UGANDA BUREAU OF STATISTICS

2018

STATISTICAL ABSTRACT

FOREWORD

The Uganda Bureau of Statistics (UBOS) is committed to the production and dissemination of integrated statistical information that meet the National and International standards quality requirements. Specifically, indicators are required for monitoring the progress towards achieving the goals for the National Development Plan II, 2015/16-2019/20 and the United Nations (UN) Sustainable Development Goals (SDGs). This Statistical Abstract is UBOS's prime annual publication through which key statistical information derived from the latest surveys, censuses and administrative records of Ministries, Departments and Agencies (MDAs) are disseminated for use in tracking outcomes of policies as well as decision-making.

The information presented in the 2018 Statistical Abstract covers statistics on the Environmental, Demographic, Socio-economic, Production and Macroeconomic sectors. Information on these sectors is presented basing on either a Calendar Year (January-December) or Financial Year (July-June) structure, depending on availability of data.

The Bureau would like to appreciate the continued cooperation of MDAs and Local Governments in providing the requisite data to produce this publication. In a special way, I wish to thank the 2018 Statistical Abstract Committee that compiled this publication. The Bureau welcomes constructive comments from stakeholders that aim at enhancing the quality of its future publications.

Copies of this publication are available at the Bureau's Head Office located at Statistics House, Plot 9, Colville Street, Kampala and the official UBOS website: www.ubos.org.

It is my sincere hope that the statistical information in this publication will be used by the readers to make informed decisions.

Imelda Atai Musaana

EXECUTIVE SUMMARY

The Statistical Abstract is an annual publication compiled by Uganda Bureau of Statistics, which provides the statistical summary on various socio-economic indicators for Uganda. Some figures in this edition may vary from those in the earlier editions due to the updates. Note that some of the CY 2017 and FY 2017/18 data presented in this edition are provisional and could be revised in subsequent publications.

This publication is divided into four major chapters which are preceded by a glossary of definitions and general information on Uganda. A set of Statistical Appendix Tables that are serialized, using a combination of numbers and alphabets, such as Table 1.1A, Table 2.3 B etc., are also provided for the readers' information. The reader is encouraged to refer to such tables while reading the text. It should be noted that the number of districts has been increasing. However, some information in this issue is presented basing on the 80 districts as of July-2007, where this is the case, it is always reflected.

Chapter one presents environmental statistics covering land, climate, forestry and water supply with the following highlights:

Land Area by coverage by 2015

- Uganda has a total area of 241,550.7 square kilometres.
- Open water bodies covered 36,864.01 square kilometres.
- Wetlands cover 7,620.76 square kilometres.
- Land area is 197,065.91 square kilometres.
- Agricultural land increased from 99,703.1 sq. kms in 2005 to 105,317.2 sq. kms.
- Built up land area covered 1,360.02 square kilometres.

Forests

- Forest cover reduced significantly by 60 percent over a period of 25 years.
- Round wood production increased by 1,587,000 tonnes in 2016.

Climate

- In 2017, Gulu and Jinja recorded higher rainfall above their long term annual averages.
- Tororo and Entebbe had the highest number of rain days in 2017.
- In 2017, Kabale and Soroti had the lowest mean daily minimum temperatures while Lira had the highest mean daily maximum temperature.
- Kabale, Entebbe and Kasese continued to experience high mean relative humidity at 06:00 hrs throughout 2017 ranging between 77 and 96 percent.

Water Supply

- Total water produced by NWSC during 2017/18 was 126.3 million cubic meters compared to 120.6 million cubic meters in FY 2016/17.

Chapter Two presents Demographic and Socio-Economic Statistics relating to Population, Education, Labour Force, Employment and Earning, Income and Expenditure, Public Health and Crime. Below are highlights of the chapter:

Demographic and Socio-Economic Statistics

- According to 2014 National Population and Housing Census (UNHS) results;
 - Uganda population was 34.6 million persons.
 - Annual population growth rate between 2002 and 2014 censuses was 3.03 percent.
 - 2014 population density was 174 persons per square kilometre.
 - Sex ratio was 94.5 percent in 2014.
- According to the 2016 Uganda Demographic and Health Survey (UDHS);

- Total fertility was 5.4 children per woman.
- Infant mortality rate was 43 deaths per 1,000 live birth.
- Under five mortality rate was 64 deaths per 1,000 live birth.
- Life expectancy at birth is 63.7 years.

Education

- Primary enrolment was at 8.8 million in 2017.
- The pupil teacher ratio in primary school was 55 in 2017.
- 91 percent of pupils who sat Primary Leaving Exams (PLE) in 2017 passed.
- Secondary school enrolment reduced from 1,457,277 to 1,370,583 in 2017.
- In 2017, there were 228,563 students who were orphans.

Labour force, Employment and Earnings

- According to 2016/17 UNHS, Uganda's working age population stood at 19,104,000 of which 78.8 percent were working.
- The proportion of employed females was 44.4 percent.(UNHS 2016/17)
- In 2016/17 43.2 percent of the working population was engaged in the subsistence agriculture sector only.
- 62.9 percent of the employed persons had completed at least secondary school.

Income and expenditure

- There was a 0.7 percent decrease in the monthly household consumption expenditure from 328,200 US\$ to 325,800 in 2016/17.
- The Northern region registered the highest growth in Per capita consumption expenditure at 21.3 percent.
- The proportion of the poor population increased from 19.7 percent to 21.4 percent corresponding to about 8 million people.
- 45.5 percent of the household expenditure was on food and non-alcoholic beverages.
- Nationally, on average, income inequality increased from 0.40 to 0.42 between 2012/13 and 2016/17.

Health

- The staffing levels in public health facilities was 72 percent in 2016/17.
- GOU health expenditure to total government expenditure was 8.9 percent in 2016/17.

Crime

- The number of crimes reported to Police increased to 252,065 cases in 2017 compared to the annual record of 243,988 cases recorded in 2016.
- Common Assaults were the most reported type of crime by victims
- Defilement continued to be the most common serious crime accounting for 50 percent of all the serious crimes in 2017.
- The Uganda Police Force recorded a total of about 13,000 road traffic accidents in 2017.
- A total of 14,854 casualties from road traffic crashes was registered in 2017, representing a decrease of 6 percent from 2016.
- The leading cause of road accidents in 2017 was careless driving (41.5 percent),
- Uganda's prison population in 2017 stood at 48,894 persons.
- In 2017, 293 prisoners occupied space meant for 100 prisoners.

Chapter three presents statistics on production, which for purposes of this Abstract includes; Agriculture and Fisheries; Industry; Producer Prices; Energy; Building and Construction; Transport and Communications; and Tourism and Migration. Below are the highlights of the chapter:

Agriculture

- There was significant increase in production of coffee in 2017.
- There was a decline of 2.5 percent in fish catch from Lake Kyoga in 2017.

Index of production

- The Index of Production which measures output from manufacturing activities recorded for the year 2017 was 248.2 which was a 5.8 percent increase from the year that ended 2016.
- The Textiles, Clothes and foot wear group registered the highest increase of 18.7 percent.

Energy

- Energy purchases by Uganda Electricity Transmission Company increased by 9.3 percent from 3,535.4 GWh in 2016 to 3,864.9 GWh in 2017.
- Total number of UMEME customers increased from 999,380 in 2016 to 1,157,215 customers in 2017.
- There was 10.1 percent and 10.3 percent increase in the import volume of petrol and diesel respectively in 2017 compared to 2016.

Building and Construction

- 54.7 percent of the plans submitted were approved for residential buildings while 35.5 percent were approved for commercial buildings
- The Net Domestic Supply of cement registered an increase of 2.3 percent between 2016 and 2017.

Minerals

- In 2017 minerals produced fetched a value of 180 billion shillings.

Transport

- There was an increase of 0.9 percent in the total length of paved roads 4,157 km in 2015/16 to 4,193 km in 2016/17.
- There was a 6.1 percent increase in the total number of passengers passing through Entebbe International Airport from 1,549,495 in 2016 to 1,644,702 in 2017.
- The volume of cargo offloaded at Entebbe International Airport increased by 16.4 percent from 59,556 tonnes in 2016 to 69,306 tonnes in 2017.

Communication

- There was a two percent increase in telephone subscribers from 23.21 million subscribers in 2016 to 23.2 million subscribers in 2017.
- The national teledensity increased by 5.5 percent from 63.4 lines per 100 people in 2016 to 66.9 lines per 100 people in 2017.
- The volume of talk time increased by 16.5 percent from 24,392 million minutes in 2016 to 28,414 million minutes in 2017.
- The total number of registered mobile money customers increased by 8.2 percent from 21,580 (thousand) customers in 2016 to 23,362 (thousand) customers in 2017.

Migration and Tourism

- The country recorded a total of 3.9 million travellers in 2017.
- The number of visitors to national parks increased from 286,000 in 2016 to 246,000 in 2017.
- The most popularly visited national park in 2017 was Murchison fall (33 percent), followed by Queen Elizabeth (29 percent).
- 43 percent of the visitors to national parks were foreigners who are non-residents, 28 percent East African residents and 23 percent Ugandan students.

Chapter four presents Macro-Economic Statistics including National Accounts, Prices, External Trade, Public Finance, Banking, Currency and Insurance. Below are the highlights of the chapter:

National Accounts

- In the FY 2017/18, GDP at constant (2009/10) prices was estimated to grow by 6.1 percent. The sectoral performance was as indicated below.
- Agriculture, Forestry and Fishing (3.8 percent)

- Industry (6.1 percent)
- Services (7.7 percent)
- Taxes on products (1.6 percent)
- The per capita income at 2009/10 constant price increased from Ug. Shs 1,571,000 in 2016/17 to Ug. Shs 1,621,000 in 2017/18.

Consumer Price Index (CPI)

- Annual average Headline inflation for the 2017 calendar year was 5.6 percent compared to 5.5 percent recorded for the 2016 calendar year;
- During the same period, the annual average Core inflation decreased to 4.4 percent from 5.9 percent observed during the 2016 calendar year;
- Annual average Food Crops inflation for the 2017 calendar year increased to 13.0 percent from 3.1 percent registered during the 2016 calendar year; and

PPI-Manufacturing and Utilities

- The annual PPI-M (combined) increased by 6.3 percent for the year ended December 2017.
- The PPI-M (local) registered an annual average increment of 5.7 percent in the CY 2017 from 3.6 registered in 2016.
- The PPI-M (Export) registered an annual average increment of 6.9 percent in CY 2017 from 4.4 percent registered in 2016.

PPI- Hotels and Restaurants

- The Producer Prices for Hotels and Restaurants activities rose by 4.0 percent in the year ending December 2017 compared with the increase of 1.3 percent for the year ending December 2016.

Construction sector indices

- Average prices of inputs for the construction activities generally increased by 1.3 percent in 2017 compared to 3.6 percent in 2016.
- Civil works particularly on roads gravel registered the biggest price increase of 4.83 percent in 2017 compared to a decline of 0.2 percent in 2016.

External Trade

- During 2017, the country experienced an increase in trade deficit of US \$ 2,225.9 compared to a deficit of US\$ 1,992.8 million in 2016.
- The total value of imports increased by 16 percent in 2017 after a significant decrease of 12.5 percent in 2016.
- The overall export earnings increased by 18.9 percent in 2017.

Government Finance Statistics

- In the FY 2016/17, the net central government revenue increased by stood at shs 13,905.4 billion compared to shs. 12,645.1 billion collected in the FY 2015/16, representing an increase of 10 percent.
- Central Government expenditure for the FY 2016/17 was shs. 15,524.8 billion compared to shs. 13,714.2 billion spent in the FY 2015/16, representing a 20.8 percent increase.

Banking and Currency

- Net Foreign Assets increased by 24.9 percent between 2016 and 2017.
- Net Domestic Assets decreased by 2.6 percent between 2016 and 2017.
- Money Supply (M3) increased by 8.9 percent between June 2016 and June 2017. Money supply (M2) increased by 10.2 percent during the same period.
- The Central Bank Rate (CBR) declined to 10.0 percent in June 2017 from a 15.0 percent increase in June 2016.
- Total Commercial Bank Assets increased by 9.3 percent between 2016 and 2017.

GLOSSARY

A nursery School	A place where children are prepared for entry into primary school education.
Accident fatality risk	The accident fatality risk, defined as the number of accidental deaths per 100,000 populations.
Accident Severity	Determined by or classified according to the most severe casualty involved in an accident. Severity is also used to rank accidents
Adult	A person aged 18 years and above, as per the Constitution of Uganda.
Agriculture	The growing of crops and rearing of animals for food, other human needs or economic gain.
An orphan	A child below 18 years of age who has lost either one or both parents.
Assault/Attack	This is the threatening/attacking someone in a way that frightens him/her. In most of the cases violence is involved i.e. inflicting severe or aggravated bodily injury.
Asset	Anything valuable that an entity owns, benefits from or has use of, in generating income.
Aviation fuel	More purified kerosene fuel used in aviation gas-turbine engines.
Base period	The reference period, to which a series of index numbers relate, It is usually expressed as 100.
BCG (Bacillus Camete Guerin)	A vaccine against Tuberculosis.
Bio-mass energy	Energy that is obtained from fuel wood, charcoal and crop residues.
Broad money - (M2)A	Equivalent to (M2) plus certificates of deposit.
Broad money - (M3)	Equivalent to (M2) A plus foreign currency deposits.
Broad money – (M2)	Consists of the currency in circulation, as well as the demand, time and savings deposits. The deposits are those held by the private sector.
Careless Driving	A person whose conduct is inconsiderate in disregard for the right of others and that endangers or is likely to endanger person or property.
Casualty (Victim)	Person who sustains a slight, serious or fatal injury.
Child	A juvenile. A person aged below 18 years.
Child labour	Work that is mentally, physically, socially and/or morally dangerous and harmful to children. Hazardous work which by its nature or the circumstances under which it is performed, jeopardises the health, safety and morals of a child. Also includes work or activities that interfere with children's school attendance.

Child Labour measurement framework	National and International standards are used to define child labour. Based on these standards, children become child Labourers if they are aged 5-11 years and engaged in economic activities for at least one hour a week, or, aged 12-13 years and engaged in economic activities for at least 14 hours per week, or, aged 14-17 years and involved in economic activities for at least 43 hours a week, or 14-17 years and engaged in work regarded as hazardous. According to this definition, household chores are not among activities grouped in child labour.
Child work	A child is regarded to be involved in child work, if she/he is aged 5-17 years and was involved in economic activities for at least one hour during the reference week, by extension, therefore, such a child will be regarded as a child worker.
Civil Servants	Employees of line ministries, teaching service, police, prison, public universities and local governments.
Cohabiting	A state where a man and woman are not officially married but are living together in a sexual union.
Completion rate	The total number of new entrants in the last grade of any education level, regardless of age, expressed as a percentage of the population at the entrance age to the last grade of that education level.
Crime	An unlawful act or omission punishable by law.
Crime Rate	The incidence of crime per 100,000 people.
Damage of property	The abstract measure of property not being intact, and may refer to any household item which suffered after a crime incidence.
Day Care	A place that looks after children between 0 - 2 years and their parents pick them in the evening.
Defrauding	This is the act of depriving an individual, organisation, or even a household of their money, or property through deceitful trickery or cheating methods. It is also a deliberate deception to secure unfair or unlawful gain.
Diesel fuel	Fuel used for internal combustion in diesel engines and as a burner material in heating installations such as furnaces. Another name for this product is automotive gasoil.
Divorced	A condition where legally married couples legally separate for life and each stays away from the other thereafter. However, either of the two (man or woman) can re-marry.
DMBs	Deposit Money Banks. Commercial banks in Uganda's institutional settings.
DPT	A vaccine against Diphtheria, Pertussis (whooping cough) and Tetanus.
Driver	In relation to a motor vehicle, means a person who drives, or attempts to drive, or is in charge of a motor vehicle (including a cycle) or an instructor of a learner driver. In relation to animals, means a person who guides cattle, in singular or in herds, or flocks, pack saddle animals on a road. But in relation to a towed vehicle, a person who drives the towing vehicle.
Earnings for persons in paid employment	For paid employment jobs, earnings include: direct wages and salaries, bonuses and gratuities, commissions and tips, directors' fees, profit-sharing bonuses and other forms of profit-related pay, remuneration for time not worked as well as free or subsidised goods and services from an employer.
Economic activity	Covers all market production and certain types of non-market production, including production and processing of primary products for own consumption, own-account

construction (owner occupied dwellings) and other production of fixed assets for own use.

Employed Persons	Persons who work for wage or salary in cash or in kind or both and have a formal job attachment.
Employment	Restricted to only the working age population who were engaged in any activity to produce goods or provide services for pay or profit. "For pay or profit" refers to work done as part of a transaction in exchange for remuneration payable in the form of wages or salaries for time worked or work done, or in the form of profits derived from the goods and services produced through market transactions.
Employment status	Refers to the status of an economically active person with respect to his/her position at his/her place of work and his/her mode of remuneration.
Engineering plant	Movable plant or equipment being a self-propelled vehicle or trailer designed or constructed for the special purposes of engineering operations which, where proceeding on a road, does not carry any load greater than such as is necessary for its propulsion or equipment.
Enterprise	A single legal entity or a combination of legal entities. It may also be a sole legal unit carrying out one or more activities at one or more locations. It may alternatively be several establishments.
Establishment	An economic unit engaged in one or predominantly one kind of economic activity under single ownership or control and is situated at a single physical location.
Exports	Outward flows comprising goods leaving the economic territory of a country to the rest of the world.
Fatal Accident	An accident in which death occurs at the scene of the accident or within one year of the accident as a result of injuries sustained in the accident.
Foreign Reserves	Consist of those external assets available to and controlled by central banks for direct financing of balance of payments imbalances, for indirectly regulating the magnitude of such imbalances through intervention in exchange markets to affect the currency exchange rate, and/or for other purposes. Included are monetary gold, Special Drawing Rights (SDRs), reserve position in the fund, foreign exchange assets (consisting of currency, deposits and securities) and other claims.
General Hospitals	Health facilities that provide preventive, outpatient curative, maternity, inpatient health services, emergency surgery, blood transfusion, laboratory and other general services. They also provide in-service training, consultation and research in support of community-based health care programmes.
Gross Domestic Product	The value of goods and services produced within the economic territory of the country.
Gross Enrolment Rate	The ratio of pupils in primary school (regardless of age) to the country total population aged 6-12 years.
Gross Enrolment Ratio	Total enrolment in a specific level of education (Pre-primary, Primary, Secondary and Tertiary), regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school-year.
Gross Intake Rate	The ratio of the pupils enrolled in primary one regardless of age to the country total population aged six years.

Gross Intake Ratio	The total number of new entrants in the last grade of a given level of education, regardless of age, expressed as percentage of the total population of the theoretical entrance age to the last grade of that education level.
Gross Output	The production value as compiled from total receipts from industrial and non-industrial goods and services in an economy, adjusted for stock changes but excluding Excise Duty and Indirect Taxes. This is Gross Output at factor cost.
Growth Rate	The number of people added to (or subtracted from) a population in a year due to natural increase and net migration expressed as a percentage of the population at the beginning of the time period.
Hazardous work	Refers to a situation where a person is engaged in work for more than 43 hours a week or works under conditions that entail them to work at night.
Health Centre II	Out-patient clinic treating common diseases and offering antenatal care. It is supposed to be led by an enrolled nurse, working with a midwife, two nursing assistants and a health assistant. According to the Ugandan government's health policy, every parish is supposed to have a Health Centre II.
Health Centre III	Health centre with facilities which include an operation room and a section for minor surgery. It is headed by a clinical officer, offers the continuous basic preventive and curative care and provides support supervision of the community and the Health Centre II facilities under its jurisdiction. According to the Ugandan government's health policy, every sub-county is supposed to have a Health Centre III.
Health Centre IV	A mini-hospital that provides the kind of services found at Health Centre III, but in addition has separate wards for men, women, and children in which to admit patients. It should have a senior medical officer and another doctor as well as a theatre for carrying out emergency operations. According to the Ugandan government's health policy, every county or parliamentary constituency is supposed to have a Health Centre IV.
Heavy Fuel Oil	Residual fuel obtained after refinery of petroleum products. It is used in ships and industrial large-scale heating installations as a fuel in furnaces or boilers.
Home based child care	An arrangement where a mother in the community looks after children at a cost in her premises and trains them basic skills necessary for proper upbringing.
Imports	Inward flows of goods from the rest of the world into the economic territory of a country.
Incidence of Crime	The total number of crimes reported per population of interest over a given period of time in a defined area (territory/country).
Index Number	A number that shows relative change in price or volume between the base period and another period.
Industry	This is an economic activity undertaken by a business establishment as specified in the International System of Industrial Classification (ISIC).
Infant Mortality Rate	The number of deaths of infants under one year of age per 1,000 live births in a given period.
Inflation	The persistent increase in the general level of prices of goods and services in an economy over a period of time
Informal employment rate (IER)	Persons in informal employment comprise of: <ul style="list-style-type: none"> Employees whose employers' do not pay contributions to their social security or, if they do, do not benefit from annual leave or payment in lieu of leave not taken, or paid sick leave in case of illness or injury or income tax deduction.

	<ul style="list-style-type: none"> • Employers and own account workers employed in their own businesses or places of work that are not registered for income tax and/or Value Added Tax (VAT). • Members of producers' cooperatives employed in their cooperatives that are not registered. • Own account workers engaged in the production of goods exclusively for own final use by their household (such as subsistence farming or do it yourself construction of own dwellings), if considered employed according to the 13th International Classification of Labour Services (ICLS) Edition definition of employment. • Contributing family workers, irrespective of whether they work in formal or informal sector enterprises.
Intermediate Consumption	The value of goods and services that are used in the process of production of other goods and services rather than final consumption
Juvenile	A person below 18 years of age (Children Statute 1997).
Kerosene	This is fuel used as an illuminant for lighting and in some cases for cooking.
Labour force	The labour force consists of all persons of working age who were either employed or unemployed.
Labour Force Participation Rate	
Labour underutilisation	Labour underutilisation is a broad concept that encompasses unemployment and other forms of mal-employment, namely, insufficiency of the volume of work (labour slack), low remuneration (low earnings) and incompatibility of education and occupation (skill mismatch). For the present purpose, labour underutilization is defined to be the aggregate of labour slack (unemployed, time related under employment as well as those marginally attached to the labour force), low earnings and skill mismatch.
Large Business	Business establishment employing 100 or more persons.
Life Expectancy	The average number of years a person could expect to live if current mortality trends were to continue for the rest of that person's life. Most commonly cited as life expectancy at birth.
Liquid Petroleum Gas	Liquid Petroleum Gases (LPG's) are hydrocarbons, which are gaseous under conditions of normal temperature and pressure but are liquefied by compression or cooling to facilitate storage, handling and transportation.
Literacy rate	The percentage of population aged 10 years and above that can read with understanding and write a simple sentence meaningfully in any language.
Loan	Money or securities supplied by one party (the lender) to a second party (the borrower) in a transaction in return for a promised future payment by the borrower. Such transactions normally include the payment of interest due to the lender as per agreed repayment schedules between the two parties.
Low pay rate	Low pay rate (LPR) or inadequate earnings rate refers to the proportion of the employed persons with hourly/monthly earnings less than 2/3 of median hourly/median earnings of full-time workers (persons working 40-48 hours a week); cf. Resolution on employment-related income by the 16 th ICLS (1998).

Marginally attached to the labour force	Discouraged workers and other inactive persons with labour force attachment.
Micro Hydro Power Stations	Hydro Power Stations generating electricity in the range of 5 KW – 100 KW
Mini Hydro Power Stations	Hydro Power Stations generating electricity in the range of 101 KW – 1 MW
Minor Accident	Accident where no persons are injured.
Minor Injury	Injury of a minor character such as a sprain, bruise or cut not judged to be severe or slight shock requiring roadside attention.
Motor vehicle	Any self-propelled automobile intended or adapted for use on the road.
National Referral Hospitals	In addition to the services offered at the regional referral hospital, they provide comprehensive specialist services and are involved in teaching and health research.
Net Enrolment Rate	The ratio of pupils in primary school aged 6 – 12 to the country total population aged 6 -12 years.
Net Enrolment Ratio	The Enrolment of the official age-group for a given level of education (Pre-primary, Primary and Secondary) expressed as a percentage of the corresponding population.
Net Intake Rate	The ratio of the pupils aged six in primary one to the country total population aged 6 years.
Net Intake Ratio	The number of new entrants of official age expressed as a proportion of the official school entry age (<i>3 years for pre- primary, 6 years for primary, 13 years for secondary and 19 years for tertiary</i>).
Non-traditional exports	Refers to commodities other than traditional exports (Coffee, Cotton, Tea, and Tobacco) that have recently featured in Uganda's export trade.
Numeracy rate	The Percentage of pupils who can use numbers, complete sequences, make additions, subtraction, simple multiplication, simple division, simple weights and measures, money counting, telling time, interpret a pictograph and draw a pictogram.
Occupation	Refers to the nature of task and duties performed during the reference period preceding the interview by persons in paid employment, unpaid family work or self-employment jobs.
Orphan	A child whose biological parent or both parents are dead. Single orphans are children who have lost one biological parent, while double orphans are those who have lost both biological parents.
Other crimes in general	Include threatening Violence, human trafficking, abduction, kidnap, arson (general), malicious damage to property, escapes from lawful custody, rescues from lawful custody, examination leakage and stealing, piracy, criminal trespass, domestic violence, attempted suicide, attempted murder (by shooting), attempted murder (other than shooting), other penal code offences (not categorised)
Overdraft	A type of a short-term loan particularly used to supply short-term credit to tide over the production cycle or finance for seasonal requirements.
Pass Rate	The percentage of pupils/students that passed exams at a given level of education.
Passengers	Travellers in a car, bus, train, plane or ship who are not driving or part of the crew. These also include those embarked and disembarked.
Pedestrian	Any person travelling on foot.

Permissible light work	Light work refers to non-hazardous activities done by children in their homes under observation and supervision by their families in an environment free of exploitation.
Persons in employment	Refers to all persons of working age who, during a short reference period, were engaged in any activity to produce goods or provide services for pay or profit. For “pay or profit” refers to work done as part of a transaction in exchange for remuneration payable in the form of wages or salaries for the time worked or work done. The payment may also be in the form of profits derived from the goods and services produced through market transactions.
Petrol	This is a light hydrocarbon fuel used in positive ignition engines. Another name used for this type of fuel is premium motor spirit.
Population pyramid	A population pyramid is a pictorial representation of the age distribution of a given population. Its shape is determined by the past birth and death rates in that population.
Poverty Gap (P1)	The sum over all individuals of the shortfall of their real private consumption per adult equivalent from the poverty line, divided by the poverty line. It is the measure of the depth of poverty, however, with limitations since it is insensitive to how consumption is distributed among the poor mainly below the poverty line. P1 is the per capita cost of eradicating poverty, as a percentage of the poverty line, if money could be targeted perfectly.
Poverty Headcount (P0)	The P0 indicator is “headcount”: the percentage of individuals estimated to be living in households with real private consumption per adult equivalent below the poverty line
Prison	Place where people are legally kept as a punishment for crimes they have committed or while awaiting trial.
Prison capacity	This is the number of inmates a prison can safely accommodate which is 01 prisoner per every 3.6m ² of accommodation space.
Prison occupancy rate	Is the number of inmates accommodated per available accommodation space of one prisoner expressed as a percentage.
Prisoner	A person kept in prison as a punishment for a crime or while waiting for trial.
Producer Price	The producer's price is the amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any VAT, or similar deductible tax, invoiced to the purchaser; it excludes any transport charges invoiced separately by the producer..
Proportional morbidity ratio	The proportion attributable to a given cause of illness. It is a proxy for the prevalence of sickness in a population.
Pupil-Classroom Ratio (PCR)	The average number of pupils (students) per classroom at a specific level of education in a given school year.
Pupil-Stance Ratio (PSR)	The average number of pupils (students) per latrine stance at a specific level of education in a given school year.
Pupil-Teacher Ratio (PTR)	The average number of pupils (students) per teacher at a specific level of education in a given school year.
Reckless/Dangerous Driving	A mental state in which the driver displays a wanton disregard for the rules of the road; the driver misjudges common driving procedures, often causing accidents and other damages.
Regional Referral Hospitals	In addition to the services offered at the general hospital, these hospitals offer specialist services such as psychiatry, ear, nose and throat, radiology, pathology, ophthalmology as well as higher level surgical and medical services, including teaching and research.

Relative Humidity	A measure of the amount of water vapour/moisture in the air (at a specific temperature) compared to the maximum amount of water vapour air could hold at that temperature, and is given as a percentage value. Relative humidity depends on the temperature of the air, as warm air can hold more moisture than cold air. Relative humidity of 100 percent indicates that the air is holding all the water it can at the current temperature and any additional moisture at that point will result in condensation.
Residents	Persons whose usual residence is Uganda including those whose nationality is not Ugandan.
Retained Reserves	The increase in value of a currency or the increase in value of fixed assets consisting mainly of freehold land and buildings.
Revaluation reserves	Reserves arising due to the revaluation of fixed assets but cannot be paid out as dividends because they are not realised profits. They merely restate the value of an asset.
Separated	A situation where married couples separate from each other without legalising the separation, and hence can re-unite after some time. However they are still regarded as married from the legal point of view.
Serious Accident	Accident in which a person is admitted in the hospital as an “in-patient” or any of the following injuries whether or not one is admitted in the hospital, or sustains: fractures, concussion, internal injuries, crashing, severe cuts and lacerations.
Serious Injury	Injury for which a person is admitted in hospital as an ‘in-patient’, or any of the following injuries whether or not the person is admitted in hospital: fractures, concussion, internal injuries, crashing, burns, severe cuts and lacerations or severe general shock requiring medical treatment.
Single	A man or woman who has never been married or never been in a consensual union.
Skill mismatch or skill inadequate employment	Skill mismatch measures the incompatibility between education and occupation. Workers whose educational attainment is above the skill requirement of their jobs are in some sense underutilized. The return on investment in their education and training is below optimum and somewhat wasted.
Solid waste	Any semi-solid or solid matter created by human or animal activities, and which are disposed because they are hazardous or useless.
Squared Poverty Gap (P2)	The sum over all individuals of the square of the shortfall of their real private consumption per adult equivalent and the poverty line divided by the poverty line. The reason to square the shortfall is to give greater weight to those who are living far below the line. The indicator caters for a policy which also makes transfers from someone just below the poverty line to the poorest person which P1 does not reflect.
Teaching Service	Teachers of primary and secondary schools, technical or commercial institutes as well as other tertiary institutions, colleges and establishments.
The Employment-to-population ratio (EPR)	The number of employed persons in the working age population given as a percentage of the total number of persons in the working age population. It is one of the measures of the extent of job creation in the economy. The indicator is calculated as:

$$EPR (\%) = \frac{\text{Number of employed persons in the working age population}}{\text{Total number of persons in the working age population}} (\times 100)$$

The labour force participation rate (LFPR)	<p>The labour force participation rate measures the proportion of the working age population that is economically active .i.e. working and unemployed. LFPR is the number of persons in the labour force given as a percentage of the working age population. The indicator is calculated as:</p> $LFPR(\%) = \frac{\text{Number of persons who are employed} + \text{number of persons who are unemployed}}{\text{Total number of persons in the working age population}} \times 100$
The Performance index	A measure of the quality of passing at all levels of education.
The unemployment rate (UR)	<p>Unemployment rate (UR) is the percentage of the labour force that is unemployed. It is calculated as follows:</p> $UR(\%) = \frac{\text{Number of unemployed persons in the working age population}}{\text{Total number of persons in the labour force}} (\times 100)$
Theft	The illegal taking of another person's property without that person's freely-given consent.
Time-related underemployment (TRE)	The <i>time-related underemployed</i> includes all employed persons whose hours of work “are insufficient in relation to an alternative employment situation in which the person is willing and available to engage.” Hence, the criteria of time-related underemployment at the national level can be summarized as: (i) willingness to work additional hours; (ii) availability to work additional hours and, (iii) having worked below a threshold of working hours (less than 40 hours a week).
Total Fertility Rate (TFR)	The average number of children that would be born alive to a woman (or group of women) during her lifetime if she were to pass through her childbearing years conforming to the age-specific fertility rates of a given period.
Trade Balance	The difference in value between the country's visible imports and exports.
Traditional Exports	Long-term export cash crops introduced to Uganda long time ago. That is Coffee, Cotton, Tea and Tobacco.
Traffic Accident	Crashes between vehicles; between vehicles and pedestrians; between vehicles and animals; or between vehicles and fixed obstacles.
Transition rate	The number of pupils (or students) admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils (or students) enrolled in the final grade of the lower level of education in the previous year.
Treasury Bill	Short-term bearer securities with maturities of 91 days, 182 days, 273 days or 364 days issued by Bank of Uganda.
Under-utilisation	An aggregate of persons who were; unemployed, in time related under-employment and potential labour force.

Unemployment	Persons of working age are classified as unemployed if, during a short reference period such as a day or a week, they (a) were without work, i.e. did not work for even one hour in any economic activity (paid employment, self-employment, or unpaid work for a family business or farm); (b) were available for work; and (c) had taken active steps to seek work during the past four weeks.
Value Added	The value of outcome when factors of production interact to produce and avail goods and services. Value added is the difference between the value of gross output and the value of intermediate inputs. Value added comprises of the following:
Value Added Tax (VAT)	A form of consumption tax. From the perspective of the buyer, it is a tax on the purchase price. From the seller's perspective, it is a tax only on the value added to a product, material or service.
Victim	A person who is offended as a result of a criminal act.
Wage Bill	All cash payments made by employers in return for labour provided by the employees. The payments include salaries and wages, overtime, holiday pay, bonuses, commissions, sick leave and any other allowances paid in cash to the employees.
Widowed	A situation where one partner in a marriage is dead. It applies to both monogamous and polygamous marriages. In case of polygamous marriages where the man is dead, the women are referred to as widows. However, where a man loses one of his many wives, he cannot be referred to as a widower.
Work	Comprises of own-use production work, employment work; unpaid trainee work, volunteer work and other forms of work. Work excludes activities that do not involve producing goods or services (e.g. begging and stealing), self-care (e.g. personal grooming and hygiene) and activities that cannot be performed by another person on one's own behalf (e.g. sleeping, learning and activities for own recreation).
Working age	While no international standard on age limits exists, for purposes of statistical measurement, the working age population is commonly defined as persons aged 15 years and older, but this may vary from country to country.
Working persons	Persons of working age are classified as working or employed if, during a short reference period such as a day or a week, (i) they did some work (even for just one hour) for pay, profit or family gain, in cash or in kind; or (ii) they were attached to a job or had an enterprise from which they were 'temporarily' absent during this period (for such reasons as illness, maternity, parental leave, holiday, training, industrial dispute).
Working poor	Individuals forming part of the working population but whose incomes fell below the official poverty line.
Working poverty rate (WPR)	WPR is the proportion of the employed population living in households that are classified as poor, i.e. their consumption or income levels are below a determined national poverty line. The direct measurement of the indicator can be expressed as:

$$\begin{aligned}
 & \text{WPR} \\
 &= \frac{\text{Number of employed persons in poor households (Number of working poor)}}{\text{Total number of employed persons}} \\
 & \times 100
 \end{aligned}$$

Worst Forms of Child Labour	<p>According to ILO convention No.182 (1999), the worst forms of child labour include:</p> <ul style="list-style-type: none"> (i) Child slavery or practice similar to slavery, such as sale and trafficking of children, debt bondage and serfdom, use of children in armed conflict; (ii) Use, procurement and offering of a child for prostitution and pornography; (iii) Use of children in illicit activities such as drug trafficking; (iv) Work that is likely to harm the health, safety and morals of children
Youth	<p>For statistical purposes, the United Nations defines <i>youth</i>, as those persons between the ages of 15 and 24 years, without prejudice to other definitions by Member States. In practice, however, many national statistics offices apply their own definitions of youth which often differ from the international standard. In Uganda, a youth is a person aged 18-30 years.</p>

CHAPTER ONE

Environment Statistics

This section presents statistics on Administrative units, land, forestry, climate and water supply.

1.0 Administrative Units

Uganda is stratified into administrative units namely; Districts, Counties, Constituencies, Sub-Counties, Parishes and Villages to facilitate service delivery near to the people. In total, there are 122 districts as at 1st July 2017, including Kampala Capital City. Below is a table indicating the number of administrative units at lower levels by region.

Table 1.1: Number of administrative units per region

n.a= data not available

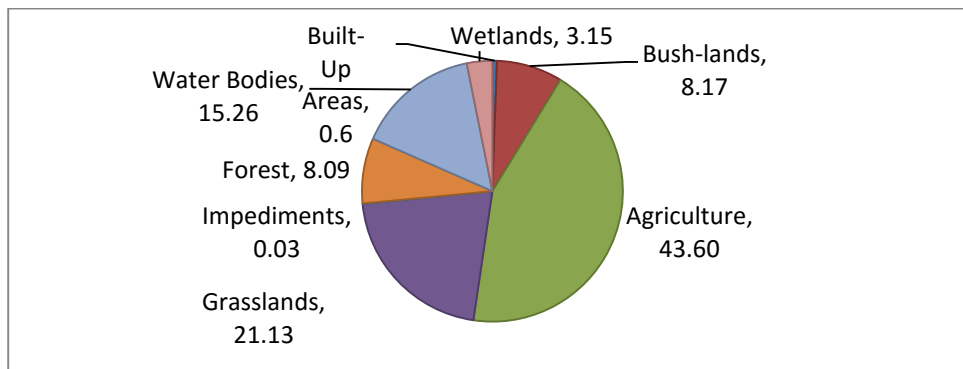

1.1 Land Cover

Uganda has an area of 241,550.7 square kilometres (sq.km), of which 44,484.77 sq. km are open water and swamps while 197,065.93 sq. km is land. The altitude above sea level ranges from 620 metres (Albert Nile) to 5,111 metres (Mt. Rwenzori peak). For trans boundary water bodies, Uganda shares Lake Victoria with Kenya and Tanzania and Lakes Albert and Edward with the Democratic Republic of Congo (DRC). Within its boundaries are lakes Wamala, Bunyonyi, Katwe, Nakivale, Mburo, Kyoga, George and Bisina.

Both eastern and western borders of Uganda are marked by mountains. The Rwenzori Mountains (often called the Mountains of the Moon) form about eighty kilometers of the border between Uganda and the Democratic Republic of Congo (DRC). In Eastern Uganda, the boarder with Kenya is marked by volcanic mountains including Mt. Elgon (4,324M ASL). In the North east, there is Mt Moroto (3,085M ASL). Further south, there is the Mufumbiro volcanoes reaching (4,132M ASL) and mark the border with Rwanda and Congo.

Land area estimates for 2015 by type of cover as updated from the Remote Sensing Survey indicated that agricultural land occupies the largest proportion of land cover area (43.6 percent), followed by grassland (21.13 percent) and then water (15.26 percent) as shown in Figure 1.1 and Table 1.1;

Figure 1.1: Share of Land Cover type, for Uganda 2015 (Sq km)

Areas under grasslands and water bodies almost remained the same between 2010 and 2015. Area under forest has significantly been decreasing since 1990. It decreased by 11 percent between 2010 and 2015. Land area for agriculture increased by 12.4 percent between 1990 and 2000, and by 8.6 percent between 2005 and 2010. It then increased by 6.1 percent between 2010 and 2015.

Notably, built-up area significantly increased by more than 40 percent between 2010 and 2015. Land area for bush lands also significantly decreased 17 percent in the same period. The changes are illustrated in figure 1.2 while the data is presented in table 1.1.

Figure 1.2: Land Cover area by type, 1990-2015 (sqkm)

Table 1.1.1: National Land Cover statistics (sq. km)

Type of land cover	1990	2000	2005	2010	2015
Built-Up Areas	365.7	365.7	365.7	969.79	1,360.02

1.2 Forests

1.2.1 Forests Cover

In 2015, Uganda had a total of 1.9 million hectares of forest land compared to 4.9 million hectares in 1990. This is a reduction of 60 percent over a period of 25 years. In 1990, forests covered 20.4 percent of the land area of the country compared to less than 10 percent in 2015. Table 1.2.1 gives the forest cover areas and changes between 1990, 2005, 2010 and 2015.

Table 1.2.1: Forest Cover change, hectares

Year/ Land cover/use	Broad leaved Plantations	Conifer Plantations	THF well stocked	THF low stocked	Wood land	Total Forest Cover
2015 (hectares)	44,298	63,568	529,186	102,000	1,214,478	1,953,530
2010 (hectares)	19,436	38,472	659,228	127,623	1,775,041	2,619,679
2005 (hectares)	14,841	18,767	542,787	201,644	2,816,423	3,594,462
1990 (hectares)	18,682	16,384	651,110	273,062	3,974,508	4,933,746
Change (2010- 2015)	-24,862	-25,096	130,042	25,623	560,563	666,149
Change in Area (2010-2015)	-128	-65	20	20	32	25
Change (1990- 2015)	-25,616	-47,184	121,924	171,062	2,760,030	2,980,216
Change in Area over 15 years	-137.1	-288.0	18.7	62.6	69.4	60.4
Annual percentage change (1990-2015)	-5.48	-11.52	0.75	2.51	2.78	2.42

1.2.2 Local and Central Forest Reserves

The proportion of land under Central Forest Reserve (CFR) was higher than the Local Forest Reserve (LFR) in all the regions as established through the National Bio-mass Study, 2015. Eastern region had the largest proportion under LFR (2.6 percent) while Western Region had the lowest proportion of less than 0.1 percent.

Table 1.2.2: Share of total area under forest reserves by region, 2015

Region	Central Forest Reserve		Local Forest Reserve		Total Forest reserve Area
	Hectares	Percentage	Hectares	Percentage	
Central	123,411	99.7	312	0.3	123,723
Eastern	12,689	98.2	235	1.8	12,924
Northern	128,852	99.7	382	0.3	129,234
Western	263,639	100	75	0	263,714
Uganda	528,593		1,002		529,595

LFR – Local Forest Reserve Source: NFA.

1.2.3. Production of Round Wood

The quantity and value of round wood produced in Uganda for the last five years is shown in Table 1.2.3. In 2016, Uganda produced 50.2 million tonnes of round wood worth about Shs 972 billion, registering an increment of 10.8 percent in value. See Annex Tables 1.2A and 1.2B for details

Table 1.2.3: Production of Round Wood

Category	2011	2012	2013	2014	2015	2016
Quantity ('000 tones)	41,161	42,889	44,707	46,603	48,581	50,168
Value (Mill. Shs)	471,499	571,643	690,608	773,969	876,789	972,101

1.3 CLIMATE

1.3.1 Rainfall and Rain-days

This section presents the Long Term Average and Monthly rainfall pattern during 2017 for seven (7) centres in the country as shown in Appendix Table 1.3 A. Detailed presentation is made for twelve synoptic stations which include Lira, Mbarara, Tororo, Kampala, Entebbe, Arua, Kabale, Jinja, Kasese, Masindi, Soroti and Gulu. The section further presents information on the monthly rain-days in the twelve stations. It should be noted that detailed data series for five years is included in the Appendix Table 1.3 A to D.

Rainfall

The total amount of rainfall received in Kampala during 2017 was 1,374.3 millimetres. The city area received higher monthly rainfall amounts than the long-term average for most of the months in the year. The highest amount of rainfall (207.1 mm) was received in March while the lowest was received in January (20.6 mm). See Statistical Appendix Table 1.3 (A).

Entebbe area received a total precipitation of 1,429 millimeters in 2017. It generally received slightly lower amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (264.4 mm) was received in April while the lowest was received in January (1.8 mm). See Figure 1.3.1 (a) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (a): Entebbe 2017 Monthly and Long term Rainfall

Kabale area received a total precipitation of 942.2 millimeters in 2017. The station generally received slightly lower amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (174 mm) was received in October while the lowest was received in June (4.7 mm). See Figure 1.3.1 (b) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (b): Kabale 2017 Monthly and Long term Rainfall

Jinja area received a total precipitation of 1122.6 millimeters in 2017. It generally received slightly higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (219.5 mm) was received in November while the lowest was received in January (27 mm). See Figure 1.3.1 (c) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (c): Jinja 2017 Monthly and Long term Rainfall

Gulu area received a total precipitation of 1795.9 millimeters in 2017. It generally received slightly higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (372.6 mm) was received in August while the lowest was received in December (5.2 mm). See Figure 1.3.1 (d) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (d): Gulu 2017 Monthly and Long term Rainfall

Rain Days

Rain days are important in knowing the distribution of number of days on which it rained within the different months of the year. Rain days are defined as days with total daily rainfall of at least 1mm. During 2016, the four centres had total rain-days as follows; Lira (132 rain-days), Entebbe (121 rain-days), Tororo (138 rain-days) and Kampala (122 rain-days). See Appendix Table 1.3D.

Monthly distribution of rain-days in the four centres indicate that Entebbe had the highest number of rain-days in the months of January, March, April and May; Kampala had the highest in February, November and December while Tororo had the highest number in the months of August, September and October as shown in figure 1.3.1(e).

Figure 1.3.1 (e): Monthly distribution of rain-days in Selected centres in 2017

1.3.2 Temperature

The mean daily maximum temperatures for the different months at the six different regional centres were generally highest at the beginning of the year (January to March) but declined gradually in April and May of 2017. Between June and December, the temperature kept rising and falling though below those experienced in the first three months. Entebbe experienced the lowest mean maximum temperature while Kasese had the highest mean maximum temperature in the same year as seen in Figure 1.3.2 below and Appendix Table 1.3B.

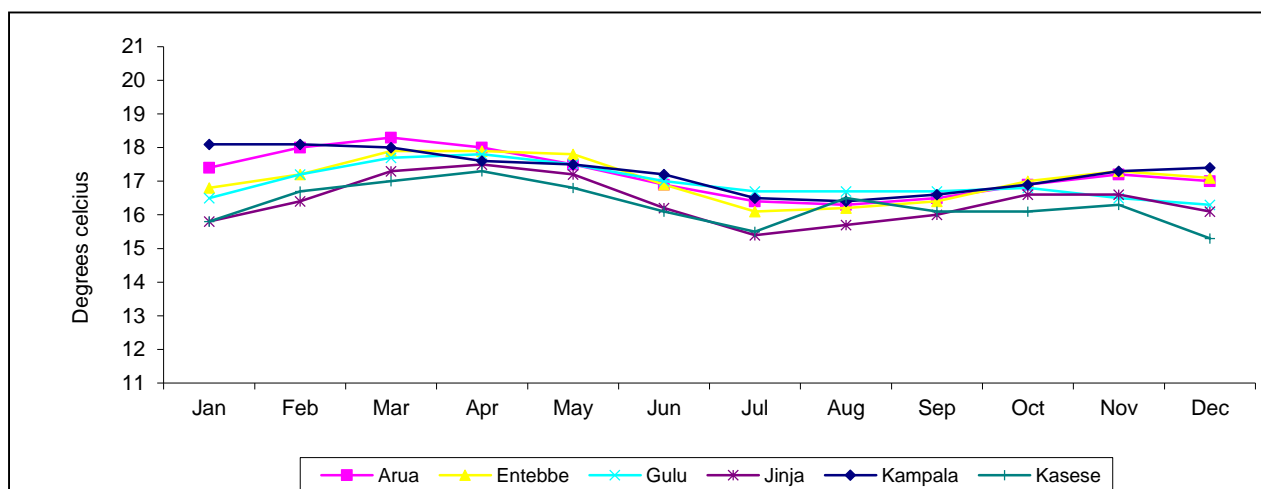

Figure 1.3.2: Long term mean maximum temperature for selected centres, 2017

Minimum Temperatures

The mean daily minimum temperature for selected centres shows that Arua and Jinja had the lowest mean daily minimum temperatures while Gulu had the highest mean daily minimum temperature during 2016. The trend for long term mean minimum temperature is generally similar for all centres increasing from January to March and then declining between April to July but later rising from August to October before finally decreasing in November. This trend is slightly different for only the Kampala station (See Figure 1.1.3 and Appendix Table 1.3B).

Figure 1.3.3: Long term Mean minimum temperature for selected centres, 2017

1.3.3 Relative Humidity

Monthly mean relative humidity in the Morning (06.00 hours) and Afternoon (12.00 hours) generally continued to be in-line with the long term average for all the selected centres (Statistical Appendix Table 1.3C).

Figure 1.3.4 below, shows mean relative humidity at 06:00 hours for the selected centres. Entebbe and Jinja continued to experience a generally high mean relative humidity at 06:00 hrs. throughout 2017 ranging between 76 and 85 percent. Gulu generally recorded the lowest mean relative humidity at 6:00 hrs. in the year.

Figure 1.3.4: Mean Relative Humidity at 06:00 hours for selected centres, 2017

Figure 1.3.5 below shows the (2012-2017) mean relative humidity at 12:00 hours for selected centres. Entebbe continued to experience the highest long term mean relative humidity at 12:00 hours throughout 2016 ranging from 63.0 to 77 percent. Gulu with 25 percent in January had the lowest mean relative humidity at 12:00 hours in the year.

Figure 1.3.5: Mean Relative Humidity at 12:00 hours for selected centers, 2017

1.4 Water Supply

1.4.1 Metered water

During the year 2017/18, water production was 126.3 million cubic meters compared to 120.6 million cubic meters produced in the 2016/17 hence an increase of about five percent which is lower than the increment registered in 2016/17 (14.3%). Figure 1.4.1 below shows the national trends of metered water production by NWSC over the past six financial years.

Out of the 126.3 million cubic meters produced in 2017/18, 95 percent (119.98 million m³) was supplied and of this 83.1 million m³ was sold implying a billing efficiency of 69 percent (Statistical Appendix Table 1.4D).

Figure 1.4.1: Water produced by NWSC in Uganda, 2012/13 – 2017/18

1.4.2 Unmetered water

The Directorate of Water Development (DWD) also supplies water especially in the rural areas and small towns through the provision of boreholes.

Over the years, there has been both increase and decrease in the amount of water supplied by DWD. There was a reduction in water supply from 2.6 million cubic metres in 2014/15 to 0.47 million cubic metres in 2015/2016 (see Figure 1.4.2). There were a number of towns taken over by NWSC during the 2015/16 FY in coupled with late reporting to the UPMIS online system. The trend is improving given that, districts are getting used to the application. Details at District level are as seen in Statistical Appendix Table 1.4F.

Figure 1.4.2: Trends in water supplied for small towns, 2013/14 – 2017/18

CHAPTER TWO

Demographic Statistics

2.1 Population

2.1.1 Population Trends

Uganda's population has continued to grow over time. Figure 2.1.1 shows that, the population increased from 9.5 million in 1969 to 34.6 million in 2014. Between 2002 and 2014 the population increased from 24.2 million to 34.6 million representing an average annual growth rate of 3.0 percent. It is projected to be 39 million in Mid-2018.

Figure 2.1.1: Census population, 1969 - 2014 and Projected Population 2017 and 2018

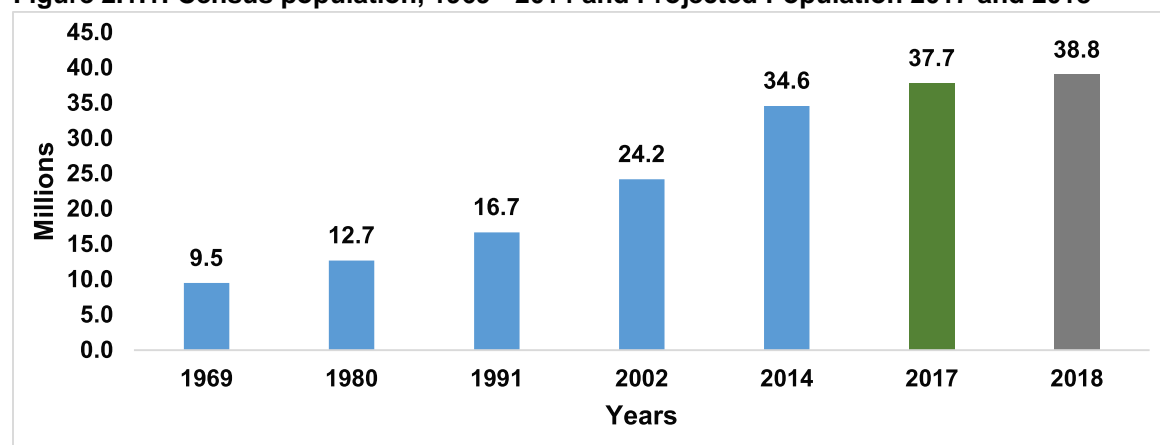

Table 2.1.1 shows that, the average annual growth rate declined from 3.2 in 2002 to 3.0 in 2014 with an average annual increase of about one million persons. However, the population grew at a lower rate in the early twentieth century where the population increased from about 2.5 in 1911 to 2.9 million in 1921. This is an increase of 400,000 persons in ten years reflecting an average annual population growth rate of less than two percent. The highest average annual growth rate (3.9 percent) was observed during the inter-censal period between 1959 and 1969.

Table 2.1.1: Population size, Inter-censal Population changes and average annual growth rates, 1911-2014

Census year	Male	Female	Total	Inter-censal Period	Average Annual Increase (000's)	Average Annual Growth Rate (%)
1911	1,116,903	1,349,422	2,466,325			
1921	1,320,286	1,534,322	2,854,608	1911-1921	39	1.5
1931	1,707,437	1,834,844	3,542,281	1921-1931	68	2.2
1948	2,481,394	2,477,126	4,958,520	1931-1948	83	2.0
1959	3,283,222	3,253,394	6,536,616	1948-1959	143	2.5
1969	4,812,447	4,722,604	9,535,051	1959-1969	300	3.9
1980	6,259,837	6,376,342	12,636,179	1969-1980	262	2.7
1991	8,185,747	8,485,558	16,671,705	1980-1991	367	2.5
2002	11,824,273	12,403,024	24,227,297	1991-2002	647	3.2
2014	17,060,832	17,573,818	34,634,650	2002 - 2014	882	3.0

Source: Uganda Bureau of Statistics.

2.1.2 Population Distribution by Age and Sex

A population pyramid is a graphical representation of the age-sex distribution of a given population. Its shape is determined by the past birth, death and migration rates in that population. Uganda's population pyramid (Figure 2.1.2) is broad based, implying that the majority of the population is young; a characteristic of a country with high fertility levels.

Figure 2.1.2: Population Pyramid in Five-Year Age Groups, Uganda, 2018

2.1.3 Population of Special Interest Age Groups

Table 2.1.2 shows that, the highest proportion of Uganda's population is young (under 18 years) constituting more than half of the population (55 percent). It increased from 51 percent in 1969 to 56 percent in 2002 and slightly dropped to 55 percent in 2014. One in five persons of the population is of primary school going age (6-12 years). On the other hand, the proportion of older persons (aged 60 years and above) decreased from six percent in 1969 to about four percent in 2014.

Table 2.1.2: Proportion of the Population by Special Interest Groups, for the censuses; 1969-2014 and 2018 projection

Age Category	1969	1991	2002	2014	2018
Less than 18 Years (Children)	51.4	53.8	56.1	55.0	53.6
6 – 12 Years (Primary School Age)	22.7	22.3	21.9	21.3	20.2
10 – 19 Years (Adolescents)	20.2	24.1	25.4	25.6	25.7
10 – 24 Years (Adolescents)	27.8	33.3	34.2	31.7	35.2
13 – 18 Years (Secondary School Age)	11.4	14.1	14.4	15.2	15.1
15 – 24 Years (Youths)	16.2	20.0	19.9	20.6	21.5
15 – 49 Years (Reproductive Age)	43.6	44.4	43.8	45.7	47.5
18 – 30 Years (Youths)	21.7	23.6	22.3	22.5	22.9
60 Years or More (Older Persons)	5.8	5.0	4.6	4.1	3.7

2.1.4 Population in Urban Areas

In Uganda the definition of urban areas has changed over time. The 2002 and 2014 Population and Housing Censuses defined urban areas to include only gazetted (approved by the responsible authority) cities, municipalities, town councils and town boards. The 1991 census however, considered all trading centres (gazette and ungazetted) with more than 1,000 people to be urban.

Figure 2.1.3 shows that, the urban population increased from less than one million persons in 1980 to about 3 million in 2002, representing nearly a threefold increase and further increased to 7.4 million in 2014. The projected urban population in mid-2017 was 9.4 million. The higher increase is attributed to four factors, including; 1) gazettement of new urban areas, 2) natural increase (difference between number of live births and number of deaths) and 3) redemarcation of the boundaries of selected urban areas, 4) rural - Urban Migration. The growth in urban population from 2.9 million in 2002 to 9.4 million in 2017 was mainly driven by creation of new districts, municipalities and town councils subsequently gazettement former rural areas as urban areas.

Figure 2.1.3: Urban Population

2.1.5 Fertility

The Total Fertility Rate refers to the average number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the age-specific fertility rates of a given period. Figure 2.1.4 shows that the fertility levels in Uganda have declined over time. The Total Fertility Rate (TFR) declined from 6.9 children per woman to 5.4 children per woman between 1995 and 2016.

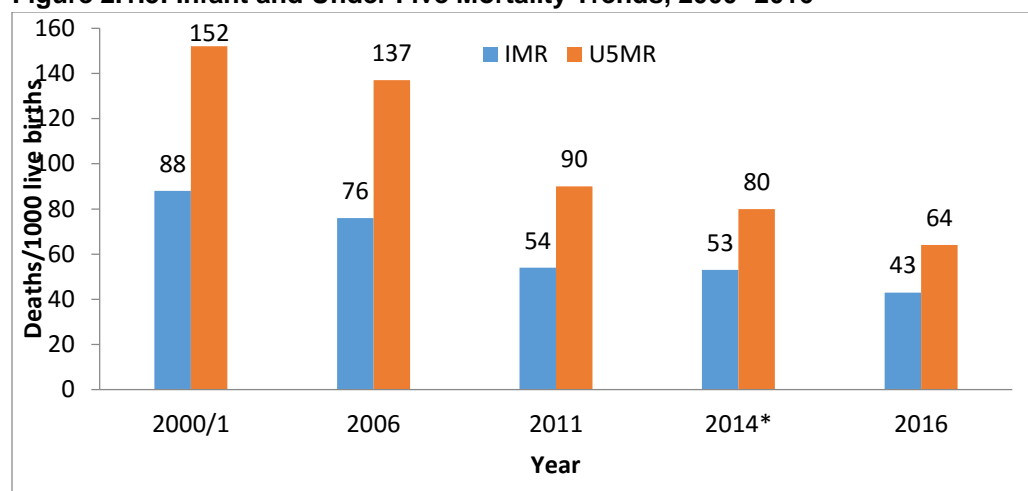

Figure 2.1.4: Fertility Trends, 1995- 2016

2.1.6 Mortality

Figure 2.1.5 presents the trend of Infant Mortality Rates (IMR) and Under Five Mortality (U5MRs) from 2000 to 2016. Infant mortality is the probability of dying between birth and less than one year of age expressed per 1,000 live births while Under Five Mortality is the probability of dying between birth and less than five years of age expressed per 1,000 live births. Infant and Under Five Mortality rates between 2000 and 2016, declined by more than half, dropping from 88 to 43 deaths per 1000 live births and from 152 to 64 deaths per 1,000 live births respectively.

Figure 2.1.5: Infant and Under Five Mortality Trends, 2000- 2016

2.1.7 Life Expectancy at Birth

Life expectancy at birth is an estimate of the average number of years a person is expected to live if a particular pattern of mortality is maintained. Table 2.1.5 shows that, overall life expectancy at birth in 2014 was 63.7 years. As expected, life expectancy of males (62.8 years) is lower than that of their women counterparts ((64.5 years). Between 2002 and 2014 there was a gain of 13 years in life expectancy which could be attributed to the reduction in mortality rates and improved living standards as a result of improvements in the health systems.

Table 2.1.3: Life Expectancy at Birth by Census Year 1969- 2014

Census Year	Male	Female	Total
1969	46.0	47.0	46.5
1991	45.7	50.5	48.1
2002	48.8	52.0	50.4
2014	62.8	64.5	63.7

Source: Uganda Bureau of statistics

2.1.8 Population Projections

Table 2.1.4: Census Population by Residence and Year

Year	Urban	Rural	Total
1969	634,952	8,900,099	9,535,051
1980	938,287	11,697,892	12,636,179
1991	1,889,622	14,782,083	16,671,705
2002	2,921,981	21,305,316	24,227,297
2014	7,425,864	27,208,786	34,634,650

Source: Uganda Bureau of Statistics

Note: The figures for 1969, 1980 and 1991 are as per the 1991 definition while those for 2002 and 2014 are as per the 2014 definition of urban (gazzetted) areas. The urban population of 2014 includes the population enumerated in Town Boards.

2.2 Education

Uganda's education system is comprised of an early childhood programme that caters for children aged 3-5 years (pre-primary education), followed by seven (7) years of primary education, followed by four (4) years of Ordinary Level secondary education, two (2) years of Advanced Level secondary education and the final tier is three (3) to five (5) years of Tertiary education. Each level is nationally examined with certificates awarded.

2.2.1 Pre-Primary School Education

Pre-primary education offers Early Childhood Care and Education (ECCE). The official school going age for pre-primary is 3-5 years. The enrolment at Pre-primary level decreased by 10 percent from 18 percent in 2016 to 8 percent in 2017 as presented in Table 2.2.1. Over the years, 2013 to 2017, the number of females enrolled in pre-primary has been more than that of males. The Pupil Classroom Ratio (PCR) and Pupil Teacher Ratio (PTR) stood at 27 and 22, respectively in 2017.

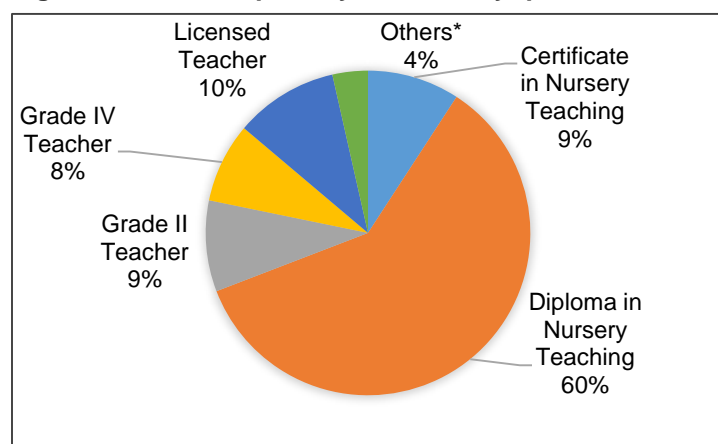

Table: 2.2.1: Trends of selected Pre-Primary Education Indicators, 2013-2017

Indicator	2013	2014	2015	2016	2017
Gross Enrolment Rate	10.2	9.74	9.88	15.8	16.6

2.2.2 Teachers' qualification in Pre-Primary

Figure 2.2.1 shows that of the pre-primary teachers that declared their qualification, the majority had a diploma in nursery school teaching (60 percent), those with a certificate in nursery teaching and grade II accounted for 9 percent each individually.

Figure 2.2.1: Pre-primary teachers by qualification, 2017

*others include Grade III Teacher, Grade V Teacher including DSNE (Diploma in Special Needs Education), Diploma in Secondary Education (DSE), DTE- Diploma in Tertiary Education, Graduate Teacher, Trained care giver and DPE (Diploma in Primary Education)

2.2.3 Primary School Education

The primary enrolment increased from 8.5 million in 2013 to about 8.8 million pupils in 2017 as shown in Table 2.2.2. The number of teachers has been increasing over the years from about 186,000 in 2013 to 207,000 in 2017. The Pupil Teacher Ratio has remained constant at 43 since 2015.

Table 2.2.2: Key Primary Education Indicators, 2013-2017

Indicator	2013	2014	2015	2016	2017
Gross Enrolment Ratio	113	117	109	112	111

2.2.3.1 Pupil Enrolment

Table 2.2.3 shows that enrollment decreases as pupils' progress to higher classes. In 2017, enrolment decreased from about 2.0 million in P.1 to about 0.62 million in P.7.

Table 2.2.3: Primary School Enrolment by class (2013-2017)

Class	2013	2014	2015	2016	2017
P1	1,883,803	1,932,489	1,842,006	1,888,847	1,965,606

2.2.3.2 Sitting space

Adequate sitting space refers to at most three pupils per standard desk. Table 2.2.4 shows that in 2017, more than two thirds (67 percent) of the pupils enrolled in primary had adequate sitting space. The share of pupils with adequate sitting space increased with the level of class.

Table 2.2.4: Primary school pupils with adequate sitting space by class, 2017

Class	Enrolment in 2017	Pupils with adequate space	Share of pupils with adequate space to total Enrolment
P1	1,965,606	1,071,795	54.5
P2	1,365,311	862,380	63.2
P3	1,377,947	919,042	66.7
P4	1,365,908	953,670	69.8

2.2.3.3 Primary Leaving Examinations (PLE) Performance

Passing PLE is a requirement for one to transit to the first grade of secondary education (S.1). Table 2.2.5 shows that of the 628,606 pupils who sat for PLE, a majority (293,977) passed in Division II while 57,354 failed (Div.U). More males than females passed in Divisions I and II.

Table 2.2.5: Primary Leaving Examination indicators; 2017

Indicator	Total Number	Male	Female
Pupils who registered	643,508	48.4	51.6
Pupils Who Sat for PLE	628,606	48.5	51.5
Pupils who passed PLE	571,252	49.2	50.8
DIV I	57,198	56.2	43.8
DIV II	293,977	50.8	49.2
DIV III	128,573	43.6	56.4
DIV IV	91,504	47.6	52.4
DIV U*	57,354	41.3	58.7
DIV X**	14,902	45.2	54.8
Pass Rate (Percent)	88.8	90.2	87.4
Performance index*	56.7	54.8	58.8

Source: Uganda National Examinations Board

*DIV U: Pupils either failed or ungraded

**DIV X: Pupils who were absent

*The Performance index measures the quality of passing at all levels of education and is computed as the (Number in Div. I multiplied by 20) + (Number in Div II multiplied by 15) + (Number in Div III multiplied by 10) + (Number in Div IV multiplied by 5) + (Number in Div U multiplied by 0)) all Divided by (Total that Sat PLE multiplied by 20)

Over the five year period 2013-2017, Figure 3.1 reveals that the pass rate increased from 87 percent in 2016 to 91 percent in 2017 resulting into a performance index of 58 percent. There was a general increase in the proportions of pupils that sat for PLE and those that passed.

Figure 2.2.2: Trend of Proportion of pupils that sat for PLE, Pass rate and Performance index in primary, 2013-2017

2.2.3.4 Primary Completion and Transition Rate

In 2017, more than half (60 percent) of the primary pupils completed P.7 while the transition rate to S1 stood at 61 percent as seen in Table 2.2.6. There were minimal variations by sex for the two variables.

Table 2.2.6: P.7 completion and Transition rates to S.1 by years; 2013-2017

Indicator	2013	2014	2015	2016	2017
P.7 Completion rate					
Boys	68.0	72.0	59.8	59.7	59.3

2.2.3.5 Teachers' qualification in Primary

More than half (61 percent) primary school teachers were Grade III Teachers followed by those with a Diploma in Primary Education (15 percent) as shown in Table 2.2.7.

Table 2.2.7: Primary teachers by level of qualification and sex, 2017

Teacher Qualification	Sex		Total	Percentage to total number of teachers
	Female	Male		
DPE (Diploma in Primary Education)	13,220	18,168	31,388	15.1
Grade II Teacher	286	234	520	0.3

2.2.3.6 Secondary School Education

Secondary enrolment reduced by six percent from about 1,458 ,000 in 2016 to 1,371,000 in 2017 while the Student Teacher Ratio (STR) dropped to 21 in 2017 from 22 in 2016. The Student Classroom Ratio also dropped to 49 from 51 in 2016 as shown in Table 2.2.8. This implies that the number of students per classroom and teacher is reducing.

Table 2.2.8: Selected Secondary School Education Indicators, 2013 – 2017

Indicator	2013	2014	2015	2016	2017
Gross Enrolment rate	29	30	25	27	25

2.2.3.7 Student Enrolment by class

Table 2.2.9 shows that enrollment decreases as students' progress to higher classes. In 2017, enrolment decreased from about 347,000 in S.1 to about 68,000 in S.6. A similar pattern was observed for the previous years.

Table 2.2.9: Secondary School Enrolment by Class, 2013-2017

Year	S1	S2	S3	S4	S5	S6	Total
2013	346,537	305,501	284,919	250,274	85,760	89,448	1,362,439

** Not all teachers' qualifications were submitted hence the variance from total number of teachers reported

*Other training: all teachers who do not fall under any of the mentioned training qualifications

2.2.3.9 UCE and UACE Performance

Table 2.2.11 shows that of the students who sat for UCE, about 131,688 passed in Division IV. Of the students that registered for UCE, about 27,780 (DIV.U) failed the examinations. A performance index of 44 percent was registered in 2017.

Table 2.2.11: Uganda Certificate of Education (UCE) results by grade and sex, 2017

Indicator	Numbers	Male	Female	Percentage
Students who registered	321,841	50.7	49.3	100.0
Students Who Sat for UCE	315,830	50.7	49.3	100.0
Students who didn't sit	6,011	51.0	49.0	100.0
Students who passed	288,050	50.9	49.1	100.0
Division 1	31,465	58.4	41.6	100.0
Division 2	53,877	55.5	44.5	100.0
Division 3	71,020	52.0	48.0	100.0
Division 4	131,688	46.7	53.3	100.0
Division U*	27,780	48.1	51.9	100.0
Division X**	6,011	51.0	49.0	100.0
Pass Rate	91.2	91.6	90.7	
Performance Index***	44.4	46.6	42.2	

Source: UNEB, 2017

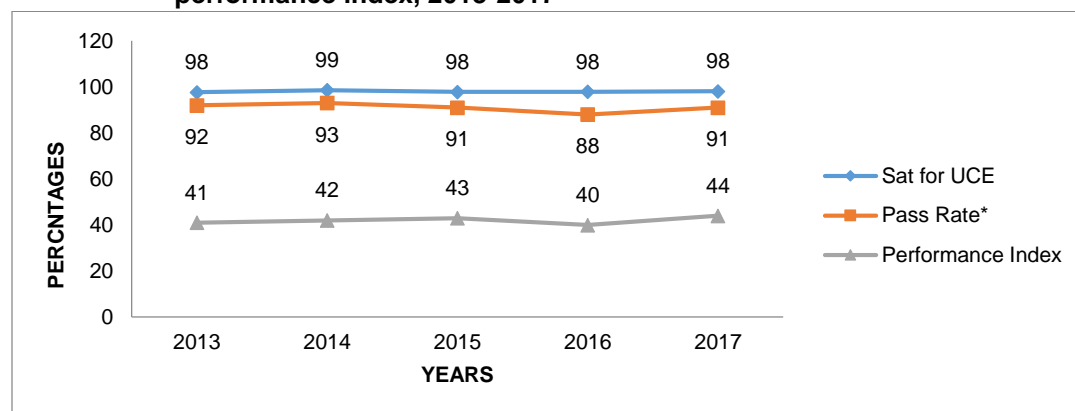

*DIV U: either failed or was ungraded

**DIV X: were absent

*** The Performance index measures the quality of passing at all levels of education and is computed as the (Number in Div. I multiplied by 20) + (Number in Div II multiplied by 15) + (Number in Div III multiplied by 10) + (Number in Div IV multiplied by 5) + (Number in Div U multiplied by 0)) all Divided by (Total that Sat UCE multiplied by 20).

In 2017, almost all (98 percent) of the students who registered for UCE exams, actually sat for the examination. Nine percent of those that sat failed. Figure 2.2.3 shows that the performance index increased slightly from 41 percent in 2013 to 44 percent in 2017 during the period 2013-2017. The pass rate decreased from 92 percent in 2013 to 91 percent in 2017.

Figure 2.2.3: Trend in proportion of students who sat for Uganda Certificate of Education (UCE), pass rate and performance index, 2013-2017

2.2.3.10 Trend in UACE performance

Over the five year period 2013-2017, the proportions of students that sat and passed UACE was nearly universal (above 98 percent) as shown in Table 2.2.12.

Table 2.2.12: Trend in Uganda Advanced Certificate of Education (UACE) performance, 2013-2017

Year	Students who registered				Students who sat			
	Did not sit for UACE	Sat for UACE	Total Percentage	Number	Passed*	Failed**	Total Percentage	Number
2013	1.5	98.5	100.0	116,129	97.9	2.1	100.0	114,362
2014	1.0	99.0	100.0	108,263	98.5	1.5	100.0	107,153

**Failed: had 1 Subsidiary pass or failed

2.2.3.11 S.4 Completion and Transition Rate to S.5; 2013-2016

O' Level Secondary completion rate is computed as the total number of students in the fourth grade of secondary education divided by the total number of children of official completion age (16 years). It captures the transition rate from primary to secondary schooling. Table 2.2.13 shows that the transition rate to S.5 in 2017 was 25 percent, a decrease from 30 percent in 2016. In both instances, males were more likely to complete S.4 as well as transition to S.5 compared to their female counterparts.

Table 2.2.13: S.4 completion and Transition rates to S.5

SEX	2013	2014	2015	2016	2017
Senior 4 Completion rate					
Boys	36.7	36.4	36.4	39.6	36.2

2.2.3.12 Orphans

The Annual School Census considers an orphan as a child below 18 years of age who has lost either one or both parents. In 2017 orphans accounted for 8 percent of the pre-primary enrolment a slightly lower percentage from that of 2016 (9 percent) as seen in Table 2.2.14. The share of orphans to primary enrollment in 2017 was 12 percent, a similar proportion for 2016 and 2015. About 17 percent of the students enrolled into secondary education in 2017 were orphans which was one percentage point less than the 2016 proportion. Details on number of orphans by sex, education level for 2013-2017 are in Appendix Table 2.2. L.

Table 2.2.14: Share of orphans to total enrolment by education level, 2013 – 2017

Education Level	Sex	2012	2013	2014	2015	2016	2017
Pre-Primary	Male	19,344	20,608	20,759	16,188	24,875	24,996
	Female	18,621	19,404	19,563	15,332	23,403	23,339
	Total	37,965	40,012	40,322	31,520	48,278	48,335
Primary	Male	635,975	628,287	587,868	485,475	543,791	528,248

2.2.3.13 The National Assessment of Progress in Education (NAPE) competence scores

Educational assessment seeks to determine how well students are learning and is an integral part of the quest for improved education. It provides feedback to students, educators, parents, policy makers, and the public about the

effectiveness of educational services¹. The National Assessment of Progress in Education (NAPE) tests for pupils competencies in Literacy, Numeracy and Biology for secondary students only.

Table 2.2.15 shows an increasing trend in the literacy rate for P.3 pupils although there was a 4 percent decline from 2014 to 2015. The literacy rate was higher for girls compared to boys. On the other hand, the P.6 Literacy rate declined from 2013-2014 though a 14 percent increase was observed between 2014 and 2015. The Numeracy rate for P.3 pupils increased from 69 percent in 2013 to 72 percent in 2016. However, a notable decline was observed in the Numeracy rate for P.6 pupils from 41 percent in 2013 to 53 percent in 2015.

Table 2.2.15: NAPE Competence Scores for Primary by class (P.3 and P.6)

Sex	2013	2014	2015
Competence in Literacy at P.3			
Boys	53.9	62.0	59.0
Girls	56.4	66.5	61.3

*in 2016 and 2017 no competency test in literacy was done

2.2.3.14 Tertiary Education

Table 2.16 indicates that in 2016 the enrolment at tertiary level was about 259,000 of which 72 percent were in universities. The proportion of males (56 percent) enrolled in higher institutions was higher than that of females (44 percent). In terms of trends, enrolment at the tertiary level increased from about 201,376 in 2013 to 258,866 students in 2016.

2.2.3.15 Literacy

The literacy rate was obtained from household based surveys and the 2014 National Population Household Census (NPHC) with no assessments done. The literacy rate among persons aged 10 years and above has generally increased over time from 2009 to 2017 with about seven in every ten (70 percent) of the population aged 10 years and above literate. Males (77 percent) were found to be more literate than their Female (70 percent) counterparts as presented in table 2.2.18.

Table 2.2.18: Literacy Rate for population aged 10 years and above by residence, 2009-2017

YEARS	Urban	Rural	Total
MALE			
2009/10	90	77	79
2012/13	87	72	76
2014	89	74	77

2014	86	68	72
2015	83	68	71
2016/17	87	69	73

Both males and females aged 10 years and above residing in Urban areas had higher literacy rates than those in the rural areas (2015 - 2016/17) as shown in figure 2.2.4

Figure 2.2.4: Literacy Rate for population aged 10 years and above by residence and sex 2015-2017

2.3 Labour Statistics

Labour statistics are vital in the measurement of economic growth and development of a nation. These statistics provide indicators on the number of persons who, during a specified period, contributed to the production of goods and services in the country and their characteristics.

2.3.1 Work and Employment

In 2013 the International Labour Organisation (ILO) convened the 19th International Conference of Labour Statisticians (ICLS) and revised concepts and definitions of Statistics of work, employment and labour underutilization. The ILO notes that these new concepts were more appropriate in addressing employment and unemployment statistics in developing countries.

Work comprises any activity performed by persons of any sex and age to produce goods or to provide services for use by others or for own use. The concept of work is aligned with the General production boundary as defined in the System of National Accounts 2008 (SNA, 2008) and its concept of economic unit that distinguishes between:

- (i) market units (i.e. corporations, quasi-corporations and household unincorporated market enterprises 2);
- (ii) non-market units (i.e. government and non-profit institutions serving households); and
- (iii) households that produce goods or services for own final use.

To meet different objectives, five mutually exclusive **forms of work** are identified for separate measurement. These forms of work are distinguished on the basis of the intended destination of the production (for own final use; or for use by others, i.e. other economic units) and the nature of the transaction (i.e. monetary or non-monetary transactions, and transfers), as follows:

- (a) *employment work* comprising work performed for others in exchange for pay or profit;
- (b) *own-use production work* comprising production of goods and services for own final use e.g. subsistence foodstuff producers;
- (c) *unpaid trainee work* comprising work performed for others without pay to acquire workplace experience or skills;
- (d) *volunteer work* comprising non-compulsory work performed for others without pay;
- (e) *other work activities* e.g. activities as unpaid community service

2.3.2 Key Labour Market Indicators of the Working Population

The distribution of Uganda's working population during the period 2012/13 and 2016/17 is presented in Table 2.3.1. The total working population was estimated at 15 million in 2016/17 from about 14 million in 2012/13. In both years the proportion of the working females (nearly 51 percent) was higher than that of the males (about 49 percent). The majority of the working population was residing in the rural areas (76 percent and 77 percent respectively for UNHS 2016/17 and UNHS 2012/13) while only 24 percent and 23 percent respectively were staying in the urban areas.

Table 2.3.1: Key Labour Market Indicators of Working Population (14-64 years) by sex and residence

Selected Labour Market Indicators	Male	Female	Rural	Urban	Total
UNHS 2016/17					
Working age population ('000)	8,965	10,139	13,803	5,301	19,104

The regional disaggregation of the population showed the Eastern region having the highest proportion of the working population in 2016/17 (27%), while the Northern region had the lowest. Kampala City had four percent of the working population. Overall, the working population increased by eight percent between 2012/13 and 2016/17.

Table 2.3.2: Distribution of the working population by selected characteristics (14-64 years), UNHS 2009/10, UNHS 2012/13 and UNHS 2016/17

2.3.2.1 Industry of the main job for the working population

The 2016/17 Uganda National Household Survey revealed that the highest percentage of the working population (65%) was engaged in Agriculture, forestry and fishing industry. The proportion working in the agriculture, forestry and fishing industry was higher for females (71 percent) than males (59 percent), see Table 2.3.3. Trading was the second prominent industry of the working population with a workforce share of 12 percent. This pattern was similar to the one observed during the 2009/10 and the 2012/13 survey periods.

Table 2.3.3: Distribution of Industry of the main job for working population (14-64 years)

Industry	UNHS 2009/10			UNHS 2012/13			UNHS 2016/17		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

2.3.3 Key Labour Market Indicators of the employed population

Employment refers to the current supply of labour for the production of goods and services in exchange for pay or profit.

According to UNHS 2016/17, the total employed population was estimated at 9 million people as indicated in Table 2.3.4 compared to 15 million persons who were working presented in Table 2.3.2 above. The difference of about 6.0 million persons depicts existence of a high number of persons in unpaid work in Uganda mostly subsistence activities and especially in agriculture.

Table 2.3.4: Selected Labour Market Indicators for Persons in Employment (14-64 years)

Selected Labour Market Indicators	Male	Female	Rural	Urban	Total
UNHS 2016/17					
Employed population ('000)	5,047.3	4,023.2	5,985.5	3,085.0	9,070.5
Employment to Population Ratio (EPR)	56.3	39.7	43.4	58.2	47.5
UNHS 2012/13					
Employed population	4,310.4	3,576.1	5,387.0	2,499.5	7,886.5
Employment to Population Ratio (EPR)	54.9	41.3	43.8	59.3	47.8

Source: UNHS 2012/13 and UNHS 2016/17, UBOS

The sum of persons in employment and in unemployment equals the labour force. Persons outside the labour force are those of working age who were neither in employment nor in unemployment in the short reference period.

The statistics in appendix Table 2.3.B indicate that the Labour Force Participation Rate (LFPR) was 52.3 while the Employment to Population Ratio (EPR) was 47.5. The subsistence agriculture rate was 31 percent. There existed variations in LFPR, EPR and Subsistence agriculture rate by selected background characteristics.

2.3.3.1 Status in employment

The information in Table 2.3.5 reveals that 38 percent of the population in employment during the period 2016/17 were paid employees while 50 percent were own account workers. The proportion of males in paid employment (46 percent) was higher than that of females (28 percent).

Overall, more than one half (57 percent) of the persons in employment were classified as “vulnerable employment*”. Females (68 percent) and those resident in rural areas (64 percent) are more likely to engage in vulnerable employment compared to their other counterparts.

Table 2.3.5: Status in Employment for Persons in Employment (14-64 years)

	Male	Female	Rural	Urban	Total
Paid employment	46.0	28.3	31.4	51.3	38.1
Employer	5.5	2.9	3.5	5.9	4.3
Own account worker	43.8	57.6	56.6	37.0	49.9
Contributing family worker	4.3	10.3	7.8	5.2	6.9
Others	0.5	0.9	0.7	0.6	0.7
Total	100	100	100	100	100
Vulnerable employment	48.0	68.0	64.4	42.2	56.9

Source: UNHS 2016/17, UBOS

* Vulnerable employment is defined as the sum of the employment status groups of own-account workers and contributing family workers. They are less likely to have formal work arrangements, and are therefore more likely to lack decent working conditions, adequate social security and ‘voice’ through effective representation by trade unions and similar organizations. Persons in “vulnerable employment” are less likely to have formal work arrangements.

2.3.3.2 Industry of the Employed population

The findings presented in Table 2.3.6 indicate that agriculture, forestry and fishing was the predominant industry of employment with a share of 36 percent. This was followed by those in sales, maintenance, repair of vehicles and personal goods (combined as trade) which employed almost one quarter (23 percent).

Table 2.3.6: Industry for Persons in Employment (14-64 years)

Industry of employment	Male	Female	Rural	Urban	Total
Agriculture, forestry and fishing	35.5	35.9	48.0	11.7	35.7
Trade	18.3	28.6	19.1	30.1	22.9
Manufacturing	8.3	7.4	8.2	7.4	7.9
Transport and storage	9.9	0.0	4.4	7.6	5.5

Source: UNHS 2016/17, UBOS

The proportion of persons employed in agriculture, forestry and fishing was higher among young person's 14 to 17 years (68 percent) and the older persons (55 percent) compared to other age groups. (Appendix Table 2.3 D).

2.3.3.3 Occupations of the Employed population

The findings in Table 2.3.7 show that overall, service and sales workers had the highest proportion of the employed population (about 31 percent) followed by skilled agricultural, forestry and fishery workers (27 percent). There were more females working as service and sales workers (40 percent) compared to the males (23 percent). On the other hand, there were more males in the elementary occupations (22 percent), craft and related workers (11 percent) and plant and machine operators (8 percent) compared to their female counterparts.

The results further show that the proportion of persons employed in occupations requiring high qualifications including professional occupations and technicians and associate professionals was low (9%) with no major gender disparities observed.

Table 2.3.7: Occupations of Persons in Employment (14-64 years)

Occupation	Male	Female	Rural	Urban	Total
Professionals	6.7	6.6	4.9	10.1	6.7
Technicians and associate professionals	2.6	1.5	1.0	4.2	2.1
Service and sales workers	23.2	39.8	25.0	41.7	30.6
Skilled agricultural, forestry and fishery workers	25.4	29.8	36.9	8.7	27.3

Plant and machine operators and assemblers	7.6	0.4	3.5	6.0	4.4
Elementary occupations	22.3	14.4	19.5	17.2	18.7
Others	1.6	1.9	0.9	3.4	1.8
Total	100	100	100	100	100

Source: UNHS 2016/17, UBOS

Disaggregation by sub-region. (Appendix Table 2.3 E) indicates that service and sales workers constituted 46 percent of the employed persons in Kampala and the proportion was 15 percent in Karamoja sub-region. The results further indicate that 39 percent of the persons in employment were skilled agricultural, forestry and fishery workers, compared to only seven percent for those with tertiary education and above

2.3.3.4 Education of the Employed population

The results in Table 2.3.8 indicate that the education level of persons in employment was low with less than one quarter of the employed persons (23 percent) having either completed secondary or post-secondary training. The proportion was higher for males (26 percent) than females (20 percent). The results further indicate that the proportion of persons who had completed secondary or higher education levels was higher for urban residents (39 percent) than rural residents (15 percent).

Table 2.3.8: Education level attained for Persons in Employment (14-64 years)

	Male	Female	Rural	Urban	Total
No formal education	5.0	11.4	9.5	4.6	7.9
Some primary	36.5	38.2	44.4	23.3	37.3
Completed primary	15.3	13.4	15.4	12.6	14.4
Some secondary	17.1	17.0	15.5	20.1	17.1
Completed secondary	11.0	8.5	7.6	14.3	9.9
Post-secondary and above	15.1	11.5	7.6	25.1	13.5
Total	100	100	100	100	100

Source: UNHS 2016/17, UBOS

About 57 percent of the persons in employment in Karamoja sub-region had no formal education while another 22 percent had some primary education level. The proportion was four percent and 13 percent respectively for Kampala. (Statistical Appendix Table 2.3.F)

2.3.3.4 Persons in Employment Living in Poor Households

The working poor refer to working people whose expenditure (as a proxy for income) falls below the Poverty Line. According to the 2016/17 Uganda National Household Survey (UNHS), 13 percent of persons in employment were living in poor households a decrease from 17 percent reported during the period 2012/13. The situation was three times more severe for rural residents compared to their urban counterparts. Employed persons in the primary sector (agriculture, forestry and fishing) were poorer compared to those in production and services (Table 2.3.9).

Table 2.3.9: Proportion of the Employed Population who lived in Poor Households, 2012/13 & 2016/17

2.3.3.5 Monthly wages for paid employees

Table 2.3.10 indicates that overall, the median monthly earnings from paid employment on the main job was Ug. shs. 168,000 in 2016/17, an increase of 27 percent in nominal terms from Ug. shs 132,000 reported in 2012/13. However in real terms (CPI 2009/10=100, CPI 2012/13=141.65 and CPI 2016/17=164.13) the overall median monthly earnings increased by 9.8 percent between the two survey periods. The table further reveals that the median monthly wage of employees in the public sector (UGX 450,000) was three times that of the private sector employees (UGX. 150,000) in nominal terms.

Table 2.3.10: Median Monthly Wages (main job) for Persons 14-64 Years in Paid Employment, 2012/13 and 2016/17

Background characteristics	Nominal		Real (base 200910=100)	
	UNHS 2012/13	UNHS 2016/17	UNHS 2012/13	UNHS 2016/17

Place of work				
Public employment	325,000	450,000	229,439	274,173
Private employment	110,000	150,000	77,656	91,391
Total	132,000	168,000	93,187	102,358

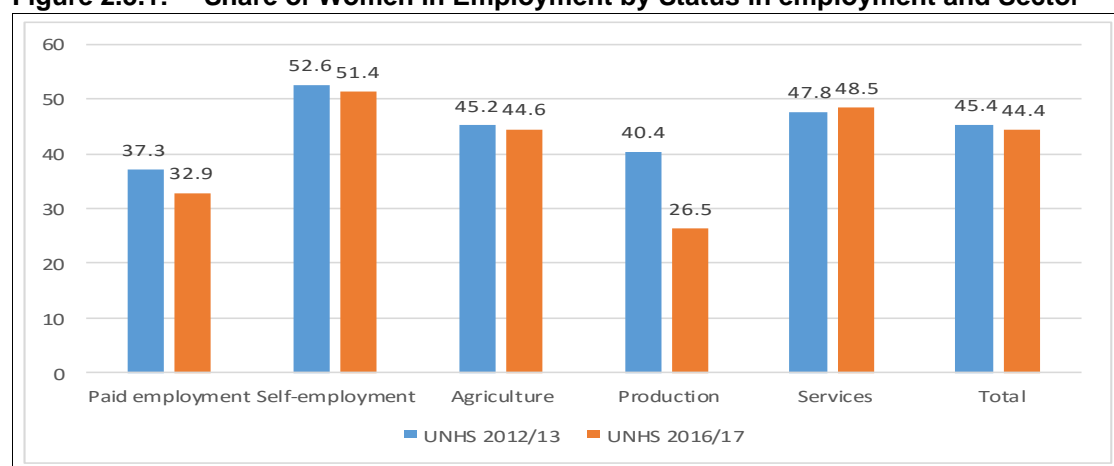

Source: UNHS 2016/17, UBOS

Appendix Table 2.3 G shows increasing wages with increasing levels of education attainment. The median monthly wage increased with the level of education with the highest impact felt at tertiary level. Persons with education level of post-secondary plus earned a monthly median income of UGX 420,000 in 2016/17, which was 525 percent of the median monthly wages of paid employees with no formal schooling (UGX 80,000).

2.3.3.6 Share of Women in Employment

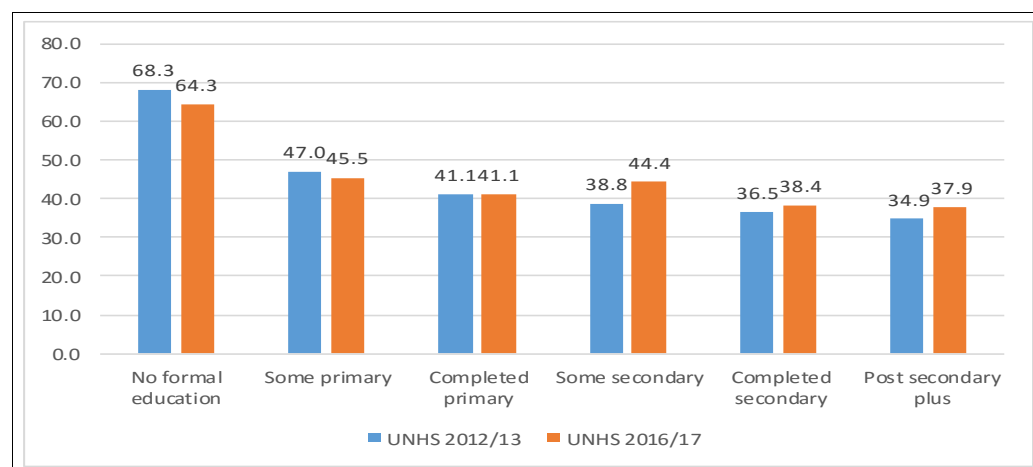

Figure 2.3.1 indicates that overall, females constituted 44 percent of all persons in employment. This proportion has remained almost the same during the last two survey periods. The proportion of females in paid employment was 33 percent and 51 percent in self-employment. Men outnumbered women in all the three sectors but most especially in the production with the service sector employing the highest proportion of women during both survey periods (49 percent in 2016/17 and 48 percent in 2012/13).

Figure 2.3.1: Share of Women in Employment by Status in employment and Sector

The results in Figure 2.3.2 show that as the education levels increased the share of women in employment decreased, i.e. low education levels had higher proportions of women as compared to the subsequent high ones. While almost two thirds (64 percent) of the working age population who had no formal education in 2016/17 were women, the share decreased to 38 percent among those with the highest education level of post-secondary and plus.

Figure 2.3.2: Share of Women in Employment by Education Level Attained

By industry, females mostly dominated in hotels, restaurants and bars (81 percent), however, the proportion of females in managerial jobs was low (36 percent). (Appendix Table 2.3H)

2.3.4 Unemployment

The overall unemployment rate (UR) was 9.2 percent in 2016/17 with the females experiencing higher unemployment rate (13 percent) than males (6 percent). There were differentials by residence with the levels of unemployment being higher among urban residents (14 percent) than rural residents (6 percent) during 2016/17.

Table 2.3.11: Unemployment rates by sex and residence, percent (14-64 years)

Unemployment rate	2012/13	2016/17
Sex		
Male	8.0	5.8
Female	11.0	13.1
Residence		
Rural	10.0	6.3
Urban	8.0	14.4
Total	9.4	9.2

The detailed unemployment rates by selected background characteristics are indicated in the Appendix Table 2.3 I

2.3.4.1 Key Labour Market Indicators of the Youth population

This section presents labour market indicators based on the Ugandan definition of the youth (18-30 years). As presented in Statistical Appendix Table 2.3.J, the population of the youth was estimated to be 7.7 million representing 21 percent of the total population. Less than three percent had completed a degree course and above and about eight percent did not have any formal education. The proportion of the youth with some area of specialisation (with post primary/secondary specialised training or a degree and above) was only eight percent.

Among the youth, the population that was working was about 6.3 million persons (82 percent of the youth population). The proportion of the working youth in the rural areas (86 percent) was higher than that of those in the urban areas (71 percent).

Nearly half of the youth were in employment (working for pay or profit). Disaggregation by sex indicates that the male youth were more likely to be in employment compared to females with nearly 17 percentage points' difference. Urban youths were more likely to be in employment than their rural counterparts (60 percent compared to 45 percent respectively). The highest proportion of the employed youth were in services (47 percent) followed by agriculture, forestry and fishing (38 percent). Among the employed youth outside the Agriculture sector, nine in every ten of them were in informal employment. On the other hand, 31 percent of youth population was engaged in purely subsistence agriculture production.

Youth labour force participation rate was 57.3 percent. This was higher than the national LFPR of 52.3 percent. This implies that 43 percent of the youth were not in the labour force. The male youth were more active in the labour market with a higher LFPR of 66 percent compared to females (50 percent).

The youth in paid employment had a median monthly wage of Ug. Shs 170,000.

2.3.4.2 Youth transition and labour underutilisation

The NLFS 2016/17 provided information for compilation of statistics on transition to employment. The stages of transition to work are categorised into three broad groups namely; transited, in transition and transition not started.

- a. **Transited** – A young person who has “transited” is one who is currently employed in:
 - a stable job, whether satisfactory or non-satisfactory; or
 - a satisfactory but temporary job; or
 - Satisfactory self-employment.

- b. **In transition** – A young person still “in transition” is one who is currently:
 - unemployed or potential labour force; or
 - employed in a temporary and non-satisfactory job; or
 - in non-satisfactory self-employment; or
 - Inactive and not in school, with the aim of looking for work later.

- c. **Transition not yet started** – A young person whose “transition has not yet started” is one who is currently:
 - still in school and inactive (inactive student); or
 - Inactive and not in school (inactive non-student), with no intention of looking for work.

The proportion of the youth (18-30 years) who transited either to stable or satisfactory jobs (based on those in employment) was 27 percent showing inadequate stable or satisfactory employment opportunities for the youth in Uganda. The majority of the youth (62 percent) were in transition while about nine percent had not started transition.

Table 2.3.12: Transition to work and labour underutilisation of the Youth Population, 2016/17

Indicator Category	Male	Female	Rural	Urban	Total
Stages of transition of the youth					
Transited to stable ² job	12.6	6.7	6.8	15.0	9.4
Transited to satisfactory ³ job	17.0	18.4	18.9	15.3	17.8
In transition	57.9	65.8	65.2	55.7	62.2
Transition not started	10.4	7.4	8.0	10.5	8.8
Not stated	2.1	1.7	1.1	3.5	1.9
Total	100	100	100	100	100
Labour underutilisation					
Unemployment rate (LU1)	11.4	14.7	13.5	12.0	13.0
Time related underemployment (TRUEMP)	12.3	11.1	14.5	7.1	11.7
Combined rate of Unemployment and Time-related underutilization (LU2)	19.0	19.0	24.1	9.9	19.0
Combined rate of unemployment and potential labour force ⁴ (LU3)	24.4	35.2	33.9	22.1	29.8
Composite measure of labour underutilization (LU4)	33.7	42.4	43.5	27.6	38.1
Other inadequate employment situations					
Skills related	7.3	7.8	3.6	13.9	7.5
Income related	45.8	63.9	61.2	44.3	52.5
Proportion of the youth Not in Employment nor Education nor Training (NEET)	29.0	50.5	46.9	27.2	40.7

Source: NLFS 2016/17, UBOS

Mismatches between labour supply and demand reflected as Labour underutilisation is the unmet need for employment. It is comprised of unemployed youth and those in employment but with unmet employment needs. Labour underutilisation focuses on issues of insufficient labour absorption and gives information that is necessary in broader labour market monitoring.

The composite labour underutilisation indicator takes into account all unemployed youth, those in time related underemployment and the potential labour force as a proportion of the extended labour force. As shown in Table 2.3.12 above, the composite measure of youth labour underutilization (LU4) was 38 percent. The unemployment rate of the youth was 13 percent.

2.3.5 Activities of Children

Key findings on main activities of children in Uganda are presented in this section based on the National Labour Force Survey (NLFS) 2016/17. The main focus is on the extent of children's involvement in economic activities, non-economic activities and schooling. Ideally children aged 6-17 years are expected to be attending school in either primary or secondary levels.

² Stable job refers to a job expected to last or has lasted more than 12 months

³ Satisfactory job refers to a job expected to last less than 12 months, but the youth satisfied with it.

⁴ Potential labour force refers to those not in employment during last seven days preceding the survey, did not take active steps to look for work during past 4 weeks preceding the survey, but available for work

A total population of about 12.5 million children (aged 6-17 years) were estimated in 2016/17 constituting a proportion of 33 percent of the total population. More than one half (60 percent) of all children aged 6-17 years attended school exclusively, while another one quarter (24 percent) combined working and attending school at the same time. However, the proportion of children combining attending school and working reduced to 24 percent during 2016/17 from 33 percent during 2011/12, and the reduction was more influenced by children residing in rural areas (27 percent and 37 percent during 2016/17 and 2011/12 respectively). About one in every ten children 6-17 year-olds were neither involved in economic activities nor at school. Although this status pattern of children has remained the same between two survey periods 2011/12 and 2016/17, the general proportion of children combining school with work activities has reduced (from 33 percent to 24 percent) while the proportion exclusively at school has gone up (from 56 percent to 60 percent) (Table 2.3.13).

Table 2.3.13: Children (6-17 years) activities by Selected Background Characteristics

Year	Activity status	Male	Female	Rural	Urban	Total (Percent)	Total Number ('000)
2016/17	Working only	6.6	5.7	6.5	4.8	6.1	768
	In school only	59.3	61.0	57.5	70.7	60.1	7,524
	Both in school and working	24.7	23.7	26.5	14.9	24.2	3,025
	Neither in school nor work	9.4	9.7	9.5	9.6	9.5	1,194
	Total	100	100	100	100	100	12,512

	Total	100	100	100	100	100	11,448

Source: NLFS 2016/17, UBOS

The extent to which children's work constitute child labour is also presented in this chapter. The estimate of child labour in this section is in accordance with national legislation and includes all at-work 5-11 year-olds, 12-13 year-olds working children except those in light work, and all 14-17 year old in hazardous⁵ work or working excessive hours⁶.

As presented in table 2.3.14, a total of 2 million children (5-17 years) were engaged in some form of child labour in 2016/17. These constituted 15 percent of all children nationally dropping marginally by one percentage point from 2011/12. The proportion of the 5-11 year olds involved in work was almost similar by gender (13 percent for males and 12 percent for females).

⁵ work which, by its nature or the circumstances in which it is carried out, is likely to harm the health, safety or morals of children.

⁶A list of hazardous forms of labour was compiled following the adoption of the National Labour Policy in 2006.

Table 2.3.14: Children involvement in child labour by Selected Background Characteristics, 2016/17 and 2011/12, Percent

Involvement in child labour ('000s)	Male	Female	Rural	Urban	Total
5 -11 years working	13.4	11.9	13.6	8.8	12.6
12 – 13 years	24.1	19.6	23.1	15.8	21.8
14-17 years	20.7	13.2	16.6	17.7	16.8
Total (Percent, 5-17 years) - 2016/17	15.9	12.1	15.9	12.1	15.1
Total in child labour ('000s) - 2016/17	1,124	931	1,728	327	2,055
Total (Percent, 5-17 years) -2011/12	16.9	15.6	8.8	17.4	16.3
Total in child labour ('000s) -2011/12	1,046	963	145	1,864	2,009

Source: NLFS 2016/17 and NLFS 2011/12, UBOS

Additional characteristics of work that children aged 5-17 years were engaged in during the NLFS 2016/17 are presented in Appendix Table 2.3 K. These include; sector of employment, status in employment, children occupations, intensity of children work, and involvement of children in household chores among others.

2.3.6 Employment in the Civil Service

Employment in the civil service is composed of persons employed in the traditional civil service, the teaching service (primary and secondary), police, prisons, public universities and staff in Local Governments. The average size of the civil service in 2017 was 308,753 persons as indicated in Table 2.3.15. This was a slight increase in 2017 of 0.1 percent compared to its size in 2016. The results indicate that there was a decrease in the number of employees in the traditional civil service, the teaching service and public universities between 2016 and 2017. On the other hand, the number of employees in the Uganda Police Force and Uganda Prison services and the Local Governments increased during the same period. The detailed monthly composition of the size of the civil service is indicated in the Appendix Table 4K.

Table 2.3.15: Size of the Civil Service, 2011-2017

Groups	2013	2014	2015	2016	2017		
					Male	Female	Total
Traditional civil service ⁷	23,392	20,273	22,455	22,965	11,987	9,747	21,734
Teaching service	160,578	160,824	164,995	159,690	97,511	62,159	159,670
Police and Prisons	45,208	44,723	49,221	53,078	41,937	11,355	53,293
Public Universities	10,071	10,175	6,379	6,453	3,655	2,180	5,835
Local Governments	54,867	56,540	57,322	66,265	39,670	28,551	68,221
Total	294,115	292,534	300,372	308,451	194,761	113,992	308,753

Source: Ministry of Public Service.

The results in Table 2.3.16 indicate that the teaching service composed the majority of the civil service in 2017(52 percent) while the public universities had the least composition (2 percent) during 2017 and the pattern was similar compared to 2016. Similarly, the share of the average monthly wage bill for teaching service was 44 percent, while that of the public universities was 10 percent during 2017. The share of employment has almost remained the same between 2015 and 2017 for teaching service and public universities, but the share of the wage bill for teaching service reduced

⁷ Includes support staff

from 47 percent in 2015 to 44 in 2017 while that of the public universities increased from 7 percent to 10 percent during the same period. The detailed monthly composition of the civil service is indicated in the Statistical Appendix Table 2.3K.

Table 2.3.16: Distribution of the Civil Service by Groups and Wage bill, 2015, 2016 and 2017

Groups	Average monthly employment						Average monthly wage bill (million Shs.)			
	2015		2016		2017		2015		2017

2.4 Household Expenditure and Poverty

2.4.1 Consumption Expenditure per Household

Table 2.4.1 presents the monthly consumption expenditure per household for the two survey years after adjusting for inflation. Uganda's average household monthly expenditure decreased from UGX 328,200 in 2012/13 to UGX 325,800 in 2016/17, representing a real decrease of about 1 percent for the period under review. Regional variations reveal that, the Kampala and Northern regions realized increases in the monthly consumption expenditure, Central and the Eastern region registered a decline in real monthly consumption expenditure while the consumption expenditure per household in the Western region largely remained the same.

Table 2.4.1: Monthly Consumption Expenditure per Household (2009/10 Prices)

	2012/13			2016/17		
	Rural	Urban	Total	Rural	Urban	Total
Uganda	274,200	476,600	328,200	271,400	464,600	325,800
Central*	330,000	543,600	424,800	335,600	488,900	397,400
Kampala City	-	590,400	590,400	-	608,400	608,400
Eastern	225,700	305,500	258,300	221,400	294,200	232,900
Northern	171,100	301,900	209,100	216,200	411,100	247,500
Western	297,300	401,200	345,800	319,300	424,200	341,900

Note: Central * = Central region excludes Kampala city

Source: Uganda Bureau of Statistics

2.4.2 Mean Per Capita Consumption Expenditure

Table 2.4.2 presents the mean monthly consumption expenditure per capita after accounting for inflation. Overall, the mean per capita consumption expenditure largely remained the same between the survey period 2012/13 and 2016/17. The Northern region registered the highest growth in consumption per capita of 5.5 percent followed by Kampala City (1%). The Central and Eastern regions registered a decline in per capita mean consumption of 2.2 percent and 3.4 percent respectively. The increase in per capita consumption expenditure was largely observed for both rural and urban residents of the Northern region (8% and 10% respectively).

Table 2.4.2: Mean Per Capita Consumption Expenditure (2009/10 prices)

Location	2012/13			2016/17

2.4.3 Share of Household Expenditure by Item Group

The trend of the share of each item group in the total household expenditure including non-consumption expenditure is presented in Table 2.4.3. Overall, the share of food and non-alcoholic beverages in total household expenditure was the

highest (46%) and has largely remained the between 2012/13 and 2016/17; followed by expenditure on Housing, Water, Electricity, Gas and other fuels (16%). An increase in the budget share of households was registered in education from five percent in 2012/13 to eight percent in 2016/17. Furthermore, overall, households spent close to two thirds (64%) of their budget on food and non-alcoholic beverages, shelter and clothing while 21 percent is spent on education, health, transport and communication.

Rural-urban variations show that, the share of food and non-alcoholic beverages in both urban and rural areas did not change much between the two survey periods. Overall, the share of Housing, Water, Electricity, Gas and other fuels increased by about one percentage points while the share of expenditure on education increased by three percentage point.

Table 2.4.3: Share of Monthly Expenditure by Purpose (%), percentage

Item grouping by purpose	2012/2013			2016/2017		
	Urban	Rural	Total	Urban	Rural	Total

2.4.4 Poverty Trend Estimates

Table 2.4.4, presents poverty statistics for the survey years 2016/17 and 2012/13. Three poverty indicators: namely P0, P1 and P2 (see Foster, Greer and Thorbecke, 1984) are reported. The P0 indicator is “headcount”: the percentage of individuals estimated to be living in households with real private consumption per adult equivalent below the poverty line for their region (divided into rural and urban). Thus a P0 of 21 implies that 21 percent of Ugandans are estimated to live in households which spend less than what is necessary to meet their caloric requirements and to afford them a mark-up for non-food needs. The headcount shows how broad poverty is, although not necessarily how deep. That is to say, we do not know how far below the poverty line, the poor are. For this information we use the P1 or P2 indicators.

The P1 indicator is the “poverty gap”. This is the sum over all individuals of the shortfall of their real private consumption per adult equivalent from the poverty line, divided by the poverty line. One way to interpret the P1 is that it gives the per capita cost of eradicating poverty, as a percentage of the poverty line, if money could be targeted perfectly. Thus if P1 is 5.3, then in an ideal world, it would cost 5.3 percent of the poverty line per Ugandan in order to eradicate poverty through selective transfers. In practice, it is impossible to target the poor perfectly and issues such as administrative costs and incentive effects have to be considered. The P1 measure gives an idea of the depth of poverty. However, it is limited because it is insensitive to how consumption is distributed among the poor. For example, if a policy resulted in money transfer from someone just below the poverty line to the poorest person, the P1 will not reflect this. To satisfy this condition, we need the P2 measure.

The P2 indicator is the “squared poverty gap”. This is the sum over all individuals of the square of the shortfall of their real private consumption per adult equivalent and the poverty line divided by the poverty line. The reason to square the shortfall is to give greater weight to those who are living far below the line. In brief, whereas P0 measures how widespread poverty is, P1 measures how poor the poor are and, by giving more weight to the poorest, P2 gives an indication of how severe poverty is.

Data are disaggregated by location, residence and regions. Along with the poverty statistics, the percentage of people in each location, their mean household consumption per adult equivalent and the contribution each location makes to each poverty statistic (i.e. what percentage of national poverty is attributable to each location) are presented. Given that poverty statistics are estimates, it is useful to test whether changes in their values are statistically significant (Kakwani, 1990). We report t-tests of the significance of the changes in the poverty statistics between 2012/13 and the 2016/17 in Table 7.8. In addition, we also present in Appendix III, the detailed information on standard error and confidence intervals for the inequality estimates.

Based on the 2016/17 UNHS, it is estimated that 21.4 percent of Ugandans are poor, corresponding to nearly 8 million persons. Table 7.6a provides more detailed statistics, by region and rural-urban status. The incidence of poverty remains higher in rural areas than in urban areas. The poor in the rural areas represent 25 percent of the population compared to about 10 percent in the urban areas. Considering that the rural areas comprise about 76 percent of the population, they contribute 89 percent of the national poverty. On the other hand, the urban areas which constitute 24 percent of the population, contribute 11 percent of the national poverty. Decomposing the national poverty by region highlights significant variations in the incidence of income poverty. In 2016/17, the regional ranking slightly differs from the previous poverty works on Uganda. The incidence of poverty was highest in the Eastern region (36%) replacing the Northern region which had consistently lagged behind all the other regions in the previous surveys.

Figure 2.4.1 shows the proportions of poor persons by year. It is estimated that 21.4 percent of Ugandans are poor by 2016/17, an increment from 19.7 percent in 2012/13.

Figure 2.4.1: Proportion of poor persons by year

In absolute terms, Table 2.4.5 shows that, the number of poor persons increased from 6.6 million in 2012/13 to 8 million in 2016/17. All regions registered an increase in the number of poor persons with the exception of the Northern region where the number of poor persons decreased from 3.1 million in 2012/13 to 2.3 million in 2016/17. The Eastern region registered the highest increase from 2.4 million in 2012/13 to over 3.6 million in 2016/17. Considering the place of residence, the number of poor persons increased in both rural (from 5.9 million to 7.1 million) and urban areas (from 0.7 million to 0.9 million) between 2012/13 and 2016/17 respectively.

2.4.5 Income Inequality

The way income is distributed across individual's shows who benefits or misses out on the development opportunities available to society. The Gini coefficient is one of the measures for income inequality. Table 2.4.6 shows that, overall, income inequality as measured by the Gini coefficient stood at 0.42 in 2016/17 which is an increase from 0.40 registered in 2012/13. Decomposing the results by residence shows that income inequality was largely driven by urban areas (0.42) compared to rural areas (0.38). The increase in income inequality was highest in the Western region (from 0.33 in 2012/13 to 0.39 in 2016/17) compared to other regions.

Table 2.4.6: Gini coefficients for Uganda in 2009/10 prices

Location	Gini coefficient				Growth	
	2005/06	2009/10	2012/13	2016/17	2009-2017	2013-2017
Uganda	0.41	0.43	0.40	0.42	-0.28	1.88
Residence						
Rural	0.36	0.38	0.34	0.38	0.04	3.15

Source: Uganda Bureau of Statistics

Conclusion

Uganda's average household monthly expenditure slightly dropped from UGX 328,200 in 2012/13 to UGX 325,800 in 2016/17, representing a marginal decline in monthly consumption expenditure between the two periods. The proportion of the population living in poverty increased from 19.7 percent in 2012/13 to 21.4 percent in 2016/17 an equivalent of about 10 million people living below the poverty line. The increase in poverty was most prominent in the Eastern region than in Northern region which had consistently been the poorest region in the country.

2.5 Health Statistics

In this publication health Statistics contains information on health facilities, human resources and expenditure in the health sector, maternal health care, Tuberculosis indicators and child mortality. The other statistics contained include new OPD utilization cases, health sector assessment indicators and birth notification in health facilities.

2.5.1 Health Facilities

Health facilities in Uganda include hospitals and health centres (IV, III and II). Figure 2.5.1 shows the number of functional healthcare facilities owned by government and those that are private not for profit (PNFP) have increased while the private for profit (PFP) increased between 2010/11-2012/13 and decreased thereafter in 2015/16. The number of PFP facilities nearly doubled between 2015/16 and 2016/17. Appendix Table 2.4A gives the number of functional healthcare facilities by ownership status by district as of June 2017.

Table 2.5.1 shows that the distribution of functional health care facilities is not even across the four regions of the country, 46 percent of the health care facilities are located in the central region. The western region has the highest number of regional referral hospitals and government owned health centre IVs while the eastern region has the highest number of government owned health centre IIIs.

2.4.3 Human Resources for Health

Table 2.5.2 shows that in the financial year 2016/17, the percentage of approved posts country wide in health facilities increased to 72 percent from 64 percent in 2015/16⁸. Regional Referral Hospitals, the Uganda Blood Transfusion services and the District Health Officer's Offices recorded the highest increase of 24, 37 and 30 percentage points respectively. The Uganda Cancer Institute had the highest decline of 13 percentage points between the two financial years.

Table 2.5.2: Human Resources for Health posts approved, filled by year and health facility

Health Facility	2015/16			2016/17

2.4.4 Expenditure on the Health Sector

The government expenditure on the health sector as a percentage of the total government expenditure is shown in Figure 2.5.2. Government expenditure on health in the year 2016/17 was 8.9 percent up from 6.4 percent spent in the previous year 2015/16. The average expenditure on the health sector in the last five years stood at 8.3 percent, 1.5 points short of the Health Sector Development Plan (HSDP) 2015/16-2019/20 target of 9.8 percent and much lower than the Abuja Declaration of 15 percent.

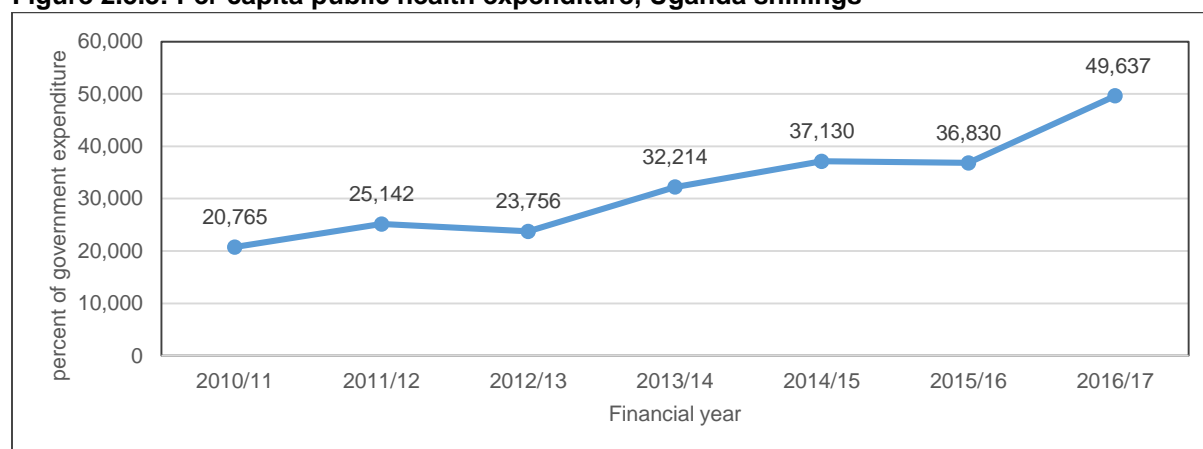

⁸ The comparison excludes the National Chemotherapeutic Research Institute and the Health Manpower Development Centre

Figure 2.5.2 Government of Uganda health expenditure as percentage of total government expenditure

Generally the per capita public health expenditure has been on the increase in Uganda. Figure 2.5.3 below shows that per capita health expenditure in 2016/17 was Uganda shillings 49,637 compared to Uganda shillings 36,830 registered in the previous year 2015/16. The per capita health expenditure has been increasing since 2010/11.

Figure 2.5.3: Per capita public health expenditure, Uganda shillings

2.4.6 Maternal Health Care

2.4.6.1 Health Facility based Maternal Mortality

Maternal mortality is the number of women who die due to pregnancy related complications during pregnancy, delivery or 42 days after delivery of a child. Figure 2.5.4 gives the number of maternal deaths among 100,000 health facility deliveries. The facility based maternal mortality for 2016/17 was 148 death per 100,000 health facility deliveries, this is an increase from 119 recorded in 2015 /16. There was a declining trend of facility based maternal mortality between 2012/13 and 2015/16 as shown in figure 2.5.4.

Figure 2.5.4: Health facility Maternal Mortality in the last five years

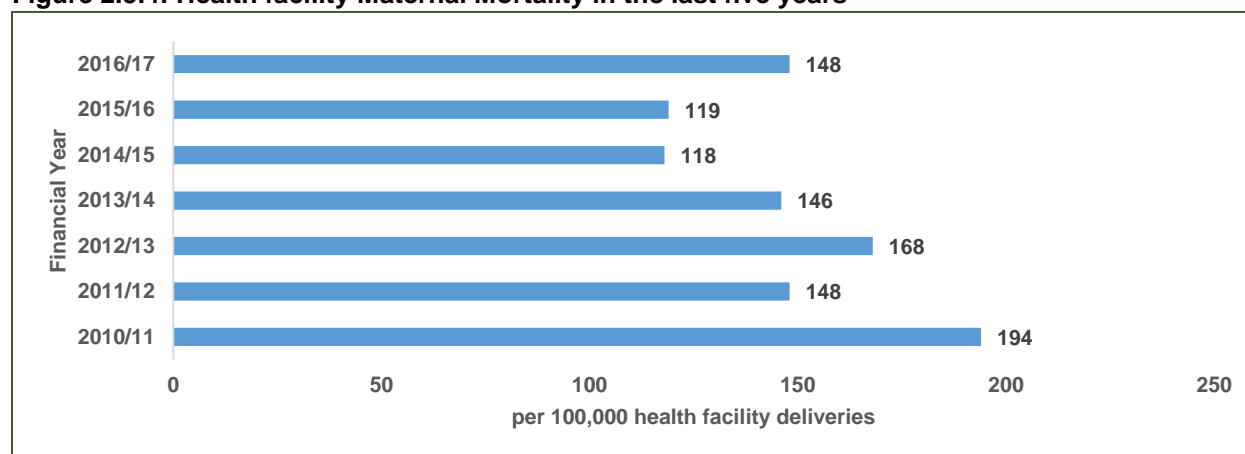

Table 2.5.3 shows that hemorrhage was the leading cause of maternal illness and mortality in the last five years accounting for 39 percent of the deaths in 2015/16. Although pregnancy related hypertension (Pre-eclampsia and eclampsia) was high in 2014/15 (12 percent), it was surpassed by postpartum sepsis (20 percent) to be second to Obstetric hemorrhage.

Table 2.5.3: Cause of Maternal Mortality by year and Disease Burden

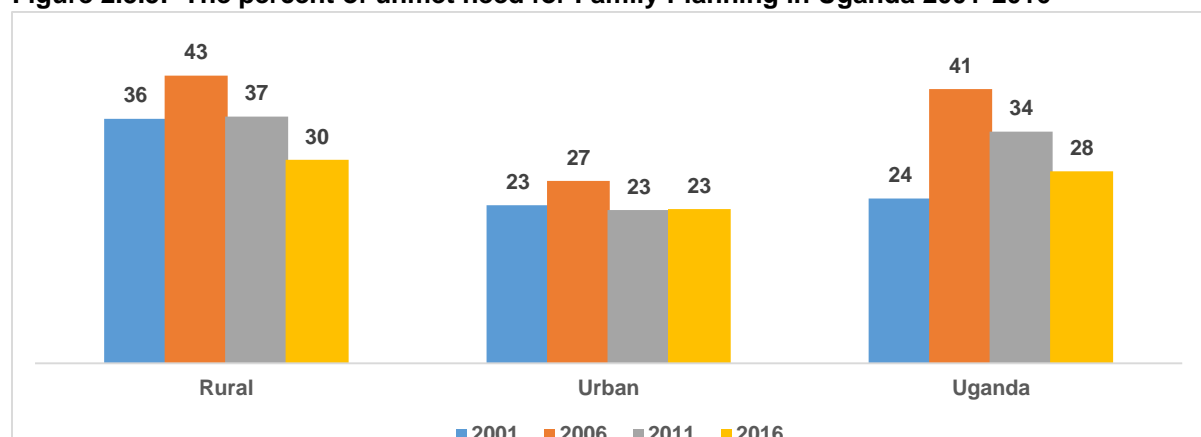

Cause Burden	Year of Maternal Mortality				
	2011/12	2012/13	2013/14	2014/15	2015/16
Hemorrhage	31.5	34.7	34.9	42	39

2.5.6.2 Unmet Need for Family Planning

The unmet need for family planning is the number or percent of women currently married or in union who are productive and who desire to either terminate or postpone childbearing, but who are not currently using a contraceptive method. The unmet need for family planning group has two categories; those with an unmet need for limiting and those with an unmet need for spacing. The unmet need for family planning for Uganda in 2016 was 28.4 percent with observed difference of 30.1 percent for rural and 22.8 percent urban. The last ten years has witnessed a steady decline in unmet need for contraceptive use in Uganda beginning the year 2006 as shown in Figure 2.5.5. The downward trend is observed for the whole country and for rural-urban areas. The urban unmet need for family planning has stagnated at about 23 percent with exception of 2006 implying the decline is more observed in rural areas compared to urban areas.

Figure 2.5.5: The percent of unmet need for Family Planning in Uganda 2001-2016

2.5.6.3 Tuberculosis Detection and Treatment

Tuberculosis (TB) is one of the main causes of illness and death globally, accounting for an estimated 8.8 million new cases and 1.6 million deaths each year. In Uganda the Ministry of Health has promoted new smear-positive case detection and subsequent treatment of the patients. The TB treatment success rate improved to 80 percent in 2016/17 from 70 percent in 2011/12. This is below the HSDP target of 84 percent. The TB case detection rate increased from 39 percent in 2011/12 to 50 percent in 2016/17.

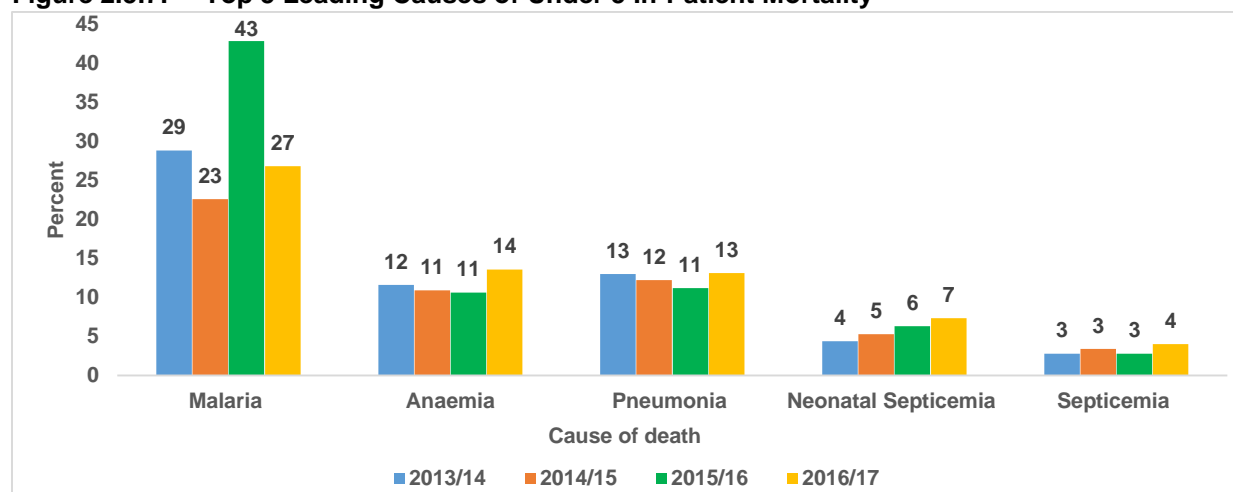

Figure 2.5.6: Countrywide TB detection and Treatment Success Rates 2011/12-2016/17

2.5.6.4 Causes of Under-five Health Facility Based Mortality

Malaria has consistently been the leading cause of death among inpatients aged below five years. In 2016/17 malaria accounted for 27 percent of the deaths, followed by Aneamia and Pneumonia at 14 percent and 13 percent respectively. Figure 2.5.7 shows that death due to neonatal septicemia has increased systematically in the four years.

Figure 2.5.7: Top 5 Leading Causes of Under 5 In-Patient Mortality

2.5.6.5 New Outpatient Department utilization Rate

This indicator shows the levels of utilization of outpatient Department (OPD) healthcare services. It is thus employed to examine trends and variations in use of OPD services and will allow comparisons between facilities, districts and programs. For the last five years, the new OPD utilization rates have been on the increase slightly above the norm of 1.0 percent as observed from figure 2.8 below. In 2015/16 the national OPD utilization rate stood at 1.2 percent similar to the previous year 2014/15. The year 2013/14 registered the lowest rate of 1.0 percent. Table 2.4 C in the appendix shows the OPD utilization rate by district for the period 2013/14 to 2016/17.

Figure 2.5.8: Outpatient Department utilization rate, 2012/13-2016/17

Selected Health Sector Performance Assessment

The Ministry of Health has identified a set of indicators to assess the performance of the Health Sector at the Local Government level. Statistical Appendix tables 5D-5E present a trend of selected health sector indicators at district level. The indicators include: Deliveries in Government and PNFP health facilities, number of hospital beds, percentage of pregnant women receiving two doses of SP fansidar to prevent malaria, and pregnant women who had 4 antenatal care visits.

Birth notification in health facilities

Birth notification through the Mobile Vital Records System (MVRS) is operational in 135 hospitals and 85 out of 122 district local governments. It aims at ensuring that no child is left without an official identity and legal protection. Although the coverage is not complete below is graphical presentation of the birth notification in Uganda in 2017.

Figure 2.5.9: Monthly Births Notified in Mobile Vital Records System by Sex - 2017

2.6 Crime Statistics

Crime statistics are very useful in implementing effective strategies for fighting crime and its impact to the population. This chapter presents data on various forms of crime and remedial measures as compiled by the Uganda Police Force and the Uganda Prisons Service respectively.

2.6.1 Annual Crime Rate

The crime Rate is the incidence of crime per 100,000 people. Figure 6.1 shows that in 2017, the Annual Crime Rate (ACR) stood at 667. This means that, out of every 100,000 people, 667 were victims of crime in 2017 a slight increment from 666 recorded in 2016.

Figure 2.6.1: Trend in Crime rate, 2013-2017

Source: Uganda Police Force

Table 2.6.1 presents the most common crimes reported in 2017 by category. Common assaults were the most reported type of crime by victims. Most forms of crime were on the decrease except Child neglect and Domestic Violence which increased by 10 percent and 17 percent respectively in 2017 compared to 2016.

Table 2.6.1: Leading Crimes by year and category, number

Crime Categories	2013	2014	2015	2016	2017	Annual %age change 2016 - 2017
Common Assaults	42,107	39,557	39,180	36,795	30,794	-16.3

Figure 2.6.2 presents a trend analysis of reported, investigated and prosecuted crimes. The number of crimes reported to Police increased from about 244,000 in 2016 to about 252,000 in 2017. All cases reported in 2015, 2016 and 2017

were investigated. However, almost three quarters (about 185,000 Of 252,000 crimes) of the cases were pending prosecution in 2017. The details for 2016 and 2017 are given in Appendix Table 2.5.A.

Figure 2.6.2: Number of Crimes by category ('000s)

*all crimes in 2015-2017 were investigated because as a case is reported the investigations started with interviewing the victim/person reporting contrary to the previous years. .

Table 2.6.2 shows that overall, there were more males (164,131) than female (89,185) victims of crime in 2017. Majority of the victims regardless of sex were of general crimes mainly thefts.

Figure 2.6.3 shows that of the victims of general crimes (226,494), there were more males than females with an exception for Sex related offences where almost all the victims (98 percent) were females.

Figure 2.6.3: Victims of reported General crime by case type and Sex (%), 2017

2.6.2 Serious crimes investigated and prosecuted

Serious crimes as defined by the Uganda Police Force include homicides, aggravated robbery, defilement, rape, burglary, child stealing and child trafficking. Table 2.6.3 shows that overall 29,936 serious crimes were investigated in 2017. Defilement was the most serious crime investigated accounting for half of the crimes investigated during the year 2017. There was a notable increase in the total number of serious crimes investigated between 2013 and 2017. The details for 2016 and 2017 are given in Appendix Table 2.5A.

Table 2.6.3: Serious Crimes Investigated by Type, 2013 - 2015

2.6.3 Traffic and Road Safety

This section covers information on traffic crashes, casualties, accident victims, vehicles involved in road accidents, causes of road accidents and the time of the crash.

Reported Road Traffic Crashes

Road Traffic Crashes refer to accidents that could be fatal, serious or minor. An accident is said to be fatal if a death occurs at the scene of the accident and/or within one year as a result of injuries sustained in the accident. A serious accident is one in which a person is admitted in the health facility as an “in-patient” or sustains injuries like fractures, concussion (temporary unconsciousness or confusion caused by a blow on the head), internal injuries, crashing, severe cuts and lacerations (deep cut or tear in the skin) whether or not one is admitted in the hospital. A minor accident is defined as a damage only accident in which no persons are injured at all regardless of the extent of damage on the vehicle.

The Uganda Police Force recorded a total of about 13,000 road traffic crashes in 2017 as shown in Table 2.6.5. The Table further shows that nearly half (49 percent) of the accidents in 2017 were serious. There was a 9 percent decrease in the total number of road traffic crashes between 2016 and 2017. The minor accidents recorded the highest decrease (16 percent) while fatal crashes were the only category that registered an increase in the same period (2 percent).

Table 2.6.5: Reported road traffic crashes by outcome of crash, 2013 – 2017

Outcome	2013	2014	2015	2016	2017	Percentage change in	
						2016	2017
Fatal	2,616	2,518	2,749	2,981	3,051		2.3

Total	18,368	18,686	18,495	14,474	13,244		-8.5

Source: Uganda Police Force

Casualties of traffic crashes

For every fatal or serious road traffic crash there are victims who are referred to as casualties. Table 2.6.6 indicates that there were a total of 14,854 casualties reported in 2017; a decrease by about 6 percent from the number of traffic casualties reported in 2016. The Table also indicates that most casualties (70 percent) in 2017 survived with serious injuries. The Accident Severity Index is used to measure the seriousness of an accident. It is defined as the number of persons killed per 100 accidents. In every 100 accidents that occurred, 24 persons died in 2017.

Table 2.6.6: Number of road traffic Casualties by outcome of crash, Accident Severity Index and years

Outcome	2013	2014	2015	2016	2017	Percentage:

Accident victims by road user type

Table 2.6.7 indicates that in 2017, of the 14,854 road accident victims, passengers constituted the highest number (5,674) followed by motorcyclists (3,847). Pedal cyclists and drivers formed the least proportion of casualties. Overall, the number of accident victims decreased from nearly 16,000 in 2016 to about 15,000 in 2017.

Table 2.6.7: Number of Accident victims by road user type, 2013 – 2017

Road user Type	2013	2104	2015	2016	2017
Passengers	6,602	6,675	7,241	6,112	5,674

Pedal cyclists	1,054	1,035	866	693	639
Total	17,283	17,830	18,426	15,736	14,854

Source: Uganda Police Force

A passenger is a person who is traveling in an automobile, bus, train, airplane, or other conveyance, especially one who is not the driver, pilot, or the like.

Table 2.6.8 shows that of the casualties in 2017, 13 percent were children while the majority (32 percent) were aged 25-34 years. More males than females were victims of accidents irrespective of the outcome. There were more seriously injured victims followed by fatalities.

Table 2.6.8: Number of Accident Victims by Age, outcome of crash and Sex, 2017

Age group	Killed		Seriously Injured		Slightly Injured		Number	Total Percentage
	Male	Female	Male	Female	Male	Female

Timing of Road Accidents

The time of the day has a strong bearing to the possibility of occurrence of accidents. Table 2.6.9 indicates that 27 percent of road accident crashes occurred between 4:00pm-7:59pm in 2017 while the least (7 percent) accidents occurred from between midnight to 3.59am in the morning. This could be partly attributed to the number of road users during such hours.

Table 2.6.9: Number of crashes by category and time of occurrence, 2017

Time	Fatal	Serious	Minor	Total	Percentage in 2017
12.00 mid night - 3.59am	269	395	271	935	7.1
4.00am-7.59am	296	624	365	1,285	9.7

Vehicles involved in crashes on the road

Table 2.6.10 shows that a total of 20,231 vehicles were involved in road accident crashes in 2017 compared to 21,985 vehicles reported in 2016. Of the vehicles involved in the crashes in 2017, motor cars and motor cycles were affected compared to other vehicles.

Table 2.6.10: Number of road accidents by type of vehicles and year

Causes of Road Accidents

Table 2.6.11 indicates that the leading cause of road accidents in 2017 was careless driving (41 percent) despite a notable decrease of 15 percent from 2016. Reckless or dangerous driving accounted for 34 percent of the road accidents, a decrease of 10 percent from 2016.

Table 2.6.11: Number of Road Accidents by Causes, 2013 - 2017

2 6.4 Prison Statistics

Prison Population

The Uganda Prisons Service compiles information on prisoners by category. These prisoners are categorized into two broad categories. These are criminal (prisoners on remand and those convicted) and non-criminal or civil prisoners (debtors). Table 6.13 reflects a decrease in the total prison population of about 5 percent from 2016. This is attributed to the fact that state attorneys' and judicial officers undertook industrial action last year without criminal cases being heard hence the prisons service was just discharging prisoners during that period without admitting any.

The majority of prisoners in 2017 were on remand, accounting for more than half (51 percent) of the prison population. Debtors constituted about one percent of the prison population. The Incarceration Rate which has been on the increase since 2012 stood at 129 prisoners per 100,000 persons in 2017. Table 2.6.13 further shows that 48 percent of the prisoners had been convicted in 2017.

Table 2.6.13: Prison population by Category, 2013 – 2017

Category	2013	2014	2015	2016	2017	Percentage share in 2017

Table 2.6.16 below shows the distribution of prisoners by category and region. In 2017, there were generally more prisoners on remand across all regions. Of the total prison population, the majority (26 percent) were in Western region while the least proportion (13 percent) were in Kampala. The details are given in Appendix Table 2.5B.

Table 2.6.16: Number of Prisoners by Category and Region, 2016 - 2017

Region	Category of prisoners				Percentage share
	Convict	Remand	Debtor	Total	
2016

*Includes prisoners in Luzira and Kigo

There were revisions in the figures provided for 2016 because Luuka was put in Central region yet it's in the Eastern region and likewise Kakumiro district was in Central yet it's supposed to be in the Western region. Table 2.6.17 shows that overall, the majority of prisoners in 2017 (19 percent) had committed burglary and thefts, followed by murder (18 percent), and aggravated defilement (16 percent).

Table 2.6.17: Number of prisoners by offence committed and sex, 2017

OFFENCES	REMANDS			CONVICTS			TOTAL	
	Male	Female	Total	Male	Female	Total	number	%age
Burglary & Theft	3,782	147	3,929	5,256	133	5,389	9,318	19.1

*includes crimes not listed above and each had less than 1.0 percent.

Prisoners on Rehabilitation

While in prison, prisoners undergo rehabilitation such as access to education (both formal and informal), skills development, as well as guidance and counseling. This rehabilitation serves the sole objective of transforming them into better citizens that can adapt to life outside prison once they complete their sentence or are released from jail. Table 2.6.18 shows that 12,678 prisoners were either undergoing skills training in agriculture or receiving vocational learning in 2017. Most prisoners did not receive any vocational or formal education despite the increase in number of inmates utilizing these services.

Table 2.6.18: Number of Prisoners on Rehabilitation, 2017

Programme	Males	Females	Number of inmates
Formal Education			
Completed PLE	152	17	169
Completed UCE	45	0	45
Completed UACE	26	0	26
Completed Degree, Diploma and certificates	88	0	88
Still undergoing training	3,189	157	3,346
Informal Education			
Functional Adult Literacy	2,329	387	2,716
Agricultural skills	6,724	312	7,036
Vocational skills	5,326	316	5,642
Not receiving any rehabilitation	41,403	1,849	43,252
Total number of prisoners	46,729	2,165	48,894

Source: Uganda Prisons Service

Recidivism

The Uganda Prisons Service defines Recidivism as the number of re-offenders expressed as a percentage of the total number of convicts admitted in a given period. Figure 2.6.4 shows that over time, the recidivism rate has declined from 27 in 2012/13 to 20 in 2016/17. This means that the number of habitual criminals is reducing.

Figure 2.6.4: Trend in Recidivism Rate, 2012/13 – 2016/17

Source: Uganda Prisons Service

Prison Capacity and Occupancy rate

Overcrowding in prison cells is a serious violation of prisoners' constitutional human rights since prisoners are entitled to a healthy environment. Prison capacity refers to the number of inmates a prison can hold within a space of 3.6m². Table 2.6.19 shows high levels of overcrowding in prison cells across all regions in the country. The national Occupancy Rate in 2017 was 293 percent implying that, there were 293 prisoners in every space meant for 100 prisoners.

Regionally, wide variations were observed. Kampala had the highest prison occupancy rate (367 percent) while Eastern region had the lowest rate (210 percent). The details are given in statistical appendix Table 2.5.C.

Table 2.6.19: Prison Capacity and Occupancy Rate by region, 2014-2017

Region	Prison capacity					Occupancy rate				
	2013	2014	2015	2016	2017	2013	2014	2015	2016	2017
Kampala*	2,224	1,720	1,720	1,720	1,720	359	409	383	403.6	367.0

Babies staying with their mothers in prison

Babies need their mothers even when the mother is in jail because that child needs to breastfeed and develop those early bonding attachments with the mother⁹. In the year ending 2017, a total of 214 babies were in 2017 staying with

9 Collaborating Centre for Prison Health and Education

their mothers in prison. Figure 2.6.5 indicates that of the babies staying with their mothers in prison, the Northern region had the highest proportion (26 percent) while the least was in Central region (12 percent).

Figure 2.6.5: Distribution of babies staying with their mothers in prison by region, 2017

Source: Uganda Prisons Service

Prison Staff strength

Prison staff are categorised into uniformed and non-uniformed staff. Uniformed staff are those who wear the UPS uniform while Non-uniformed staff are civilians recruited into the service as well as those transferred directly in by public service.

In 2017, the Uganda Prison Force had a total of 9,787 staff of which 3 in every 10 were females. The distribution of staff by category is shown in Table 2.6.21. NCOs were the majority (7,759) among uniformed staff while junior officers (279) were the majority among non-uniformed staff.

Table 2.6.21: Number of Prison staff by category and sex, 2017

STAFF CATEGORY	Sex		TOTAL
	Males	Females	
Uniformed			
Senior officers	281	62	343
Principal Officers	481	118	599
NCOs	5,461	2,298	7,759
Recruit Warders/Wardresses (At PATS)	509	197	706

Deaths in prison

When in prison, convicts or those on remand are exposed to several health and socio-economic changes that may affect their well-being. These include feeding status, access to medical treatment when sick, relationship with inmates, treatment by prison officers and psychological torture among others. Depending on the duration of sentence and impact

either of the listed factors has on an individual, this will determine his or her life span in jail. Overall, table 2.2.22 shows a slight increase in the proportion of prison deaths from 0.4 percent in 2015 to 0.5 percent in 2017. Details on number of deaths in prison by district and prison are in Appendix Table 2.5D.

Table 2.2.22: Trend in death of prisoners by sex, 2015-2017

CHAPTER THREE

Production Statistics

3.1 Agriculture and Fisheries

This section presents statistics on food crop area and production, selected cash crop production, livestock, livestock products and fish catch.

3.1.1 Major Cash Crops

The traditional cash crops of Uganda include: Coffee, Tea, Cotton and Tobacco. Uganda produces two kinds of coffee (Arabica and Robusta). Over the years, Robusta coffee has been produced in much more quantities compared to Arabica coffee (also known as mountain coffee). In 2017, there was an increase in the volume of coffee, tea and cotton produced. Tea production (39,299 tonnes) increased by 27 percent in 2017, Coffee production (302,000 tonnes) resulting into an increment of about 24.3 percent while Cotton production increased to 31,800 tonnes from 20,399 tonnes produced in 2016 hence about 66 percent increment. Statistical Appendix Table 3.2A (i) presents coffee, cotton and tea produced for the period 2013 – 2017.

Figure 3.1.1: Coffee, Tea, and Cotton Production (Tonnes), 2013-2017

3.1.2 Area and production of Food Crops, 2017

Uganda grows several food crops of which 16 are major according to the Uganda Census of Agriculture (UCA) 2008/09. These include Maize, Millet, Sorghum, Rice, Cassava, Sweet potatoes, Irish potatoes, Beans, Cow peas, Field peas, Pigeon peas, Groundnuts, Soya beans, Simsim, Plantains and Coffee.

Area under major crop groups was as follows: Cereals (1,788,000Ha), Roots and Tubers (1,348,600,500 Ha), Plantains (970,308 Ha), Oil crops (934,500Ha) and Pulses (763,00Ha). Area planted under cereals and root crops, pulses and oil crops increased by less than one percent.

Despite the small increases in area under crop in the year 2017, there was a general increase in production for most of the crops. Production of plantains to 3,493,000 tonnes in 2017 (2.9 percent). Crops in the cereal group increased on average by 11 percent i.e. millet (9 percent), maize (11.4 percent), sorghum (12.3 percent) and Rice (11.4 percent). Pulses increased by 24 percent from 763,000 tonnes to 1,052,000 tonnes in 2017. In particular, beans (25 percent) and cow peas (11.2 percent). Oil crops production increased by about six percent on average with groundnuts and Simsim, and Soya beans increasing by eight percent and nine percent respectively. See Statistical Appendix Table 3.2C.

Figure 3.1.2: Production Volumes for Selected Crops (Tonnes), 2013-2017

3.1.3 Fish catch by water body

Fisheries activities are mainly carried out in open water sources and provide an important source of livelihood for many people in Uganda. Open Water cover 15.3 percent of Uganda’s total surface 241,039Km2 and this comprises five major lakes (Victoria, Albert, Kyoga, Edward and George), which are a main contributor to capture fisheries in the country.

In 2015 and 2016, the contribution of fish catch in for Lake Albert 44. 0 percent surpassed that of Lake Victoria (40.0 %) which had been the most important water body in Uganda both in size and contribution to the fish catch in the past years. As shown in Figure 3.1.2 F, Lake Kyoga was the third largest contributor to fish catch (10.5%).

Figure 3.1.3: Proportion of fish catch by water body, 2016

Table 3.1 E: Fish catch by water body (thousand tonnes), 2013 – 2016

Water Body	2013	2014	2015	2016
Lake Victoria	193,000	245,000	238,630	252,804
Lake Albert	160,000	152,000	149,040	148,159
Lake Kyoga	40,000	38,000	41,768	40,710
Lake Edward, George,& Kazinga	6,248	6,246	6,354	6,638
Albert Nile	5,500	5,390	5,122	5,375
Lake Wamala	4,500	4,590	4,186	3,959
Other Waters	10,000	10,500	9,760	9,883
Total	419,248	461,726	454,860	467,528

Source: Fisheries Department, Ministry of Agriculture, Animal Industry and Fisheries (MAAIF).

3.1.4 Livestock

Figure 3.1.4 a shows that the number of livestock reduced from 14.4 million in 2016 to 14.2 million in 2017 registering a 1.25 percent reduction. In addition between 2016 and 2017 the goat, sheep, pigs and poultry numbers increased by 1.97 percent, 3.20 percent, 0.54 percent and 2.78 percent respectively as shown in Fig 3.1.4 a below.

Statistical Appendix Table 3.1 F provides data on livestock numbers by type for the period 2012 -2017.

Figure 3.1.4 a: Livestock Numbers 2015- 2017

3.1.4.1: Number of Cattle and Poultry by breed in 2013 - 2017

The indigenous breeds continue to be dominant over the exotic ones for both cattle and poultry as seen in Table 3.1.3.

Out of the 14.2 million cattle in Uganda, 9 in every 10 (13.3 million) are indigenous. As regards to poultry, 42.8 million (87.7%) were indigenous while the rest were exotic as shown in Table 3.1.3

Table 3.1.3: Cattle and Poultry Numbers ('000s) by breed 2013 - 2017

Year	Cattle		Poultry		Goats	
	Indigenous	Exotic	Indigenous	Exotic	Indigenous	Exotic
*2008	10,679	730	32,835	1,536	12,288	162
2013	12,339	887	38,064	5,332	14,245	188
2014	12,709	914	39,206	5,492	13,829	182
2015	13,090	941	40,382	5,657	15,113	199
2016	13,377	991	40,597	5,694	15,521	204
2017	13,271	918	41,726	5,852	15,826	208

*2008 Livestock census

3.1.5 Beef, Milk and Egg production

This sub-section presents data on beef, milk and eggs production based on Livestock Census 2008.

The production of beef in 2017 was estimated to be 211,358 metric tons and this was a 1.25 percent reduction from 214,033 Metric tons registered in 2016 as seen in Figure 3.2.5a. The details are shown in appendix, Table 3.1 G

Figure 3.1.5a: Beef Production (Mt)

In 2017, there was a reduction in the production of milk to 1,614 million litres from the 1,634 million litres that were produced in 2016 as shown in Figure 3.1 5 b.

The details are shown in appendix, Table 3.1 H

Figure 3.1.5b: Milk Production Trend 2012 – 2017 in Million litres

There was a 2.8 percent increase in egg production in 2017 from 882.6 million eggs produced in 2016 to 907.1 million in 2017. This increase was higher compared to the 0.01 percent that was observed between 2015 and 2016. The details are shown in Appendix, Table 3.1 H.

3.2 Industry Statistics

3.2.1 Index of Production (Manufacturing)

The Index of Production (IoP) for the manufacturing sector measures changes in the volume of goods produced by the manufacturing sector in the economy. Monthly data are compiled from manufacturing establishments that contribute about 80 percent of the manufacturing value added. The index is computed for eight broad groups as shown in Table 3.2.1 and the detailed group shown in Statistical Appendix Tables 3.2 A (i) and (ii).

The Index of Production recorded for the year 2017 was 248.17. This was a 5.8 percent increase compared to the 4.6 percent increase for the year 2016. The 'Textiles, Clothing & Foot Wear Products' group registered the highest increase (18.7 percent), followed by 'Chemicals, Paint, Soap & Foam Products' group by 18.6 percent and 'Sawmilling, Paper and Printing' group (18.2 percent). It should be noted, that the 'Food Processing' group recorded decline of 2.0 percent. Detailed indices by groups and categories are shown in Tables 3.2.1.

Table 3.2.1: Index of Production, Annual Production levels (2002=100), 2013 – 2017

Description	Weight	Years					Annual Percentage Change	
		2013	2014	2015	2016	2017	2017	2016
Total Manufacturing	1,000	199.87	221.67	224.34	234.67	248.17	5.8	4.6
Food Processing	400	177.28	215.77	193.35	211.57	207.29	-2.0	9.4

Miscellaneous	66	161.33	190.59	200.09	214.24	215.16	0.4	7.1

Source: Uganda Bureau of Statistics

The volume of production for the manufacturing sector increased by 5.8 percent for 2017 as shown in Table 3.2.2. There was a notable increase in the Textiles, Clothing and Footwear sector to 18.7 percent that was mainly due to a 35.4 percent increase in the volume of cotton ginning. The production of drinks indicated an increase of 10.5 percent that was mainly attributed to an increase in the volume of Beer production (6.3 percent) and Soft Drinks & Bottled Water Production (13.1%). There was also an increase in volume of Chemicals, Paint, Soap & Foam Products of 18.6 percent mainly attributed to increase in volume of Chemical & Pharmaceutical Production (44.6 percent). However, it should be noted that the volume of Food Products recorded a decline of 2.0 percent that was mainly attributed to a reduction in volumes of Sugar (21.9%) and Tea (6.1 %).

Table 3.2.2: Index of Production, Annual Percentage Changes (2002=100), 2013 - 2017

Description	Weight	2013	2014	2015	2016	2017
Total Manufacturing	1,000	3.0	10.9	1.2	4.6	5.8

3.3 Energy

3.3.1 Introduction

This section presents statistics on Electricity and petroleum fuels. . The section provides statistics and information on imports and sales of petroleum products, generation and distribution of electricity including installed capacity of some of the generators in the country.

3.3.2 Import of Petroleum products

The petroleum products include Petrol (PMS), Diesel (AGO) and Kerosene (BIK). During the period under review, there was a 10 percent increase in the import volume of petrol and diesel in 2017 compared to 2016. However, Kerosene registered a decrease in import volume of 6 percent in 2017 compared to 2016, as shown in Figure 3.3.1. For details, see Statistical Appendix Table 3.3.A.

Figure 3.3.1: Imports of selected Petroleum Products (cubic meters), 2002-2017

3.3.3 Annual Average Retail Prices for Petroleum Products

Table 3.3.1 shows the annual average retail price changes for selected petroleum products. There was a 5 percent increase in the average prices of Petrol, a 14 percent increase in the average prices of Diesel and a 4 percent increase in the average prices of Kerosene from 2016 to 2017 as shown in Table 3.3.1 below.

Table 3.3.1: Average Retail Prices per litre of selected Petroleum Products (Ugx), 2013-2017

Product	2013	2014	2015	2016	2017

Source: UBOS

3.3.4 Electricity

3.3.4.1 Installed Capacity

The total installed capacity of electricity power sources increased by 5 percent from 895.5 MW in 2016 to 937.8 MW in 2017 as shown Statistical Appendix Table 3.3 B. This increase was as a result of the commissioning of new power plants. These include Muvumbe Hydroelectric power station, Siiti Hydroelectric power station, Access power station and Tororo Solar power station.

3.3.4.2 Electricity generation

The national on grid electricity generated increased by 9 percent from 3,534 GWh in 2016 to 3,856 GWh in 2017 as shown in Figure 3.3.2 below. For details, see Appendix Table 3.3.C.

Figure 3.3.2: Total Units of Electricity Generated (GWh), 2009-2017

3.3.4.3 UETCL Purchases

The total units of electricity purchased by Uganda Electricity Transmission Company from the generating companies increased by 9 percent from 3,535 GWh in 2016 to 3,865 GWh in 2017 as shown in Figure 3.3.4 below. See Statistical Appendix Table 3.3 D.

Figure 3.3.4: Total Units of Electricity Purchased (GWh), 2013-2017

3.3.4.4 UETCL Sales

The total units of electricity sold by Uganda Electricity Transmission Company increased by 9 percent from 3,398 GWh in 2016 to 3,712 GWh in 2017 as shown in Figure 3.3.5. For more details, see Statistical Appendix Table 3.3 E.

Figure 3.3.5: Total Units of Electricity Sold (GWh), 2013-2017

3.3.4.5 Number of consumers

Figure 3.3.6 shows that the total number of consumers increased by 16 percent from 999,380 consumers in 2016 to 1,157,265 consumers in 2017. This was due to an increase in domestic consumers by 16 percent, commercial consumers by 12 percent and industrial by 3 percent as shown in Figure 3.3.7 below. For more details, see Statistical Appendix Table 3.3 G.

Figure 3.3.6: Total Number of Electricity Consumers, 2008-2017

3.3.4.6 Annual Average Weighted Tariffs

Figure 3.3.7 below shows the movement of the annual average domestic, commercial and large industrial tariffs from 2013 to 2017.

The annual average weighted domestic tariff increased by 7 percent from 595.1 Ug.Shs/kwh in 2016 to 635.1 Ug.Shs/kwh in 2017. For more details, see Statistical Appendix Table 3.3 G.

The annual average weighted commercial tariff increased by 6 percent from 565.2 Ug.Shs/kwh in 2016 to 599.5 Ug.Shs/kwh in 2017. For more details, see Statistical Appendix Table 3.3 H.

The annual average weighted industrial tariff increased by 6 percent from 565.2 Ug.Shs/kwh in 2016 to 599.5 Ug.Shs/kwh in 2017. For more details, see Statistical Appendix Table 3.3 I.

3.4 Building and Construction Statistics

3.4.1 Building Statistics

This section presents statistics on Building Plans submitted, Building Plans Approved, Building Plans deferred, Plans rejected and Occupational Permits Issued in the country for the period under review from selected Town Councils and Municipalities. Buildings are classified on the basis of their purpose. thus; Residential, Commercial or Mixed-use (both Residential and Commercial on the same building), Industrial, Institutional and Other use. Residential buildings include; Apartments, Bungalows, Dormitories and Huts.

Commercial buildings include; warehouses, shops, shopping malls, gas stations, markets, pharmacies, drug shops, offices, supermarkets. Industrial building include; factories, food mills, sawmills, power plants, bakeries and breweries. Institutional buildings include; libraries, college, child development, primary/secondary schools, institutes, universities, hospitals, health centres, nursing home, clinics Police, Barracks, Prisons. Other structures include; Police, banks, youth/child centres, museums, court halls, churches, mosques, temples, shrines, beauty salon, gym, sports club and those not anywhere categorized.

Data was collected from twenty five (25) Municipalities and sixty (60) Town Councils in 2014, twenty five (25) Municipalities and sixty (60) Town Councils in 2015, thirty five (35) Municipalities and ninety (90) Town Councils in 2016 and 40 Municipalities and 115 Town Councils in 2017. This shows an increase of 82% in coverage in Town Councils and Municipalities since 2014 because more small urban centres have been upgraded to Town Councils or Municipalities. Results are shown as percentages in the following tables and numbers in appendix attached in tables 3.4.2 to 3.4.6.

3.4.2 Building Plans submitted

Data on Building Plans Submitted in 2017 shows that; majority were residential, followed by commercial and institutional with shares of 58, 30 and 5 percent respectively. The remaining building categories registered less than two percent as shown in Figure 3.4.2.

Figure 3.4.2: Percentage Distribution of Plans Submitted to selected Municipalities and Town Councils

3.4.3 Plans Approved

Data on Plans Approved in 2017 show that close to 55 percent were residential buildings, 36 percent were commercial building, 5 percent were institutional. Comparing plans approved in 2016, 58 percent were residential buildings, 34 percent were commercial building while 5 percent were institutional plans. The remaining building categories registered less than 2 percent in both 2017 and 2016 as shown in Figure 3.4.2.

Figure 3.4.3: Percentage Distribution of Plans Approved in selected Municipalities and Town Councils

3.4.4 Occupational Permits Issued

An Occupation Permit is a certificate of occupancy issued by the Local Government certifying a building's compliance with applicable building codes and laws, qualifying it to be in a condition suitable for occupancy. Findings are that of all Occupation Permits issued in 2017, 38 percent were commercial buildings, 31 percent were residential buildings while nearly 14 percent were institutional buildings as shown in Fig 3.4.4.

Figure 3.4.4: Percentage Distribution of Occupation Permits issued by selected Urban Councils

3.4.5 Plans Deferred

Deferred plans are postponed submitted plans that are returned back to the owner because they are missing some details for example if a submitted plan is missing a land title. Of all plans deferred in 2017, 63 percent were for residential buildings and 20 percent were for commercial buildings as shown in figure 3.4.5

Figure 3.4.5: Percentage Distribution of deferred plans by Urban Councils in 2017

3.4.6 Plans Rejected

Rejected plans are plans that are completely disallowed for example if the proposed building is to be constructed in a wetland or forest reserve or does not have parking for vehicles. Figure 3.4.6 shows that of all plans rejected in 2017, 53 percent were for residential buildings and 21 percent were for commercial buildings.

Figure 3.4.6: Percentage Distribution of Rejected plans by Urban Councils in 2017

Source: Uganda Bureau of Statistics

3.4.7 Cement Consumption

Table 3.4.7 shows the Production, Imports, Exports and Net Domestic Supply (NDS) of cement in the economy. Total Net Domestic Supply of cement registered 2.3 percent increase in 2017 with 2,499 thousand tonnes from 2,442

thousand tonnes in 2016. Cement imports decreased to 284 thousand tonnes in 2017 from 308 thousand tonnes in 2016 representing 7.6 percent decrease while Exports decreased to 296 thousand tonnes in 2017 from 359 thousand tonnes in 2016 representing a 17.5 percent decrease.

Table 3.4.7: Net Domestic Supply of Cement, ('000 Tonnes) 2013 – 2017

	2013	2014	2015	2016	2017	Percentage changes
Production	2,023	2,141	2,331	2,494	2,511	0.68
Imports	322	397	335	308	284	-7.63

Source: Uganda Bureau of Statistics

3.5 Mineral Statistics

This section presents statistics on production of minerals in Uganda. Mineral statistics are categorized under two sections; metallic minerals and non-metallic minerals.

Miners in an underground tunnel

Metallic minerals are minerals that contain metals in their chemical composition and are a potential source of metal while non-metallic minerals are minerals that don't contain extractable metals in their chemical composition.

3.5.1 Mineral production by quantity

There was an increase in the production of Wolfram, Vermiculite, Kaolin, Synetic Aggregate, Iron ore, Tin and Limestone and a decrease in the production of Gold, Coltan and Pozollana in 2017 as compared to 2016 (See Statistical Appendix Table 3.4.A.).

3.5.2 Mineral production by value

Figure 3.5.1 shows the value of mineral production for the selected minerals in Uganda from 2013 to 2017. The results show that there was a 2.2 percent increase in the total value of the minerals produced from 176 billion shillings in 2016 to 180 billion shillings in 2017. (See Statistical Appendix Table 3.4.B.)

Figure 3.5.1: Mineral Production by Value

3.6 Transport Statistics

3.6.1 Road transport

The Uganda road network is categorized into four; National Roads, District Roads, Urban Roads and Community Access Roads. These are further sub-divided into two types which are paved and unpaved roads. The information presented in this section is for national roads only.

The total National road length during 2016/2017 financial year did not change compared to 2015/2016 as shown in the Table 3.6.1. The paved length increased by 0.9 percent while the unpaved length reduced by 0.2 percent. The upgrading on the total length of 1,628 million kilometers of unpaved roads were reported to be ongoing while 698 thousand kilometers paved roads were under rehabilitation as shown in appended Table 1

Table 3.6.1: National Road Network in Uganda (Km) 2012/13- 2016/17

	2012/13	2013/14	2014/15	2015/16	2016/17

3.6.2 Newly registered motor vehicles

Registration of new vehicles is conducted by Uganda Revenue Authority for private cars while Ministry of works registers Government owned cars.

Table 3.6.2 below present's statistics on newly registered motor vehicles and motorcycles from 2013-2017 for privately owned Vehicles. Overall, the newly registered motor vehicle and motor cycles increased by 16 percent in 2017 compared to 2016 due to an increase of newly registered cars by 25 percent. The results also show that the total number of newly registered motorcycles increased by 12 percent.

Table 3.6.2: Private newly registered motor vehicles / Motorcycles from 2013-2017

Category	2013	2014	2015	2016	2017
Newly Registered Cars	45,169	45,560	43,337	33,750	42,005

3.6.3 Government newly registered Motor vehicles

The total number of newly registered vehicles licensed by Government increased by 91 percent in 2016 compared to 2015. There was also an increase of 121 percent in the number of district vehicles in 2016 compared to those registered in 2015 by 121 percent.

Table 3.6.3: Government registered motor vehicles from 2012-2016

3.6.4 Transport Licensed Vehicles for Public Use.

This sub-section provides statistics on vehicles regulated by Transport Licensing Board.

Table 3.6.4 shows that there was a significant increase of 95 percent in the number of Rental/ Town taxi Vehicles Operating licenses issued in 2017.

During the period, there was a notable decrease in the issuance of certificate of fitness to Vehicles by 72 percent. This was as a result of previously introducing a periodic inspection of all vehicles in the country using modern automated equipment to ensure roadworthiness by the Government.

Table 3.6.4: Number of Licensed Public vehicles Statistics 2013 – 2017

Category	2013	2014	2015	2016	2017	Percentage Change
Tourist	107	34	38	125	197	58

3.6.5 Air Transport

This sub-section presents data on the movement of commercial aircrafts, passengers and Cargo through Entebbe International Airport and aircraft movement over Uganda's air space.

Aircraft Movement

Table 3.6.5 shows that there was 1.8 percent increase of aircraft movement at Entebbe Airport in 2017 compared to 2016. This was as a result of increased number of commercial aircrafts landings by 3.4 percent. However, aircraft over flights reduced by 1.3 percent in 2017 as shown in Table 3.6.5 below.

Table 3.6.5: Aircraft Movements at Entebbe International Airport 2013 – 2017

Aircraft Movement	2013	2014	2015	2016	2017
Commercial Aircraft Landings	30,364	26,886	27,650	28,347	29,323

Percentage Change		-3.4	-0.1	3.9	1.8

Source: Civil Aviation Authority

Passenger Air transport

The total number of passengers passing through Entebbe International Airport increased by 6.1 percent from 1.5million in 2017 to 1.6million in 2016. This was mainly attributed to the 33 percent increase in the number of Domestic passengers that increased from 14,166 in 2016 to 18,824 in 2017 as shown in Table 3.6.5.

Table 3.6.5: Number of Passengers through Entebbe International Airport from 2012-2017

Passengers	2013	2014	2015	2016	2017
International	1,438,546	1,427,035	1,505,505	1,532,329	1,625,878

Source: Civil Aviation Authority

Volume of Cargo through Entebbe International airport

The volume of cargo increased by 16.4 percent from 59,556 tonnes in 2016 to 69,306 tonnes in 2017. This was as a result of an increase in the volume of cargo loaded by 21.2 percent and the volume of cargo off-loaded by 7 percent.

Also during the period, the volume of mails offloaded increased by 23.1 percent in 2017. This was attributed to the increase of off-loaded mails of 399 as compared to a decrease of 324 in off loaded mails by 5.5 percent in 2016 as shown in Table 3.6.6.

Table 3.6.5: Cargo (Tonnes) Through Entebbe International Airport, 2013 – 2017

3.6.6 Rail Transport

A total of 818,520 tonnes was hauled in 2015 compared to 682,800 tonnes in 2014 representing an increase of 19.9 percent . The Net tonnes by rail ferried through Port Bell decreased by 66 percent in 2015.

It was also revealed that the number of fatalities remained constant for the years 2014 and 2015 respectively as shown in table 3.6.7.

Table 3.6.6: Railway Transport statistics from 2012-2015

Indicator	2012	2013	2014	2015	Annual %age change

3.7 Communication Statistics

This section presents data and information on some of the key aspects of communication. These include: telephone usage, internet market and mobile money statistics.

3.7.1 Telephone Usage

The telecommunications sub-sector posted a small increase in the number of subscribers in the year 2017. In the context of telecommunications, any registered line that has registered a transaction within the last 90 days is considered a subscriber. Table 3.6.8 shows that there was an increase of telephone subscribers from 23.206 million subscribers in 2016 to 23.211 million subscribers in 2017. Subsequently, the national tele-density increased by 5.5 percent from 63 lines per 100 people in 2016 to 66 lines per 100 people in 2017. The volume of talk time increased by 16.5 percent from 24,392 million minutes in 2016 to 28,414 million minutes in 2017. This represents 8 percent decrease in the International Talk time as shown in Table 3.6.8.

Table 3.7.1: Telephone Subscribers and Talk time, 2013-2017

Service	2013	2014	2015	2016	2017	Annual Percentage Change
Subscribers (number '000)	18,341	20,690	20,549	23,206	23,211	0.02
Fixed Telephone (number '000)	272	324	328	368	263	-28.5
Cellular Phone (number '000)	18,068	20,366	20,220	22,838	24,949	9.2

Source: Uganda Communications Commission

3.7.2 Call tariffs

In a move to standardize rates by Mobile telecommunication service providers, the average call rates for both on-net and off-net dropped to Shs 264 and Shs 288 respectively in 2016. This indicated a 2 percent decrease in call rates for on net calls, 44 percent decrease for off-net calls.

Table 3.7.2: Call tariff averages (Ug.Shs.), 2013-2016

Call tariff averages per minute	2012	2013	2014	2015	2016

3.7.3 Internet market

During 2017, the total number of fixed internet subscribers increased by 13.3 percent compared to those registered in 2016. In the same period there was a 22.9 percent decrease in mobile wireless internet subscriptions from the

79.9 percent increase in 2016. Internet penetration increased by 49.9 percent in 2017 compared to 51.9 percent increase in 2016, as shown in Table 3.7.3.

Table 3.7.3: Internet subscriptions, 2013-2017

Users and subscribers	2013	2014	2015	2016	2017

3.7.4 Mobile Money transactions

The total number of mobile money registered customers increased by 8 percent from 21,580 Million customers in 2016 to 23,362 Million customers in 2017. The number of transactions (information exchange) decreased by 59 percent from 291,000 million in 2016 to 120,699 million in 2017. The value of the transactions increased by 37 percent from 4,791 billion shillings in 2016 to 6'583 billion shillings in 2017 as shown in Table 3.6.11.

Table 3.7.4: Mobile Money transactions, 2013-2017

Subscribers	2013	2014	2015	2016	2017

3.7.5 Postal and Courier services

The total volume of letters handled by Posta Uganda increased by 6.4 percent in 2017 compared to 2016 from 752,149 letters to 800,179 letters respectively. The most contributing factor to the increase was realised from Domestic Registered Letters posted which recorded the highest increase of 209.9 percent. However, the Ordinary Domestic Letters posted recorded a decrease of 33.4 percent. Parcels received from abroad increased by 60.4 percent in 2017 compared to 2016 while EMS items received registered a highest percent of 32.4.percent, as shown in Table 3.6.8 below.

Table 3.7.5: Postal Statistics 2013 – 2017

3.8 Migration and Tourism Statistics

The statistics presented here includes a summary of International movement of persons across gazetted points of entry and exit and other Tourism Statistics such as (occupancy levels for hotels and other accommodation establishments, as well as visitors to national parks in the country). The information on international arrivals and departures is majorly based on the Arrival/Departure declaration cards filled at the 22 gazetted border points. However, due to irregular use of Arrival and Departure declaration forms, data for some border posts including Entebbe International Airport Busia, Cyanika, and Katuna have been estimated based on Personal Identification Evaluation Secure Comparable System (PIESCS) totals and Flight Manifests used for recoding air travelers obtained from Civil Aviation Authority (CAA).

3.8.1 International Arrivals and Departures

The country recorded a total of 3.9 million travelers in 2017 with the number of departures marginally exceeding arrivals for the past two consecutive years. The number of arrivals and departures has grown consistently since 2013. The number of arrivals through the gazetted border posts increased by 6.9 percent between 2016 and 2017, while departures increased by 2.5 percent in the same period as shown in Table 3.8.1. Throughout the period, there were more male travelers to and departures from the country compared to females as shown in Appendix Table 3.6 D

Table 3.8.1: International Arrivals and Departures ('000s), 2013 – 2017

Period	Arrivals		Departures		Net Movement*	Gross
	Number ('000s)	Annual %age	Number ('000s)	Annual	Number ('000s)	Number ('000s)
2013	1,684	3.1	1,566	6.5	118	3,250
2014	1,700	0.9	1,597	2.0	103	3,297
2015	1,730	1.8	1,710	7.1	20	3,440
2016	1,802	4.1	1,887	10.3	-85	3,688
2017	1,927	6.9	1,933	2.5	-6	3,861

Arrivals from and Departures to the EAC- Pattern States

The East African Community (EAC) Common Market Protocol guarantees free movement of persons who are citizens of Partner States within the EAC territory. Statistics on arrivals and departures within the region is therefore important in monitoring implementation of the EAC Common Market Protocol. The number of arrivals from EAC member states increased from about 883,000 in 2016 to about 947,000 in 2017. Over the past two years, most of the arrivals and departures were from Rwanda followed by Kenya, overall accounting for 79 percent of the arrivals and the departures. The net movement between Uganda and the other EAC Partner States increased from about 24,000 persons in 2016 to about 70,000 in 2017.

Table 3.8.2: Arrivals from and Departures to the EAC Pattern States ('000s), 2013 – 2017

Visitor (Tourists) Arrivals

A visitor is a traveler taking a trip to a main destination outside his/her usual environment, for less than a year, for any main purpose (business, leisure or other personal purpose) other than to be employed by a resident entity in the country or place visited, similarly, A visitor is considered a tourist (overnight visitor) if his/her trip includes an overnight stay or as a same day visitor (excursionist) (IRTS 2008)

In 2017, out of 1.9 million total arrivals, 1.4 million (73 percent) were visitor arrivals. The number of visitor arrivals has marginally increased between 2013 and 2017. During the period (2013-2017) the visitor arrivals were consistently higher than the visitor departures, but the reverse is seen in 2015 and 2016. See Table 7.3 below.

Table 3.8.4: Visitor Arrivals and Departures by Residence, 2013 – 2017

Year	Visitor Arrivals ('000s)	Visitor Departures ('000s)	Tourists Net Movement ('000s)
2013	1,206	1,188	18
2014	1,266	1,220	46
2015	1,303	1,310	-7
2016	1,323	1,359	-37
2017	1,402	1,370	32

Source: Uganda Bureau of Statistics

Place of Origin of Visitor Arrivals.

In 2017, most visitor arrivals in the country were from the African continent (80.4 percent) followed by Europe (7.4 percent), America (5.5 percent) and Asia (5.1 percent). Visitors from the neighbouring EAC countries that is (Burundi, Kenya, Rwanda, Tanzania and south Sudan) accounting for 68 percent of all visitor arrivals. This was followed by the United States and United Kingdom accounting for 4.4 percent and 2.4 percent of visitor arrivals respectively. The percentage of Visitors from the United Kingdom has continued to decline since 2015. (Statistical Appendix Table 7M).

Table 3.8.5: Distribution of Visitor Arrivals by Place of Origin, 2013 – 2017

Country of Residence	2013	2014	2015	2016	2017

Visitor Arrivals by Mode of Travel

There are 2 major forms of travel into and out of Uganda namely Air and Road, Out of the 22 gazetted entry points, only Entebbe International Airport can be accessed by air. The other points are only accessed by road.

The majority of the visitor arrivals used road as a mode of travel. The number of visitor arrivals by road increased from about 890,000 in 2016 to about 981,000 in 2017. Katuna, Mirama Hills and Cyanika along the Rwandan border, Busia and Malaba along the Kenyan border and Mutukula along the Tanzanian border were the major entry land borders used. (Table 3.6 C) The number of visitor arrivals by air transport declined from about 432,000 in 2016 to about persons 421,000 in 2017, reflecting a 2.5 percent decline in air travel. Overall, the number of visitor arrivals have remained fairly constant since 2015.

Figure 3.8.1: Visitor Arrivals by Mode of Transport ('000s), 2013 – 2017

Age-Sex Composition of Visitor Arrivals.

Males have consistently dominated the visitor arrivals into Uganda. On average they constituted over 65 percent of the Visitor Arrivals during the past five years (2013 -2017). In 2017, the majority (57 percent) of the visitor arrivals were in the age group 20-39 years followed by the age group 40-59 years (35 percent). On average, visitor arrivals aged less than 20 and above 60 years together accounted for less 9 percent of the total visitor arrivals in period 2017 (Statistical Appendix 3.6 N).

Tourist Arrivals by Purpose of Visit

Majority of Tourists Arrivals came into the country to visit friends and relatives (see table 3.8.6), followed by those who came to attend business and professional conferences then those who came for leisure, recreation and holidays.

The number of visitor arriving for leisure, recreation and holidays increased from about 238,000 in 2016 to about 281,000 in 2017 representing 18.2 percent increase, whereas the visitor arrivals visiting friends and relatives increased from about 466,000 in 2016 to 492,000 in 2017, indicating 5.6 percent increase.

Table 3.8.6: Visitor Arrivals by purpose of visit ('000s), 2013 – 2017

Purpose of Visit	2013	2014	2015	2016	2017	%Age Change 2016-2017

3.8.2 Visitors to National Parks

Uganda has twelve national parks and three active game reserves (See figure 6.2). These offer a wide range of tourism products including gorilla tracking, nature guided walks, village walks, butterfly and bird watching, rare fauna and flora species.

Figure 3.8.2 shows that there has been an increasing trend in the number of visitors to the national parks from 2014. Visitors to National Parks increased from 246,000 in 2016 to 286,000 in 2017.

Figure 3.8.2: Visitors to National Parks (000's), 2013 – 2017

The most commonly visited national park in 2017 was Murchison Falls (33 percent) followed by Queen Elizabeth (29 percent) and Lake Mburo National Park (11 percent). These three collectively account for over two thirds of the visitors to all the National Parks. (Appendix Table 3.6 O)

Figure 7.3 shows the distribution of visitors to the national parks in 2017 by category. The highest percentage (43 percent) of visitors to national parks were non-residents of foreign origin followed by residents from East African partner states and Ugandan students accounting for 28 percent and 23 percent respectively.

Figure 3.8.3: 2017 Visitors (Citizens and foreigners) to national parks (Percentage)

3.9 Governance, Peace and Security Statistics

The source of the information presented in this section on Governance, Peace and security is derived from the 2017 National Governance, Peace and Security survey (NGPSS) and the National Governance Baseline Survey (NGBS), 2014. These were household based surveys targeting the population aged 18 years and above.

The Surveys collected information on different themes such as Human Rights, Democracy and Decentralization, Access to Justice, Transparency and Accountability and Political Participation.

3.9.1 Human Rights

Human rights are standards that allow all people to live with dignity, freedom, equality, justice, and peace. They should therefore be assured to everyone without any distinction.

Awareness of and Respect for Human Rights

Table 3.1 reveals that, overall, 88 percent of the adult population were aware of their human rights. The proportion of the male and urban population (90 percent respectively) that were aware of their human rights were slightly more than those among the females (87%) and the rural population (88%). Of the respondents aged 18 years and above, only 15 percent had claimed their human rights (males, 16% and females, 14%).

Despite the high proportion of respondents aware of human rights, only 60 percent indicated that human rights were often/always respected in Uganda.

Table 3.9.1: Knowledge of Human Rights, claiming of Human Rights and perceptions on respect of Human Rights, 2017

Background Characteristic	Aware of Human rights	Claimed Human rights 12 months before the survey	Perception that Human Rights are Often/Always respected
Sex			
Male	89.7	16.4	57.4
Female	87.1	13.6	61.4
Residence			
Urban	89.8	13.4	54.7
Rural	87.7	15.4	61.5
Sub-Region			
Kampala	86.5	12.3	36.6
Central	82.2	21.5	45.6
Eastern	86.1	11.6	61.8
Northern	87.2	18.6	55
Western	97.3	9.5	78.9
Uganda	88.3	14.9	59.6

Source: Uganda Bureau of Statistics

Figure 3.1 further shows the perceptions of respondents on the respect for human rights in the country based on the 2014 and 2017 NGPSS. Overall the proportion of the population aged 18 years and above who perceived human rights to be respected in the country slightly decreased from 69 percent in 2014 to 60 percent in 2017. A similar trend was observed when the findings are disaggregated by sex and residence.

Figure 3.9.1: Trends in perceptions on respect of Human Rights in Uganda by sex and residence (%), 2014-2017

3.9.2 Access to Justice

Access to justice is the ability of people to seek and obtain a remedy through formal or informal institutions of justice for grievances in compliance with human rights standards. Table 3.2 shows that overall 86 percent of the population aged 18 years and above were aware of the right to seek justice. Whereas variations by background characteristics were minimal, variations by region were observed, awareness was almost universal among persons living in Western Uganda (95%) and lowest among those from Central (76%). Awareness to seek justice did not change much between the two National Governance survey periods of 2013 and 2017.

Figure 3.9.2: Proportion of the respondents aware of their right to seek justice by selected background characteristics, 2017

Knowledge and Trust in the Justice System

In Uganda, there exist several institutions which can be utilized in the administration of Justice. Accessibility is qualified by degree of awareness about the service/institution, existence of facilities to provide it and the need for the services offered at the facility.

Figure 3.3 shows that a higher proportion of the population had knowledge of the local councils (72%). The office of the Administrator General, the Directorate of public prosecutions, FIDA-U and the Equal Opportunity Commission (EOC), had less than 10 percent of the population reporting that they were aware of each of them. The local council system was the most trusted institution of the Justice, Law and Order sector as reported by 88 percent of the respondents.

Figure 3.9.3: Proportion of respondents with Knowledge and Trust of the different Justice Institutions in Uganda, 2017

3.9.3 Democracy

Democracy consists of a political system for choosing the Government through free and fair elections.

3.4.1 Satisfaction with the way democracy works

The majority of the adults (61%) reported that they were either very satisfied or satisfied with democracy with the female population (64%) having higher levels than the male (57%). A higher proportion of the population living in rural areas (64%) revealed that they were satisfied with democracy in the country compared to those from urban areas (52%).

Table 3.9.2: Level of satisfaction with democracy (percent) by selected Background Characteristics

Background Characteristic	Very dissatisfied	Dissatisfied	Satisfied	Very satisfied	Satisfied with democracy
Sex					
Male	13.9	29.7	46.6	9.9	56.5
Female	9.5	26.6	52.3	11.6	63.9
Residence					
Urban	14.3	33.9	44.2	7.7	51.9
Rural	10.4	25.7	51.8	12.1	63.9
Uganda	11.5	28	49.7	10.8	60.5

Source: Uganda Bureau of Statistics

3.9.4 Access to and Trust in public institutions

When the people have access to public institutions it promotes accountability and transparency¹⁰. During the NGPSS 2017 and 2014, respondents were asked to identify the services/public institutions they had used in the last 12 months.

Access to public institutions

Access to institutions offering public services (in general) increased to 42 percent in 2017 from 29 percent in 2014 while access to the other institutions decreased between the two years as seen in Figure 3.4.

Figure 3.9.4: Trend in percentage of respondents that used public institutions during the last 12 months prior survey

Trust in public Institutions

Trust in public institutions means that the public has confidence in the actions of the respective sector Ministries Departments and Agencies (MDAs) to do what is right and perceived to be fair¹¹. Generally respondents that had trust in any one of the public institution was less than 10 percent as presented in Figure 3.5.

Figure 3.9.5: Percentage of respondents that trust public institutions

¹⁰ Building more effective and Accountable and Inclusive institutions for all, OECD Post 2015 Reflections

¹¹ The OECD work program on Trust: Understanding the key drivers for better policy making, Zsuzsanna Lonti 2014

Whereas there was an increase in public trust in mayors from 50 percent in 2014 to 62 percent in 2017, other institutions recorded a decrease with the biggest in the Social security system by almost half as shown in figure 3.6.

Figure 3.9.6: Trend in percentage of respondents with trust* in Public institutions

*trust means somewhat or very much trust in the institution

3.9.5 Transparency and Accountability

The citizens of Uganda have a right to know and hold public institutions accountable for actions executed and public institutions are obliged to present the accountability with clarity and justification.

Performance of LC V /district leaders and Members of Parliament

The results in Table 3.6 reveal that, overall 46 percent of respondents rated the performance of their leaders at LC V level in relation to service delivery as good/very good while 18 percent rated their performance as poor. The Northern and Western regions had the highest percentage of persons that rated the performance of their leaders at LC V level as good/very good (54 percent) while Kampala had the lowest (29%).

Considering leaders at the Parliamentary level, 38 percent of respondents rated the performance of their leaders in service delivery as good/very good, while 26 percent rated the performance as poor. At regional level, the Western region had the highest proportion of persons that rated the performance of leaders at parliamentary level as good (44%).

Table 3.9.3: Rating the Performance of leaders at LC V/District and MP levels with regard to service delivery (%)

3.9.6 Monitoring Service Delivery

Information on funds received, how they were distributed and used by set up committees within communities or by local leaders is important if citizens are to have confidence in their leaders and the entire public service system. Figure 3.7 shows a decrease in the proportion of respondents that reported that their local leaders inform them of the funds received were utilised.

Figure 3.9.7: Proportion of population for selected dimensions of service delivery

3.9.7 Corruption

Computation and ranking of the country is greatly based on the extent to which members of the public have paid bribes or were asked to pay bribes to access services especially from the public sector. According to findings, respondents that said corruption was not a concern at all has almost not changed from 4 percent in 2014 to 3 percent in 2017 while those who considered it as a concern have increased from 80 percent in 2014 to 88 percent in 2017.

3.9.8 Political Participation

In Uganda, for one to be eligible to vote in an election or referendum, one must be a citizen, aged 18 years or older and duly registered as a voter. Table 3.4 shows that nationally, 83 percent of persons aged 18 years and above at the time of elections voted in the Presidential and Parliamentary elections, 76 percent voted in the LC V elections while 73 percent voted in the LC III elections. A higher proportion of males (86%) compared to their female counterparts (80%) voted in the 2016 Presidential and Parliamentary elections. Furthermore, a higher proportion of persons in the rural areas (85%) than in urban areas (76%) voted in the 2016 Presidential and Parliamentary elections.

In addition, persons with Certificate/Diploma level of education (88%) were more likely to have voted in the Presidential and Parliamentary elections while those with a Degree or Secondary education (77% each) were least likely to have voted. Regional Kampala had the lowest (67%) percentage of respondents who voted in the Presidential and Parliamentary elections.

Table 3.9.4: Proportion of Respondents aged 18 years and above at the time of 2016 elections that voted

3.9.10 Management of Violence

The importance of collecting data on Violence Against Women (VAW) is to unravel that thread by shedding light not only on forms of violence that are already widely discussed but also to reduce the known forms of violence, such as dowry murders, female circumcision enslavement for sex tourism, and rape.

3.9.11 Effectiveness of Public Security Forces in addressing violent Crime

It is increasingly acceptable among police practitioners, academics and policy-makers that a shift in the philosophy of police work is needed, from an exclusive law enforcement approach to one that also focuses on prevention, partnerships and problem-solving. Table 3.6 shows that sixty-eight percent of the respondents generally felt that the public security forces were effective in combating all forms of crime.

A relatively higher proportion of females (71%) than males (68%) felt the public security organizations were effective in combating violence against children. By region, the western region had the highest proportion of respondents that reported that the Public Security Forces were effective in combating violence against children (80%) while Kampala had the lowest proportion (17%) regarding violence against women.

3.9.12 Safety

Fear of crime restricts mobility, which interferes with social and economic interaction, as well as other social activities. To better understand the views of respondents, five scenarios related to safety in their day to day activities were presented to respondents. Figure 3.9 findings indicate that across all the scenarios that were researched on, respondents felt safer in 2017 compared to the situation in 2014. It is also clear that respondents felt safer walking alone during daytime (94%) as compared to walking alone in their areas at night (61%) in 2017.

Figure 3.9.9: Level of feeling safe in different places (%)

3.9.13 Tension and Conflict

Causes of Conflict

Conflicts have led to devastating effects, including: deaths to innocent people, refugees across borders, internal displacements, loss and destruction of property, disruption of socio economic activities as well as cost relating to their management. From table 3.7 respondents identified the main causes of tension/conflict as existence of gangs (42%) followed by land disputes (19%) in their communities. However, the leading causes tended to differ across regions. Land dispute were the most commonly identified cause of conflict/tension in the Northern region (66%) while scarce natural resources were the leading cause of tension/conflict in Western (18%). On the other hand, the Central region reported gangs (66%) as the leading cause of Tension or Conflict.

Table 3.9.7: Causes of conflict or Tension by selected characteristics of respondents, percentage

	Economic competition	Scarce natural resources	Ethnic differences	Linguistic differences	Religious differences	Political factors	Land disputes	Gangs	Other
Sex									
Male	5.8	8.3	4.4	0	0.1	9	19.3	42.2	10.9

Public confidence in the state to provide security

The government is mandated to protect and enhance the right of its people. Public security is a key pillar that determines confidence that the citizens have in their leadership. The table 3.8 reveals that about three quarters (72%) of the respondents had trust in the ability of government to protect them and their property. Individuals residing in rural areas were seen to trust the government more than those in urban areas with 74 percent and 66 percent respectively. By region, the proportion of respondents that trusted the government was lowest in Kampala (55%) and Northern region (56%). The highest level of trust was reported by respondents from the Eastern region (84%).

CHAPTER FOUR

Macroeconomic Statistics

4.1 National Accounts

4.1.1 Gross Domestic Product (GDP)

The economy performed better in 2017/18 compared to 2016/17 with a Gross Domestic Product (GDP) growth of 6.1 percent, which was up by 2.2 percentage points higher than the 3.9 percent growth in 2016/17. The GDP growth in 2017/18 is the highest, since 2013/14 when the economy grew by 5.1 percent; See summary table 4.1 below.

Table 4.1: GDP at Market Prices, FY, 2013/14-2017/18

	2013/14	2014/15	2015/16	2016/17	2017/18
GDP at Current Market prices (Billion shillings)	69,276	76,517	83,091	91,718	100,531
GDP at Constant 2009/10 prices (Billion shillings)	50,651	53,279	55,826	57,983	61,514
GDP at Constant price, Percentage Change	5.1	5.2	4.8	3.9	6.1
Growth in Implied deflators, 2009/10=100 (%)	3.4	5	3.6	6.3	3.3

4.1.2 Gross Domestic Product by Broad Economic Sectors

The broad structure of the economy for Agriculture, Industry and Services sectors has not changed much in the past five years. Among the three broad sectors, Service sector continuously recorded the highest share in the economy with a 47.6 percentage share in 2017/18, a marginal increase from a share of 47.1 percent in 2016/17(see appendix 4.1 C(ii)). Below is a breakdown of sector performance.

Table 4.2: Value Added at Current prices by Sectors (Billion Shs), 2013/14 – 2017/18

	2013/14	2014/15	2015/16	2016/17	2017/18
Agriculture, forestry and fishing	17,371	18,350	19,655	22,545	24,322
Industry	14,140	15,311	17,142	18,652	19,961
Services	32,650	36,675	39,627	43,211	47,868
Taxes on products	5,116	6,181	6,668	7,310	8,380
GDP at market prices	69,276	76,517	83,091	91,718	100,531

Source: Uganda Bureau of Statistics

4.1.3 Agriculture, forestry and fishing sector

The value added of the agricultural activities includes; cash crops, food crops, livestock, fishing and forestry which grew by 3.8 percent in 2017/18 compared to a growth of 1.6 percent recorded in 2016/17. The strong growth is attributed to favourable weather in 2017/18. In nominal terms, the gross value added was recorded at 24,322 billion in 2017/18 compared to 22,545 billion recorded in 2016/17. The sector recorded a 24.2 percent contribution to GDP in 2017/18 as compared to 24.6 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.3.1 Cash crops

The cash crops growing activities include: coffee, cotton, tea, cocoa, tobacco, sugar cane and horticultural products growing. The value added for cash crops recorded a growth of 4.6 percent in 2017/18 compared to the 7.7 percent in 2016/17, a drop by 3.1 percentage points from the previous year. In nominal prices, the sector recorded a value addition of 2,108 billion shillings in 2017/18 compared to 1,862 billion shillings in 2016/17. The cash crops contributed 2.1 percent to GDP in 2017/18 as compared to 2.0 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.3.2 Food crops

The food crops growing activities include the following crops; bananas, wheat, sweet potatoes, cassava, Irish potatoes, maize, rice, beans, peas, among others products. The value added for food crops recorded a growth of 5.3 percent in 2017/18 compared to the 2.0 percent growth in 2016/17, an increase of 3.3 percentage points from the previous year. In nominal prices, the sector recorded a value addition of 12,881 billion in 2017/18 compared to 12,148 billion in 2016/17. The food crops contributed 12.8 percent to GDP in 2017/18 as compared to 13.2 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.3.3 Livestock

The livestock rearing activities include keeping of animals and birds such as: cattle, goats, sheep, chicken, among other products. The value added for livestock activities registered a growth of 2.0 percent in 2017/18 compared to the 1.6 percent growth in 2016/17, an increase of 0.4 percentage points from the previous year. In nominal prices, the sector recorded a value addition of 4,303 billion in 2017/18 compared to 3,847 billion in 2016/17. The livestock keeping activities contributed 4.3 percent to GDP in 2017/18 compared to 4.2 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.3.4 Forestry

The forestry activities include; logging, Gathering of non-wood forest products, support services to forestry, among other products. The value added for forestry activities registered a growth of 2.5 percent in 2017/18 compared to a decline of 2.3 percent recorded in 2016/17. In nominal prices, the sector recorded a value addition of 3,472 billion in

2017/18 compared to 3,192 billion in 2016/17. The forestry activities contributed 3.5 percent to GDP in 2017/18 similar to that registered in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.3.5 Fishing

The fishing activities include; fishing in fresh water lakes and rivers, and fish farming. The value added for fishing activities registered a contraction 2.1 in 2017/18 compared to an increase of 1.7 percent recorded in 2016/17. In nominal prices, the sector recorded a value addition of 1,521 billion in 2017/18 compared to 1,462 billion in 2016/17. The fishing activities contributed 1.5 percent to GDP in 2017/18 as compared to 1.6 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.4 Industry sector

The value added for the industry sector activities include; mining and quarrying, manufacturing, water and waste management activities, electricity generation and supply, and construction activities. The overall industry activities grew by 6.1 percent in 2017/18 compared to 3.4 percent in 2016/17. This strong growth was mainly due to strong performance of the agriculture activities which in turn provide raw materials to manufacturing. Construction activities also registered a higher growth. In nominal terms, the gross value added was recorded at 19,961 billion in 2017/18 compared to 18,652 billion recorded in 2016/17. The sector recorded a 19.9 percent contribution to GDP in 2017/18 as compared to 20.3 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.4.1 Mining & quarrying

Mining & quarrying activities include; extraction of crude petroleum and natural gas, mining of metal ores, other mining and quarrying, mining support service activities. The value added for mining & quarrying activities a growth of 26.1 percent in 2017/18 compared to a contraction of 5.7 percent recorded in 2016/17. In nominal prices, the activity recorded a value addition of 444 billion in 2017/18 compared to 603 billion in 2016/17. Mining and quarrying activities contributed 0.4 percent to GDP in 2017/18 as compared to 0.7 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.4.2 Manufacturing

Manufacturing activities include; Manufacture of food products, beverages, tobacco products, textiles, wearing apparel, paper and paper products, among other activities. The value added for manufacturing activities grew by 1.7 percent in 2017/18 compared to a growth of 2.2 percent recorded in 2016/17. Manufacturing activities contributed 0.1 percent to the overall growth of GDP in the period under study. In nominal prices, the activity recorded a value addition of 8,305 billion in 2017/18 compared to 7,881 billion in 2016/17. Manufacturing activities contributed 8.4 percent to GDP in 2017/18 as compared to 8.6 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.4.3 Electricity

Electricity activities include; electricity, gas, steam and air conditioning supply. The value added for manufacturing activities grew by 6.3 percent in 2017/18 compared to a growth of 8.3 percent recorded in 2016/17. In nominal prices, the activity recorded a value addition of 1,029 billion in 2017/18 compared to 899 billion in 2016/17. Electricity activities contributed 1.0 percent to GDP in 2017/18 same as in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.4.4 Water supply activities

Water supply activities include; water supply; sewerage, waste management and remediation activities. The value added for water supply activities grew by 6.0 percent in 2017/18 compared to a growth of 6.8 percent recorded in 2016/17. Water supply activities contributed 0.1 percent to the overall growth of GDP in the period under study. In nominal prices, the activity recorded a value addition of 2,925 billion in 2017/18 compared to 2,557 billion in 2016/17. Water supply activities contributed 2.9 percent to GDP in 2017/18 as compared to 2.8 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.4.5 Construction activities

Construction activities include; construction of buildings, civil engineering, specialized construction activities. The value added for construction activities grew by 6.9 percent in 2017/18 compared to a growth of 5.3 percent recorded in 2016/17. In nominal prices, the activity recorded a value addition of 7,258 billion in 2017/18 compared to 6,713 billion in 2016/17. Construction activities contributed 7.2 percent to GDP in 2017/18 as compared to 7.3 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5 Services sector

The value added of service sector includes; wholesale and retail trade; repairs, Transport and storage, Accommodation and food services, Information and communication, Financial and insurance activities, Real estate activities, Professional, scientific and technical services, Administrative and support services, Public Administration, Education, Health, Arts, Entertainment and recreation, Other service activities. The overall services sector activities value added grew by 7.7 percent in 2017/18 as compared to 5.4 percent in 2016/17. Services contributed 4.0 percent to GDP growth in 2017/18 compared to 2.8 percent in 2016/17. The main contributors to the strong growth in services sector were information & communication, trade & repairs, education and public administration.

In nominal terms, the gross value added was recorded at 47,868 billion in 2017/18 compared to 43,211 billion recorded in 2016/17. The sector recorded a 47.6 percent contribution to GDP in 2017/18 as compared to 47.1 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.1 Trade, repairs and sale & repair of motor vehicles

Trade & repairs activities include; wholesale, retail trade and sales & repair of motor vehicles. The value added for trade & repairs activities registered a growth of 2.2 percent in 2017/18 compared to a growth of 1.6 percent recorded in 2016/17. In nominal prices, the activity recorded a value addition of 11,806 billion in 2017/18 compared to 11,043 billion in 2016/17. Trade & repairs activities contributed 11.7 percent to GDP in 2017/18 as compared to 12.0 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.2 Transport and storage

Transport and storage activities include; road, rail, water, air transport, warehousing as well as posts and courier activities. The value added for transport and storage activities grew by 5.6 percent in 2017/18 from a growth of 3.5 percent in 2016/17. The growth is attributed to an increase warehousing activities which grew by 4.1 percent from 1.5 percent growth registered in FY 2016/17. In nominal prices, the activity recorded a value addition of 2,813 billion in 2017/18 compared to 2,733 billion in 2016/17. Transport and storage activities contributed 2.8 percent to GDP in 2017/18 as compared to 3.0 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.3 Accommodation and Food Service

Accommodation and Food Service activities include; accommodation and restaurants activities. The value added for accommodation and food service activities grew by 1.2 percent in 2017/18 from a growth of 7.5 percent in the 2016/17. In nominal prices, the activity recorded a value addition of 2,827 billion in 2017/18 compared to 2,521 billion in 2016/17. Accommodation and food service activities contributed to 2.8 percent of GDP in 2017/18 as compared to 2.7 percent in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.4 Information and communication services

Information and communication activities include; programming and broadcasting, telecommunications, computer programming, consultancy and related activities and information services. Information and communication services grew by 15.2 percent in 2017/18 from a 13.9 percent growth registered in the previous year. The largest contributor to the growth of information and communication was telecommunications which grew by 14.6 percent following a higher growth of 15.4 percent in 2016/17, followed by broadcasting and programming activities which bounced back with a 51.8 percent growth in 2017/18 following a decline of 6.4 percent registered in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

In nominal prices, the activity recorded a value addition of 2,897 billion in 2017/18 compared to 2,039 billion in 2016/17. Information and communication service activities contributed 2.9 percent to GDP in 2017/18 as compared to 2.2 percent in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.5 Financial and Insurance Activities

Financial and insurance services include; bank of Uganda, commercial banks, financial auxiliaries, credit institutions and micro-deposit taking institutions as well as other financial corporations. The sector grew by 8.3 percent in 2017/18 from a growth of 2.3 percent registered in 2016/17. In nominal prices, the activity recorded a value addition of 3,342 billion in 2017/18 compared to 3,029 billion in 2016/17. Financial and insurance activities contributed 3.3 percent to GDP in 2017/18 similar to the contribution in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.6 Real Estate Activities

Real estate activities include; real estate on own or lease and real estate on fee or contract. The activities grew by 6.5 percent in FY 2017/18 compared to a growth of 5.6 percent in 2016/17. The growth in the activities is the highest since 2014/15 when real estate activities grew by 6.5 percent. In nominal prices, the activity recorded a value addition of 4,451 billion in 2017/18 compared to 4,154 billion in 2016/17. Real estate activities contributed 4.4 percent to GDP in 2017/18 as compared to 4.5 percent contribution in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.7 Professional, Scientific and Technical services

Professional, Scientific and Technical services include; legal and accounting, head offices and management, architectural and engineering services, science, research and development, advertising and market research, veterinary services as well as other business services. The activities grew by 5.3 percent in 2017/18, bouncing back from a decline of 3.0 percent registered in 2016/17. The growth of 5.3 percent is the highest since 2010/11 when the activity grew by 20.0 percent. In nominal prices, professional, scientific and technical activities realised a value added of 2,505 billion in 2016/17 compared to 2,303 billion in 2016/17. The overall activity contributed 2.5 percent to GDP similar to the contribution registered in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.8 Administrative and Support Activities

Administrative and Support Activities include; rental and leasing, employment activities, travel, tour and reservation, security and investigation, buildings and landscaping and office administration and business support. The activities bounced back with a growth of 11.9 percent in FY 2017/18 following a decline of 4.8 percent registered in 2016/17.

In nominal prices, the activity recorded a value addition of 1,465 billion in 2017/18 compared to 1,296 billion in 2016/17. Administrative and Support activities contributed 1.5 percent to GDP in 2017/18, similar from 1.4 percent registered in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.9 Public Administration services

The activities include; Public administration and defence, and compulsory social security Services. The activities grew by 10.6 percent in 2017/18 down from a 2.1 percent growth in 2016/17. The activities contribution to GDP was recorded at 2.9 percent from 3.1 percent contribution in 2016/17. In nominal prices, the activity recorded a value addition of 2,983 billion in 2017/18 compared to 2,819 billion in 2016/17. Public Administration activities contributed

3.0 percent to GDP in 2017/18 compared to 3.1 percent registered in 2016/17 (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.5.10 Education services

Education services comprise of both private and public services. The activities grew by 6.7 percent in FY 2017/18 compared to the growth of 9.3 percent in the previous year. Public education activities grew by 8.8 percent following a high growth of 17.4 percent registered in the previous year. On the other hand, private education activities grew by 5.7 percent similar to the growth registered in 2016/17(see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

In nominal prices, the activity recorded a value addition of 7,457 billion in 2017/18 compared to 6,673 billion in 2016/17. Education activities contributed 7.4 percent to GDP in 2017/18 from 7.3 percent registered in 2016/17.

4.1.5.11 Human Health and Social Work Activities

Human Health and Social Work Activities include; public health, private health and social work activities. The activities grew by 6.2 percent in 2017/18 compared to a growth of 4.4 percent registered in 2016/17. In nominal prices, public health realised a value added of 3,131 billion in 2017/18 compared to 2,854 in 2016/17. The share of the activities to GDP is recorded at 3.1 percent in 2017/18, similar to the previous year (see appendix tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

4.1.6 GDP by Expenditure

GDP by expenditure approach measures the allocation of total production during the year among alternative uses and therefore, the expenditure approach takes into account three main aggregates which are Final Consumption Expenditure (Household, Government, Non-Profit Institutions Serving Households (NPISH)), Gross Capital Formation, and the Net Exports (Exports less Imports). Below is an explanation of the expenditure sectors of GDP.

4.1.6.1 Final Consumption Expenditure (FCE)

The Final Consumption Expenditure (FCE) recorded positive growth of 1.8 percent in 2017/18, same as in 2016/17. The FCE in nominal terms was recorded at 84,698 billion. The share of the FCE recorded at 84.3 percent of the GDP in 2017/18 compared to 83.6 percentage in 2016/17 (see appendix 4.1 K and 4.1 L(ii)).

4.1.6.2 Households Final Consumption Expenditure (HFCE)

The household final consumption expenditure accounted for about 89.7 percent of the final consumption expenditure in 2017/18. The HFCE grew by 4.1 percent in 2017/18 compared to 3.3 percent. In nominal terms, the HFCE was estimated at 75,960 billion in 2017/18. The share of HFCE stood at 75.6 percent of GDP in 2017/18 (see appendix 4.1 K and 4.1 L(ii)).

4.1.6.3 Government Final Consumption Expenditure (GFCE)

The government final consumption expenditure accounted for about 8.3 percent of the final consumption expenditure in 2017/18. The GFCE recorded a further contraction of 19.4 percent in 2017/18 following a decline of 10.9 percent in 2016/17. In nominal terms, the GFCE was estimated at 7,016 billion in 2017/18 from 7,352 billion in 2016/17. The share of GFCE stood at 7.0 percent of GDP in 2017/18 (see appendix 4.1 K and 4.1 L(ii)).

4.1.6.4 Gross Fixed Capital Formation (GFCF)

Gross fixed capital formation consists of expenditure on the following; Dwellings, Other buildings and structures, Buildings other than dwellings, Other structures, Land improvements, Machinery and equipment, Transport equipment, ICT equipment, Other machinery and equipment, Research and Development, Mineral exploration and evaluation, Computer software and databases, Computer software, Databases. In 2017/18, the growth of gross fixed capital formation was recorded at 13.1 percent from a contraction of 0.9 percent in 2016/17. The GFCF contributed 24.1 percentage points to the total GDP by expenditure in 2017/18 (see appendix 4.1 K and 4.1 L(ii)).

Within the GFCF, construction (Dwellings, other buildings, other structures) have a share of 72.0 percent of GFCF recorded in 2017/18 as compared to 76.2 percent in 2016/17. The ongoing construction of hydropower plants (Isimba, Karuma and other small numerous dams) have led to increased investment in infrastructure development.

In nominal terms, the GFCF was estimated at 24,271 billion in 2017/18 from 21,196 billion in 2016/17. The share of GFCF stood at 23.8 percent of GDP in 2017/18 compared to 23.1 percent in 2016/17.

4.1.6.5 Exports and Imports of Goods and Services

Export of goods & services grew by 17.7 percent in 2017/18 compared to the contraction of 3.3 percent recorded in 2016/17. Export of goods grew by 16.6 percent and the services grew by 19.8 percent in the period under study.

Import of goods & services grew by 6.3 percent in 2017/18 compared to the contraction of 12.6 percent recorded in 2016/17. Import of goods grew by 7.5 percent and the services contracted by 3.6 percent in the period under study (see appendix 4.1 K and 4.1 L(ii)).

In nominal terms, the value of exports of goods and services was recorded at 19,573 billion in 2017/18 from 16,634 billion in the previous year. The value of imports of goods and services was recorded at 28,467 billion in 2017/18 from 23,247 billion in 2016/17 (see appendix 4.1 K and 4.1 L(ii)).

4.1.7 Balance of Payments

Balance of payments (BoP) statement summarises all transactions between a country's residents and its non-residents involving goods, services and income; financial claims on and liabilities to the rest of the world; and transfers such as gifts. Within the BOP, there are three separate categories under which different transactions are categorized: the current account, the capital account and the financial account. The overall BoP balance stood at a

surplus of 209.0 million US dollars in 2017/18 following a previous deficit of 438.6 million US dollars recorded in 2017/18.

4.1.7.1 Current Account Balance

The current account is the sum of the balance of trade (goods and services exports less imports), net income from abroad and net current transfers. The current account balance registered a deficit of 1,617.8 million US dollars in 2017/18 compared to a deficit of 861.0 million US dollars in 2016/17. The 2016/17 deficit is smaller than that recorded in 2017/18 due to a decline in secondary incomes from 1,564.2 million US dollars in 2016/17 to 1,431.3 million US dollars recorded in 2017/18. Net export of services continued to decline from a deficit of 273.7 million US dollars in 2016/17 to a further decline of 424.4 million US dollars in 2017/18 while primary incomes declined by 0.02 percent during 2017/18. See Statistical Appendix Table 4.1 AB(ii).

4.1.7.2 Capital and Financial Account Balance

The capital account combined with the financial account represents the transfer of capital to help pay for the current account, which includes the trade of goods and services. The capital account balance declined by 29.99 percent from 150.5 million US dollars in 2016/17 to 105.4 million US dollars in 2017/18. Financial account components include direct investment, portfolio investment and reserve assets, which are broken down by sector. From the financial account, Net borrowing registered a deficit of 852.1 million US dollars in 2017/18 from a deficit of 1,153.4 million US dollars in 2016/17. Similarly, direct investments registered a deficit of 738.1 million US dollars in 2017/18 compared to a deficit of 648.9 million US dollars registered in 2016/17. See Statistical Appendix Table 4.1AB (ii).

4.2 Price Statistics

4.2.1 Consumer Price Index (CPI)

This section presents statistics on Consumer Price Indices (CPIs) for goods and services consumed by households within the economic territory. The national CPI covers eight urban centers of Kampala, Jinja, Mbale, Masaka, Mbarara, Gulu, Arua and Fort Portal. Apart from Kampala, each of the urban centres has an independent consumption basket of goods and services. However, the consumption of Kampala is decomposed into 3 consumption baskets; these are, Kampala High Income (KHI), Kampala Middle Income (KMI) and Kampala Low Income (KLI). Thus, in all, the Uganda national CPI is a composition of 10 consumption baskets. This publication also presents the average market prices of selected goods for the consumption baskets of Kampala High, Kampala Middle and Kampala Low income groups.

4.2.1.1 Headline Inflation

Headline Inflation is the measure of the relative change in prices of all goods and services for all the 10 consumption baskets. The 2017 Calendar Year registered a slightly higher annual average inflation of 5.6 percent compared to the annual average inflation of 5.5 percent recorded for the 2016 Calendar Year, as shown in Figure 4.2.1. The relatively higher rate (5.6 percent) recorded in 2017 was due to an increases in Food crops inflation and in the Energy, Fuel and Utilities (EFU) inflation compared to the 2016 calendar year.

Figure 4.2.1: Headline Index and Annual Average Inflation 2013 –2017

The urban centre of Fort portal recorded the highest annual average inflation of 8.3 percent in 2017 compared to 5.7 percent recorded in 2016. This was followed by Arua that registered an annual average inflation of 7.1 percent in 2017 compared to 6.9 percent recorded for the 2016. The lowest annual average inflation for the 2017 Calendar Year was recorded in the urban area of Kampala High Income at 4.6 percent compared to 5.7 percent that was observed in 2016. The Financial Year 2016/17 registered an annual average inflation of 5.7 percent compared to the 6.6 percent annual average inflation recorded during the 2015/16 financial year.

4.2.1.2 Core Inflation

Core Inflation measures relative changes in the prices of all goods and services in the consumption expenditure basket excluding fresh fruits, fresh vegetables, dried vegetables and fresh milk. Also excluded are tobacco leaves, electricity, petrol, diesel, paraffin, charcoal, propane gas, metered water and un-metered water. The annual average Core Inflation decreased to 4.4 percent in 2017 from the 5.9 percent recorded during the 2016 calendar year as shown in Figure 4. 2.3. The decrease in the inflation was attributed to decreases in prices of Alcoholic Beverages & Tobacco, Clothing & Foot wear, Health Services, Transport services, Communication, Restaurants & Hotels and Miscellaneous goods and services during the calendar year 2017 compared to 2016 Calendar Year. The annual average core inflation for the 2016/17 financial year decreased to 5.1 percent from the 6.7 percent recorded during the 2015/16 financial year (see Statistical Appendix Table 4.2 A).

Figure 4.2.3: Headline, Core, Food Crops and EFU Average Annual Inflation 2012 – 2017

4.2.1 Food Crops Inflation

As shown in Figure 4.2.3 above, the annual average Food Crops inflation for 2017 Calendar Year increased to 13.0 percent from 3.1 percent recorded for the 2016 Calendar Year. The increase in the annual average food crops inflation is attributed to poor harvests experienced during the year, which led to low supplies of fresh food products on the market during the 2017 Calendar Year. The 2016/17 Financial Year, registered a higher annual average food crops inflation of 12.4 percent compared to the 5.5 percent recorded for 2015/16 Financial Year (see Statistical Appendix Table 4.2 A).

4.2.1.4 Energy, Fuel and Utilities (EFU) Inflation

During the 2017 calendar year, the local market registered higher prices of fuel. This resulted into the annual average EFU Inflation to be registered at 7.5 percent from 3.9 percent recorded during the 2016 Calendar Year (see Statistical Appendix Table 4.2 A). The 2016/17 financial year, registered a lower annual average inflation of 2.1 percent observed compared to 6.7 percent registered in 2015/16.

4.2.1.5 Major Inflation drivers during the CY 2017

Over the 12 months of 2017, the national annual average Index rose by 5.6 percent. The main driver was Food and Non – Alcoholic Beverages that registered 10.1 percent in 2017 compared to 5.5 percent recorded for 2016. Others were; Education (9.1 percent), Recreation and Culture (6.3 percent), Restaurants and Hotels (5.8 percent), Furnishings, Household Equipment and Routine Household Maintenance (5.8 percent) and Housing, Water, Electricity, Gas and other fuels (4.9 percent). (See Statistical Appendix Table 4.2 E).

4.2.2 Producer Price Index – Manufacturing & Utilities

The Producer Price Index for Manufacturing and Utilities (PPI-M&U) is an index that measures changes in the prices of a basket of products either as they leave their place of production (Output Price Index) or as they enter the production process (Input Price Index). The current computed PPI-M&U is an Output Price Index valued at Basic prices with a base period of July 2009 to June 2010. It covers two sectors; the manufacturing sector both for local and export market (Combined) and Utility sector at Local market.

4.2.2.1 PPI-M&U (Combined) Annual Percentage Changes, (Calendar) Year 2013-2017.

The PPI-M&U (Combined) rose on average by 6.3 percent to 184.41 for the 2017 calendar year from 173.40 recorded in 2016 calendar year. The increment in the producer prices was due to the rise in PPI-Manufacturing sector by 6.1 percent and PPI- Utility sector by 9.7 percent. The rise in producer prices under the manufacturing sector was mainly driven by the Manufacture of Basic metals (15.2 percent), food products (9.5 percent), Furniture (7.4 percent) and Textiles (6.9 percent); and the Utility sector was due to price increment in Electricity power generation (11.4 percent) as represented in Table 4.2.1 below.

Table 4.2.1 PPI-M&U (Combined) Annual Percentage Changes, Calendar Year 2013-2017; July 2009 to June 2010=100

Industry Group	Base period weights	2013	2014	2015	2016	2017

4.2.2.2 PPI-M&U (Combined) Annual Percentage Changes, (Fiscal) Year 2012/13-2016/17.

The PPI-M&U (Combined) registered an annual average increment of 4.4 percent from an average index of 171.68 in Fiscal year 2015/16 to 179.25 in the Fiscal year 2016/17. The main contributors to price increment are; the annual average price rise under the manufacturing sector of 4.2 percent and 6.4 percent under the utility sector. The price rise in the manufacturing sector was mainly due to food products (8.1 percent), Printing & Reproduction of Recorded media (5.7 percent), Basic metals (5.1 percent) and Furniture (3.8 percent); and rise in the Utility sector was due to rise in Water collection, treatment and supply (9.4 percent) as represented in Table 4.2.2 below and Statistical Appendix-Table 4.2 T

4.2.2.3 PPI-M (Local) Annual Percentage Changes, (Calendar) Year 2013-2017.

The PPI-M (Local) on average rose by 5.7 percent from 162.21 in 2016 to 171.47 in 2017. The registered annual average rise was mainly due to increment in Basic metals (15.2 percent), Food products (10.7 percent), Furniture (7.4 percent), Textiles (6.9 percent) and Fabricated Metal Products, Except Machinery and Equipment (5.2 percent). However Other Non- Metallic Products (-2.0 percent), Wearing Apparel (-0.3 percent) and Pharmaceuticals, Medicinal Chemical & Botanical Products (-0.1 percent) registered an annual average decrease in prices as represented in Table 4.2.3 and Statistical Appendix-Table 4.2 Q.

4.2.2.4 PPI-M (Local) Annual Percentage Changes, (Fiscal) year 2012/13 to 2016/17

PPI-M (Local) considers a basket of goods produced and consumed within the country boundaries (Domestic consumption). In 2016/17 fiscal year, the PPI-M (Local) on average rose by 3.3 percent from an average index of 161.15 to 166.40 in the Fiscal year 2016/17. The Annual increment of 3.3 percent was mainly caused by the observed price increment in Food products (6.2 percent), Printing & Reproduction (5.7 percent), Basic metals (5.1 percent), Furniture (3.8 percent) and Textiles (3.7 percent) as represented in Table 4.2.4 and Statistical Appendix-Table 4.2 R.

4.2.2.5: PPI-M (Export) Annual Percentage Changes, (Calendar) Year 2013-2017.

The PPI-M (Export) for the calendar year 2017 was at 226.02 registering an annual average increment of 6.9 percent from an annual average index of 211.52 in the calendar year 2016. The Annual increment was due to notable increments in the following subsectors; Beverages (14.9 percent), Food Products (8.2 percent), Pharmaceuticals, Medicinal Chemical & Botanical Products (5.9 percent) and Other Non-Metallic Mineral Products (5.6 percent). However, Chemicals & Chemical products (-3.5 percent) and Leather & related products (-1.0 percent) registered a fall in prices as represented in Table 4.2.5 and Statistical Appendix-Table 4.2 S.

4.2.2.6: PPI-M (Export) Annual Percentage Changes, (Fiscal) Year 2012/13 to 2016/17

The PPI-M (Export) registered on average an annual change of 6.2 percent from 208.24 annual average index in the fiscal year 2015/16 to 221.16 in 2016/17. The main contributors to the 6.2 percentage rise in the prices were Food products (10.3 percent), Rubber & Plastic Products (3.6 percent), Beverages (3.1 percent) and Pharmaceuticals, Medicinal Chemical & Botanical Products (3.0 percent) as represented in Table 4.2.6 and Statistical Appendix - Table 4.2 T.

Table 4.2.6 PPI-M (Export) Annual Percentage Changes, Fiscal Year 2012/13 to 2016/17; July 2009 to June 2010=100

4.2.3 The Producer Price Index- Hotels & Restaurants

The producer Price Index for Hotels and Restaurants (PPI- H&R) measures the average change in the prices that Hotel and Restaurant Service providers receive for their services. It is an Output Price Index designed to reflect the price trend of a constant well-defined and representative basket of services provided by hoteliers. The Index is divided into two sub-sectors namely; Accommodation and Catering services. The Catering services are further divided into two categories; Food and snacks and Drinks as shown in Table 4.2.7. The prices collected exclude all taxes and other levies. The base period for this index is the first quarter of 2008 and covers a sample of 100 hotels and restaurants across the country.

Annual Average Producer Price changes

The annual average producer prices for Hotels and Restaurants Sector rose by 4 percent in the year 2017, compared with the previous increase of 1.3 percent for the year 2016. Accommodation and Catering services Producer prices as sub-sectors also rose by 4.8 and 3.3 percent respectively. The rise in the Catering services subsector was mainly attributed to a 2.7 percent rise in prices of Food & Snacks and 4.5 percent rise in Drinks prices as shown in Table 4.2.7 and Statistical Appendix Table 4.2 W.

Table 4.2.7: PPI-H&R: Annual Percentage Changes Calendar Year, 2012-2016

Industry Group	Weights	2013	2014	2015	2016	2017
Hotels and restaurants	10,000	0.7	-0.5	14.3	1.3	4.0
Accommodation	3,375	-0.8	-0.1	14.9	0.0	4.8
Catering services	6,625	8.9	9.4	5.3	4.2	3.3
Accommodation	3,375	-0.8	-0.1	14.9	0.0	4.8

4.2.4 Construction Sector Indices

The Construction Sector Index (CSI) is an input price index which measures the cost of a given set (basket) of construction goods and services, relative to their cost in the base period. This basket includes the costs of materials, equipment and labour as inputs to the construction sector. The first quarter (January-March) of 2006 is the base period for the CSI.

CSI Composition

The CSI is composed of Basic Heading and Composite Indices. Basic Headings are the smallest sets of goods and services which are used to develop Composite Indices. Each Basic Heading covers a reasonably homogeneous set of goods and services, which are maintained over time. For example, items within a Basic Heading are likely to be made from the same material. A list of Basic Headings is given in Statistical Appendix Table 4.2 Y.

Annual Changes

The average prices in the construction industry increased by 1.3 percent in 2017 compared to 2016 as shown in Table 4.2.8. The sub sector that observed the highest average price change over the year 2017 was the Civil Works by 2.7 percent. This was greatly influenced by the Roads gravel where prices increased by 4.8 percent average while Roads paved experienced average price change of 2.3 percent. All Buildings had an average price change of 1.0 percent with both Residential Buildings and Non Residential Buildings increasing with average prices of 2.3 percent and 0.3 percent respectively.

Over the period under review (2013-2017), average prices in the overall construction sector registered the highest increase of inputs in 2016 at 3.6 percent, followed by an increase of 2.21 percent in 2013. However, we observe a price drop in construction sector inputs in 2014 by 2.8 percent. At sub sector level, civil works had the highest increase in average prices of inputs in 2013 at 4.8 percent, followed by 3.1 percent in 2015 and the lowest increase (0.5 percent) was registered in 2014. The average price of inputs into All Buildings registered the highest increase (5.5 percent) in 2016, followed by 1.5 percent in 2013.

Table 4.2.8: Construction Sector Indices, Jan-Mar 2006=100, Percentage Changes

	Weight	2013	2014	2015	2016	2017
Whole sector	100	2.21	-2.80	0.45	3.60	1.33
All Buildings	80	1.50	-3.50	-0.85	5.54	1.02

4.3 External Trade

The section presents merchandise imports and exports flows between Uganda and the rest of the world as compiled from customs department of the Uganda Revenue Authority (URA) and non-customs data sources. The complementary non-customs data sources include Commodity Authorities and the Informal Cross Border Trade (ICBT) survey. The data compiled from customs and commodity authorities is herein referred to as formal exports and imports, whereas data collected from ICBT survey is referred to as informal exports and imports. The informal trade transactions do not go through official clearance and documentation as required by the customs laws.

The compilation of External Trade statistics is based on the General Trade System and coded according to HS2012 and the Standard International Trade Classification Revision Four (SITC Rev4) commodity nomenclatures.

The objective of ICBT Survey was to estimate informal trade flows between Uganda and her neighbours; namely Kenya, Rwanda, DRC, South Sudan and Tanzania. Although, Burundi does not share a physical boundary with Uganda, goods entered its economic territory through Rwanda before the emergence of the civil conflict there. Therefore, goods destined to Burundi were captured at the Kampala/Bujumbura bus terminal in Kampala.

The informal Cross Border Trade Survey covers 20 border posts and four bus terminals in Kampala namely; Busia, Malaba, Swam River and Lwakhaka crossing points along Kenya/Uganda border, Mirama Hills, Katuna and Cyanika along Rwanda/Uganda border; Bunagana, Ishasha River, Mpondwe, Goli, Paidha, Vurra, and Odramachaku along DRC/Uganda border, Oraba and Elegu/Nimule along South Sudan/Uganda border; Bugangu, Mutukula and Kikagati along Tanzania Uganda Border. All exports to Burundi transited through Rwanda with Katuna as the first main entry point.

4.3.1 Summary of External Trade Statistics

During Calendar Year (CY) 2017, total export earnings (formal and informal exports combined) increased by 18.9 percent to US\$ 3,450.7 million from US\$ 2,901.5 million recorded in 2016. The total imports bill in CY2017 stood at US\$ 5,676.6 million, an increase of 16 percent when compared to the value of US\$ 4,894.3 million registered in 2016. The overall annual trade deficit increased to US\$ 2,225.9 million in 2017 compared to the value of US\$ 1,992.8 million recorded in 2016.

Overall, Uganda was a net informal exporter recording a trade surplus throughout the period under review. The highest trade surplus, estimated at US\$ 468 million, was registered during 2017 compared to the least surplus of US\$ 335 million attained in 2015.

Table 4.3.1: Summary of External Trade Statistics Flows, 2013-2017 (US Million Dollars)

Trade Flow	2013	2014	2015	2016	2017
Informal Exports	421.3	414.6	399.1	419.2	549.0
Formal/Official exports.	2,407.7	2,262.0	2,267.0	2,482.3	2,901.6
Total Exports	2,829.0	2,676.6	2,666.1	2,901.5	3,450.7
Informal Imports	53.7	65.8	64.3	64.9	80.7
Formal/Official imports.	5,817.5	6,073.5	5,528.1	4,829.5	5,595.9
Total Imports	5,871.2	6,139.3	5,592.4	4,894.3	5,676.6
Total trade	8,700.2	8,815.9	8,258.5	7,795.9	9,127.2

% change (trade balance)	(7.4)	13.8	(15.5)	(31.9)	11.7

Source: Uganda Bureau of Statistics

4.3.2 Exports

In 2017, Formal exports accounted for US\$ 2901.6 million while informal exports were worth US\$ 549 million. This compares with export receipts of US\$ 2,901.5 million registered in 2016. For the period under review, formal exports gradually increased from 2014 at US \$ 2262 million to US \$ 2901.6 Million in 2017

4.3.3 Total Exports by Destination

African continent remained the main destination of Uganda's Total exports, followed by Europe and then the Middle East during the period under review. In 2017, total exports to the African continent stood at US\$ 2053.3 million accounting for 59.5 percent of exports, compared to US\$ 1665.8 million recorded in 2016, whose market share was 57.4 percent. The COMESA regional bloc was the main destination accounting for 44.1 percent of total formal exports revenue. In the COMESA bloc, the leading export destination country was Kenya accounting for 20.1 percent, followed by D.R.Congo with 13.3 percent in 2017.

The European continent ranked second as final destination of Uganda's Total exports accounting for 17.4 percent in 2017 compared to 16.6 percent in 2016. The EU bloc was the main destination for Uganda's exports in Europe, and its market share increased slightly to 16.5 percent during 2017 from 14.8 percent registered in 2016. The major destinations in the EU bloc were; Italy, Belgium, Netherlands, Spain and Germany commanding about 14.2 percent of the market share in 2017.

The Middle East's market share increased slightly to 13.9 percent during 2017 compared to 13.4 percent in 2016. The main export destination in the Middle East sub-continent was United Arab Emirates whose export revenue increased to US\$ 445.5 million in 2017 from US\$ 372.3 million during 2016.

The Asian continent's market share averaged at 6.7 percent from 2013 to 2017 with main export destinations being India, Hong Kong and China whose export market share to total formal exports stood at 1.3 percent, 1.1 percent and 0.9 percent in 2017 respectively. It is important to note that, with proper export promotion strategy these countries could absorb more exports since these countries are among the main sources of Uganda's imports to narrow the trade deficits. The above is illustrated in the Table 4.3 I in the appendices.

4.3.4 Performance of Formal Commodity Exports

Overall, Coffee was the leading commodity export although its value increased to US\$ 555.5 million in 2017 from US\$ 371.7 million in 2016 (see table 4.3 B in appendices). Coffee's share to total formal export earnings increased from 15 percent during 2016 to 19.1 percent in 2017. Gold and Gold compounds, which came second, saw its export revenue significantly increase from US\$ 339.5 million in 2016 to US\$ 418.1 million in 2017 thus an increase in shares from 13.7 percent in 2016 to 14.4 percent in 2017. Fish and Fish products ranked third from US\$ 121.5 million in 2016 to US\$ 136.2 million in 2017. Maize ranked fourth and its export receipts increased to US\$ 96.2 million in 2017 from US\$ 70.3 million in 2016.

4.3.5 Informal Exports by Country of Destination

Most of the manufactured commodities were destined mainly to DRC and South Sudan. Agricultural products, critical for food security like maize, beans and bananas are mainly destined to Kenya.

Figure 4.3.2: Informal Exports by country of destination (US\$ Million), 2012 to 2017

From the above figure, DRC remains the Uganda's main Export trade partner under informal trade arrangements whose export values continued to increase attaining the highest Export receipts amounting to US\$ Million 270.0 in 2017. This was followed in second place by Kenya, whose Export receipts values continued to fluctuate with the highest value of US\$ 142.0 million also being recorded in 2017. Informal export trade with Rwanda and Tanzania has been increasing steadily after they fell to their lowest experienced in 2015 during the period under review, attaining the highest values of US\$ 39.0 million and US\$ 51.0 million in 2017 respectively.

Conversely, informal exports to South Sudan fell significantly on account of insecurity there due the civil war that affected movement of goods and people to the country. The Informal Export trade values with the South Sudan fell to a lowest of US \$ 42.0 Million in 2016 and thereafter seen to begin rising in 2017. Burundi fell from US \$ 15.0 Million in 2014 to zero after the 2015 due to severe civil war which affected movement of buses to the country.

4.3.6 Performance of Informal Exports by Border Station

Mpondwe border post has been the leading exit point for Uganda's informal trade merchandise exports by value for most of the years currently under review except in 2013 when Elegu surpassed Mpondwe by US \$ 10.1 Million. In 2017, the Export receipts through Mpondwe registered the highest value through and exit point worth US \$ 171.7 Million and this accounted for over 30 percent of Export receipts value for the period. This was followed by Busia with export receipts estimated at US\$ 117.4 million (21.4 percent share), then Elegu with US\$ 47.4 million (8.6 percent share) and Paidha with US\$ 36.0 million (refer to Table 6 above). The decline in informal exports through Elegu, were mainly attributable to the civil war in the South Sudan.

The four border posts of Busia, Mpondwe, Elegu/Nimule and Paidha had a combined share of over 68 percent of informal export revenue.

Table 4.3.3: Informal Exports by Border Station (US\$ Thousands), 2012- 2017

Customs/Year	2013	2014	2015	2016	2017
Bugango	-	-	429	322	391
Bunagana	4,936	8,204	9,545	9,961	12,626
Busia	59,739	82,800	69,942	66,060	117,406

Grand Total	421,288	414,591	399,126	419,236	549,039

Source: Uganda Bureau of Statistics

4.3.7 Imports

The total import bill constituted of formal import bill worth US \$ 5,595.9 million and informal bill worth US \$ 80.7 million in 2017 compared to the total imports bill attained in 2016 of US\$ 4,894.3 million. Throughout the period under review, the imports bill continued fluctuating with the highest value of US\$ 6,139 million in 2014 and the lowest value of US\$ 4,894 million in 2016.

The country continued to experience trade deficits with an 11.7 percent increase compared to the 31.9 decrease attained in 2016. It generally improved throughout the period under review, with the lowest trade deficit of US\$ 1992.8 million being registered in 2016, while the highest of US\$ 3,462.8 million was registered in 2014.

4.3.8 Total Imports by Continent and regional blocs

During the period under review, the Asian continent was the main source of Uganda's merchandise total imports whose import bill stood at US\$ 2728.9 million in 2017 compared to US\$2491.5 million recorded in 2016. However its market share to total imports decreased from 50.9 percent of the market's share in 2016 to 48.1 percent in 2017. The Middle East ranked second, where its import bill to total Imports significantly increased to 19.3 percent in 2017 from 15.1 percent realized in 2016.

The Common Market for Eastern and Southern Africa (COMESA) regional bloc came third with its import value increasing slightly to US\$ 639.7 million in 2017 from US\$ 608.5 million in 2016. Overall, COMESA commanded on average a market share of about 11.9 percent from 2016 to 2017. The European Union (EU) bloc came fourth with import expenditure declining slightly from US\$552.8 million in 2016 to US\$ 529.4 million in 2017. The EU market share has been fluctuating, with least share of 9.3 percent being registered in 2017 and the highest of 11.7 percent in 2013.

The eight main countries where Uganda imported her merchandise constituted a market share of over 72.2 percent, with the rest of the countries taking the reminder. Of these, China was the leading country of origin for Uganda's merchandise imports, whose value stood at US\$ 986 million during 2017. This was a rise when compared to US\$ 886.2 million recorded in 2016. Similarly, India which ranked second recorded a decline in import bill estimated at US\$ 736.3 million in 2017 compared to US\$ 834.5 million recorded in the previous year. United Arab Emirates came third, with its import bill rising to US\$659.7 million during 2017 from US\$413.2 million in 2016.

Among other countries which contributed substantially to Uganda's merchandise imports and ranked in order included; Kenya with a very slight decline in import bill worth US\$484.6 million in 2017 compared to 485.6 million in 2016, followed by Japan(US\$ 370.1 million) and Saudi Arabia (US\$ 369.2 million).

It is worth noting that, the four countries (China, UAE, India and Kenya) commanded a market share of about 50.5 percent during the period under review. Hence these countries should be targeted for investment and export promotion to narrow the trade deficit gap.

4.3.9 Formal Imports of Main Products

Petroleum products (which include petrol, diesel, paraffin, aviation fuel etc.) were the main imported products into the country with import expenditure rising from US\$775 million in 2016 to US\$ 1017.1 million in 2017. The proportion of petroleum products to total imports stood at 18.2 percent during 2017, a rise by 2.2 percent from the previous year. Motor vehicles came second with imports bill increasing to US\$ 449.3 million in 2017 in comparison to US\$ 412.9 million recorded in 2016. The increases in vehicle imports have direct implication on demand for petroleum products, hence the need to build a refinery in Uganda to curtail future demand for these products. Industrial Machinery imports came third, with imports bill showing an increase to US\$ 321.3million in 2017 from US\$ 158.2 million generated in 2016. The other product which contributed significantly to the country's import bill during 2017 were; Iron and steel (US\$ 282 million), cereals (US\$ 272.8 million), Medical Products and Pharmaceuticals (US\$ 272.5 million), vegetable fats and oils (265.5 million), and plastic products (US\$ 200.9 million) among others as seen in the table below.

Table 4.3.2: Annual Formal Imports of Main Commodities by SITC (US\$ million), 2013-2017

DESCRIPTION	2013	2014	2015	2016	2017
Petroleum, petroleum products and related materials	1,310.2	1,414.4	1,007.8	775.0	1,017.1
Road vehicles (including air-cushion vehicles)	516.3	531.9	518.9	412.9	449.3
Machinery specialized for particular industries	225.0	252.3	257.6	158.2	321.3

4.3.10 Informal Exports and Imports

This section presents informal trade flows highlighting the nature of products transacted, the direction of trade and performance of border posts as recorded during ICBT survey. The survey is conducted at twenty border posts including four bus terminals located in Kampala where informally traded merchandise are loaded or unloaded. The monthly volumes and values are estimated from two- weeks data collected during the survey.

Informal exports registered the highest value for the period under review of US\$ 549.0 million in 2017 which generated a significant increase of 23.6 percent from US\$ 419.0 million in 2016. Also, informal exports increased by 4.8 percent to US\$ 419.2 million in 2016 from to US\$ 399.0 million recorded in 2015. Similarly, informal imports registered an increase of 19.6 percent to US\$ 80.7 million in 2017 from US\$ 64.9 million in 2016.

4.3.11 Informal Imports by Country of origin

The DRC was the leading source of Uganda's informal imports in 2017, followed by Kenya and then Tanzania as shown in table 4.3.9.1 below. Informal imports from Kenya attained the highest value of US\$ 27.0 Million in 2016. On other hand, for DRC, the import bill increased reaching the highest levels of US\$ 29.0 Million in 2017.

For Rwanda and South Sudan, the imports remained low averaging US \$ 3.0 Million with highest being US\$ 3.0 Million and US\$ 6.0 Million respectively recorded in 2017. It is important to note that, informal imports have been low on account of customs interest in collecting taxes on small consignment entering the country, making most of the goods formally declared.

Table 4.3.4: Annual Informal imports by country of origin (US\$ Million), 2013 to 2017

ORIGIN	2013	2014	2015	2016	2017
Burundi	-	-	-	-	-
Dr Congo	18	21	18	20	29
Kenya	26	31	32	27	27
Rwanda	3	2	1	2	3
South Sudan	6	4	2	3	2
Tanzania	1	8	11	13	19
Grand Total	54	66	64	65	81

4.3.12 Performance of Border Stations for ICBT

According to Table 4.3.9.3 below, Busia and Mutukula were the main entry points for Uganda's informally imported commodities estimated costing US\$ 17.6 Million and US\$ 18.1 Million in 2017, accounting for 21.8 and 22.4 percent respectively. Busia border has been the leading entry point for Informal Imports of Uganda's goods for most the period under review accounting for on average 30 percent of total Import values Imported up to 2016. Mutukula border on the other has had a steady rise, accounting for 1.3 percent in 2013 to 22.4 percent in 2017. Other leading Import entry points include among others Mpondwe, Paidha and Malaba.

4.4 Government Finance Statistics (GFS)

4.4.0 Introduction

Government finance Statistics measures the financial activities of government in the economy. This section provides information on the fiscal operations of the General Government. Fiscal operations include the revenue, expenditure and financing of government institutional units. Government revenue is further analyzed by type of revenue while Government expenditure is analysed by economic and functional classification according to GFS Manual 2014. The fiscal statistical information is critical in guiding policy and decision makers to analyze the impact of the fiscal operations at the level of a government, institutional sector and other sectors of the economy.

Government Finance Statistics (GFS) coverage is currently restricted to the General Government sector which comprises of Central Government and Local Government (120 Districts, 41 Municipalities and 201 Town councils) and also non-profit institutions that are controlled and financed by the government.

4.4.1 Central Government Revenue.

In the FY 2016/17, the net Central Government revenue (excludes tax refunds and government taxes) was shs 13,905.4 billion compared to shs. 12,645.1 billion collected in the FY 2015/16. This was about 10.0 percent increment in the net central government revenue.

During the period under review, the largest contributor to the total Central Government was the Tax revenue accounting for 90.7 percent registered in the FY 2016/17 while non-tax revenue contributed only 9.3 percent. Among the tax revenue, the taxes on goods and services had the largest contribution of 6,478 billion accounting for 47.9 of the total revenue in the FY 2016/17, followed by Taxes on Income, Profits, and Capital with shs. 3,738 billion accounting for 26.5 percent of the total revenue while the lowest contribution from the tax revenue was taxes on permission to use goods or perform activities accounting for only 1.0 percent of the total revenue. (See figure 4.4.1)

Among the non-tax revenue, the largest contribution to the total Central Government revenue was from grants received by government, accounting for 6.7 percent of the total revenue in the FY 2016/17. This was however a decline of 17.2 percent in grants received by Government in comparison to the FY 2015/16. (See Table 2a (i&ii)). [See figure1 and Appendix Tables 4.3 B (a) & 4.3 B (b)].

Figure 4.4.1: Trends in Central Government Revenue by type in Billions Shillings, 2013/14-2016/17

4.4.2 Central Government Expenditure

Central Government expenditure for the FY 2016/17 was shs. 15,524.8 billion compared to the shs. 13,714.2 billion spent in the FY 2015/16. This was a 13.2 percent increase in Central Government Expenditure. Of the total Central government expenditure for the financial year in question, the recurrent expenditure was shs. 7,911.5 billion While development and Donor expenditure were Shs 3,868.5 billion and shs 3,744.8 billion respectively. The Public administration sector spending continued to overshadow other sectors in recurrent expenditure accounting for 53.0 percent of total recurrent expenditure, followed by the defense sector with 13.0 percent. Recreation, Culture and Religious sector had the lowest recurrent expenditure accounting for only 0.03 percent of the total expenditure.

During the FY 2016/17, the percentage share of the transport sub-sector under the other economic affairs sector, took the largest share of the Central Government development expenditure. It accounted for 45.0 percent of total development expenditure, which was higher compared to the 39.7 percent recorded in the previous FY 2015/16. This was followed by Agriculture sector and the Fuel and energy affairs sector accounting for 10.3 and 9.9 percent. [See figure 4.4.2 and Appendix Tables 4.3 C (a & b) & 4.3 D (a & b)].

Note: Central government expenditure excludes transfers to Local government

4.4.3 Local Government Revenue

During the FY 2016/17, total Local government revenue increased from 2,624.8 billion to 3,003.5 billion accounting for a 12.6 percent increase in revenue. This increase is attributed to the increase in the Central government transfers to the district. Of the 3,003.5 billion received in revenue by the local governments, Shs. 394.4 billion was revenue for Municipalities while Shs. 2,609.1 billion was revenue received by districts. Grants remained the major source of Local government revenue accounting for 95.6 percent of total local government revenue. Taxes accounted for only 1.4 percent while the other non-tax revenue accounted for 3.0 percent. [See Appendix Tables 4.3 H (a&b)].

4.4.4 Local Government Expenditure

In FY 2016/17, Local Government total expenditure rose to 2,851.7 billion from 2,627.4 billion in the FY 2015/16 which was an 8.5 percent increase in local government expenditure. The Education sector took the largest proportion of Local government expenditure accounting for 47.2 percent of the total government expenditure, followed by public administration and health sectors accounting for 26.0 percent and 13.5 percent of the total expenditure. Agriculture

accounted for only 2.9 percent of the total expenditure while roads accounted for 5.2 percent of total expenditure. See Appendix Tables 4.3 I, M and Q (a & b).

4.5 Banking and Currency

This section presents Statistics on the performance of the banking sector for the period June 2016 - June 2017.

4.5.1 Commercial Banks Assets and Liabilities

The total assets of commercial banks in UGX increased by 9.8 percent from 22,997 Billion in June 2016 to 25,156 Billion in June 2017, despite a decline in their deposit assets over the period. Additionally, Commercial banks assets in loans increased from 698 Billion in June 2016 to 810 Billion in June 2017.

Total Commercial banks liabilities increased by 10.5 percent from UGX 19,117 Billion as at June 2016 to UGX 21,123 Billion as at June 2017. Additionally, total Capital increased from UGX 3,881 Billion in June 2016 to UGX 4,033 Billion in June 2017, translating into a 3.9 percent increase.

Overall, net capital increased from UGX 3,538 Billion in June 2016 to UGX 3,725 Billion in June 2017. This represents a 5.3 percent increase in net capital.

Demand deposits liabilities increased by 10.4 percent from 15,578 Billion in June 2012 to 17,197 Billion in June 2017. This was basically realized from an increase in demand, savings and time deposits as at June 2017.

Treasury bills are government bonds or debt securities with maturity of less than a year. The 91 days Treasury Bills rate decreased to 10.1 percent in June 2017 from 13.9 percent in June 2016. Similarly the 182 days Treasury Bills rate decreased to 10.9 percent in June 2017 from 14.8 percent in June 2016. In the same way, 364 days Treasury Bills rate decreased to 12.0 percent in June 2017 from 14.9 percent in June 2016.

4.5.2 Exchange Rates

The average buying rate for foreign exchange appreciated from 3,407 shillings in June 2016 to shillings 3,596 in June 2017. The average selling rate appreciated from shillings 3,422 in June 2016 to shillings 3,643 in June 2017. In the same way, the Bureau mid-rate appreciated from an average of 3,414 in June 2016 to an average of 3,620 in June 2017. Furthermore, the interbank mid-rate appreciated from an average of 3,420 in June 2016 to an average of 3,611 in June 2017.

Table 3.5: Annual Foreign Exchange Rates (Uganda shillings per US\$), 2012-2017.

Bureau Weighted Average	Jun-2013	Jun-2014	Jun-2015	Jun-2016	Jun-2017
Buying rate	2,578	2,590	3,226	3,407	3,596
Selling rate	2,587	2,599	3,242	3,422	3,643
Bureau mid-rate	2,583	2,595	3,234	3,414	3,620
Inter-bank mid-rate	2,587	2,600	3,246	3,420	3,611

4.5.3 Depository Corporations Survey

The Depository Corporation Survey covers Credit institutions and Micro Finance deposit taking institutions and deposits excluded from broad money. These deposits comprise of loan insurance fund held by individuals at credit

institutions and Micro Deposit Taking Institutions (MDIs). The table below shows the detailed statistics covering Net Foreign Assets, Net Domestic Assets and Money supply.

The Net Foreign Assets (NFA) which show a country's level of indebtedness, increased from UGX 10,329 Billion as at June 2016 to 12,897 Billion as at June 2017. This represents a 24.9 percent increase. The Net Domestic Assets (NDA) decreased by 2.6 percent from UGX 7,228 Billion in June 2016 to UGX 7,039 Billion in June 2017. Domestic claims and claims on other sectors decreased from UGX 14,263 Billion to UGX 7,039 Billion and UGX 11,514 Billion to UGX 4,659 Billion in June 2016 and June 2017 respectively.

Money supply which indicates the total stock of money circulating in an economy includes currency, notes, money in deposits and liquid assets. Money supply denoted as (M1), which includes money in circulation and local currency in deposits in banks increased by 7.2 percent from UGX 7,176 Billion in June 2016 to UGX 7,694 Billion in June 2017. This increase was attributed to the increase in currency in the hands of the people and transferable deposits from UGX 2,935 Billion in June 2016 to UGX 3,129 Billion in June 2017 and UGX 4,241 Billion in June 2016 to UGX 4,565 Billion in June 2017 respectively.

Money supply (M2), which includes M1 plus savings and time deposits increased from UGX 12,085 Billion in June 2016 to UGX 13,317 Billion in June 2017. This represents a 10.2 percent increase.

Money supply (M3), which is the broadest level of money supply, includes money supply M2, foreign currency deposits, increased by 8.9 percent from UGX 17,557 Billion in June 2016 to UGX 19,125 Billion in June 2017. This is partly due to a 6.1 percent increase in foreign currency deposits that increased from UGX 5,472 Billion in June 2016 to UGX 5,808 Billion in June 2017.

4.5.4 Commercial Banks outstanding Loans and Advances

The total outstanding loans and advances in local currency to the private sector increased by 9.9 percent from UGX 6,003 Billion in June 2016 to UGX 6,594 Billion in June 2017. Sectors that registered an increase in loans and advances in June 2017 include Agriculture (18.9 percent), Trade (9.7 percent), Transport and Communication (16.2 percent), Business Services (19.4 percent) and Personal Loans and Household Loans (19.0 percent).

On the other hand, Mining and Quarrying, Manufacturing, Electricity & Water among others registered a decrease in loans and advances over the period.

4.6 Insurance

This section presents statistics on insurance services. This includes the number of life and non-life policies issued, premium supplements as well as paid and outstanding claims.

The total industry gross written premium increased by 3.7 percent in 2016 from 612.1 billion shillings in 2015 to 634.8 billion shillings in 2016. Life gross premium increased by 32.8 percent and Health Management Organisations (HMOs) gross premium increased by 11.1 percent in 2016. However, Non-life gross premium declined by 3.1 percent in 2016 from a 20.9 percent growth registered in 2015.

4.6.1 Life Insurance income and expenditure

Life insurance refers to all policies that cover human related risks. Life policies issued include; Individual, Group, Medical and Deposit Administrative Plan (DAP).

Gross Life premium incomings increased by 32.7 percent in 2016 from 99,849 million shillings in 2015 to 132,498 Million shillings in 2016. The gross premium incomings for Life individual, Life Group and DAP insurance categories registered growths of 105.3, 5.8 and 14.1 percent respectively in 2016. Medical insurance category increased by 34.9 percent in 2016 from 57.8 percent decline in the previous year. (Table 4.6.B)

Table 4.6.1: Life Insurance Premium Incomings 2011– 2016 (Million shillings)

Class of Business	2012	2013	2014	2015	2016
Life Individual	5,753	8,745	18,167	24,428	50,152
Life Group	26,951	34,501	31,824	57,654	60,976
Medical	n.a	4,040	12,501	5,277	7,120
DAP	6,551	8,119	11,542	12,490	14,250
Total Income	39,255	55,405	74,034	99,849	132,498

Life Insurance Reinsurance Out goings

The Life insurance for reinsurance outgoings category increased from 17,147 million shillings in 2015 to 20,930 million shillings in 2016 representing 22.1 percent. The main contributor to the increase was the life group insurance category that increased from 15,560 million shillings in 2015 to 20,122 million shillings in 2016. The medical category registered 107 million shillings in 2016

Paid and Outstanding claims

The total paid and outstanding claims on life insurance registered 10.2 percent increase in 2016 from 31,397 million in 2015 to 34,613 million shillings in 2016. The paid and outstanding claims on the Life Individual category registered an increase of 57.7 percent in 2016 from 3,205 million shillings registered in 2015 to 5,055 million shillings in 2016. While the DAP category recorded a decrease of 12.0 percent in 2016.

4.6.2 Non-Life Insurance income and expenditure

Non-life insurance refers to policies that cover non- human related risks. These policies include fire, marine/aviation, motor, and miscellaneous accidents.

The value of non-life Insurance premium incomings decreased from 316, 693 million shillings in 2015 to 277,794 million shillings in 2016, representing 12.3 percent decline. Both miscellaneous accidents and marine/ aviation categories contributed to the decline each registering 48.8 percent and 0.7 percent respectively in 2016.

The fire category in the non-life insurance premium incomings recorded an 8.4 percent increase from 74,131 million shillings in 2015 to 80,333 million shillings in the 2016; motor insurance increased by 1.6 percent from 118,005 million shillings to 119,870 million shillings in 2016.

Non-Life insurance Reinsurance

The outgoings in form of reinsurance declined by 9.5 percent in 2016 compared to a 30.5 percent increase that was registered in 2015. The major contributors to the decline were reinsurance for miscellaneous accidents from 40,869 million shillings in 2015 to 25,741million shillings in 2016 representing a decline of 37.0 and Motor insurance category which decreased by 6.6 percent 2016 from 9,311 million shillings in 2015 to 8,700 million shillings in 2016.

The paid and outstanding claims on non-life insurance decreased by 35.3 percent in 2016 compared to 105.9 percent growth registered in 2015. The value of non-life paid and outstanding claims reduced from 88,067 million shillings in 2015 to 56,975 million shillings in 2016. The main drivers for the decline were miscellaneous accidents which declined by 73.2 percent, Fire insurance that declined by 38.5 percent, and Motor insurance decreased by 7.7 percent.
