programming and outreach.	
<ul style="list-style-type: none"> ▪ Make available to investors all rules and other information relating to investment promotion and incentive schemes 	Completed	Detailed information about federal programs and incentives available to investors can be found at the web site of SelectUSA: http://selectusa.commerce.gov/investment-incentives . SelectUSA also provides information and contacts relating to programs at the state and local levels.	
<ul style="list-style-type: none"> ▪ Allow investors to choose their form of establishment within legislative and legal frameworks. 	Completed	The United States permits investors to choose their form of establishment as a matter of practice, and has undertaken international commitments to do so through obligations in its FTAs and in the GATS.	

<ul style="list-style-type: none"> ▪ Ensure transparency and clarity in investment-related laws 	Completed	The United States publishes all investment-related laws, as a matter of law and practice, and pursuant to commitments undertaken in international trade and investment agreements.	
<ul style="list-style-type: none"> ▪ Improve upon the APEC-wide website (e-portal) to replacing the hard copy publication of the APEC Investment Guidebook (IEG) 	Completed	The United States has contributed its submission to the revised, 2010 <i>Guide to APEC Investment Regimes</i> , which is now available electronically.	
<ul style="list-style-type: none"> ▪ Encourage on-line enquiries and on-line information on all foreign investment issues 	Completed	Through its SelectUSA program, the United States invites the submission of online enquires and information regarding foreign investment: http://selectusa.commerce.gov/contact-us .	
<ul style="list-style-type: none"> ▪ Maintain a mechanism to provide timely and relevant advice of changes in procedures, applicable standards, technical regulations and conformance requirements 	Completed	Pursuant to WTO obligations, the Department of Commerce's National Institute of Standards and Technology maintains a TBT Inquiry Point, which is able to answer any reasonable questions on standards, technical regulations and conformity assessment procedures, and notifies the WTO TBT Committee of all proposed technical regulations and conformity assessment procedures of central and sub-central government bodies. Proposed regulations of federal agencies are available at www.regulations.gov .	
<ul style="list-style-type: none"> ▪ To the extent possible, provide advance notice of proposed changes to laws and regulations and provide an opportunity for public comment 	Completed	With limited exceptions, U.S. law requires that federal agencies provide advance notice, and opportunity for participation by interested parties in, any rulemaking. Detailed information about the U.S. rulemaking process is available at: http://www.federalregister.gov/uploads/2011/01/the_rulemaking_process.pdf . In addition, the United States has undertaken obligations in its BITs and FTAs to provide, to the extent possible, advance notice of, and opportunity to comment on, proposed laws and regulations.	
<ul style="list-style-type: none"> ▪ Explore the possibility of using the international benchmarks on a voluntary basis as a reference point for peer dialogue and measuring progress 			
<p>Other voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> ▪ _____ ▪ _____ 			
IFAP Principle 2 Enhance stability of investment environments, security of property and protection of investments			

Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Establish timely, secure and effective systems of ownership registration and / or property use rights for land and other forms of property 	Not applicable	(Offices for the registration of real property are generally administered by U.S. state and country governments; records are available for public inspection.)	
<ul style="list-style-type: none"> Create and maintain an effective register of public or state owned property. 	Completed	The General Services Administration makes publicly available inventories of federally held real property (http://www.gsa.gov/portal/content/100783). Most federal agencies currently provide public access to individual parcel data for the lands they manage. For example, the Department of Interior's Bureau of Land Management maintains several online systems for searching its land records (http://www.blm.gov/wo/st/en/prog/more/land_records.html).	
<ul style="list-style-type: none"> Ensure costs associated with land transactions are kept to a minimum including by fostering competition 	Completed	The United States has a diverse and competitive private marketplace of real estate brokerages.	
<ul style="list-style-type: none"> Foster the dissemination of accurate market reputation information including creditworthiness and reliability 	Completed	The United States has a robust private market for credit rating agencies and consumer reporting agencies, as well as laws in place that promote the accuracy of market information and the development of a broad array of tools for weighing creditworthiness and reliability.	
<ul style="list-style-type: none"> Explore the possibility of using the World Bank <i>Doing Business</i> indicator "Enforcing Contracts" as the basis for peer dialogue and benchmarking and measuring progress across APEC 	Ongoing	The United States has supported and actively participated in a number of APEC projects focused on improving performance with respect to <i>Doing Business</i> indicators, including "Enforcing Contracts" in particular.	
<ul style="list-style-type: none"> Encourage or establish effective formal mechanisms for resolving disputes between investors and host authorities and for enforcing solutions, such as judicial, arbitral or administrative tribunals or procedures 	Ongoing	The United States is party to over 50 international investment agreements containing provisions on investor-State dispute settlement and the enforcement on arbitral awards, and continues to actively negotiate high-standard investment agreements. In addition, U.S. law (the Tucker Act), permits lawsuits against the United States Government for three types of claims: (1) contractual claims, (2) non-contractual claims where the plaintiff seeks the return of money paid to the government and (3) certain non-contractual claims where the plaintiff asserts that he is entitled to payment by the government.	Additional international investment agreements with investor-State dispute settlement mechanisms entering into force.
<ul style="list-style-type: none"> Encourage and facilitate the use of arbitration and other means of alternative 	Completed	The Federal Arbitration Act provides broad authority to assure the enforcement of agreements to arbitrate private international commercial disputes, as well as any resulting arbitration awards. Pursuant to this Act,	

dispute resolution for the settlement of international commercial disputes between private parties		the U.S. Supreme Court has long recognized “the emphatic federal policy in favour of arbitral dispute resolution . . . [which] applies with special force in the field of international commerce.” ¹ . The U.S. also hosts some of the world’s leading institutions for alternative commercial dispute resolution, such as the American Arbitration Association and the Center for Public Resources.	
<ul style="list-style-type: none"> Facilitate commercial dispute resolution for foreign investors by providing reasonable cost complaint-handling facilities, such as complaint service centres, and effective problem-solving mechanisms 	Completed	The SelectUSA program encourages and facilitates foreign investment in the United States by, among other things, serving as an ombudsman to facilitate the resolution of issues involving federal programs or activities related to pending investments (http://selectusa.commerce.gov/).	
<ul style="list-style-type: none"> Take steps to accede to an arbitral convention 	Completed	The United States is a signatory to major arbitral conventions, such as the ICSID Convention, Convention on the Recognition and Enforcement of Foreign Arbitral Awards, and the Inter-American Convention on International Commercial Arbitration.	
Other voluntary actions in addition to the above: <ul style="list-style-type: none"> _____ _____ 			
IFAP Principle 3 Enhance predictability and consistency in investment-related policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Increase use of legislative simplification and restatement of laws to enhance clarity and identify and eliminate inconsistency 	Completed	The Code of Laws of the United States of America (also known as the U.S. Code) is a compilation and codification of the general and permanent laws of the United States, arranged by subject matter. Commercial publishers also provide an annotated code, including citations to relevant court cases and other commentary interpreting the statutory provisions listed in the Code.	
<ul style="list-style-type: none"> Provide equal treatment for all investors in the operation and application of domestic laws and principles on investment 	Completed	The U.S. investment regime is based on the principle of national treatment. Equal treatment to investors is assured as a matter of U.S. law, and by virtue of obligations on non-discrimination undertaken in over 50 BITs and FTAs.	
<ul style="list-style-type: none"> Reduce the scope for discriminatory bureaucratic discretion in interpreting investment-related regulations 	Completed	U.S. federal law provides for judicial review of agency actions on a number of grounds, including whether an agency’s action is “arbitrary and capricious, an abuse of discretion, or otherwise not in accordance with the law.”	

¹ Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, 473 U.S. 614 (1985).

<ul style="list-style-type: none"> Maintain clear demarcation of agency responsibilities where an economy has more than one agency screening or authorising investment proposals or where an agency has regulatory and commercial functions 	Completed	The United States does not screen investment, or otherwise require general authorization of proposed foreign investment. In cases where federal agencies have commercial functions, these generally are clearly demarcated from any regulatory functions.	
<ul style="list-style-type: none"> Establish and disseminate widely clear definitions of criteria for the assessment of investment proposals 	Not applicable	(The United States does not screen or otherwise require authorization for foreign investment.)	
<ul style="list-style-type: none"> Establish accessible and effective administrative decision appeal mechanisms including where appropriate impartial “fast-track” review procedures 	Completed	U.S. BITs and FTAs contain an obligation upon Parties to establish or maintain judicial, quasi-judicial, or administrative tribunals or procedures for the purpose of prompt review and, where warranted, correction of final administrative actions. Once final, agency administrative decisions are generally subject to review by a court. The precise process for review varies by context; in some circumstances there is a specialized administrative or quasi-judicial appeals process available, which is typically followed by judicial review. Some U.S. laws provide for various forms of expedited review, such as direct appeal of an agency decision to a court of appeals.	
<p>Any voluntary actions in addition to the above:</p> <ul style="list-style-type: none"> _____ _____ 			
IFAP Principle 4: Improve the efficiency and effectiveness of investment procedures			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Simplify and streamline application and, registration, licensing and taxation procedures and establish a one-stop authority, where appropriate, for the lodgement of papers 	Not applicable	(Licensing and registration requirements vary based on the location and types of an investment. Such registration is typically done at the state or local level, subject to generally applicable laws and regulations. The U.S. Government’s SelectUSA program provides assistance to potential investors regarding licensing and registration procedures, including by providing contact information for investment facilitation agencies in U.S. states.)	
<ul style="list-style-type: none"> Simplify and reduce the number of forms relating to foreign investment and encourage electronic lodgement 	Not applicable	(The United States does not require prior approval, or maintain any general authorization procedures, for foreign investment.)	
<ul style="list-style-type: none"> Shorten the processing time and procedures 	Not	(The United States does not screen or otherwise require any general prior	

for investment applications.	applicable	approval for foreign investment.)	
<ul style="list-style-type: none"> Promote use of “silence is consent” rules or no objections within defined time limits to speed up processing times, where appropriate 	Not applicable	(The United States does not require prior approval of foreign investments.)	
<ul style="list-style-type: none"> Ensure the issuing of licences, permits and concessions is done at least cost to the investor 	Completed	Federal, state and tribal authorities maintain a number of requirements for licensing service or other operations; permitting for activities that may affect public health, safety, the environment or natural resources; and issuing concessions for access to publicly held natural resources. Minimizing the economic burden on the investor is widely taken into account in designing regulatory requirements and procedures through mechanisms such as cost-benefit analysis, while recognizing the need to protect the public welfare. It is a common practice to base fee levels on the cost to the government of processing an application.	
<ul style="list-style-type: none"> Simplify the process for connecting to essential services infrastructure 	Not applicable	(Essential services such as electricity, water, and sewage are typically regulated at the state and local levels of government.)	
<ul style="list-style-type: none"> Implement strategies to improve administrative performance at lower levels of government 			
<ul style="list-style-type: none"> Facilitate availability of high standard business services supporting investment 	Completed	The United States has an open and highly competitive services market, reinforced by broad and high-quality market access commitments in the WTO and in FTAs.	
Other voluntary actions in addition to the above: <ul style="list-style-type: none"> _____ _____ 			
IFAP Principle 5: Build constructive stakeholder relationships			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> To the extent possible, establish a mechanism to provide interested parties (including business community) with 	Completed	Subject to limited exceptions, U.S. law requires federal regulatory agencies to provide interested persons an opportunity to participate in any rulemaking through submission of written comments. A longstanding mechanism exists	

opportunity to comment on proposed new laws, regulations and policies or changes to existing ones prior to their implementation		for this process.	
<ul style="list-style-type: none"> Continue to share APEC member economies' experiences of successful stakeholder consultative mechanisms 	Ongoing	In 2011, the United States hosted an APEC workshop on regulatory impact assessment, which centered on the development of more effective and transparent regulations, including through enhanced public consultation in the rulemaking process.	
<ul style="list-style-type: none"> Promote the role of policy advocacy within IPAs as a means of addressing the specific investment problems raised by investors including those faced by SMEs 	Ongoing	The U.S. Government's SelectUSA program facilitates investment in the United States by, among other things, assisting the federal government as well as state and local governments, at their request, to address regulatory concerns for domestic and foreign firms wishing to invest in the United States.	
<ul style="list-style-type: none"> Continue to share APEC member economies' experiences of successful public private dialogue to take advantage of the information on successes and problems encountered by established investors 	Ongoing	The United States hosted the first APEC Public-Private Dialogue on Investment in Washington, DC in 2011.	A subsequent Investment Dialogue was held in Singapore in 2012, and another is expected to take place in Jakarta in 2013.
<ul style="list-style-type: none"> Promote backward investment linkages between businesses, especially between foreign affiliates and local enterprises including through the promotion of industry clusters 	Ongoing	<p>In 2011, the Administration launched a multi-million dollar initiative (Jobs and Innovation Accelerator Challenge) aimed at the creation of regional industry "clusters" through public-private partnerships.</p> <p>In addition, with funding by the U.S. Department of Commerce's Economic Development Administration (EDA), the Institute for Strategy and Competitiveness at Harvard University has launched a Cluster Mapping Project for the United States. It provides data and tools to understand industry clusters across the United States. Information about this initiative is available at: http://www.isc.hbs.edu/cluster-mapping-project.htm.</p>	
<ul style="list-style-type: none"> Encourage high standards of corporate governance through cooperation aimed at promoting international concepts and principles for business conduct, such as 	Ongoing	The United States is a vocal advocate of international instruments on business conduct, such as the UN Guiding Principles on Business and Human Rights, and the OECD Guidelines for Multinational Enterprises. The United States also promotes and recognizes exemplary corporate citizenship	An ACE has been awarded annually

APEC's programs on corporate governance and anti-corruption.		through the Secretary of State's annual Award for Corporate Excellence (ACE).	since its establishment in 1999. The 2012 awardee will be announced by the Secretary of State on November 28, 2012.
<ul style="list-style-type: none"> Examine and share APEC member economies' experience with responsible business conduct instruments 			
Other voluntary actions in addition to the above: <ul style="list-style-type: none"> _____ _____ 			
IFAP Principle 6: Utilise new technology to improve investment environments			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Promote the introduction and use of new technologies aimed at making the investment process simpler and faster 	Not applicable	(The United States does not screen foreign investment, or otherwise maintain federal-level "process" for the registration of foreign investment. However, governmental functions at both the federal and state level are increasingly performed through electronic processes.)	
<ul style="list-style-type: none"> Maintain adequate and effective protection of technology and related intellectual property rights 	Completed	Intellectual property is effectively protected by a comprehensive system of federal and state laws in the United States. The United States also provides extensive enforcement for intellectual property rights, including, where applicable, severe criminal penalties, damages and injunctive relief.	

<ul style="list-style-type: none"> Where possible, give effect to international norms for property protection 	Completed	The United States has fully implemented its obligations under the WTO TRIPS Agreement, and provides copyright protection consistent with the Berne Convention.	
Other voluntary actions in addition to the above: <ul style="list-style-type: none"> _____ _____ 			
IFAP Principle 7: Establish monitoring and review mechanisms for investment policies			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> Conduct periodic reviews of investment procedures ensuring they are simple, transparent and at lowest possible cost 	Not applicable	(The United States does not screen foreign investment, or otherwise impose registration or similar general procedures specifically for foreign investment.)	
Other voluntary actions in addition to the above: <ul style="list-style-type: none"> Review of existing regulations_____ 	Ongoing	The United State does not have federal level “procedures” for foreign investment. However, with respect to regulations generally, the President in 2011 issued an Executive Order (13563) requiring a “lookback” at existing regulations, with the central goal of eliminating outdated requirements and unjustified costs. EO 13563 requires executive agencies to produce plans to periodically review existing significant regulations.	As of May 2012, over two dozen executive department and federal agencies have identified over 500 initiatives to reduce costs, simplify the regulatory system, and eliminate redundancy and

			inconsistency producing billions of dollars in savings.
<ul style="list-style-type: none"> Review of federal agency procedures____ 	Ongoing	The Administrative Conference of the United States (ACUS) was re-established in 2010. The ACUS is an independent agency dedicated to improving the administrative process through consensus-driven applied research, providing expert advice and recommendations for improvement of federal agency procedures. Its membership is composed of officials and experts with diverse views and backgrounds from both the private sector and academia.	
IFAP Principle 8: Enhance international cooperation			
Specific Actions	Time Table	Details of implementation	Expected outcomes
<ul style="list-style-type: none"> To the best extent possible, accede to, or observe, multilateral and/or regional investment promotion and facilitation conventions 	Completed	The United States is a signatory to major international and regional conventions relating to investment facilitation and promotion, including the ICSID Convention, Convention on the Recognition and Enforcement of Foreign Arbitral Awards, and the Inter-American Convention on International Commercial Arbitration.	
<ul style="list-style-type: none"> Make use, where appropriate, of international and regional initiatives aimed at building investment facilitation and promotion expertise, such as those offered by the World Bank, UNCTAD and OECD 			
<ul style="list-style-type: none"> Ensure measures exist to ensure effective compliance with commitments under international investment agreements 	Completed	The United States maintains a number of mechanisms to ensure compliance with international commitments. For example, the White House's Office of Management and Budget (OMB) coordinates the interagency review and clearance of all bills proposed to be transmitted to Congress by Executive agencies. Through this legislative review mechanism, agencies with relevant expertise are able to identify and seek to address any international trade or investment implications of proposed legislation.	
<ul style="list-style-type: none"> Review existing international agreements and treaties to ensure their provisions continue to create a more attractive 	Completed	In 2009, the United States initiated a comprehensive review of its Model BIT, to ensure that its provisions remain consistent with the public interest and	In April 2012, the United States

<p>environment for investment.</p>		<p>the Administration's international economic policy.</p>	<p>announced the conclusion of its review, and published a revised Model BIT, which maintains high standards of investment protection, while preserving the government's ability to regulate in the public interest.</p>
