# **UGANDA BUREAU OF STATISTICS**

2021

# STATISTICAL ABSTRACT

## FOREWORD

The Uganda Bureau of Statistics (UBOS) is committed to the production and dissemination of integrated statistical information that meets the National and International standards quality requirements. Specifically, indicators are required for monitoring the progress towards achieving the goal of the Third National Development Plan (NDP III) which covers Financial Years (FY) 2020/21-2024/25 *"increasing household incomes and improving the quality of life of Ugandans*", other requirements include, updating the international developments frameworks such as the United Nations (UN) Sustainable Development Goals (SDGs), the Africa Union (AU) Agenda 2063, and the East African Community (EAC) Agenda 2050. This Statistical Abstract is the prime annual publication through which UBOS disseminates key statistical information derived from the latest censuses, surveys and administrative records of Ministries, Departments and Agencies (MDAs), Higher Local Governments (HLGs) and some Civil Society Organisations (CSOs). The information is critical in tracking progress, implementation, decision-making as well as service delivery.

The information presented in the 2021 Statistical Abstract covers statistics on the Environmental, Demographic, Socio-economic, Production and Macroeconomic sectors. Information on these sectors is structured based on either a Calendar Year (CY) starting from January to December or Financial Year (FY) starting from July to June, depending on data availability.

The Bureau appreciates the continued cooperation of the MDAs, HLGs and CSOs in providing the requisite data for production of this publication. In a special way, we wish to thank the 2020 Statistical Abstract Committee that compiled this publication and Government of Uganda (GoU) for continued support to statistical production. The Bureau welcomes constructive comments from stakeholders that aim at enhancing the quality of its future publications.

Copies of this publication are available at the Bureau's Head Office located at Statistics House, Plot 9, Colville Street, Kampala and the official UBOS website: www.ubos.org.

It's our sincere hope that the statistical information in this publication will be used by all stakeholders to make informed decisions.

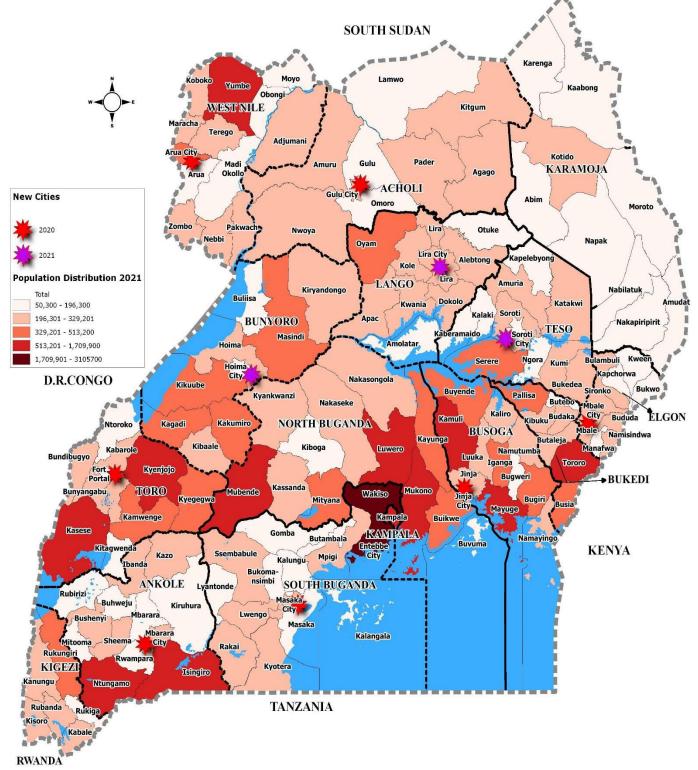

Imelda Atai Musana (PhD) For: Executive Director

## **Table of Contents**

FOREWORD	ii
Table of Contents	iii
A Map of Uganda Showing Population Distribution by District -2021	vi
List of Acronyms	vii
Executive Summary	x
Glossary	
National Standard indicator Framework	
CHAPTER ONE: ENVIRONMENT STATISTICS	
1.0 Administrative Units	
1.1Land Cover	
1.2Forests	
1.2.1 Forests Cover	
1.2.1 Folests Cover	
1.2.3 Production of Round Wood	
1.3CLIMATE	
1.3.1 Rainfall and Rain-days	
1.3.2 Temperature	
1.3.3 Relative Humidity	
1.4Water Supply	
1.4.1 Water Produced and supplied - Metered	
1.4.2 Water produced and supplied - intered	
1.5 Waste Statistics	
1.5.1 Municipal Solid Waste	
1.5.2 Hazardous Waste Collected by Licensed waste agents	
1.5.3 Electronic Waste (E-Waste)	
CHAPTER TWO: DEMOGRAPHY AND SOCIOECONOMIC STATISTICS	
2.1.1 Population Trends	
2.1.2 Population Distribution by Age and Sex	
2.1.3 Population in Urban Areas	
2.1.4 Marital Status	17
2.1.5 Fertility	
2.1.6 Mortality	
2.1.7 Life Expectancy at Birth	19
2.1.8 Households	20
2.2 Education	21
2.2.1 Pre-Primary School Education	21
2.2.2 Primary School Education	22
2.2.3 Secondary School Education	
2.2.4 Tertiary Education	
2.2.5 Literacy	
2.3 Labour Statistics	31
2.3.1 Work concept	31
2.3.2 Key Labour Market Indicators of the Working Population	
2.3.3 Key Labour Market Indicators of the employed population	
2.3.4 Unemployment	
2.3.5 Activities of Children	
2.3.6 Employment in the Civil Service	
2.3.7 Social Security	44

2.3.8 Migrant Workers	45
2.4 Household Expenditure and Poverty	48
2.4.1 Share of Household Expenditure by item group	48
2.4.2 Share of household food by source	49
2.4.3 Income Mobility - Quintile Analysis	50
2.4.4 Changes in Income Poverty Status (2015/16-2019/20)	50
2.4.5 Household Welfare Correlates	51
2.5 Health Statistics	55
2.5.1 Health Facilities	55
2.5.2 Human Resources for Health	55
2.5.3 Health Sector financing	57
2.5.4 Leading Causes of Death	58
2.5.5 Maternal Health Care	58
2.5.6 Tuberculosis Detection and Treatment	60
2.5.7Causes of Under-five Health Facility Based Mortality	60
2.5.8 New Outpatient Department utilization Rate	61
2.5.9 Selected Health Sector Performance Assessment	62
2.5.10 Birth notification in health facilities	62
2.5.11 Contraceptive use	63
2.5.12 Gender Based Violence	64
2.6 Crime Statistics	65
2.6.1 Annual Crime Rate	65
2.6.2 Victims of Crime	66
2.6.3 Perpetrators of Crime	67
2.6.4 Serious Crimes Investigated and Prosecuted	67
2.6.5 Traffic and Road Safety	
2.6.6 Prison Statistics	
CHAPTER THREE: PRODUCTION STATISTICS	
CHAPTER THREE: PRODUCTION STATISTICS	
	78
<b>3.1 Agriculture and Fisheries</b> 3.1.1 Major Cash Crops         3.1.2 Area and production of Food Crops, 2020	<b>78</b>

3.7 Communication Statistics	96
3.7.1 Postal and Courier Services	
3.7.2 Mobile Money Transactions	
3.8 Migration and Tourism	
3.8.1 International Arrivals and Departures	
3.8.2 Wildlife Tourism	
3.8.3 Accommodation Statistics	
CHAPTER FOUR: MACROECONOMIC STATISTICS	
4.1 National Accounts	
4.1.1 Gross Domestic Product	
4.1.2 Gross Domestic Product by Broad Economic Sectors	
4.1.3 Agriculture, forestry and fishing sector	
4.1.4 Industry sector	
4.1.5 Services sector	
4.1.6 GDP by Expenditure	
4.1.7 GDP by Institutional sectors	
4.1.8 Balance of Payments	
4.2 Price Statistics	
4.2.1 Consumer Price Index (CPI)	
4.2.2 Producer Price Index – Manufacturing & Utilities	
4.2.3 The Producer Price Index-Hotels & Restaurants	
4.2.4 Construction Sector Indices	
4.3External Trade	
4.3.1 Summary of External Trade Statistics	
4.3.2 Exports	
4.3.3 Exports by Destination	
4.3.4 Performance of Formal Commodity Exports	
4.3.5 Imports	
4.3.6 Total Imports by Regional blocs	
4.3.7 Main Products Formally Imported	
4.3.8 Total Trade Balance performance	
4.3.9 Informal Exports and Imports	
4.3.10 Informal Exports by Country of Destination	
4.3.11 Performance of Informal Exports by Border Station	
4.3.12 Informal Imports by Country of origin	
4.3.13 Performance of Informal Imports by Border Stations	
4.4 Government Finance Statistics (GFS)	
4.4.0 Introduction	
4.4.1 Central Government Revenue.	
4.4.2 Central Government Expenditure	
4.4.3 Local Government Revenue	
4.4.4 Local Government Expenditure	
4.5 Banking and Currency	
4.5.1 Depository Corporations Survey	
4.5.2 Commercial Banks Assets and Liabilities	
4.5.3 Commercial Banks outstanding Loans and Advances	
4.5.4 Structure of Interest Rates	
4.5.5 Exchange Rates	
4.6Insurance	
4.6.1Life Insurance Incomings and Outgoings

USE	Universal Secondary Education
UTA	Uganda Tea Association
UTL	Uganda Telecommunication Limited
VA	Value Added
VAT	Value Added Tax
VCs	Vulnerable Children
WHO	World Health Organisation

## **Executive Summary**

The Statistical Abstract is an annual publication compiled by Uganda Bureau of Statistics (UBOS), and provides the statistical summary on various socio-economic indicators for Uganda. Some of the Calendar Year (CY) 2020 and Financial Year (FY) 2020/21 data presented in this edition are provisional and could be revised in subsequent publications. Similarly, some figures in this edition may vary from those in the earlier editions due to the updates that have taken place. Besides, the names and numbers of administrative units has been increasing over the last twenty years so those in this publication may not directly correspond to the ones in earlier publications.

This publication is divided into four major chapters which are all preceded by a glossary of definitions and by general information on Uganda. A set of Statistical Appendix Tables that are serialised, using a combination of numbers and letters of the alphabets, such as Table 1.1 A, Table 2.3 B etc, is also provided for the readers' information. The reader is encouraged to refer to such tables while reading the text. The breakdown of chapters is as below.

**Chapter One**: Presents environmental statistics related to land, climate, forestry and water supply with the following highlights:

#### Land Area by coverage by 2017

- Uganda has a total area of 241,555 square kilometers.
- Open water bodies covered 37,460 square kilometers.
- Wetlands cover 7,621 square kilometers.
- Land area is 196,237 square kilometers.
- Agricultural land increased from 105,308 sq. kms in 2015 to 106,662 sq. kms in 2017; and
- Built up land area covered 1,387 square kilometers.

#### Forests

- Forest cover reduced significantly by 60.4 percent between 1990 and 2015.
- Woodlands cover declined to 12,391 sq km in 2017 from 28,347 sq km in 2000.
- Total forest cover declined by 25.4 percent between 2010 and 2015.
- 528,593 (99.8%) hectares of the total forest is under Central Forest Reserve and 1,002 under Local Forest Reserve; and
- Round wood production increased to 1,165,063 tonnes in 2018 from 1,075,035 tonnes in 2017.

**Chapter Two**: Presents Demographic and Socio-Economic Statistics relating to Population, Education, Labour Force, Employment and Earning, Income and Expenditure, Public Health and Crime. Below are highlights:

#### Demographic and Socio-Economic Statistics

Uganda's population is projected at 42.9 million people (2021 midyear projections)

- According to 2014 National Population and Housing Census (NPHC) results;
  - Uganda population was 34.6 million persons.
  - Annual population growth rate between 2002 and 2014 censuses was 3.03 percent.
  - o 2014 population density was 174 persons per square kilometer.
  - Sex ratio was 94.5 percent in 2014; and
  - Life expectancy at birth in 2014 was 63.7 years with at 62.8 years compared to 64.5 years for females.
- According to the 2016 UDHS (Uganda Demographic and Health Survey);
  - Total fertility was 5.4 children per woman.
  - Infant mortality rate was 43 deaths per 1000 live birth; and
  - Under five mortality rate was 64 deaths per 1000 live birth.

#### Education

- The enrollment rate at pre-primary level decreased to 8 percent in 2017 from 18 percent registered in 2016.
- Primary school enrolment was at 8.8 million in 2017.
- Secondary school enrolment stood at 1,370,583 in 2017.
- 99 percent of the students who registered for Uganda Certificate of Education (UCE) exams in 2019, sat for the examinations.
- 8 percent of the students who sat for UCE exams in 2019 failed.
- In 2017, more than two thirds of pupils attending primary school had adequate sitting space; and.
- 228,563 students were orphans in 2017.

#### Labour Force, Employment and Earnings

- The total working population was estimated at 15.9 million persons in 2019/20; an increase from 15.1 million persons in 2016/17.
- The Employment to Population Ratio (EPR) during the period 2019/20 was 38.8 percent implying that less than half of the Working Age Population was employed in 2019/20.
- There was an increase in the proportion of working persons in purely subsistence agriculture from 39% in 2016/17 to about 48% in 2019/20.
- According to UNHS 2019/20, the highest percentage of the working population (68%) was engaged in Agriculture, forestry and fishing industry.
- The percentage of population in employment in Uganda decreased from 9 million persons in 2016/17 to 8.3million in 2019/20.
- Less than a third of persons in employment (25%) had completed either secondary or postprimary/secondary training;

- The median cash earnings (nominal) for an employee in Uganda was UGX. 200,000 in 2019/20; an increase from UGX 176,000 in 2016/17;
- The overall unemployment rate was 8.8 percent in 2019/20, a decrease from 9.2 percent registered in 2016/17; and
- The average size of the civil service as at December 2020 was 329,633 persons.

#### Income and Expenditure

- Updates in the Uganda National Panel Survey (UNPS) data sets/waves from 2005/06 to 2019/20 indicate that, the largest share of household expenditure continues to be food (40.5%), followed by housing, water, electricity, gas and other fuel (18.2%), education (8.6%); and
- According to the 2018/19 and 2019/20 UNPS 76% of the households remained in the bottom 40% of the wealth quintile while 10% where able to remain in the top 60% of the wealth quintile.

#### Health

- The number of functional healthcare facilities decreased to 6,232 recorded in 2019/20, from 6,904 in 2018/19 irrespective of the ownership status.
- The human resource statistics for health indicate that in FY 2019/20, the percentage of approved posts filled country wide in health facilities slightly increased to 73 percent from 71 percent in 2017/18;
- Government allocation on health FY 2019/20 was 7.2 percent, which was the same as in FY 2018/19.
- The per capita health expenditure in FY 2019/20 was Uganda Shillings 57,715 (about US\$ 16) compared to Uganda Shillings 55,339 registered in the previous FY 2018/19;
- Malaria continues to be the leading cause of death followed by Pneumonia.
- The health facility based maternal mortality for 2019/20 was 99 deaths per 100,000 live deliveries, a slight increase from 92 recorded in 2018/19.
- Haemorrhage still remains the leading cause of maternal illness and mortality in the country accounting for 42 percent of the deaths in 2019/20 with a slight decrease from 46 percent in 2018/19; and
- The TB case detection rate increased from 78 percent in 2018/19 to 82 percent in 2019/20 and still below the HSDP target of 84 percent.

#### Crime

- The Annual Crime Rate (ACR) stood at 502, i.e out of every 100,000 people, 502 were victims of crime in 2020;
- The number of crimes reported to Police decreased from 215,224 in 2019 to 195,931 in 2020;
- There were more male (122,226) than female (75,052) victims of crime in 2020;
- A total of 17,992 vehicles were involved in road accident crashes in 2020 compared to 18,978 vehicles reported in 2019;
- A total of 12,249 road traffic crashes were recorded by the Uganda Police Force in 2020;
- A total of 13,012 Casualties were reported in 2020 of which 30 persons died;

- About 29.8 percent of road accident crashes occurred between 4:00-7:59pm in 2020; and
- 295 prisoners occupied space meant for 100 prisoners in 2020 compared to 345 prisoners recorded in 2019.

**Chapter Three:** Presents statistics on production, which for purposes of this Abstract includes Agriculture and Fisheries, Industry, Producer Prices, Energy, Building and Construction, Transport and Communications, Tourism and Migration. Below are the highlights of the chapter:

#### Agriculture

- In 2020, there was a 15 percent increase in the volume of coffee produced, from 313,000 Metric Tonnes (MT) to 360,000 Metric Tonnes (MT);
- Tea production increased by 25 percent (from 60,000 MT to 75,000 MT) in 2020 while Cotton production increased to 35,000MT from 33,000MT produced in 2019 hence registering six percent increment; and
- Production of plantains, specifically Banana Food (Matooke), increased by 4.2 percent i.e. to 9.8 million MT from 9.4 million MT in 2019.

#### Index of production

• The index of production increased by 3 percent in 2020 from an average index of 277.7 in 2019 to an average index of 285.9 in 2020.

#### Energy

- Total import of petroleum products decreased by 7 percent from 2,198,739 cubic meters in 2019 to 2,047,237 to cubic meters recorded in 2020;
- A total of 2.068 billion litres of selected petroleum products were sold in 2020 reflecting a 7.0 percent decrease in 2020 compared to 2.224 billion litres of sales in 2019;
- Total installed capacity of electricity power sources increased by 1.3 percent from 1252.843 MW in 2019 to 1269.053 MW in 2020;
- Total Electricity generated decreased by 0.07 percent from 4,411.8 GWh in 2019 to 4,411.6 GWh in 2020;and
- Electricity purchased by Uganda Electricity Transmission Company from the generating companies increased by 0.16 percent from 4,384 GWh in 2019 to 4,391 GWh in 2020.

#### Building and construction

- During 2020, the majority (59.7%) of Building Plans submitted were for residential structures, followed by commercial structures (27.2%), mixed-use structures (6.7) and institutional structures (2.7%); and
- Total Net Domestic Supply of cement registered a 20.2 percent increase in 2020, with 3,226.5 thousand tonnes from 2,684.8 thousand tonnes in 2019.

#### Minerals

• There was a decrease in the total value of the minerals produced from 148.1 billion shillings in 2019 to 124.1 billion shillings in 2020.

#### Transport

- The total national road length during the FY2019/20 increased by nearly one percent from 20,856.km in 2018/19 to 21,010 km in FY 2019/20;
- The number of newly registered motor vehicles and motor cycles reduced by 0.2 percent to 145,132 in 2020 from 145,455 recorded in CY 2019;
- There was 52.3 percent decrease in the aircraft movement at Entebbe Airport in 2020 compared to 1.3 percent rise registered in CY 2019;
- In CY 2020, there was a 74.6 percent decrease in total number of passengers transported using registered ferry operators from 4.5 million in 2019 to 1.2 million passengers in CY2020; and
- A total of 196,935 metric tonnes was hauled in 2020 indicating an increase in haulage of 1.7 percent compared to 193,693 metric tonnes hauled in 2019.

#### Communication

- The total number of mobile money registered customers increased by almost 5.1 percent from 26.7 Million customers in 2019 to 28.0 Million customers in 2020; and
- The total volume of letters handled by Posta Uganda decreased by 43 percent in 2020, from 819,574 letters in 2019 to 467,508 letters in 2020.

#### Migration and Tourism

- Uganda registered about 1.3 million people arriving and departing out of the country in 2020 compared to 2.3 million travellers recorded in 2019, reflecting a 43 percent decline;
- There were about 0.6 million persons entering the country (arrivals) and about 0.7 million leaving the country (departures);
- In 2020, about 473,000 visitors entered Uganda through the eight ports of entry/exit and about 485,000 visitors left the country; and
- The main reason for visitors into Uganda in 2020 was carrying out business or doing professional work which constituted to more than half (55%) of the visitors.

**Chapter Four:** Presents Macro-Economic Statistics including National Accounts, Prices, External Trade, Public Finance, Banking, Currency and Insurance. Below are the highlights:

- The preliminary Gross Domestic Product (GDP) estimates for the FY2020/21 indicate that the Ugandan economy grew by 3.4 percent, compared to 3.0 percent growth registered in FY2019/20.
- In nominal terms, GDP stood at Uganda Shillings 147,962 billion;
- GDP per capita increased from Uganda Shillings 3,403,000 in FY2019/20 to Uganda Shillings 3,492,000 in FY2020/21;
- The Services sector continue to be the lead contributor to GDP, accounting for 41.9 percent of the overall GDP in FY2020/21;
- The Final Consumption Expenditure (FCE) recorded a growth of 6.6 percent in FY2020/21, compared to 3.2 percent in FY2019/20; and

• In terms of Institutions, the Household Institution, was the lead contributor to the GDP, estimated at Uganda Shillings 76.69 Trillion in FY2020/21 and contributing 51.8 percent to GDP.

#### Balance of Payments

- The overall Balance of Payments (BoP) was a deficit of United States Dollars 182 million in 2020/21 following a previous deficit of United States Dollars 146 million recorded in 2019/20;
- The current account balance registered a deficit of United States Dollars 4,135 million in FY2020/21 compared to a deficit of United States Dollars 2,504 million in FY2019/20.
- The capital account position grew from a surplus of United States Dollars 69 million in FY2019/20 to United States Dollars 171 million in 2020/21; and
- The financial account showed a net borrowing position of United States Dollars of 2,910 million in 2020/21, up from USD 1,623 million recorded in 2019/20.

#### **Consumer Price Index (CPI)**

- Calendar Year (CY) 2020 registered a higher annual average inflation of 3.8 percent compared to the annual average inflation of 2.9 percent in CY2019;
- The annual average Core Inflation increased to 4.7 percent in CY2020 from the 3.6 percent recorded during the CY2019;
- The annual average Food Crops inflation for CY2020 decreased to minus 3.6 percent from minus 3.2 percent recorded for the CY2019; and
- During the CY2020, the annual average EFU inflation increased to 4.6 percent from 4.2 percent recorded during the CY 2019.

#### PPI-Manufacturing and Utilities

- The PPI-M&U (Combined) registered an annual average increase of 2.8 percent from 178.05 recorded in CY2019 to 182.98 for CY2020;
- The PPI-M (Local) for the CY2020 increased by 2.1 percent from an annual average of 172.03 registered in CY2019 to 175.62 to CY2020; and
- The PPI-M (Export) on average registered an annual increase of 2.0 percent from 198.51 annual average index in the FY2018/19 to 202.53 in FY2019/20.

#### **PPI- Hotels and Restaurants**

• The Annual Average Producer Prices for the Hotels and Restaurants Sector dropped by 0.1 percent in the CY2020, compared with an increase of 1.8 percent for the CY2019..

#### **Construction Sector Index (CSI)**

- The average prices in the construction industry decreased by 2.01 percent in CY2020 compared to CY2019; and
- Between CY2016 and CY2020, the overall construction sector registered the highest increase of inputs in CY2016 (3.6 percent), followed by an increase of 2.5 percent in CY2018.

#### **External Trade**

- During the CY2020, the total International Merchandise Trade was United States Dollars 12,554.5 million, representing a 6.0 percent increase in international trade in goods from US\$ 11,849.4 million recorded in 2019.
- Total export earnings (Formal and Informal exports combined) increased by 4.7 percent to United States Dollars 4,286.8 million from United States Dollars 4,095.7 million recorded in 2019;
- Similarly, the total imports bill increased by 6.6 percent to United States Dollars 8,267.7 million in 2020 from United States Dollars 7,753.8 million registered in 2019;
- The overall annual trade deficit increased to United States Dollars 3,980.9 million in 2020 from United States Dollars 3,658.1 million recorded in CY2019;
- Formal exports earnings were US\$ 4,149.0 million while informal exports earnings were worth United States Dollars 137.8 million;
- Total imports bill increased significantly by 6.6 percent to United States Dollars 8,267.7 million in CY2020 from United States Dollars 7,753.8 million registered in CY2019;
- The Formal and informal import bills in CY2020 stood at United States Dollars 8,250.5 million and United States Dollars 17.2 million respectively from United States Dollars 7,696.0 million and United States Dollars 57.8 million recorded in CY2019.

#### **Government Finance Statistics (GFS)**

- In the FY2019/20, the net Central Government revenue (excludes tax refunds and government taxes) was Uganda Shillings 18,434 billion compared to Uganda Shillings 17,262 billion collected in the FY2018/19; and
- Central government expenditure increased by 38.4 percent from Uganda Shillings 20,968 billion for the FY2018/19 to Uganda Shillings 29,013 billion for FY2019/20.

#### **Banking and Currency**

- The Net Foreign Assets (NFA) which shows a country's level of indebtedness, increased by 16.9 percent from Uganda Shillings 13,878 billion as at June 2019 to Uganda Shillings 16,224 billion as at June 2020;
- Net Domestic Assets (NDA) grew by 31.4 percent, from Uganda Shillings 10,535 billion in June 2019 to Uganda Shillings 13,845 billion in June 2020;
- M1 increased by 26.6 percent from Uganda Shillings 10,018 billion in June 2019 to Uganda Shillings 12,678 billion in June 2020;
- M2 increased by 24.9 percent from Uganda Shillings 17,279 billion in June 2019 to Uganda Shillings 21,575 billion in June 2020;
- M3 increased by 23.2 percent from Uganda Shillings 24,405 billion in June 2019 to Uganda Shillings 30,069 billion in June 2020;
- Total assets of commercial banks in shillings increased by 18.0 percent from Uganda Shillings 30,559 billion as at June 2019 to Uganda Shillings 36,060 billion as at June 2020;
- Total commercial banks liabilities increased by 18.1 percent from Uganda Shillings 25,591 billion as at June 2019 to Uganda Shillings 30,223 billion as at June 2020;

- Net capital increased from Uganda Shillings 4,594 billion in June 2019 to 5,406 billion shillings in June 2019, representing a 17.7 percent increase;
- The Central Bank Rate (CBR), which is the rate at which commercial banks can borrow from the Central Bank decreased to 7.0 percent in June 2020 from 10.0 percent in June 2019;
- Commercial bank rate decreased to 11.0 percent in June 2020 from 15.0 percent in June 2019; and
- The average buying rate for foreign exchange (US dollar) depreciated from Uganda Shillings 3,690 in CY2019 to Uganda Shillings 3,704 in CY2020 while the average selling rate depreciated from Uganda Shillings 3,703 shillings in CY2019 to Uganda Shillings 3,717 shillings in CY2020.

#### Insurance

- Life insurance Gross premium incomings increased by 27.3 percent in CY2019, from Uganda Shillings 217 shillings in CY2018 to Uganda Shillings 276 billion in 2019;
- Life group insurance category declined by 3.6 percent in gross premium incomings in the same period, from Uganda Shillings 66 billion in CY2018 to Uganda Shillings 63 billion in CY2019;
- Life insurance for reinsurance outgoings category decreased by 0.8 percent from Uganda Shillings 34.5 billion in CY2018 to Uganda Shillings 34.2 billion in CY2019;
- The Net Incurred claims on life insurance registered 15.1 percent increase in CY2019 compared to 31.4 percent registered in CY2018. The value of life paid and outstanding claims increased from Uganda Shillings 57 billion in CY2018 to Uganda Shillings 66 billion in 2019;
- Non-life Insurance premium incomings increased from Uganda Shillings 333 billion in CY2018 to Uganda Shillings 340 billion in CY2019, representing a growth of 2.2 percent;
- Marine insurance registered an increase of 19.8 percent in 2019 from an earlier decline of 0.9 percent in CY2018;
- Miscellaneous accidents in non-life insurance premium incomings recorded a decline of Uganda Shillings 40.0 percent in CY2019;
- Outgoings in form of reinsurance registered a growth of 18.9 percent in CY2019 from Uganda Shillings 136 billion to Uganda Shillings 162 billion;.
- Non-Life premium income declined by 9.0 percent in CY2019 from Uganda Shillings 195 billion to Uganda Shillings 177 billion in 2019; and
- Net incurred claims on non-life insurance increased by 22.4 percent in CY2019 from an earlier decline of 5.8 percent in CY2018.

## Glossary

A nursery school	A place where children are prepared for entry into primary school education.
Accident fatality risk	The number of accidental deaths per 100,000 populations.
Accident Severity	Determined by or classified according to the most severe casualty involved in an accident. Severity is also used to rank accidents
Adult	A person aged 18 years and above, as per the Constitution of Uganda.
Agriculture	The growing of crops and rearing of animals for food, other human needs or economic gain.
An orphan	A child below 18 years of age who has lost either one or both parents.
Assault/Attack	This is the threatening/attacking someone in a way that frightens him/her. In most of the cases violence is involved i.e. inflicting severe or aggravated bodily injury.
Asset	Anything valuable that an entity owns, benefits from or has use of, in generating income.
Aviation fuel	More purified kerosene fuel used in aviation gas-turbine engines.
Base period	The reference period, to which a series of index numbers relate, It is usually expressed as 100.
BCG (Bacillus Camete Guerin)	A vaccine against Tuberculosis.
Bio-mass energy	Energy that is obtained from fuel wood, charcoal and crop residues.
Broad money – (M2)	Consists of the currency in circulation, as well as the demand, time and savings deposits. The deposits are those held by the private sector.
Broad money - (M2)A	Equivalent to (M2) plus certificates of deposit.
Broad money - (M3)	Equivalent to (M2) A plus foreign currency deposits.
Careless Driving	A person whose conduct is inconsiderate in disregard for the right of others and that endangers or is likely to endanger person or property.
Casualty (Victim)	Person who sustains a slight, serious or fatal injury.
Child	A juvenile. A person aged below 18 years.
Child labour	Work that is mentally, physically, socially and/or morally dangerous and harmful to children. Hazardous work which by its nature or the circumstances under which it is performed, jeopardises the health, safety and morals of a child. Also includes work or activities that interfere with children's school attendance.

- Child LabourNational and international standards are used to define child labour. Based on thesemeasurementstandards, children become child Labourers if they are aged 5-11 years and engaged inframeworkeconomic activities for at least one hour a week, or, aged 12-13 years and engaged ineconomic activities for at least 14 hours per week, or, aged 14-17 years and involved ineconomic activities for at least 43 hours a week, or 14-17 years and engaged in workregarded as hazardous.According to this definition, household chores are not among<br/>activities grouped in child labour.
- Child work A child is regarded to be involved in child work, if she/he is aged 5-17 years and was involved in economic activities for at least one hour during the reference week, by extension, therefore, such a child will be regarded as a child worker.

**Civil Servants** Employees of line ministries, teaching service, police, prison, public universities and local governments.

- **Cohabiting** A state where a man and woman are not officially married but are living together in a sexual union.
- **Completion rate** The total number of new entrants in the last grade of any education level, regardless of age, expressed as a percentage of the population at the entrance age to the last grade of that education level.
- **Crime** An unlawful act or omission punishable by law.

Crime Rate The incidence of crime per 100,000 people.

- Damage ofThe abstract measure of property not being intact, and may refer to any household itempropertywhich suffered after a crime incidence.
- **Day Care** A place that looks after children between 0 2 years and their parents pick them in the evening.
- **Defrauding** This is the act of depriving an individual, organisation, or even a household of their money, or property through deceitful trickery or cheating methods. It is also a deliberate deception to secure unfair or unlawful gain.
- Diesel fuelFuel used for internal combustion in diesel engines and as a burner material in heating<br/>installations such as furnaces. Another name for this product is automotive gasoil.
- **Divorced** A condition where legally married couples legally separate for life and each stays away from the other thereafter. However, either of the two (man or woman) can re-marry.
- **DMBs** Deposit Money Banks. Commercial banks in Uganda's institutional settings.

**DPT** A vaccine against Diphtheria, Pertussis (whooping cough) and Tetanus.

**Driver** In relation to a motor vehicle, means a person who drives, or attempts to drive, or is in charge of a motor vehicle (including a cycle) or an instructor of a learner driver. In relation to animals, means a person who guides cattle, in singular or in herds, or flocks, pack saddle animals on a road. But in relation to a towed vehicle, a person who drives the towing vehicle.

**Earnings for** persons in paid employment

EconomicCovers all market production and certain types of non-market production, includingactivityproduction and processing of primary products for own consumption, own-account<br/>construction (owner occupied dwellings) and other production of fixed assets for own use.

Employed Persons who work for wage or salary in cash or in kind or both and have a formal jobPersons attachment.

**Employment** Restricted to only the working age population who were engaged in any activity to produce goods or provide services for pay or profit. "For pay or profit" refers to work done as part of a transaction in exchange for remuneration payable in the form of wages or salaries for time worked or work done, or in the form of profits derived from the goods and services produced through market transactions.

EmploymentThe status of an economically active person with respect to his/her position at his/herstatusplace of work and his/her mode of remuneration.

- EngineeringMovable plant or equipment being a self-propelled vehicle or trailer designed orplantconstructed for the special purposes of engineering operations which, where proceeding<br/>on a road, does not carry any load greater than such as is necessary for its propulsion or<br/>equipment.
- Enterprise A single legal entity or a combination of legal entities. It may also be a sole legal unit carrying out one or more activities at one or more locations. It may alternatively be several establishments.
- **Establishment** An economic unit engaged in one or predominantly one kind of economic activity under single ownership or control and is situated at a single physical location.

**Exports** Outward flows comprising goods leaving the economic territory of a country to the rest of the world.

Fatal AccidentAn accident in which death occurs at the scene of the accident or within one year of the<br/>accident as a result of injuries sustained in the accident.

ForeignConsist of those external assets available to and controlled by central banks for directReservesfinancing of balance of payments imbalances, for indirectly regulating the magnitude of<br/>such imbalances through intervention in exchange markets to affect the currency<br/>exchange rate, and/or for other purposes. Included are monetary gold, Special Drawing<br/>Rights (SDRs), reserve position in the fund, foreign exchange assets (consisting of<br/>currency, deposits and securities) and other claims.

GeneralHealth facilities that provide preventive, outpatient curative, maternity, inpatient healthHospitalsservices, emergency surgery, blood transfusion, laboratory and other general services.They also provide in-service training, consultation and research in support of community-

based health care programmes.

Gross Domestic Product	The value of goods and services produced within the economic territory of the country.
Gross Enrolment Rate	The ratio of pupils in primary school (regardless of age) to the country's total population aged 6-12 years.
Gross Enrolment Ratio	Total enrolment in a specific level of education (Pre-primary, Primary, Secondary and Tertiary), regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school-year.
Gross Intake Rate	The ratio of the pupils enrolled in Primary One regardless of age to the country total population aged six years.
Gross Intake Ratio	The total number of new entrants in the last grade of a given level of education, regardless of age, expressed as percentage of the total population of the theoretical entrance age to the last grade of that education level.
Gross Output	The production value as compiled from total receipts from industrial and non-industrial goods and services in an economy, adjusted for stock changes but excluding Excise Duty and Indirect Taxes. This is Gross Output at factor cost.
Growth Rate	The number of people added to (or subtracted from) a population in a year due to natural increase and net migration expressed as a percentage of the population at the beginning of the time period.
Hazardous work	Refers to a situation where a person is engaged in work for more than 43 hours a week or works under conditions that entail them to work at night.
Health Centre II	Out-patient clinic treating common diseases and offering antenatal care. It is supposed to be led by an enrolled nurse, working with a midwife, two nursing assistants and a health assistant. According to the Ugandan Government's Health Policy, every parish is supposed to have a Health Centre II.
Health Centre III	Health Centre with facilities which include an operation room and a section for minor surgery. It is headed by a clinical officer, offers the continuous basic preventive and curative care and provides support supervision of the community and the Health Centre II facilities under its jurisdiction. According to the Ugandan Government's Health Policy, every sub-county is supposed to have a Health Centre III.
Health Centre IV	A mini-hospital that provides the kind of services found at Health Centre III, but in addition has separate wards in which to admit men, women and children. It should have a senior medical officer and another doctor as well as a theatre for carrying out emergency operations. According to the Ugandan Government's Health Policy, every county or

parliamentary constituency is supposed to have a Health Centre IV.

Heavy Fuel Oil	Residual fuel obtained after refinery of petroleum products. It is used in ships and industrial large-scale heating installations as a fuel in furnaces or boilers.
Home based child care	An arrangement where a mother in the community looks after children at a cost in her premises and trains them basic skills necessary for proper upbringing.
Imports	Inward flows of goods from the rest of the world into the economic territory of a country.
Incarciration Rate/Imprisonme nt Rate	The number of in mates confined in prison or jail per 100,000 persons of the population.
Incidence of Crime	The total number of crimes reported per population of interest over a given period of time in a defined area (territory/country).
Index Number	A number that shows relative change in price or volume between the base period and another period.
Industry	This is an economic activity undertaken by a business establishment as specified in the International System of Industrial Classification (ISIC).
Infant Mortality Rate	The number of deaths of infants under one year of age per 1,000 live births in a given period.
Inflation	The persistent increase in the general level of prices of goods and services in an economy over a period of time
Informal	Persons in informal employment comprise of:
employment rate (IER)	<ul> <li>Employees whose employers' do not pay contributions to their social security or, if they do, do not benefit from annual leave or payment in lieu of leave not taken, or paid sick leave in case of illness or injury or income tax deduction.</li> <li>Employers and own account workers employed in their own businesses or places of work that are not registered for income tax and/or Value Added Tax (VAT).</li> <li>Members of producers' cooperatives employed in their cooperatives that are not registered.</li> <li>Own account workers engaged in the production of goods exclusively for own final use by their household (such as subsistence farming or do it yourself construction of own dwellings), if considered employed according to the 13th International Classification of Labour Services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers of the produce services (ICLS) Edition definition of account workers account workers because the produce services (ICLS) Edition definition of account workers account services (ICLS) Edition definition of account workers account services (ICLS) Edition definition of account services (ICLS) edition definition (ICLS) edition definition (ICLS) edition (ICLS) edition (ICLS) editi</li></ul>
	employment.

· Contributing family workers, irrespective of whether they work in formal or

informal sector enterprises.

Intermediate Consumption	The value of goods and services that are used in the process of production of other goods and services rather than final consumption
Juvenile	A person below 18 years of age (Children Statute, 1997).
Kerosene	This is fuel used as an illuminant for lighting and in some cases for cooking.
Labour force	The labour force consists of all persons of working age who were either employed or unemployed.
Labour underutilisation	Labour underutilisation is a broad concept that encompasses unemployment and other forms of mal-employment such as with insufficiency of the volume of work (labour slack), low remuneration (low earnings) and incompatibility of education and occupation (skill mismatch). For the present purpose, labour underutilisation is defined to be the aggregate of labour slack (unemployed, time related under employment as well as those marginally attached to the labour force), low earnings and skill mismatch.
Large Business	Business establishment employing 100 or more persons.
Life Expectancy	The average number of years a person could expect to live if current mortality trends were to continue for the rest of that person's life. Most commonly cited as life expectancy at birth.
Liquid Petroleum Gas	Liquid Petroleum Gas (LPG) consists of hydrocarbons, which are gaseous under conditions of normal temperature and pressure but are liquefied by compression or cooling to facilitate storage, handling and transportation.
Literacy rate	The percentage of population aged 10 years and above that can read with understanding and write a simple sentence meaningfully in any language.
Loan	Money or securities supplied by one party (the lender) to a second party (the borrower) in a transaction in return for a promised future payment by the borrower. Such transactions normally include the payment of interest due to the lender as per agreed repayment schedules between the two parties.
Low pay rate	Low pay rate (LPR) or inadequate earnings rate refers to the proportion of the employed persons with hourly/monthly earnings less than 2/3 of median hourly/median earnings of full-time workers (persons working 40-48 hours a week); cf. Resolution on employment-related income by the 16 <sup>th</sup> ICLS (1998).
Marginally attached to the labour force	Discouraged workers and other inactive persons with labour force attachment.
Micro Hydro Power Stations	Hydro Power Stations generating electricity in the range of 5 KW – 100 KW
Mini Hydro	Hydro Power Stations generating electricity in the range of 101 KW $-$ 1 MW

Power Stations	
Minor Accident	Accident where no persons are injured.
Minor Injury	Injury of a minor character such as a sprain, bruise or cut not judged to be severe or slight shock requiring roadside attention.
Motor vehicle	Any self-propelled automobile intended or adapted for use on the road.
National Referral Hospitals	In addition to the services offered at the regional referral hospital, they provide comprehensive specialist services and are involved in teaching and health research.
Net Enrolment Rate	The ratio of pupils in primary school aged 6 – 12 to the country total population aged 6 -12 years.
Net Enrolment Ratio	The Enrolment of the official age-group for a given level of education (Pre-primary, Primary and Secondary) expressed as a percentage of the corresponding population.
Net Intake Rate	The ratio of the pupils aged six in primary one to the country total population aged 6 years.
Net Intake Ratio	The number of new entrants of official age expressed as a proportion of the official school entry age (3 years for pre- primary, 6 years for primary, 13 years for secondary and 19 years for tertiary).
Non-traditional exports	Refers to commodities other than traditional exports (Coffee, Cotton, Tea, and Tobacco) that have recently featured in Uganda's export trade.
Numeracy rate	The Percentage of pupils who can use numbers, complete sequences, make additions, subtraction, simple multiplication, simple division, simple weights and measures, money counting, telling time, interpret a pictograph and draw a pictogram.
Occupation	Refers to the nature of task and duties performed during the reference period preceding the interview by persons in paid employment, unpaid family work or self-employment jobs.
Orphan	A child whose biological parent or both parents are dead. Single orphans are children who have lost one biological parent, while double orphans are those who have lost both biological parents.
Other crimes in general	Include threatening violence, human trafficking, abduction, kidnap, arson (general), malicious damage to property, escapes from lawful custody, rescues from lawful custody, examination leakage and stealing, piracy, criminal trespass, domestic violence, attempted suicide, attempted murder (by shooting), attempted murder ( other than shooting), other penal code offences (not categorised)
Overdraft	A type of a short-term loan particularly used to supply short-term credit to tide over the production cycle or finance for seasonal requirements.
Pass Rate	The percentage of pupils/students that passed exams at a given level of education.
Passengers	Travellers in a car, bus, train, plane or ship who are not driving or part of the other crew.

These also include those embarked and disembarked.

Pedestrian Any person travelling on foot.

Permissible lightLight work refers to non-hazardous activities done by children in their homes underworkobservation and supervision by their families in an environment free of exploitation.

Persons in Refers to all persons of working age who, during a short reference period, were engaged employment in any activity to produce goods or provide services for pay or profit. For "pay or profit" refers to work done as part of a transaction in exchange for remuneration payable in the form of wages or salaries for the time worked or work done. The payment may also be in the form of profits derived from the goods and services produced through market transactions.

 Petrol
 A light hydrocarbon fuel used in positive ignition engines. Another name used for this type of fuel is premium motor spirit.

PopulationA pictorial representation of the age distribution of a given population. Its shape ispyramiddetermined by the past birth and death rates in that population.

**Poverty Gap (P1)** The sum over all individuals of the shortfall of their real private consumption per adult equivalent from the poverty line, divided by the poverty line. It is the measure of the depth of poverty, however, with limitations since it is insensitive to how consumption is distributed among the poor mainly below the poverty line. P1 is the per capita cost of eradicating poverty, as a percentage of the poverty line, if money could be targeted perfectly.

**Poverty** The P0 indicator is "headcount": the percentage of individuals estimated to be living in households with real private consumption per adult equivalent below the poverty line

 Prison
 Place where people are legally kept while awaiting trial or as a punishment for crimes they have committed..

**Prison capacity** This is the number of inmates a prison can safely accommodate which is 01 prisoner per every 3.6m<sup>2</sup> of accommodation space.

PrisonIs the number of inmates accommodated per available accommodation space of oneoccupancy rateprisoner expressed as a percentage.

**Prisoner** A person deprived of liberty and kept under involuntary restraint, confinement, or custody.

**Producer Price** The amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any VAT, or similar deductible tax, invoiced to the purchaser. It excludes any transport charges invoiced separately by the producer.

ProportionalThe proportion attributable to a given cause of illness. It is a proxy for the prevalence ofmorbidity ratiosickness in a population.

Pupil-ClassroomThe average number of pupils (students) per classroom at a specific level of education inRatio (PCR)a given school year.

Pupil-StanceThe average number of pupils (students) per latrine stance at a specific level of educationRatio (PSR)in a given school year.

Pupil-TeacherThe average number of pupils (students) per teacher at a specific level of education in aRatio (PTR)given school year.

Reckless/DangerA mental state in which the driver displays a wanton disregard for the rules of the road;ous Drivingthe driver misjudges common driving procedures, often causing accidents and other<br/>damages.

Regional ReferralIn addition to the services offered at the general hospital, these hospitals offer specialistHospitalsservices such as psychiatry, ear, nose and throat, radiology, pathology, ophthalmology as<br/>well as higher level surgical and medical services, including teaching and research.

Relative A measure (expressed as a percentage value) of the amount of water vapour/moisture in Humidity the air (at a specific temperature) compared to the maximum amount of water vapour air could hold at that temperature. Warm air can hold more moisture than cold air. Relative humidity of 100 percent, therefore, indicates that the air is holding all the water it can at the current temperature and any additional moisture at that point will result in condensation and precipitation.

**Residents** Persons whose usual residence is in Uganda, including those whose nationality is not Ugandan.

RetainedThe increase in value of a currency or the increase in value of fixed assets consistingReservesmainly of freehold land and buildings.

RevaluationReserves arising due to the revaluation of fixed assets but cannot be paid out asreservesdividends because they are not realised profits. They merely restate the value of an asset.

Separated A situation where married couples separate from each other without legalising the separation, and hence can re-unite after some time. However, they are still regarded as married from the legal point of view.

**Serious Accident** Accident in which a person is admitted in the hospital as an "in-patient" or any of the following injuries whether or not one is admitted in the hospital, or sustains: fractures, concussion, internal injuries, crashing, severe cuts and lacerations.

**Serious Injury** Injury for which a person is admitted in hospital as an 'in-patient', or any of the following injuries whether or not the person is admitted in hospital: fractures, concussion, internal injuries, crashing, burns, severe cuts and lacerations or severe general shock requiring medical treatment.

**Single** A man or woman who has never been married or never been in a consensual union.

Skill mismatch or<br/>skill inadequateSkill mismatch measures the incompatibility between education and occupation. Workers<br/>whose educational attainment is above the skill requirement of their jobs are in some<br/>sense underutilised. The return on investment in their education and training is below<br/>optimum and somewhat wasted.

Solid waste	Any semi-solid or solid matter created by human or animal activities, and which are disposed because they are hazardous or useless.
Squared Poverty Gap (P2)	The sum over all individuals of the square of the shortfall of their real private consumption per adult equivalent and the poverty line divided by the poverty line. The reason to square the shortfall is to give greater weight to those who are living far below the line. The indicator caters for a policy which also makes transfers from someone just below the poverty line to the poorest person which P1 does not reflect.
Teaching Service	Teachers of primary and secondary schools, technical or commercial institutes as well as other tertiary institutions, colleges and establishments.
The Employment-to- population ratio (EPR)	The number of employed persons in the working age population given as a percentage of the total number of persons in the working age population. It is one of the measures of the extent of job creation in the economy. The indicator is calculated as: $EPR(\%) = \frac{(Number of employed persons in working age population)}{Total number of persons in the working age population} (\times 100)$
The labour force participation rate (LFPR)	The labour force participation rate measures the proportion of the working age population that is economically active .i.e. working and unemployed. LFPR is the number of persons in the labour force given as a percentage of the working age population. The indicator is calculated as:
	LFPR (%) = $\frac{(\text{Number of persons who are employed} + \text{Number of persons who are unemployed}}{\text{Total number of persons in the working age population}} (\times 100)$
The Performance index	LFPR (%) = $\frac{(\text{Number of persons who are employed + Number of persons who are unemployed}}{\text{Total number of persons in the working age population}} (\times 100)$ A measure of the quality of passing at all levels of education.
The Performance	Total number of persons in the working age population
The Performance index The Unemployment	A measure of the quality of passing at all levels of education. Unemployment rate (UR) is the percentage of the labour force that is unemployed. It is calculated as follows:
The Performance index The Unemployment Rate (UR)	A measure of the quality of passing at all levels of education. Unemployment rate (UR) is the percentage of the labour force that is unemployed. It is calculated as follows: $UR(\%) = \frac{\text{Number of unemployed persons in the working age population}}{\text{Total number of persons in the labour force}} (\times 100)$ The taking of another person's property without that person's freely-given consent. The <i>time-related underemployed</i> includes all employed persons whose hours of work "are

**Trade Balance** The difference in value between the country's visible imports and exports.

TraditionalLong-term export cash crops introduced to Uganda long time ago (Coffee, Cotton, TeaExportsand Tobacco).

**Traffic Accident** Crashes between vehicles; between vehicles and pedestrians; between vehicles and animals; or between vehicles and fixed obstacles.

**Transition Rate** The number of pupils (or students) admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils (or students) enrolled in the final grade of the lower level of education in the previous year.

**Treasury Bill** Short-term bearer securities with maturities of 91 days, 182 days, 273 days or 364 days issued by Bank of Uganda.

**Under-utilisation** An aggregate of persons who were unemployed, in time related under-employment and potential labour force.

**Unemployment** Persons of working age are classified as unemployed if, during a short reference period such as a day or a week, they (a) were without work, i.e. did not work for even one hour in any economic activity (paid employment, self-employment, or unpaid work for a family business or farm); (b) were available for work; and (c) had taken active steps to seek work during the past four weeks.

Value Added The value of outcome when factors of production interact to produce and avail goods and services. Value added is the difference between the value of gross output and the value of intermediate inputs.

Value Added Tax A form of consumption tax. From the perspective of the buyer, it is a tax on the purchase price. From the seller's perspective, it is a tax only on the value added to a product, material or service.

Victim A person who is offended as a result of a criminal act.

Wage BillAll cash payments made by employers in return for labour provided by the employees.The payments include salaries and wages, overtime, holiday pay, bonuses, commissions,<br/>sick leave and any other allowances paid in cash to the employees.

- Widowed A situation where one partner in a marriage is dead. It applies to both monogamous and polygamous marriages. In case of polygamous marriages where the man is dead, the women are referred to as widows. However, where a man loses one of his many wives, he cannot be referred to as a widower.
- Work Comprises of own-use production work, employment work, unpaid trainee work, volunteer work and other forms of work. Work excludes activities that do not involve producing goods or services (e.g. begging and stealing), self-care (e.g. personal grooming and hygiene) and activities that cannot be performed by another person on one's own behalf (e.g. sleeping, learning and activities for own recreation).

Working age While no international standard on age limits exists, for purposes of statistical measurement, the working age population is commonly defined as persons aged 15 years and older, but this may vary from country to country.

**Working persons** Persons of working age are classified as working or employed if, during a short reference period such as a day or a week, (i) they did some work (even for just one hour) for pay, profit or family gain, in cash or in kind; or (ii) they were attached to a job or had an enterprise from which they were 'temporarily' absent during this period (for such reasons as illness, maternity, parental leave, holiday, training, industrial dispute).

**Working Poor** Individuals forming part of the working population but whose incomes fell below the official poverty line.

Working PovertyWPR is the proportion of the employed population living in households that are classifiedRate (WPR)as poor, i.e. their consumption or income levels are below a determined national povertyline. The direct measurement of the indicator can be expressed as:

 $WPR = \frac{Number of employed persons in poor households (Number of working poor)}{Total number of employed persons} (\times 100)$ 

Worst Forms of According to ILO convention No.182 (1999), the worst forms of child labour include:

#### **Child Labour**

(i) Child slavery or practice similar to slavery, such as sale and trafficking of children, debt bondage and serfdom, use of children in armed conflict;

- (ii) Use, procurement and offering of a child for prostitution and pornography;
- (iii) Use of children in illicit activities such as drug trafficking; and
- (iv) Work that is likely to harm the health, safety and morals of children.
- Youth For statistical purposes, the United Nations defines *youth*, as those persons between the ages of 15 and 24 years, without prejudice to other definitions by Member States. In practice, however, many national statistics offices apply their own definitions of youth which often differ from the international standard. Under the Uganda Constitution, a youth is a person aged 18-30 years.

# **CHAPTER ONE: ENVIRONMENT STATISTICS**

Environment Statistics are vital in describing the state, quality and quantity of the aspects of the environment and natural resources as well as their trends overtime. This section presents statistics on land, forestry, climate, water supply and Waste.

# **1.0 Administrative Units**

Uganda is stratified into administrative units. Those are Districts, Counties, Sub-Counties, Parishes and Villages to facilitate service delivery near to the people. In total, there are 146 districts as at 1st January 2021, including Kampala Capital City, Mbarara, Gulu, Masaka, Lira, Fort Portal, Mbale, Soroti, Arua, Hoima and Jinja cities. Below is a table indicating the number of administrative units at lower levels by region.

Region	No. of districts	No. of municipalities	No. of counties	No. of sub counties	No. of parishes	No. of villages
Central	27	14	75	265	1,623	10,905
Western	38	8	91	455	1,961	15,967
Northern	41	7	70	325	1,647	14,344
Eastern	40	10	86	443	2,322	16,981
Uganda	146	39	322	1,488	7,553	58,197

1.0 Table 1.1: Number of Administrative Units per Region

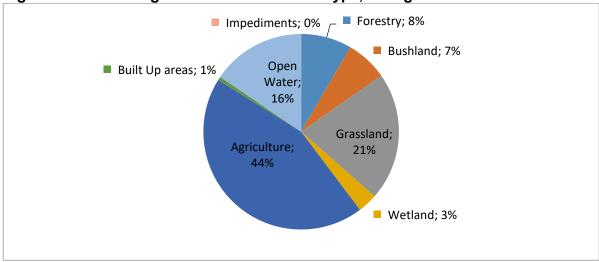

Source: Uganda Bureau of statistics, 2020-2021 FY

# 1.1 Land Cover

Uganda has an area of 241,555 square kilometres (sq. kms), of which 45,318 sq. kms are open water and wetlands while 196,237 sq. km is land. The altitude above sea level ranges from Lake Albert which is 620 metres Above Sea Level (ASL) to Mt. Rwenzori peak (5,111 metres ASL). For trans-boundary water bodies, Uganda shares Lake Victoria with Kenya and Tanzania and Lakes Albert and Edward with the Democratic Republic of Congo (DRC). Within its boundaries are lakes Wamala, Bunyonyi, Katwe, Nakivale, Mburo, Kyoga, George and Bisina.

In Western Uganda, the Rwenzori Mountains (often called the Mountains of the Moon) form about eighty kilometers of the border between Uganda and the Democratic Republic of Congo (DRC). In Eastern Uganda, the boarder with Kenya is marked by volcanic Mt. Elgon (4,324 metres ASL). In the north-east, there is Mt Moroto (3,085 metres ASL). Further south-west, there is the Mufumbiro volcanoes (4,132 metres ASL) that mark the border with Rwanda and Congo.

Land area estimates by type of cover as updated using the Remote Sensing Survey-2017 carried out by National Forestry Authority (NFA) indicated that agricultural land occupies the largest proportion of land cover area (44.2 percent), followed by grassland (21.2 percent) and then water (15.5 percent) as shown in Figure 1.1 and Table 1.1;

# Figure 1.1: Percentage Share of Land Cover type, for Uganda 2017

Areas under grasslands and water bodies almost remained the same between 2010 and 2017. Area under forest has significantly been decreasing since 1990. It, for instance, decreased by 11.2 percent between 2010 and 2015 but gained by close to four percentage points between 2015 and 2017. This gain is attributed to the various restoration efforts by government and the civil society organisations (CSOs). Land area for agriculture increased by 12.4 percent between 1990 and 2000, and by 8.6 percent between 2005 and 2010. It then increased by 6.1 percent between 2010 and 2015. It slightly increased (by less than two percent) between 2015 and 2017 and this is attributed to strict measures instituted by the forestry authorities on forest land encroachment.

Notably, built-up area increased by more than 40 percent between 2010 and 2015 but increased by hardly two percent between 2015 and 2017. The changes are illustrated in Figure 1.2 and the data is presented in Statistical Appendix Table1.1.1

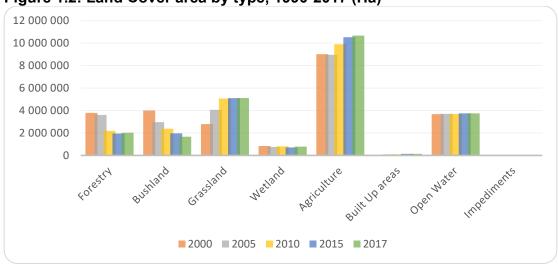

Figure 1.2: Land Cover area by type, 1990-2017 (Ha)

# 1.2 Forests

The Food and Agricultural Organisation (FAO) defines a Forest as Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent, or trees able to reach these thresholds in situ. Forests are very vital for their services such as rainfall formation, carbon sequestering and products like round wood, firewood, timber among others. Statistics on various aspects of Forests provide information on trends on the utilisation; products extracted and management, area under Forests in Uganda.

# 1.2.1 Forests Cover

In 2015, Uganda had a total of 1.9 million hectares of forest land compared to 4.9 million hectares in 1990. This is a reduction of 60 percent over a period of 25 years. In 1990, forests covered 20.4 percent of the land area of the country compared to less than 10 percent in 2015. Table 1.2.1 gives the forest cover areas and changes between 1990 and 2015.

Broad leaved Plantations	Conifer Plantations	THF well stocked	THF low stocked	Wood land	Total Forest Cover
44,298	63,568	529,186	102,000	1,214,478	1,953,530

### Table 1.2.1: Forest Cover & Forest change over 25 years

THF: Tropical High Forest

Source: National Forestry Authority

# 1.2.2 Local and Central Forest Reserves

In Uganda, the Local Forest Reserves (LFRs) are forests that are managed by the Local Government whereas Central Forest Reserves (CFRs) are those managed by National Forestry Authority (NFA). The proportion of land under Central Forest Reserves (CFRs) was by far higher than that under the Local Forest Reserves (LFRs) in all the regions as established through the National Bio-mass Study of 2015. Regionly, the Western Region had the largest proportion of land under CFRs (49.9%), representing almost half of the total CFRs land while Eastern Region had the lowest proportion (less than 3%), as shown in Table 1.2.2

Table 1.2.2:	Share of total area under forest reserves by region, 20	15

Decien	Central Fo	rest Reserve	Local F	Local Forest Reserve			
Region	Hectares	Percentage	Hectares	Percentage	reserve Area

Uganda	528,593	1,002	529,595

# 1.2.3. Production of Round Wood

Round Wood is wood in its natural state as felled, or otherwise harvested, round, split, roughly squared or other forms (e.g. roots, stumps, burls, etc.) and with or without bark.

The quantity and value of round wood produced in Uganda for the last five years is shown in Table 1.2.3. In 2018, Uganda produced 54.3 million tonnes of round wood worth about Shs1.2 trillion, registering an increment of 8.4 percent in value. See Annex Tables 1.2A and 1.2B for details

# Table 1.2.3: Production of Round Wood

Category	2014	2015	2016	2017	2018
Quantity ('000 tonnes) Value (Mill. Shs)	46,603	48,581	50,168	52,195	54,285
	773,969	876,789	972,101	1,075,035	1,165,063

Source: National Forest Authority

# 1.3 CLIMATE

Climate refers to the average weather conditions of a place or region over a long period of time, normally 30 years and above. It defines typical weather conditions based on long term averages of various elements. The elements are temperature, rainfall, humidity, insolation, wind, atmospheric pressure and cloud cover. Climate statistics are vital for understanding trends in climate and projecting likely future changes for informed decision making and policy formulation. Climate change is considered one of the top major global challenges in the 21<sup>st</sup> Century, with its impacts mainly affecting developing countries including Uganda such as increased incidences of droughts, floods and erratic rains.

# 1.3.1 Rainfall and Rain-days

This section presents the Long Term Average and Monthly rainfall pattern during 2020 for four (4) selected regional centres. The centres are Entebbe, Gulu, Jinja and Kabale. Also detailed presentation is made for the synoptic stations which include Arua, Wakiso, Mubende, Masaka, Bulambuli, Kotido, Kyenjojo Gulu, Jinja, Kabale, Kitgum, Kampala, Kasese, Lira, Masindi, Mbarara, Soroti and Tororo. The section further presents information on the monthly rain-days in these stations. See Appendix Table **1.3** A

### 1.3.1.1 Rainfall

#### Entebbe

Entebbe area received a total precipitation of 1,614 millimeters in 2020. The station generally received higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (263.0 mm) was received in March while the lowest was received in August (29.4 mm). See Figure 1.3.1 (a) and Statistical Appendix Table 1.3 (A).

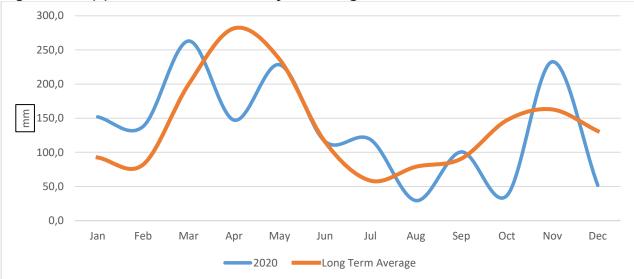

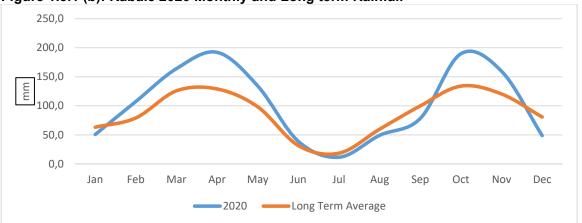

Figure 1.3.1 (a): Entebbe 2020 Monthly and Long-term Rainfall

### Kabale

Kabale area received a total precipitation of 1,224.7 millimeters in 2020. The station generally received significantly higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (192.1 mm) was received in April while the lowest was received in July (11.6 mm). See Figure 1.3.1 (b) and Statistical Appendix Table 1.3 (A)

#### Jinja

Jinja area received a total precipitation of 1,604.4 millimeters in 2020. It generally received much higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (330.4 mm) was received in March while the lowest was received in July (22.4 mm). See Figure 1.3.1 (c) and Statistical Appendix Table 1.3 (A).

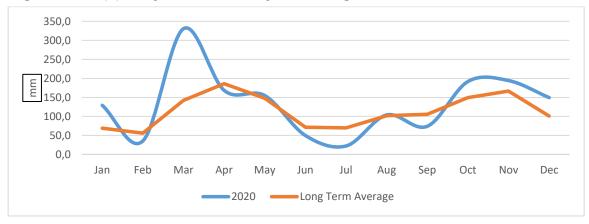

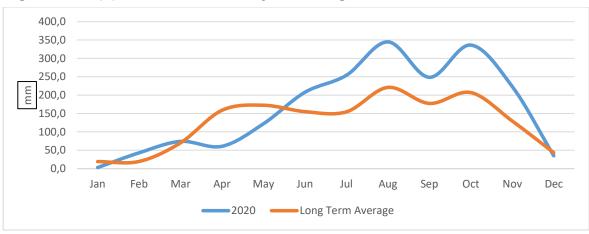

Figure 1.3.1 (c): Jinja 2020 Monthly and Long-term Rainfall

### Gulu

Gulu area received a total precipitation of 1951.8 millimeters in 2020. It generally received higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (348.5 mm) was received in September while the lowest was received in January (2.8 mm). See Figure 1.3.1 (d) and Statistical Appendix Table 1.3 (A).

# Figure 1.3.1 (d): Gulu 2020 Monthly and Long-term Rainfall

# 1.3.1.2 Rain Days

Rain days are important in knowing the distribution of days on which it rained within the different months of the year. Rain days are defined as days with total daily rainfall of at least 1mm. During 2020, the centres (synoptic stations) had total rain-days as follows; Kampala (147), Arua (122), Kitgum (142), Lira (128), Soroti (114), Kasese (103), Jinja (146), Masindi (136), Mbarara (108), Tororo (159), Gulu (160) and Kabale (130). See Appendix Table 1.3A (i).

Monthly distribution of rain-days in the centres indicate that Bulambuli had the highest number of rain-days, followed by Masaka, Gulu, Tororo and Kampala during the year 2020 as shown in Figure 1.3.1 (e)

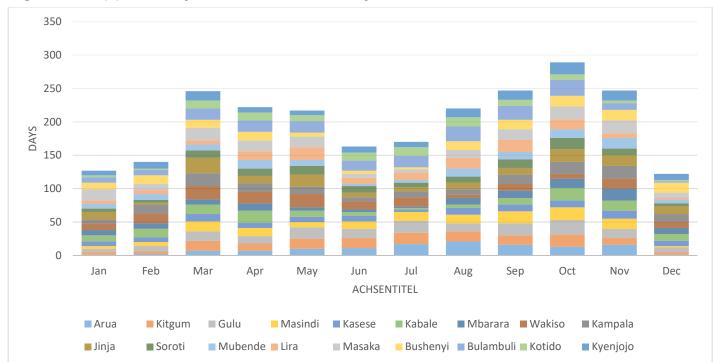

Figure 1.3.1 (e): Monthly distribution of rain-days in Selected centres in 2020

# 1.3.2 Temperature

#### **Maximum Temperature**

The Mean Maximum temperature represents an average of the single highest temperature recorded in that month each year. The mean daily maximum temperatures for the different months at the different regional centers were generally highest at the end and beginning of the year (December to February) but significantly declined in July. Between August and December, the temperature kept rising. Kabale experienced the lowest mean maximum temperature of 24.4<sup>o</sup>C while Lira had the highest mean maximum temperature of 32.1<sup>o</sup>C in the same year as seen in Figure 1.3.2 and Appendix Table 1.3B.

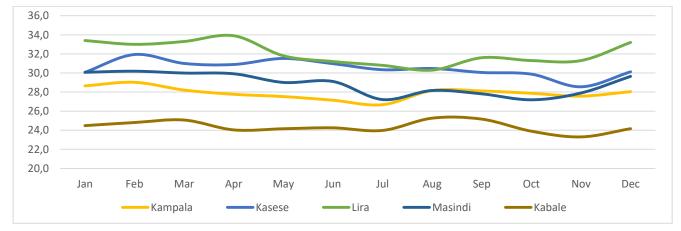

Figure 1.3.2: Long term mean maximum temperature for selected centers, 2020

#### **Minimum Temperatures**

The Mean Minimum Temperature represents an average of the single lowest temperature recorded in that month each year. The daily mean minimum temperature for selected centres shows that Kabale and Jinja had the lowest mean daily minimum temperatures of 13.0<sup>o</sup>C and 15.1<sup>o</sup>C respectively while Soroti and Entebbe had the highest daily mean minimum temperature of 19.5<sup>o</sup>C and 19.2<sup>o</sup>C respectively during 2020. The trend for long term mean minimum temperature is generally similar for all centres increasing from January to March and then declining between April and July. (See Figure 1.1.3 and Appendix Table 1.3B).

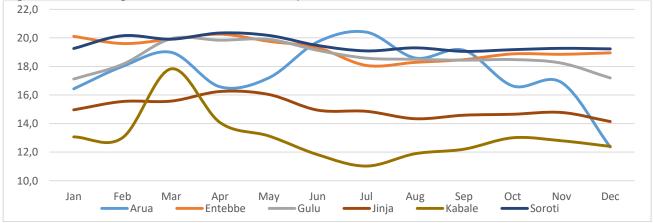

Figure 1.3.3: Long term Mean minimum temperature for selected centres, 2020

# 1.3.3 Relative Humidity

Monthly mean relative humidity in the Morning (0600 hours) and Noon (1200 hours) generally continued to be in-line with the long term average for all the selected centres (Statistical Appendix Table 1.3C). Figure 1.3.4 below, shows mean relative humidity at 0600 hours for the selected centres. Entebbe and Kasese continued to experience a generally high mean relative humidity at 0600 hrs throughout 2017 ranging between 77 and 91 percent. Lira generally recorded the lowest mean relative humidity at 0600 hrs of 45 percent in the year.

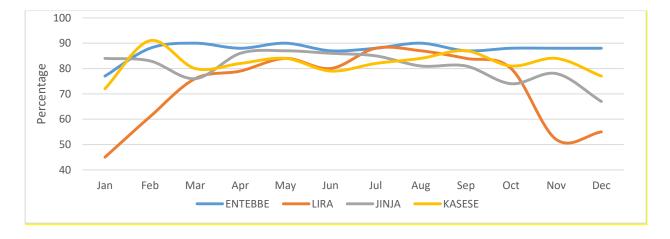

Figure 1.3.4: Mean Relative Humidity at 06:00 hours for selected centres, 2017

Figure 1.3.5 below shows the (2012-2017) mean relative humidity at 12:00 hours for selected centres. Entebbe continued to experience the highest long term mean relative humidity at 12:00 hours throughout 2017 ranging from 59.0 to 88 percent. Lira with 20 percent in January had the lowest mean relative humidity at 12:00 hours in the year. See Appendix Table: 1.3C

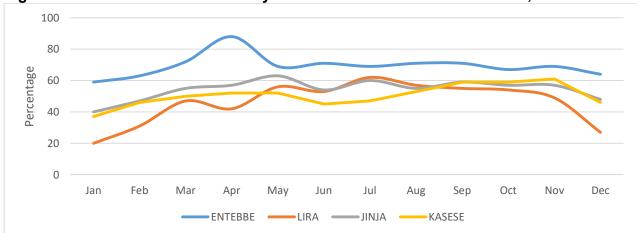

Figure 1.3.5: Mean Relative Humidity at 12:00 hours for selected centers, 2017

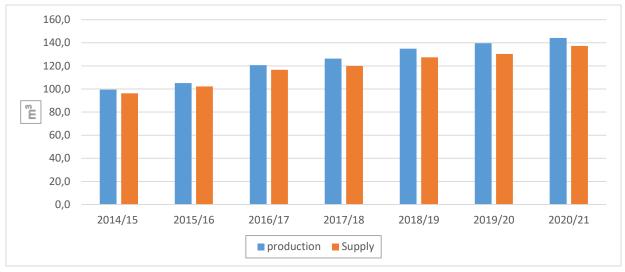

# 1.4 Water Supply

# 1.4.1 Water Produced and supplied - Metered

Metered water focuses on water that is produced and supplied by the National Water and Sewerage Corporation (NWSC). During the FY2020/21, water production was 144.1 million cubic meters compared to 134.6 million cubic meters produced in the FY2019/20, hence an increase of about 3.2 % which is similar to the increment registered in FY2018/19 (3.5%). Figure 1.4.1 below shows the national trends of metered water production by NWSC over the past financial years.

In FY2020/21, out of the 144.1 million cubic meters produced, 137.2 million m<sup>3</sup> (95.2%) was supplied, a similar performance as in FY2019/20. Of the total supplied, 89.8 million m<sup>3</sup> was sold, implying a billing efficiency of 76.7 percent (Statistical Appendix Table 1.4D).

# 1.4.2 Water produced - Unmetered

The Directorate of Water Development (DWD) supplies water especially in the rural areas and small towns through the provision of boreholes and gravity flow systems operated by water schemes. The water schemes are operated under umbrella organisations of the Ministry of Water and Environment (MWE). Over the years, water production by the schemes has been increasing due to the increase in the number of water schemes across the country, increased installed capacity of the schemes and better management through maintenance as well as timely repairs of system break downs as reflected in Figure 1.4.2. The schemes report their performance using the Utility Performance Monitoring and Information System (UPMIS) of MWE. In 2020/21, 4.5 million cubic meters of water were produced, registering a 9.8 percent increase. Details at scheme level are as seen in Statistical Appendix Table 1.4F.

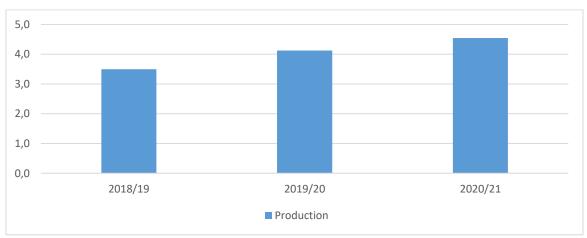

Figure 1.4.2: Water produced (million  $m^3$ ) by small town water schemes in Uganda – 2018/19 to 2020/21

# **1.5 Waste Statistics**

The Basel Convention defines waste as "substances or objects which are disposed off or are intended to be disposed off or are required to be disposed off by the provisions of national law".

# 1.5.1 Municipal Solid Waste

The Uganda Bureau of Statistics (UBOS) collects information on solid waste collected (tons) from KCCA and other selected cities and municipalities across the country. Waste collected increased by 9.4 percent from 729,755 tons in CY2018 to 798,590 tonnes in CY2019. KCCA had the highest increase (12.8%) followed by the Northern (8.9%). Municipality collections are as presented in Appendix Table 1.5 A

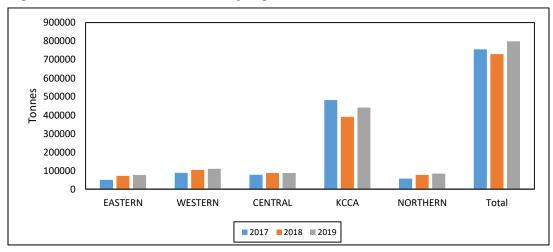

Figure 1.5.1: Solid waste collected by region

#### 1.5.2 Hazardous Waste Collected by Licensed waste agents

Hazardous waste is described as waste that causes unacceptable risk to public health and the environment. The quantity of hazardous waste reported in here is that collected by the various NEMA licensed hazardous waste agents. The treated hazardous waste increased by 28 percent in FY2016/17 (5,668 tons) to FY2017/18 (7,226 tons). In FY2016/17, Oils and Chemicals waste (60.3%) was the most collected and treated followed by General waste (14.4%) while Plastics and Polythenes (1.1%) were the least. In the period 2017/18, Oil and chemicals (74.9%) was the most collected and treated followed by medical and pharmaceuticals (10.6%). Between the two periods, the quantity of medical and pharmaceutical waste recorded a two fold increase. The figures in this publication slightly differ from those in previous ones because in the course of compilation UBOS received more data about previous years.

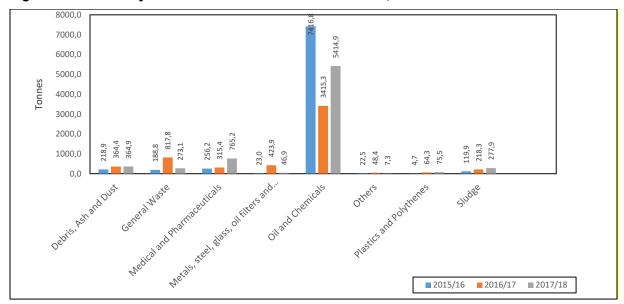

Figure 1.5.2: Quantity of hazardous waste collected 2015/16, 2016/17 and 2017/18

Source: Luwero Industries and other sources

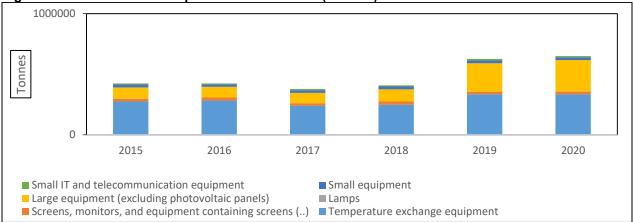

#### 1.5.3 Electronic Waste (E-Waste)

The Basel Convention on the control of trans-boundary movement and disposal of hazardous waste, to which Uganda is a member, defines E-Waste, as: "all discarded electrical and electronic assemblies, scrap, components and batteries".. E-Waste includes a broad range and growing number of electronic devices ranging from large household appliances such as refrigerators and air conditioners, to personal products such as handheld cellular phones, personal stereos, consumer electronics and computers.

E-Waste is one of the new environmental threats arising out of huge global sales of Electric and Electronic Equipment (EEE), with symmetric volumes of waste generated after and whose disposal is a complicated process especially for developing countries such as Uganda.

# 1.5.3.1 Placed on the Market

The placed on the market variable is the total imports less exports plus local manufactured EEE (Domestic Production). Results reveal that the amount of EEE placed on the market significantly increased by 59% from 2018 (407,495) tonnes to 2020 (649,094) tonnes. The component of temperature exchange equipment forms the biggest percentage of electronics placed on the market since 2015. This is followed by large equipment such as AC and refrigerators. However, lamps have the least quantities of what is placed on the market. For details see Statistical Appendix Table1.5C

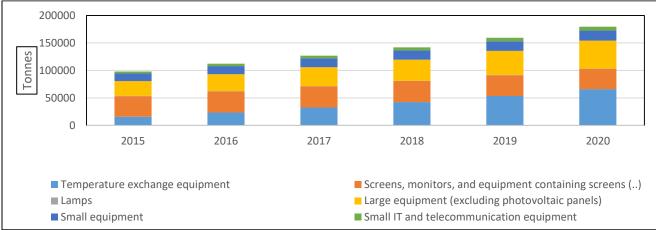

#### 1.5.3.2 E-Waste Generated

The E-waste generated depends on the quantities placed on the market and various life spans for the various categories. The E-waste generated has been increasing over the years as shown in Figure 1.5.4. In the year 2020, the amount of e-waste generated was about 179,537 tonnes compared to 97,955 tonnes generated in 2015. The biggest component of E-waste generated in 2020 was temperature exchange equipment which was followed by large equipment as seen from graph 1.5.4. E-waste generated has increased by 83 percent from 2015 to 2020 as shown in the Appendix Table 1.5 E.

#### Figure 1.5.4: E-waste generated as per EU-6 Classification (Tonnes)

# CHAPTER TWO: DEMOGRAPHY AND SOCIOECONOMIC STATISTICS

# 2.1.1 Population Trends

Uganda has conducted a decenial Population and Housing Census since 1911 and the latest was in 2014. The 1911, 1921 and 1931 population censuses were mainly administrative in nature. The first scientific census was conducted in 1948 where a questionnaire was used. Between 1948 and 1969, separate enumeration procedures were made for the African and non-African population in the country using different forms and sometimes different census nights.

Figure 2.1.1 shows that Uganda's population has continued to grow over time, it increased from 9.5 million in 1969 to 34.6 million in 2014 representing an average annual growth rate of 3.0 percent between 2002 and 2014. The population is projected to be 42.9 million by mid year 2020.

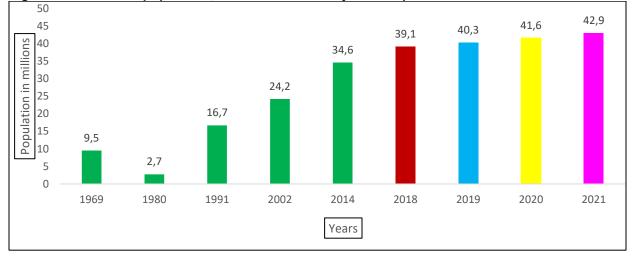

Figure 2.1.1: Census population, 1969 - 2014 and Projected Population 2018 and 2021

Table 2.1.1 shows that, the growth rate declined from 3.2 in 2002 to 3.0 in 2014 with an average annual increase of about one million persons. However, the population grew at a lower rate in the early twentieth century where it increased from about 2.5 to 2.9 million between 1911 and 1921. This is an increase of 400,000 persons in ten years reflecting an average annual population growth rate of less than two percent. The highest average annual growth rate (3.9 percent) was observed during the intercensal period between 1959 and 1969.

Table 2.1.1: Population size, Internation	er-censal Populatior	n changes and	l average annual	growth rates,
1911-2014				

		Female	Total	Intercensal Period	Annual Increase (000's)	Annual Growth Rate (%)
1911	1,116,903	1,349,422	2,466,325			
1921	1,320,286	1,534,322	2,854,608	1911-1921	39	1.5

# 2.1.2 Population Distribution by Age and Sex

A population pyramid is a pictorial representation of the age distribution of a given population. Its shape is determined by the past birth and death rates in that population. Uganda's population pyramid (Figure 2.1.2) is broad based, implying that the majority of the population is young, characteristic of a country with high fertility levels.

# Figure 2.1.2: Population Pyramid in Five-Year Age Groups, Uganda, 2014

### 2.1.2.1 Population of Special Interest Age Groups

Table 2.1.2 shows that the highest proportion of Uganda's population is young (under 18 years). The population increased from 51 percent in 1969 to 56 percent in 2002, slightly dropped to 55 percent in 2014 and is projected at 53 percent in the year 2020. One in five persons of the population is of primary school going age (6-12 years). On the other hand, the proportion of older persons (aged 60 years and above) decreased from six percent in 1969 to about four percent in 2014.

Table 2.1.2	Percentage Distribution	of the	Population	by	Special	Interest	Groups,	for	the
censuses; 196	69-2014 and projections.								

Age Category	Census Period				Projections		
	1969	1991	2002	2014	2018	2019	2020
6 – 12 Years	22.7	22.3	21.9	21.3	20.2	19.9	19.7
10 – 24 Years	27.8	33.3	34.2	31.7	35.2	35.2	35.1

Less than 18 Years	51.4	53.8	56.1	55.0	53.6	53.1	52.6
60 Years or More	5.8	5.0	4.6	4.1	3.7	3.7	4.0

### 2.1.3 Population in Urban Areas

In Uganda, the definition of urban areas has changed over time. During the 2002 and 2014 censuses, urban areas were constituted of only the gazetted (approved by the responsible authority) urban areas while in the earlier censuses both the gazetted and ungazetted urban areas were included. Under the earlier method, any trading centre with more than 1,000 people was considered urban.

Figure 2.1.3 shows that the urban population increased from less than one million persons in 1980 to about 3 million in 2002 (representing a nearly threefold increase) and further increased to 7.4 million in 2014. It is projected at 11.8 million persons in the year 2021. The higher increase is attributed to four factors. The factors are 1) gazzeting of new urban areas; 2) natural growth; 3) redemacation of the boundaries of selected urban areas; and 4) Rural - Urban Migration. The growth in urban population was mainly driven by creating new districts and subsequently gazzeting new urban areas (Town councils and Municipalities) within the new districts. The recent approval by Parliament of 15 new cities will also lead to the growth of the urban population for the period July 2020 to July 2023 during their cluster operationalisation.

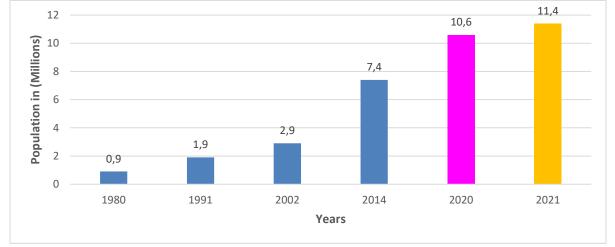

Figure 2.1.3: Urban Population by Census Year and projection

# 2.1.4 Marital Status

Demographers' interest in marriage is based mainly on its influence on the fertility behaviour which is one of the components of population dynamics. Marriage is the gateway to family formation, the most basic unit of social and community organisation in any society. It forms the base setting in most societies within which childbearing occurs. Age at marriage is, therefore, one of the drivers of fertility because early marriages exposes teenagers to early pregnancy and hence early child bearing.

Table 2.1.3 show the proportion of females by marital status. Currently, the word "married" refers to women and men who report being married or living together as husband and wife. The table shows that about one in every five teenagers aged 15-19 was married in all the three surveys yet this is also the school going age group.

		2006			2011			2016	
Age group	Never Married	Currently Married	*Ever Married	Never Married	Currently Married	*Ever Married	Never Married	Currently Married	*Ever Married
15-19	77.6	19.6	2.7	77.3	20.0	2.8	77.2	19.9	2.9
20-24	21.9	67.1	11.0	23.9	67.3	8.8	25.5	64.0	10.5
25-29	5.8	80.4	13.8	5.6	82.5	11.9	10.0	77.3	12.7
30-34	2.8	81.6	15.6	2.3	81.1	16.6	3.9	78.5	17.6
35-39	1.9	78.1	20.1	1.5	79.9	18.7	2.7	77.1	20.1
40-44	1.8	73.3	24.9	0.8	75.8	23.4	2.4	73.6	24.1

Number	2,028	5,337	1,167	2,118	5,418	1,138	4,783	11,223	2,500

Table 2.1.3: Proportion of Females by marital status and age group

Source: UDHS, 2006-2016

\*Ever married include separated, divorced and widowed

#### **Early Marriages**

Early marriages result into social, health and economic challenges and the situation is made worse if the person loses a partner when still young. Widowed mature persons are at a disadvantage compared to their married counterparts in terms of economic security and health. Figure 2.1.4 shows that about one in every ten female children (15-17 years) have ever been married while the corresponding proportion for their male counterparts was less than one percent implying the big sex differentials of age at marriage.

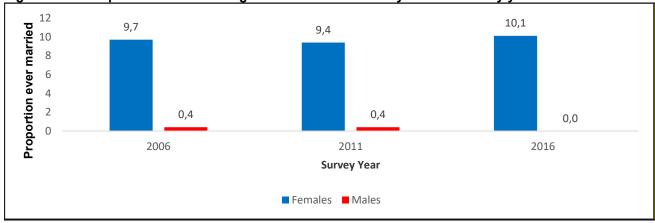

Figure 2.1.4: Proportion of Children aged 15-17 ever married by sex and survey year

# Widowhood

Table 2.1.4 presents the widowhood rates of the population 15 years and above. Overall, the widowhood rates among persons aged 60 years and above slightly increased from 36 percent in 2012/13 to 38

percent in 2016/17. The proportion of women aged 60 years and above who were widowed in the two survey years was nearly 59 percent, about 10 times that of their male counterparts. This is partly explained by the fact that men are more likely to remarry if they lose their loved ones compared to women.

	<b>WIGOWIIOOU I</b>	ndownood rates by sex, age group and survey year						
		2012/13			2016/17

Table 2.1.4: Widowhood rates by sex, age group and survey year

Source: UNHS, 2012/13, 2016/17

#### 2.1.5 Fertility

The Total Fertility Rate (TFR) refers to the average number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the agespecific fertility rates of a given period. Figure 2.1.5 shows that the fertility levels in Uganda have declined over time. The TFR declined from 7 children per woman to 5 children per woman between 1995 and 2016.

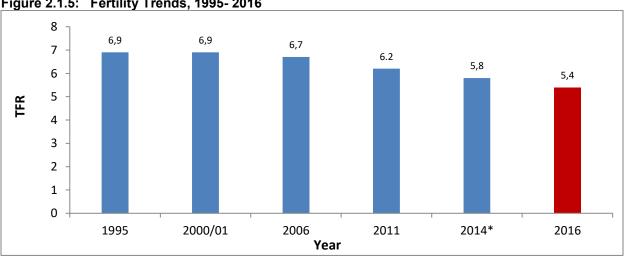

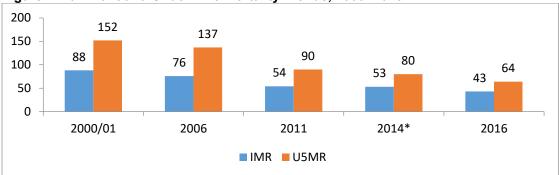

Figure 2.1.5: Fertility Trends, 1995- 2016

Source: UDHS Data (1995, 2000/2001, 2006, 2011, 2016) \* Population and Housing Census Data (2014)

# 2.1.6 Mortality

Figure 2.1.6 presents the trend of the Infant Mortality Rate (IMR) and Under Five Mortality (U5MR) from 2000/01 to 2016. Infant mortality is the probability of dying between birth and exactly one year of age, expressed per 1,000 live births while Under Five Mortality is the probability of dying between birth and less than five years of age expressed per 1,000 live births. The IMR and U5MR between 2000 and 2016 declined by more than half, dropping from 88 to 43 deaths per 1000 live births and from 152 to 64 deaths per 1,000 live births respectively.

Source: UDHS of 1995, 2000/2001, 2006, 2011, 2016 and National Population and Housing Census 2014

# 2.1.7 Life Expectancy at Birth

Life expectancy at birth is an estimate of the average number of years a person is expected to live if a particular pattern of mortality is maintained. Table 2.1.5 shows that, overall, life expectancy at birth in 2014 was 63.7 years. As expected, males registered a lower life expectancy (62.8 years) compared to their female counterparts (64.5 years). Between 2002 and 2014 there was a gain of about 13 years in life expectancy which could be attributed to the improvement in the childhood moratlity rates.

Census Year	Male	Female	Total
1969	46.0	47.0	46.5
1991	45.7	50.5	48.1
2002	48.8	52.0	50.4
2014	62.8	64.5	63.7

Table 2.1.5:Life Expectancy at Birth by Census Year 1969- 2014

Source: Uganda Bureau of statistics.

# 2.1.8 Households

Uganda is administratively at macro level divided into districts, counties/municipalities, subcounties/town councils, parishes/wards and villages/cells. At micro level, there is a household which is referred to as a group of persons who normally eat and live together, with one responsible person regarded as head. During the 2014 National Population and Housing Census (NPHC) there were 7.3 million households. They are projected to be about 9.3 million households by mid-year 2021

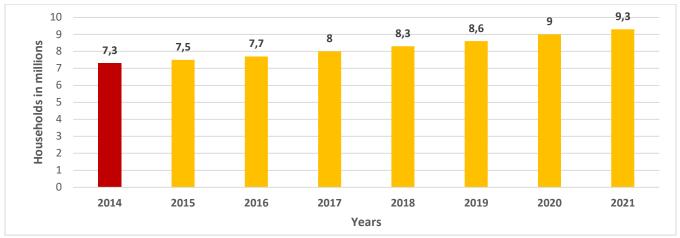

Figure 2.1.7: Census and projected Households (2014-2021)

# 2.2 Education

Uganda's education system is comprised of an early childhood programme that caters for children aged 3-5 years (pre-primary education), followed by seven (7) years of primary education, followed by four (4) years of Ordinary (O) Level secondary education, two (2) years of Advanced (A) Level secondary education and the final tier is three (3) to five (5) years of Tertiary education. Each level is nationally examined and successful candidates are awarded with certificates.

# 2.2.1 Pre-Primary School Education

Pre-primary education offers Early Childhood Care and Education (ECCE). The official school going age for pre-primary is 3-5 years. The enrolment at Pre-primary level decreased by 10 percent from 18 percent in 2016 to 8 percent in 2017 as presented in Table 2.2.1. Over the years, 2013 to 2017, the number of females enrolled in pre-primary has been more than that of males. The Pupil Classroom Ratio (PCR) and Pupil Teacher Ratio (PTR) stood at 27 and 22, respectively in 2017.

Table 2.2.1 Trends of selected Pre-Primary Education Indicators, 2013-2017						
Indicator	2013	2014	2015	2016	2017

### 2.2.1.1 Teachers' qualification

Figure 2.2.1 shows that the majority of the pre-primary teachers of the pre-primary teachers that declared their qualification had a diploma in nursery school teaching (60%), those with a certificate in nursery teaching and grade II accounted for 9 percent each individually.

#### Figure 2.2.1 Pre-primary teachers by qualification, 2017

\*Others include Grade III Teacher, Grade V Teacher including DSNE (Diploma in Special Needs Education), Diploma in Secondary Education (DSE), DTE- Diploma in Tertiary Education, Graduate Teacher, Trained care giver and DPE (Diploma in Primary Education)

# 2.2.2 Primary School Education

Primary school enrolment refers to the number of pupils attending primary school in a given time period irrespective of age. The primary enrolment increased from 8.5 million in 2013 to about 8.8 million pupils in 2017, as shown in Table 2.2.2. The number of teachers has been increasing over the years, from about

186,000 in 2013 to 207,000 in 2017. The Pupil Teacher Ratio (PTR) has remained constant, though, at 43 pupils per teacher since 2015.

Indicator	2013	2014	2015	2016	2017
Gross Enrolment Ratio	113	117	109	112	111

#### 2.2.2.1 Pupil Enrolment

Table 2.2.3 shows that enrollment decreases as pupils' progress to higher classes. In 2017, enrolment decreased from about 2.0 million in P.1 to about 0.62 million in P.7.

		,	2215	2212	0047
Class	2013	2014	2015	2016	2017
Primary 1	1,883,803	1,932,489	1,842,006	1,888,847	1,965,606
Primary 2	1,307,745	1,349,233	1,277,974	1,352,893	1,365,311

Source: Annual School Census, Ministry of Education and Sports, 2013-2017

#### 2.2.2.2 Sitting space

Adequate sitting space refers to at most three pupils per standard desk. Table 2.2.4 shows that in 2017, more than two thirds (67 percent) of the pupils enrolled in primary had adequate sitting space. The share of pupils with adequate sitting space increased with the level of class.

Table 2.2.4: Primary school pupils with adequate sitting space by class, 2017

Class	Enrolment in 2017	Pupils with adequate space	Share of pupils with adequate space total Enrolment
Primary 1	1,965,606	1,071,795	54.5
Primary 2	1,365,311	862,380	63.2

Primary 3	1,377,947	919,042	66.7
Primary 4	1,365,908	953,670	69.8
Primary 5	1,170,640	868,778	74.2
Primary 6	971,231	754,340	77.7

Total	8,840,589	5,956,151	67.4

Source: Annual School Census, Ministry of Education and Sports, 2017

### 2.2.2.3 Primary Leaving Examinations (PLE) Performance

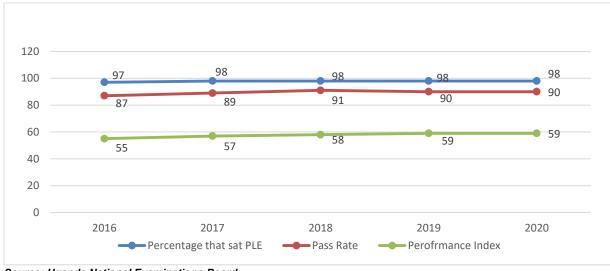

Passing PLE is a requirement for one to transit to the first grade of secondary education (S.1). The majority (46 percent) of the pupils who sat for PLE passed in Division II, about 75,000 pupils failed (DIV U) while of the pupils that registered for PLE 12,792 (DIV X) did not sit for the examinations.

Indicator	Male	Female —	<u>Total</u>	
Indicator	Wale	remaie —	Percentage	Numbers
Pupils who registered	47.2	52.8	100	747,580
Pupils Who Sat for PLE	47.2	52.8	100	734,788
Pupils who passed PLE	47.9	52.1	100	659,910
DIV I	54.8	45.2	100	81,864
DIV II	49.0	51.0	100	334,711
DIV III	43.6	56.4	100	146,142
DIV IV	44.7	55.3	100	97,193
DIV U	41.3	58.7	100	74,878
DIV X	46.4	53.6	100	12,792
Pass Rate (Percent)	91%	89%	-	90%
Performance index*	61%	57%	-	59%

Source: Uganda National Examinations Board \*The Performance index measures the quality of passing at all levels of education and is computed as the (Number in Div. I multiplied by 20) + (Number in Div II multipled by 15) + (Number in Div III multiplied by 10) + (Number in Div IV multiplied by 5) + (Number in Div U multiplied by 0)) all Divided by (Total that Sat PLE multiplied by 20)

Between 2019 and 2020, the pass rate remained constant at 90 percent. The performance index was also constant at 59 percent for the same period. There was no change in the proportions of pupils that sat for PLE.

Figure 2.2.2: Trend of Proportion of pupils that sat for PLE, Pass rate and Performance index in primary, 2016-2020

Source: Uganda National Examinations Board \*obtained Div I, II, III and IV

### 2.2.2.4 Primary Completion and Transition Rate

In 2017, more than half (60 percent) of the primary school pupils completed P.7 while the transition rate to S1 stood at 61 percent, as seen in Table 2.2.6. There were minimal variations by sex for the two variables.

Indicator	2013	2014	2015	2016	2017
P.7 Completion rate*					
Boys	68.00	72.00	59.80	59.70	59.3
Girls	67.00	72.00	63.30	63.40	60.0
Total	67.40	72.00	61.60	61.50	60.0
Transition rate to S1					
Boys	72.30	70.50	62.80	64.40	60.8
Girls	72.00	70.50	63.60	65.20	60.5
Total	72.20	70.50	63.20	64.80	60.6

 Table 2.2.6:
 P.7 completion and Transition rates to S.1 by years ; 2013-2017

Source: Annual School Census, Ministry of Education and Sports, 2013-2017

\*It is calculated by taking the total number of students in the last grade of primary school, minus the number of repeaters in that grade, divided by the total number of children of official graduation age.

### 2.2.2.5 Teachers' qualification

More than half (61 percent) of the primary school teachers were Grade III Teachers, followed by those with a Diploma in Primary Education (15 percent) as shown in Table 2.2.7.

#### Table 2.2.7: Primary teachers by level of qualification and sex, 2017

Teacher Qualification	Sex			Percentage to total number of teachers
	Female	Male	Total	
DPE (Diploma in Primary Education)	13,220	18,168	31,388	15.1
Grade II Teacher	286	234	520	0.3

Total	89,256	117,982	207,238	100

Source: Annual School Census, Ministry of Education and Sports, 2017

### 2.2.3 Secondary School Education

Secondary school enrolment reduced by six percent from about 1,458 ,000 in 2016 to 1,371,000 in 2017 while the Student Teacher Ratio (STR) dropped to 21 in 2017 from 22 in 2016. The Student Classroom Ratio also improved to 49 from 51 in 2016 as shown in Table 2.2.8. This implies that the number of students per classroom and the number of students per teacher are reducing.

Indicator	2013	2014	2015	2016	2017
Gross Enrolment rate	29	30	25	27	25
Net Enrolment Ratio	26	26	22	24	22

#### 2.2.3.1 Student Enrolment by class

Table 2.2.9 shows that enrollment decreases as students' progress to higher classes. In 2017, enrolment decreased from 347,529 (Senior One) to 67,611 (Senior Six). A similar pattern was observed for the previous years

Year	Senior 1	Senior 2	Senior 3	Senior 4	Senior 5	Senior 6	Total
2013	346,537	305,501	284,919	250,274	85,760	89,448	1,362,439
2014	348,701	327,016	289,219	268,253	76,649	81,412	1,391,250
2015	326,591	299,262	279,851	242,248	70,317	65,739	1,284,008

#### 2.2.3.2 Teachers' Qualification

Table 2.2.10 shows that the majority (46 percent) of the secondary School Teachers were Graduates. About 37 percent of the teachers were Grade V Teachers. The proportions of Licensed Teachers were less than one percent

Table 2.2.10: Secondary teachers by	level of qualification and sex, 2017
-------------------------------------	--------------------------------------

Qualification		Percentage		
	Female	Male	Total	
Graduate Teacher	8,366	21,642	30,008	46.2

# 2.2.3.3 Uganda Certificate of Education (UCE) Performance

Uganda Certificate of Education (UCE) refers to the examination that is given at the end of the first four years of secondary school education (Senior Four), while the Uganda Advanced Certificate of Education (UACE) refers to the examination given at the end of secondary school education cycle (Senior Six). Out of the 332,553 candidates who registered for the UCE in 2020, only 329,745 sat the examinations while 2,808 candidates did not sit the examination.

The majority of those students who sat the examination passed in Division 4 (120,055). Another 18,415 students totally failed to qualify for any UCE. The performance index increased to 49 percent in 2020 as compared to 44 percent in 2019.

Indiantor	Mala	Female	Total	
Indicator	Male	remale	Percentage	Numbers
Students who registered	50.0	50.0	100	332553
Students Who Sat for UCE	50.0	50.0	100	329745
Students who didn't sit	53.2	46.8	100	2808
Students who passed	50.4	49.6	100	311330
Division 1	59.1	40.9	100	40,038
Division 2	54.1	45.9	100	69,805
Division 3	50.1	49.9	100	81,432
Division 4	45.5	54.5	100	120,055
Division U	43.4	56.6	100	18,415
Division X	53.2	46.8	100	2,808
Pass Rate	95%	94%		94%
Performance Index*	52%	47%		49%

#### Table 2.2.11: Uganda Certificate of Education (UCE) results by grade and sex, 2020

\*The Performance index measures the quality of passing at all levels of education and is computed as the (Number in Div. I multiplied by 20) + (Number in Div II multiplied by 15) + (Number in Div III multiplied by 10) + (Number in Div IV multiplied by 5) + (Number in Div U multiplied by 0)) all Divided by (Total that Sat UCE multiplied by 20) Source:MoES/UNEB, 2019

Almost all (99 percent) of the students who registered for UCE exams in 2020, sat for the examinations. Figure 2.2.3 shows that the performance index increased from 44 percent in 2019 to 49 percent in 2020. The pass rate also increased to 94 percent in 2020 from 92 percent in 2019.

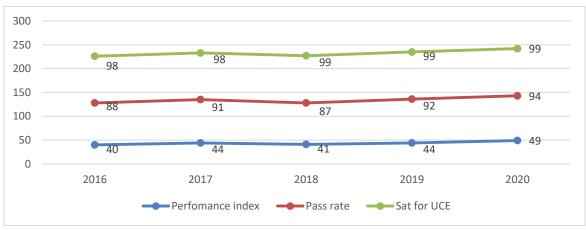

Figure 2.2.3: Trend in proportion of students who sat for Uganda Certificate of Education (UCE), pass rate and performance index, 2016-2020

Source: UNEB, 2016 -2020

#### 2.2.3.4 Uganda Advanced Certificate of Education (UACE) Performance

Over the five-year period 2014-2018, the proportions of students that sat and passed UACE was nearly universal (above 99 percent) as shown in Table 2.2.12.

	Students who registered		Students who sat					
Year	Did not	Sat for	Tota	al			Tota	al
	sit for UACE	UACE	Percentag e	Number	Passed*	Failed**	Percentage	Number
2014	1.0	99.0	100.0	108,263	98.5	1.5	100.0	107,153
2015	1.4	98.6	100.0	101,072	98.3	1.7	100.0	99,649
2016	1.4	98.6	100.0	104,318	98.9	1.1	100.0	102,859
2017	1.2	98.8	100.0	101,190	98.9	1.1	100.0	99,987
2018	1.0	99.0	100.0	99,580	99.1	0.9	100.0	98,545

#### 2.2.3.5 S.4 Completion and Transition Rate to S.5; 2013-2016

Ordinary Level Secondary (S1-S4) completion rate is computed as the total number of students in the fourth grade (S4) of secondary education divided by the total number of children of official completion age (16 years). It captures the transition rate from primary to secondary schooling. Table 2.2.13 shows that the transition rate to Senior Five (S5) in 2017 was 25 percent, a decrease from 30 percent in 2016. In both instances, males were more likely to complete S.4 as well as transition to S.5 compared to their female counterparts.

Table 2.2.13: S.4 completion and Transition rates to S.

#### 2.2.3.6 Orphans

The Annual School Census considers an orphan as a child below 18 years of age who has lost either one or both parents. In 2017, orphans accounted for 8 percent of the pre-primary enrolment - a slightly lower percentage from that of 2016 (9%) as reflected in Table 2.2.14. The share of orphans to primary school enrollment in 2017 was 12 percent, a similar proportion for 2016 and 2015. About 17 percent of the students enrolled into secondary school education in 2017 were orphans, which was one percentage point less than the 2016 proportion. Details on number of orphans by sex, education level for 2013-2017 are in Appendix Table 2.2. L.

Education Level	Sex	2013	2014	2015	2016	2017
Pre-Primary	Male	20,608	20,759	16,188	24,875	24,996
	Female	19,404	19,563	15,332	23,403	23,339
	Total	40,012	40,322	31,520	48,278	48,335
Primary	Male	628,287	587,868	485,475	543,791	528,248
-	Female	609,144	568,988	471,497	529,778	513,958
	Total	1,237,431	1,156,856	956,972	1,073,569	1,042,206
Secondary	Male	132,600	133,131	109,741	119,426	117,442

#### 2.2.3.7 The National Assessment of Progress in Education (NAPE) competence scores

Educational assessment seeks to determine how well students are learning and is an integral part of the quest for improved education. It provides feedback to students, educators, parents, policy makers, and the public about the effectiveness of educational services1. The National Assessment of Progress in Education (NAPE) tests for pupils' competencies in Literacy, Numeracy and Biology for secondary students only.

Table 2.2.15 shows an increasing trend in the literacy rate for P.3 pupils although there was a 4 percent decline from 2014 to 2015. The literacy rate was higher for girls compared to boys. On the other hand, the P.6 Literacy rate declined from 2013-2014 though a 14 percent increase was observed between 2014 and 2015. The Numeracy rate for P.3 pupils increased from 69 percent in 2013 to 72 percent in 2016. However, a notable decline was observed in the Numeracy rate for P.6 pupils from 41 percent in 2013 to 53 percent in 2015.

#### 2.2.4 **Tertiary Education**

Table 2.2.16 indicates that in 2016 the enrolment at tertiary level was about 259,000, of which 72 percent were in universities. The proportion of males (56 percent) enrolled in higher institutions was higher than that of females (44 percent). In terms of trends, enrolment at the tertiary level increased from about 201,376 in 2013 to 258,866 students in 2016

#### Table 2.2.16: Tertiary Enrolment by Sex, 2013-2016

The Business Technical and Vocational Education and Training (BTVET) sector aims at addressing the technical skills gap in the country and provides skills to persons that completed or dropped out of school (at any level) as well as unemployed youths. The BTVET enrolment decreased to 45,153 in 2017 from 63.209 in 2016.

# 2.2.5 Literacy

The literacy rate was obtained from household-based surveys and the 2014 National Population Household Census (NPHC), with no assessments undertaken. The literacy rate among persons aged 10 years and above has generally increased between 2009 and 2017, with about seven in every ten (70 percent) of the population aged 10 years and above being literate. Males (77 percent) were found to be more literate than their Female (70 percent) counterparts, as presented in Table 2.2.18

YEARS	Urban	Rural	Total

# 2.3 Labour Statistics

Labour statistics are vital in the measurement of economic growth and development of a nation. These statistics provide indicators on the proportion of persons who during a specified period contributed to the production of goods and provision of services in the country and their characteristics. This chapter, therefore, presents statistics on selected Labour market indicators while observing trends for some key indicators.

# 2.3.1 Work concept

Work comprises any activity performed by persons of any sex and age to produce goods or to provide services for use by others or for own use. The concept of work is aligned with the General production boundary as defined in the System of National Accounts 2008 (SNA, 2008). Working population, therefore, is the population within the working age that was engaged in the production of goods and provision of services for others or own final use. The Working Age Population (WAP) is a measure of the total number of potential workers within the economy and it is set at 14-64 years for Uganda.

# 2.3.2 Key Labour Market Indicators of the Working Population

Table 2.3.1 presents a trend in selected Key Labour Market Indicators for the period FY2016/17 and FY2019/20. The total working population was estimated at 15.9 million persons in 2019/20; an increase from 15.1 million persons in 2016/17. There was an increase in the proportion of working persons in purely subsistence agriculture from 39% in FY2016/17 to about 48% in FY2019/20. Over the years, the proportion of females working in purely subsistence agriculture has remained higher than males. See Appendix Table 2.3A for details.

Selected Labour	UNHS 2016/17			UNHS 2019/20		
Market Indicators	Male	Female	Total	Male	Female	Total

Table 2.3.1.	Rey Labour Man	ver mulcators c	JI WORKING PO	opulation (	14-04	years) D	y sex and residence

Source: UBOS

As presented in Table 2.3.2, in both FY2016/17 and FY2019/20, there was an equal share of working females (nearly 50%) and males (50%). Regional disaggregation of the working population showed that the Western region had the highest (26.5%) share of the working population in 2019/20, while the Northern region had the lowest (19.1%). The working population increased by 5.3% between 2016/17 and 2019/20.

#### 2.3.2.1 Industry of the main job for the working population

The 2019/20 Uganda National Household Survey (UNHS) revealed that the highest percentage of the working population (68%) was engaged in Agriculture, forestry and fishing industry. Trade was the second predominant industry of the working population, with a workforce share of 10 percent. This pattern was similar to the one observed in 2016/17 (Table 2.3.3).

	UNHS 2016/17	UNHS 2019/20			
Male	Female	Total	Male	Female	Total
58.5	70.5	64.6	63.0	73.1	68.1

Table 2.3.3: Distribution of the Working Population by Industry (%)

## 2.3.3 Key Labour Market Indicators of the employed population

Employment refers to the current supply of labour for the production of goods and services in exchange for pay or profit. This implies that work was done as part of a transaction in exchange for payment in form of wages or salaries for time worked or work done or in the form of profits derived from the goods produced and services provided through market transactions.

## 2.3.3.1 Background characteristics of the population in employment

The percentage of population in employment in Uganda decreased from 9 million persons in 2016/17 to 8.3million in 2019/20 (Table 2.3.4). This can be attributed to the global pandemic in which many employed persons lost their jobs or were compelled to close their business. The proportion of females in employment was lower than that of the males throughout the reference periods. Residential differences

showed that the proportion of population in employment living in urban areas increased from 35 percent in 2016/17 to about 36 percent in 2019/20.

Peakaround Characteristics	UNHS	2016/17	UNHS 2019/20

Table 2.3.4: Distribution of the Employed Population by selected Background characteristics and survey year (%)

## 2.3.3.1 Employment-to-Population Ratio (EPR)

The Employment-to-Population Ratio (EPR) is the proportion of the working age population that is employed. High Population-to-Employment Ratios imply that a large proportion of the population is employed, while a low ratio means that a large share of the population is either unemployed or out of the labour force. The indicator measures the extent of employment creation in the economy. Changes in the EPR reflect net changes in the number of the employed relative to changes in the working age population.

The EPR during the period 2019/20 was 38.8 percent implying that less than half of the Working Age Population was employed in 2019/20. The EPR was higher for males and for residents of urban areas compared to females and rural residents for all the survey years. The EPR increased with increasing age (Table 2.3.5). See appendix table 2.3B for details.

#### 2.3.3.2 Status in employment

Table 2.3.6 presents status in employment aligned to Resolutions of the 20<sup>th</sup> International Conference of Labour Statisticians (ICLS). The table shows that the majority (42%) of the employed population were independent workers without employees. These were followed by employees accounting for forty percent of the population in employment. About one in every ten of the employed persons were contributing family workers. Analysis by sex showed that whereas most of the males (46%) were employees, majority of the females (47%) were Independent workers without employees. On the other hand, the majority of the rural residents (44%) were Independent workers without employees as opposed to their urban counterparts who were mainly employees (44%). Additionally, the majority of those who completed secondary and higher education levels were employees. See appendix table 2.3C for details.

Table 2.3.6: Percentage distribution of the population in employment by Status in Employment, (%), 2019/20

#### 2.3.3.3 Industry and Sector of the Employed population

The findings presented in Table 2.3.7 indicate that agriculture, forestry and fishing was the predominant industry of employment with a share of 39.6 percent in 2019/20. This was an increase from about 36 percent in 2016/17. This was followed by sales, maintenance, repair of vehicles and personal goods (combined as trade) which employed 20 percent. See appendix table 2.3D for details.

	S	ex	Residen	се	National	UNHS
Industry of employment	Male	Female	Urban	Rural	2019/20	2016/17
Agriculture, forestry	39.8	39.2	18.6	51.1	39.6	35.7

Total	100	100	100	100	100	100
Number '000	4,835	3,447	2,940	5,342	8,282	9,071

Table 2.3.7: Industry for Persons in Employment (14-64 years),

## The industries are grouped into the three broad economic sectors of the economy. Those are:

- 1. Agriculture, forestry and fishing
- 2. Services, including market services (Trade, transportation, accommodation and food, business and administrative services) and non-market services (public administration, community, social and other services and activities)
- 3. Production, including manufacturing, construction, mining and quarrying, electricity, gas and water supply.

Figure 2.3.1 shows that in 2019/20, the majority of the population in employment (46%) was in Services sector while 40 percent were employed in the Agricultural sector. Only 14 percent of the employed population was in the production sector. Whereas more rural residents were employed in the Agricultural sector, more urban residents were employed in the Services sector.

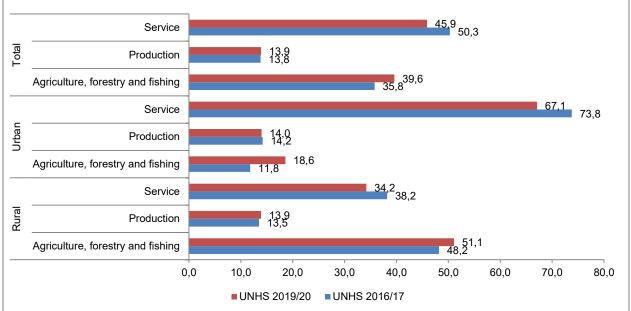

Figure 2.3.1: Percentage distribution of employed population by Sectors of employment in the main job and residence

## 2.3.3.4 Occupation of the Employed population

Occupation refers to the tasks or duties or job a person usually pursues to earn income in form of pay or profit. The findings in Table 2.3.8 show that overall, skilled agricultural, forestry and fishery workers had the highest proportion of the employed population (25%) followed by Service and sales workers (24%) in 2019/20. The results further show that the proportion of persons employed in occupations requiring high qualifications such as technicians and associate professionals was low (6.3% and below) with negligible gender disparities observed. See appendix table 2.3.E for details.

Occupations	Se	ex	Resid	ence	National
of the main job	Male	Female	Rural	Urban	National
UNHS 2019/20					
Skilled agricultural, forestry and fishery workers	25.2	24.9	12.6	32	25.1
Service and sales workers	17.7	33.7	34.8	18.5	24.3
Elementary occupations	23.3	20.9	17.6	24.8	22.3
Craft and related trades workers	11.8	9.7	10.9	10.9	10.9
Professionals	6.7	5.6	8.6	4.9	6.3

Table 2.3.8: Occupation of the employed population aged 14-64 years by sex and Residence, percent

## 2.3.3.4 Education Status of the Employed population

The results in Table 2.3.9 indicate that the education level attained by the majority of persons in employment was low with less than a third of the employed persons (25%) having completed either secondary or post-primary/secondary training. See appendix table 2.3F for details.

Education Level attained	Ма	le	Fem	ale	Total

## 2.3.3.5 Median Monthly wages for paid employees

Table 2.3.10 shows that the median cash earnings (nominal) for an employee in Uganda was UGX. 200,000 in 2019/20; an increase from UGX 176,000 in 2016/17. Sex differentials showed that males earned more than twice (UGX 250,000) as much as their female counterparts (UGX 120,000). On the other hand, employees in the urban area earned more than double (UGX 300,000) what employees in the rural areas earned (UGX 130,000). Additionally, employees in the public sector earned more (UGX 510,000) than those in the private sector (UGX 150,000).

Real earnings are nominal earnings deflated using the Consumer Price Index (CPI) in relation to the base year. In real terms, the overall median monthly earnings in 2019/20 was UGX 183.385. This was a 71 percentage increase from UGX 107,233 recorded in 2016/17 as presented in table 2.3.10. See appendix table 2.3 G for details.

 Table 2.3.10: Median Monthly Wages (main job) for Persons 14-64 Years in Paid Employment, 2016/17 and

 2019/20

NB: (CPI 2019/20=109.06 with base =)

#### 2.3.3.4 Working Poor

The working poor refer to working people whose household expenditure (as a proxy for income) falls below the Poverty Line. Figure 2.3.2 shows that 17 percent of the working population were living in poor households with the majority (22%) working in the agricultural sector.

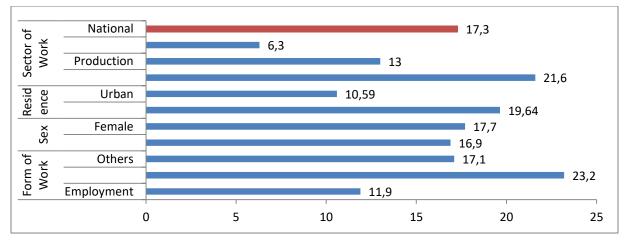

Figure 2.3.2: Proportion of the Working Population who lived in Poor Households, 2019/20

## **Employed poor**

The employed poor refer to employed people whose household expenditure (as a proxy for income) falls below the Poverty Line. According to the 2019/20 UNHS, about 12 percent of persons in employment were living in poor households a decrease from 13 percent reported during the period 2016/17 (Table 2.3.11).

Background	UNHS	UNHS	UNHS
characteristics	2012/13	2016/17	2019/20
Sex			
Male	15.2	13.3	11.4
Female	19.6	13.2	12.5
Residence			
Rural	22.2	17.4	15.2
Urban	6.5	5.3	5.7
Sector of employment			
Agriculture	29.4	22.3	17.9
Production	16.5	14.7	13.0
Services	8.4	6.7	6.3
Total	17.2	13.3	11.9

Table 2.3.11: Proportion of the Employed Population who lived in Poor Households, 2012/13 – 2019/20

## 2.3.3.6 Share of Women in Employment

The results in Figure 2.3.3 show that as the education levels increased the share of women in employment decreased, i.e. the proportions of women with low education levels who were in employment was higher compared to the proportion of women with subsequent high levels of education. While almost two thirds (64 percent) of women of working age who had no formal education were in employment in 2019/20, the share decreased to 35 percent among those with the highest education level of post-secondary and above.

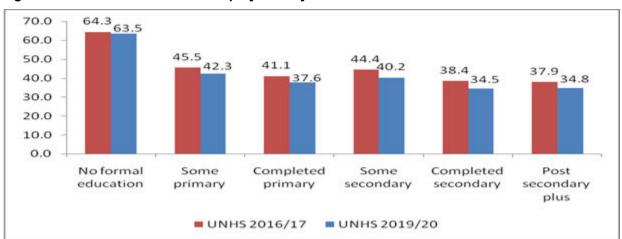

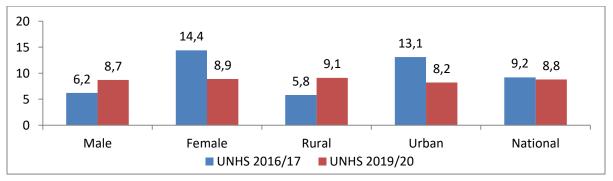

Figure 2.3.1: Share of Women in Employment by Education Level Attained

## 2.3.4 Unemployment

Unemployment refers to a condition in which one is not in employment but was actively looking for work and available to work. The unemployment rate therefore is the proportion of the unemployed population to the total labour force. The overall unemployment rate was 8.8 percent in 2019/20, a decrease from 9.2 percent registered in 2016/17 (Figure 2.3.4). The unemployment rate was higher in the rural (9.1%) compared to urban areas (8.2%) in 2019/20 contrary to what was reported in 2016/17. See appendix table 2.3B for details.

#### 2.3.4.1 Key Labour Market Indicators of the Youth (18-30 years) population

Table 2.3.12 below presents a trend in key labour market indicators for persons aged 18-30years (the youth). The table shows that composite measure of youth labour underutilisation was 43.5 percent. The unemployment rate of the youth was 13.0 percent, which is higher than the national rate (10%). Youth activity status as shown in Table 2.3.12 below reveals that almost half (47%) of the youth were neither in employment nor in education training (NEET), with more females (35%) than males (35%) in NEET. It can also be noted that half of the youth in employment had acquired education levels matching those required on their main job.

Table 2.3.12: Selected labour market indicators of the Youth Population (18-30 years),

## 2.3.5 Activities of Children

Key findings on main activities of children in Uganda are presented in this section based on the UNHS 2019/20. Table 2.3.13 shows that more than one half (59.8 %) of all children aged 6-17 years attended school exclusively, while another one quarter (28.2 percent) combined working and attending school at the same time. It is also estimated that 7.0% of the children 6-17 years were neither involved in economic activities nor at school.

 Characteristics, 2019/20

## 2.3.6 Child Labour

Child Labour is defined in the Ugandan National Child Labour Policy as work that is hazardous or exploitative and threatens the health, safety, physical growth and mental development of children<sup>1</sup> and therefore constitutes an urgent policy priority. Children are considered child labourers if they are:

- a) Aged 5-11 years and they are at work yet they are not expected to work.
- b) Aged 12-13 years doing work other than 'light work' or do work beyond 14 hours a week; and
- c) Aged 14-17 years involved in hazardous forms of labour or working for an equivalent of 43 hours in a week or beyond.

The estimate of child labour in this section is in accordance with national legislation and includes all atwork 5-11 year-olds, 12-13 year-olds working children except those in light work, and all 14-17 year olds in hazardous work or working excessive hours<sup>2</sup>. As presented in table 2.3.14, a total of 2.7 million children (5-17 years) were engaged in some form of child labour in 2019/20. These constituted 17.5 percent of all children nationally. Additional characteristics of work that children aged 5-17 years were engaged in 2019/20 are presented in Table 2.3.14.

<sup>&</sup>lt;sup>1</sup> National Child Labour Policy (2006), MoGLSD, Uganda

<sup>2</sup>A list of hazardous forms of labour was compiled following the adoption of the National Labour Policy in 2006.

 background characteristics

Source: UNHS 2019/20

It can be seen from Figure 2.3.5 below that the rate of Child Labour estimates excluding household chores increased for children aged 5-17 years from 16 percent in 2011/12 to about eighteen percent in 2019/20.

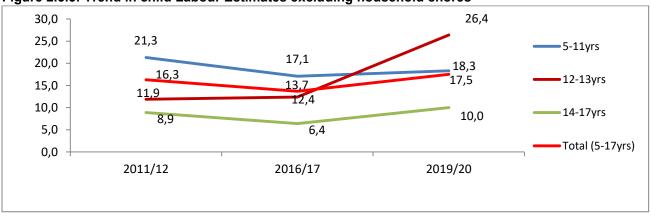

Figure 2.3.5: Trend in child Labour Estimates excluding household chores

Source: NLFS 2011/12, UNHS 2016/17 and UNHS 2019/20

Table 2.3.15 presents child labour rates including household chores for all at-work 5-11-year-olds, 12-13-year-olds working children including those in light work, all 14-17-year olds in hazardous work or working excessive hours<sup>3</sup> and all children 5-17 years. The table also shows that out of a total of 15.4 million children (5-17 years), about 4.4 million were engaged in some form of child labour in 2019/20 when household chores are included. These constituted 28.2 percent of all children nationally.

<sup>3</sup>A list of hazardous forms of labour was compiled following the adoption of the National Labour Policy in 2006.

## 2.3.6 Employment in the Civil Service

The Ministry of Public Service is mandated to "develop, manage and administer human resource policies, management systems, procedures and structure for the public service" in Uganda. This section provides civil service employment statistics from the Ministry of Public Service.

## 2.3.6.1 Size of the civil service

Employment in the civil service is composed of persons employed in the traditional civil service MDA's, the teaching service (primary, secondary and Tertiary Institutions), police, prisons, public universities and staff in Local Governments (health workers and other traditional civil servants). The average size of the civil service as at December 2020 was 329,633 persons as indicated in Table 2.3.16. This was a slight increase (3 %) compared to the size in 2019. The highest increase was registered in the Police and Prisons service (11.3%) while the teaching service registered the lowest increase (0.5 %). The results indicate that there was a slight increase in the number of employees in all categories between 2019 and 2020.

#### Table 2.3.15: Size of the Civil Service, 2016-2020

Groups	2016	2017	2018	2019	2020	%age change
Traditional civil service <sup>4</sup>	22,965	21,734	22,145	22,312	22,642	1.5

Source: Ministry of Public Service.

<sup>4</sup> Includes support staff

## 2.3.6.2 Sex composition of the civil service

Table 2.3.17 reveals that overall, the share of females in civil service was 37.9 percent in 2020, and the proportion was almost similar in comparison with 2019. The proportion of females was lower than that of males in all the groups and the gap was widest among the police and prisons group in both years.

		20 <sup>-</sup>	19		2020				
Group	Female	Male	Total	%	Female	Male	Total	%	
				Female				Female	
Tradition service	10,259	12,053	22,312	46.0	10,373	12,269	22,642	45.8	
Teaching service	66,831	103,089	169,920	39.3	67,718	103,073	170,791	39.6	
Police and prisons	11,051	39,504	50,555	21.9	12,501	43,780	56,281	22.2

Total	121,013	199,060	320,073	37.8	124,865	204,768	329,633	37.9	

#### 2.3.6.3 Average wage bill of the civil service

The results in Table 2.3.18 indicate that average monthly wage bill of the civil service in 2020 was UGX. Shs 276 Billion which increased from UGX. Shs 262 Billion in 2019. Over the years, the highest share (41%) of the total average monthly wage bill was on teaching service. This was a reduction from the 42.8 percent share reported in 2019. However, the share of the public universities wage bill increased to 12.9 percent during 2020 from the 11.9 percent in 2019.

#### 2.3.6.4 Composition of the civil service pensions

The average monthly civil service pensions increased from Uganda Shillings 20.3 Billion in 2019 to Uganda Shillings 24.0 Billion in 2020. The largest share went to the traditional civil service (Uganda Shillings 14.6 Billion) while the teachers received 9.4 Billion in the year 2020.

## 2.3.7 Social Security

The National Social Security Fund (NSSF) is National Saving Scheme is mandated by Government through the National Social Security Fund Act, Cap 222 (Laws of Uganda) to provide social security services to employees in Uganda. It was established by an Act of Parliament (1985) to provide for its membership, payment of contributions to, and payment of benefits out of the Fund. NSSF is a provident fund (pays out contributions in lump sum). It covers all employees in the country that are not covered by the Government's pension scheme. It is a scheme instituted for the protection of employees against the uncertainties of social and economic life. Table 2.3.20 shows that there were 74,624 annual subscribers with more males than female employees. There has, however, been a decrease in annual subscribers over the years from about 127,000 in 2018 to 123, 000 in 2019 and 74,000 in 2020.

Source: NSSF

Table 2.3.18 shows the number of annual subscribers for all Sectors by sex in last three years. The total number of subscribers has been dropping for the last three years from 126,808 in 2018 to 122,875 in 2019 and 74,624 in 2020. The male subscribers have been consistently higher than females in all the three years. In the year 2020, the Manufacturing and Mining sector had the highest number of subscribers followed by Agriculture, forestry and fishing sector. For the years 2018 and 2019, the Education sector had the highest number of subscribers. In the three years, the highest amount of benefits paid out was in the 2019 (Uganda Shillings 24.4 billion). The Age benefit has had the largest share of benefits paid out for all the three years.

Table2.3.19: Benefits paid out by category and sex (	million shillings)

## 2.3.8 Migrant Workers

Migrant workers refer to workers living outside their country of origin. In this context, definition covers only migration between countries. In this section, the form of work considered is employment and hence "migrant for employment" which refers to a person who migrates from one country to another with a view to being employed otherwise than on his own account and includes any person regularly admitted as a migrant for employment"

## 2.3.8.1 Externalised Migrant Workers

Government started the Labour Externalisation Programme in 2005 and, since then, a number of external labour recruitment companies have been licensed. As shown in Table figure 2.3.6, information from the registered recruitment companies indicates that the total number of Ugandan migrant workers deployed outside increased from 2,539 in 2016 to 25,363 in 2019 and then reduced to 9,026 in 2020. There were more female than male emigrants over the five year period annually.

Figure 2.3.6: Externalized Migrant Workers by Sex, 2016 – 2020

## 2.3.8.2 Destination Countries

Records from registered recruitment companies indicate that out of 63,049 migrant workers deployed from 2016 to 2020, more than half (31,980) were deployed in Saudi Arabia while about half of that number (16,009) were deployed in the United Arab Emirate (UAE). See Table 2.3.22.

Country of Destination	2016	2017	2018	2019	2020	Total

#### 2.3.8.3 Work permits issued to immigrant workers

All foreign nationals intending to work in Uganda are required to obtain a relevant work permit. The permit is a legal document authorising a foreigner to work in a country. In Uganda, it is also referred to as an entry permit<sup>5</sup>. Work permits are issued for a period of 6 months for short term contracts, 1 year up to a maximum of 3 years. There are different categories / classes of work permits with different requirements as shown below;

Class of Permit	Categorization of employment	
Α	Diplomatic/Official Service	
A2	Expatriates in Government service/Government Contractors	
В	Investment in Agriculture	
С	Investment in Mining	
D	Business owners (Business and Trade)	
E	Investment in Manufacturing	
F	Professionals	
G1	Volunteers, NGO Workers and Missionaries	
G2	General Expatriate Employees	

Categorization of employment by Class of Permit

Source: Ministry of Internal Affairs

Table 2.3.23 shows the number of work permits issued in recent years by sex and categories. The number of immigrant workers rose from, 10,852 in 2016 to 16,750 in 2019 but dropped to 9,633 in 2020. The number of permits issued to males has been much higher than those issued to females. Over the years, the category of immigrant workers that were issued the most number of permits was class G which are the General Expatriate Employees with 10,009 permits issued in 2019 and 6,076 in 2020.

Year	Sex				С	lass of Perr	nit				Total

## 2.3.8.4 Immigrant Workers' country of Origin

About one half of the work permits issued in 2019 were to immigrant workers from India and China. This has been the trend since 2016.

## 2.4 Household Expenditure and Poverty

## **Consumption Expenditure per Household**

This chapter provides an update on the changes in poverty and welfare dynamics using the data available for the Uganda National Panel Surveys (UNPS) for between 2005/6 and 2019/20. The chapter further provides insights into some areas of the study and is intended to provoke further analysis of the data by various stakeholders. The information provided is based on a nationally representative longitudinal data on Ugandan residents and describes the ways in which people's lives changed overtime.

#### 2.4.1 Share of Household Expenditure by item group

The trends in the share of each item group in the total household expenditure including non-consumption expenditure are presented in Table 2.4.1. The results show that, overall, the largest share of household expenditure has been on food (40.5%), and this has been the case across the waves; followed by expenditure on housing, water, electricity, gas and other fuel (18.2%) and education (8.6%). Rural-urban variations show that the expenditure share of food is higher for rural areas compared to the urban areas (47% and 33% respectively).

	Residence						
Item Groups	Urban	Rural	Total				
Food	33.2	46.8	40.5				
Non-alcoholic beverages	1.1	0.7	0.9

#### Table 2.4.2: Percentage Household expenditure shares by broad item group, and Residence

Source: UNPS 2019/20

Regional variations in the share of expenditures are evident in Table 2.4.2 as well. Apart from Kampala, the rest of the regions spent over 40 percent of their budget on food. Expenditure on social services such as education and health across the regions in the 2019/20 wave shows that Eastern region leads in expenditure on education (9.2%), followed by Western (7.5%) and the least expenditure is observed in the Northern region (4.4%). Considering the 2018/19 wave, the Northern region leads in health expenditure (4.8%), followed by western and eastern regions (4.2%) while Kampala spends the least on health (2.2%). Across all regions, more than 80 percent of the households' expenditure was on food, housing (rent), fuels & energy, transport & communication, education, health then drinks & tobacco. See table (2.4.2)

## 2.4.2 Share of household food by source

Overall, there is continued decline in the own production between 2016 and 2020, while there is increased dependency on the market as a source of food, as shown in Figure 2.4.1.

Table 2.4.3 shows that the largest percentage of food consumed in Kampala is purchased from the market and this is true for other urban areas. Receipts in form of gifts continued to increase by three and five percentage points respectively in the two regions over the same period.

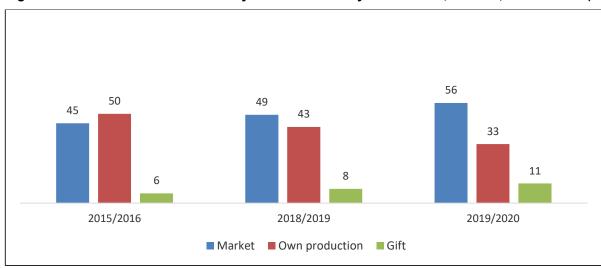

Figure 2.4.1: Trend in Share of food by Source over the years 2015/16, 2018/19, and 2019/20 (%)

## 2.4.3 Income Mobility - Quintile Analysis

Figure 2.4.2 presents the households position on the welfare distribution over the two survey periods. It was found that 76 percent of the households remained in the bottom 40 percent of the wealth quintile while 10 percent where able to remain in the top 60 percent of the wealth quintile over the two survey periods.

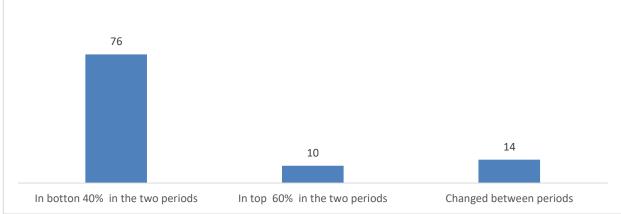

Figure 2.4.2: Consumption Expenditure Mobility by Quintile, 2015/16-2019/20 2015/16-2018/19 (%)

## 2.4.4 Changes in Income Poverty Status (2015/16-2019/20)

In Uganda, poverty has been measured using monetary methods of welfare such as consumption expenditure. However, the multi-dimensional nature of poverty calls for complementary measures to fully understand it. This entails considering a combination of measures of well-being such as along with education, health, vulnerability and deprivation. Besides, panel surveys have demonstrated that poverty is not static. Instead, poor people and indeed poor households change their state depending on several factors. Some stay in poverty over an extended period of time while others move into and out of poverty overtime. This section highlights changes in poverty over the panel survey period. Overall, 10 percent of the households moved out of poverty whereas 7.5 percent slipped into poverty. A large percentage (76%) of the households were never poor compared with the chronically poor (6.5%). In terms of rural urban divide, the proportion of the chronically poor was more in the rural areas compared to the urban areas (7.7% and 3.4% respectively). A higher percentage of households (92.1%) that were never poor was in urban areas compared with the 70 percent of rural areas.

Regional variation shows that the most chronically poor were in the Northern region (15.1%), followed by Eastern region (7.1%), Western (5.6%) and Central (0.4%). The largest proportion of the never poor population was in Central region (94.5%), followed by western region (77.7%), with Northern region at 60.2 percent. The most chronically poor were more likely to be those with no formal education (20.9%) or those with only some primary education (7.9%). There was no difference in chronic poverty between female headed and male headed households, with male headed household slightly better off. (See Table 2.4.4)

	Chronically Poor	Moved Out of Poverty	Moved into Poverty	Never Poor	Total
Sex of household head					
Female	7	10.5	7.2	75.4	100
Male	6.4	9.8	7.6	76.2	100

#### 2.4.5 Household Welfare Correlates

Welfare indicators play a major role in providing reliable data for monitoring changes in the welfare status of various population sub-groups. The findings from the surveys present information on vital needs and living conditions of the same households over two survey periods. The panel rounds of surveys (2015/16 to 2019/20) each asked questions on welfare correlates which were used as proxy indicators for monitoring poverty in Uganda. The welfare indicators measured included ownership of two sets of clothes, a blanket and pair of shoes by household members, average number of meals taken per day and action taken when the household last run out of salt.

#### Possession of Two Sets of Clothes by Household Members

Information was collected on whether every member of the household had at least two sets of non-school uniform clothes in good or average condition. Tattered clothing worn for work.

Table 2.4.5 shows that, on the overall, nine in ten households reported that every member had at least two sets of clothes in all the waves. Male headed households were more likely to have every member of household in possession of two sets of clothes in all the waves compared with their female counterparts, though the variation seems to even out in the recent survey of 2019/20.

By residence, households in urban areas were more likely than those in rural areas to possess at least two pairs of clothes in all the waves. The Central, Eastern and Western regions had a higher percentage of households in possession of at least two sets of clothes in all the waves compared with the Northern region.

Background characteristics	2005/6	2009/10	2010/11	2013/14	2015/16	2018/19	2019/20

## Ownership of Blanket for Children less than 18 Years in the Household

Among the basic necessities of life is ownership of a blanket, regardless of whether an individual is an adult or a child (under 18 years). The surveys collected information on whether each child aged less than 18 years in the household possessed a blanket. Ownership of a blanket only considered those that were not shared (one member per blanket). Table 2.4.6 shows that four in every ten children owned a blanket. There is no significant difference in households in terms of possession of a blanket by sex of the household heads, except in 2013/14 where slightly more children from female headed household owned blankets compared with their male counterparts (46.9% and 42.2% respectively).

Disaggregation by place of residence shows considerable variation between urban and rural areas. In all the waves, households in urban areas were more likely to have every child own a blanket compared with their rural counterparts. Regional differences in blanket ownership for children under 18 years for all the waves show that the central region is slightly better with every six in ten children owning a blanket (65.7%), followed by western (54.2 percent) in the latest survey of 2019/20. The Northern region lags behind with one in every four children owning a blanket (25.3%).

Background characteristics	2005/6	2009/10	2010/11	2013/14	2015/16	2018/19	2019/20

#### Possession of at Least a Pair of Shoes

Measurement of welfare considers possession of at least one pair of shoes by every household member as one of its key components in the assessment of the household's welfare. Emphasis was put on shoes in good condition excluding gumboots, tyre shoes ('lugabire') and slippers.

The results in Table 2.4.7 show that, overall, in all the waves, more than 50 percent of the households reported that their members had at least a pair of shoes. It is key to note that ownership of a pair of shoes has been increasing over the years. In terms of sex of the household heads, more male headed households have every member in possession of at least one pair of shoes in all waves compared to their female counterparts. The residence dimension shows that urban households, were more likely than their rural counterparts to have their members owning at least a pair of shoes. At regional level, the possession of a pair of shoes by household members was highest in Central and Western regions, with fewer proportions reported in the Northern region in all the waves.

#### Action Taken when Household last run out of Salt

The surveys also sought to understand what action households took when they last run out of salt. Salt is an essential commodity to a household, considering that it is affordable to acquire and it is regarded as a good input to indicators measuring welfare of households. The question only applied to households that cooked at home. The action taken when a household last run out of salt has been examined by selected background characteristics as presented in Table 2.4.8.

Overall, 75.6 percent of households indicated that they bought salt when they last ran out of it in 2019/20 while 23.5 percent borrowed from their neighbours. Comparing the panel waves, we see that the proportion of households that buy salt when they run out of it has consistently been increasing from 70 percent in the 2015/16 to 76 percent in the 2019/20 wave. When we consider the sex of the household head, female headed households were more likely to borrow salt from their neighbours than male headed households and the reverse is true among households that buy salt when it is finished.

By residence, the practice of borrowing salt is more pronounced in the rural areas compared to the urban areas. Purchasing of salt when it is finished is more prevalent in urban households compared to the rural counterparts, as shown in Table 2.4.8.

## Feeding Practices

In many developing countries such as Uganda, many people do not have enough to eat to meet their daily energy needs. An inquiry was, therefore, made on the average number of meals (including breakfast) taken by household members per day. A meal was considered to be any substantial amount of food eaten at one time. It could be on any one of the usual occasions such as breakfast, lunch or dinner.

Table 2.4.9 shows that over 60 percent of the households had at least one meal in a day in the waves. Male headed households were more likely to take at least a meal per day than was the case for female headed households across the waves, as shown in Table 2.4.9. Considering rural-urban stratification, the urban households had more cases having at least one meal in a day compared to the rural counterparts. In terms of the regions, the Eastern region had more households reporting having eaten at least a meal a day, followed by Central region and the Western region.

## 2.5 Health Statistics

Health statistics include both empirical data and estimates related to health, such as mortality, morbidity, risk factors, health service coverage, and health systems. This section presents statistics on some of the key aspects of public health. These include status of healthcare facilities, health human resources, morbidity and other selected health sector performance indicators.

## 2.5.1 Health Facilities

Health facilities in Uganda include hospitals and health centres (IV, III and II). Figure 2.5.1 shows that the number of functional healthcare facilities has generally decreased irrespective of the ownership status, making a total of 6,232 in 2019/20. There was a 9.7 percentage decrease from 6,904 facilities in 2018/19. A total of 672 health facilities, therefore, became non functional.

Note: PNFP includes community owned facilities. Source: Ministry of Health

## 2.5.2 Human Resources for Health

Table 2.5.2 shows that in the FY2019/20 the percentage of approved posts filled countrywide in health facilities slightly increased to 73 percent from 71 percent in 2017/18. Kawempe National Referral Hospital had the least percentage of approved posts filled in FY2019/20 while at the district level, there was a slight increase from 73 in FY2017/18 to 75 percent in FY2019/20. The district health offices registered a decrease from 78 in FY2017/18 to 69 percent in FY2019/20 partly due to an increase in number of approved posts.

#### Table 2.5.2: Human Resources for Health posts approved filled by year and public health facility

Source: Ministry of Health, Human Resources for Health Audit Reports and Annual Health Sector Performance Report

Figure 2.5.2 below provides information on Health Worker to Population ratio in the pubic sector. The health workers include doctors, nurses, midwives, anaethetists and pharmacists. There is a slight improvement from 1.87 per 1000 population in 2018/19 to 1.92 per 1000 population in 2019/20. However, this is still below the WHO recommendation target of 2.28 per 1000 population. The improvement is partly attributed to the government commitment to attract and retain a competent health workforce in Uganda

Source: Ministry of Health

## 2.5.3 Health Sector financing

The government budget allocation for the health sector as a percentage of the total government budget is shown in Figure 2.5.3. Government allocation on health in the FY2019/20 was 7.2 percent, the same as the previous financial year. The average expenditure on the health sector in the last nine years stood at 7.8 percent, 2 points short of the Health Sector Development Plan (HSDP) 2015/16-2019/20 target of 9.8 percent and much lower than the Abuja Declaration of 15 percent. Generally, the government budget allocation on the health sector shows a downward trend and has no steady pattern.

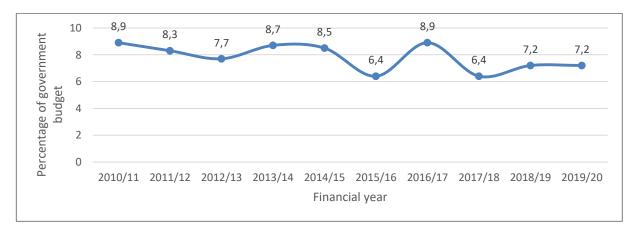

Figure 2.5.2 Government of Uganda health sector allocation as percentage of total government Budget

#### Source: Ministry of Health, Annual Health Performance reports

Generally, in Uganda the per capita public health expenditure has been increasing since FY2012/13. Figure 2.5.4 shows that the per capita health expenditure in 2019/20 was Uganda shillings 57,715 (about US\$ 16) compared to the Uganda Shillings 55,339 registered in FY2018/19. This is far below the minimum recommended WHO per capita expenditure on health for developing countries (US\$ 84 per capita) for health care for a person per year.

Source: Annual Health Performance reports

## 2.5.4 Leading Causes of Death

The seven leading causes of death affecting all ages that occurred in health facilities in FY2017/18, FY2018/19 and FY2019/20 are presented in Figure 2.5.5. Malaria has been the leading cause of death across the three financial years, followed by pneumonia. Death due to injuries and tuberculosis registered a downward trend over the period FY2018/19 to FY2019/20 while pneumonia, anaemia and hypertension had an upward trend. The other emerging causes of death in health facilities that affected all ages in FY2019/20 include diabetes mellitus (578), acute diarrhoea (459), liver cirrhosis (474) and respiratory distress (394).

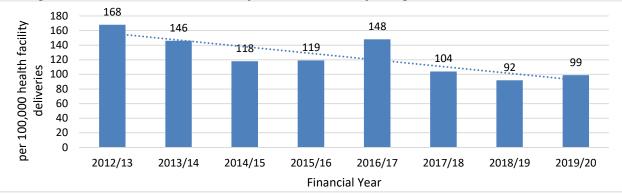

\*Hypertension is only among persons 5 years and above Source: Annual Health Performance reports

## 2.5.5 Maternal Health Care

#### 2.5.5.1 Health Facility based Maternal Mortality

Maternal mortality is the number of women who die due to pregnancy related complications either during pregnancy, delivery or within 42 days after delivery of a child. Figure 2.5.6 presents the number of maternal deaths that occur among 100,000 health facility deliveries in a Financial Year. The health facility based maternal mortality for 2019/20 was 99 deaths per 100,000 live deliveries, a slight increase from 92 recorded in 2018/19. Health facility based maternal mortality based maternal mortality has been on the decline over the last eight years between FY2012/13 and FY2019/20.

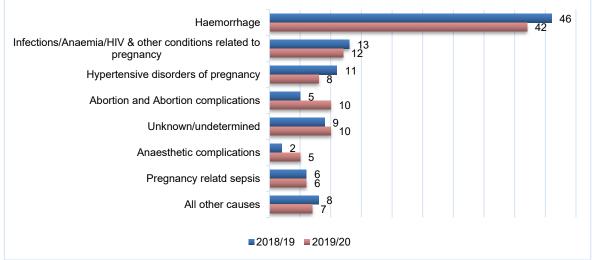

## Figure 2.5.5: Trend of Health Facility Maternal Mortality in Uganda

## 2.5.5.2 Causes of Maternal Mortality

Figure 2.5.7 shows that haemorrhage still remains the leading cause of maternal illness and mortality in the country, accounting for 42 percent of the deaths in FY2019/20. This is followed by infections that slightly reduced from 13 percent to 12 percent. The haemorrhage is a slight decrease from 46 percent in 2018/19. The greatest improvements were observed among death due to hypertensive disorders, from 11 to eight percent while death due to Abortions and Abortion complications doubled from five percent in 2018/19 to 10 percent in FY2019/20.

Source: Ministry of Health, Annual Health Performance reports. 2019/20 is based on partial data

## 2.5.5.3 Health Facility Perinatal death

The World Health Organisation (WHO) defines perinatal mortality as the "number of stillbirths and deaths in the first week of life per 1,000 total births". The number of fresh still births is one of the key performance indicators of quality service delivery in the health sector. The number of recorded perinatal deaths has reduced slightly by 7 percent from 30,273 cases in 2016 to 28,050 cases in 2020.

Source: Ministry of Health, Annual Health SectorPerformance reports

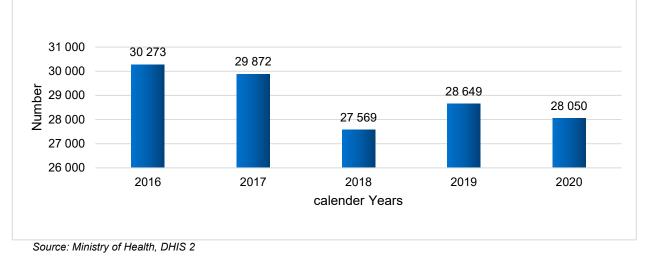

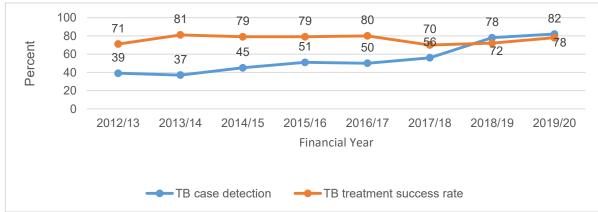

Figure 2.5.7: Number of health facility perinatal death in Uganda, 2016-2020

2.5.6 Tuberculosis Detection and Treatment

Tuberculosis (TB) is a main cause of illness and death globally, accounting for an estimated 8.8 million new cases and 1.6 million deaths each year. In Uganda, the Ministry of Health has promoted new smear-positive case detection and subsequent treatment of the patients. The TB case detection rate increased from 78 percent in FY2018/19 to 82 percent in FY2019/20 but that is still below the HSDP target of 84 percent. The TB treatment success rate increased to 78 percent in FY2019/20 from 72 percent in FY2018/19 but, again, this is still below the HSDP target of 88 percent.

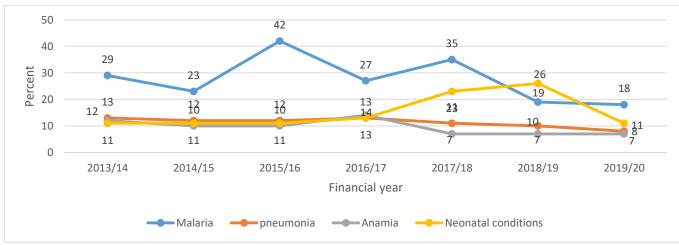

Source: Ministry of Health, Annual Health Performance reports

## 2.5.7 Causes of Under-five Health Facility Based Mortality

Figure 2.5.10 shows that Malaria has consistently been the leading cause of death among inpatients aged below five years accounting for 18 percent. In the FY 2019/20, neonatal conditions that include premature babies and other neonatal conditions had a 15 percentage points decline from 26 percent in FY 2018/19 to 11 percent in FY 2019/20, while death due to anaemia consistently accounted for seven percent over the last three year period.

#### Figure 2.5.9: Top four Leading Causes of under 5 In-Patient Mortality

Source: Ministry of Health, Annual Health Performance reports

## 2.5.8 New Outpatient Department utilization Rate

This indicator shows the levels of utilisation of Out Patient Department (OPD) healthcare services. It, thus, examines trends and variations in use of OPD services and allows comparisons between facilities, districts and programmes. For the last five years, the new OPD utilisation rates have remained slightly above the norm of 1.0 percent as observed from Figure 2.5.10. In FY2019/20, the OPD utilisation rate registered a 10-percentage increase, to 1.1 from 1.0 in FY2018/19. This is still below the HSDP target of 1.5. However, gender variations in seeking for health care are evident from the consistently higher OPD utilisation among females.

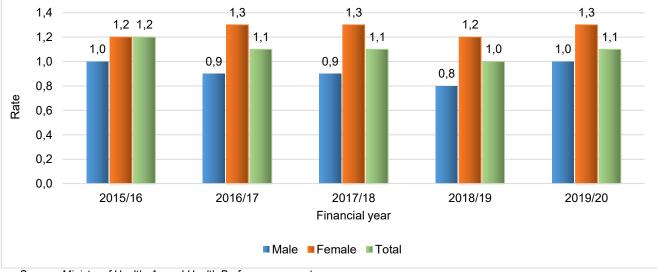

Figure 2.5.10: Per capita Outpatient Department utilization rate, 2015/16-2019/20

Source: Ministry of Health, Annual Health Performance reports

## 2.5.9 Selected Health Sector Performance Assessment

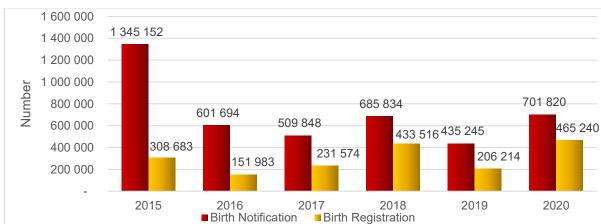

The Ministry of Health has identified a set of indicators to assess the performance of the Health Sector at the Local Government level. Statistical Appendix Tables 2.5A and 2.5B present a trend of selected health sector indicators at district level. The indicators include:

- Deliveries in Government and PNFP health facilities, where the following districts noticeably deteriorated in coverage between FY2016/17 and FY2019/20: Ssembabule, Kamuli, Adjumani, Bunyangabu, Amudat, Kaliro, Tororo, Lamwo, Yumbe, Isingiro and Amuria, among others.
- Fresh stillbirth per 1,000 Deliveries and the following districts performed poorly by recording an increase between FY2016/17 and FY2019/20: Lyantonde, Mubende, Kamwenge, Ssembabule, Buliisa, Namayingo, Kibaale and Buhweju, among others.
- Percentage of pregnant women receiving two doses of SP fansidar to prevent malaria the following districts highly declined in coverage during the period 2016/17 -2019/20: Moroto, Adjumani, Kabale, Namutumba and Sheema.

Pregnant women who had 4 antenatal care visits - the following districts had more than 10 percentage points decline in coverage between FY2018/19 and FY2019/20: Kyegegwa, Nabilatuk, Amudat, Moroto, Kabarole, Abim, Tororo, Nakapiripirit and Buhweju.

## 2.5.10 Birth notification in health facilities

Birth notification through the Mobile Vital Registration System (MVRS) is operational in 135 hospitals. Birth notification involves transmission of information via a mobile device to a centralised system or focal individual(s) to report occurance of a birth. It aims at ensuring that no child is left without an official identity and legal protection. Birth registration is the official recording of the birth of a child by the State. Every child born in Uganda has a right to be registered at birth, as recognised inter alia in the Convention on the Rights of the Child of 1989. The National Identification and Registration Authority (NIRA) currently has 117 registration centers for Births, Deaths and Adoptions. Figure 2.5.11 shows that over the last six years birth registration has not matched the level of birth notification. The CY2020 recorded a 61 percent increase in birth notification and a 126 percent increase in birth registration from the records in 2019.

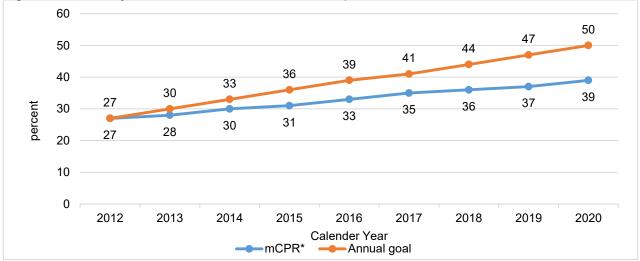

#### Figure 2.5.13: Birth Notification and Registration

Source: Uganda Mobile Vital Registration System

## 2.5.11 Contraceptive use

One of the key interventions in the NDP III towards harnessing Uganda's human capital is to increase access to family planning services in order to improve population health, safety and management. The contraceptive prevalence rate is a key indicator for measuring family planning utilization and is compiled every five years. For annual tracking and reporting on Track 20, Ministry of Health compiles estimates of the modern Contraceptive prevalence (mCPR) using the Family Planning Estimation Tool and the results are presented in figure 2.5.12. There has been steady but slow progress, the mCPR was 39 percent in 2020 and 11 percentage points below the annual target, the gap has been widening since 2012.

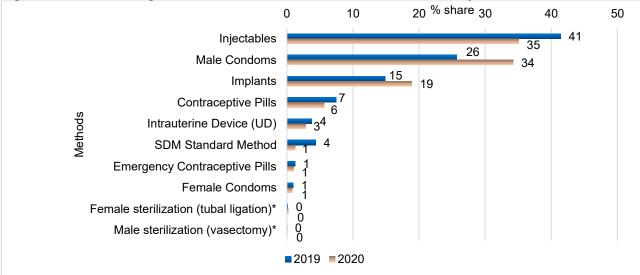

Source: Ministry of Health

Figure 2.5.13 shows the percentage share of modern family planning methods distributed in health facilities for the last two years. It is observed that although injectables are most used methods, their share among methods given has reduced by 15 percent from 41 percent in 2019 to 35 percent in 2020. On the other hand, facility vists for male condoms and insertion of implants increased over the one-year period by 31 percent and 27 percent respectively.

#### Source: Ministry of Health- DHIS 2

## 2.5.12 Gender Based Violence

Gender Based Violence (GBV) is an umbrella term for any harmful act that results in, or is likely to result in, physical, sexual or psychological harm or suffering to a man, woman, girl or boy on the basis of their gender, resulting from power inequities and power abuse. The NDP III attests to the fact that police has invested in mobilising and empowering communities to prevent violence. GBV inflicts on health and can cause injuries, miscarriages, sexually transmitted diseases and anxiety, so health facilities are one of the places that handle survivors of GBV. Figure 2.5.13 shows that the number of GBV cases declined between 2019 and 2020. Appendix Table 2.5 C gives the distribution and trend of GBV survivors who reported to a health facility by district.

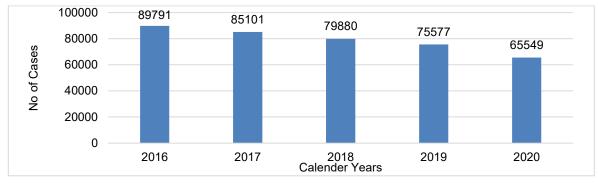

Figure 2.5.15: Number of GBV survivors reporting to health facilities, 2016 -2020

## 2.6 Crime Statistics

Crime statistics are very useful in implementing effective strategies on crime management and its impact to the population. Crime statistics can be a tool in helping criminal justice and in anticipating changes in risk levels of crime. This chapter presents data on various forms of crime and their remedial measures as compiled by the Uganda Police Force (UPF) and the Uganda Prisons Service (UPS) respectively.

## 2.6.1 Annual Crime Rate

The Crime Rate is the incidence of crime per 100,000 people. Figure 2.6.1 shows that in CY2020, the Annual Crime Rate (ACR) stood at 502. This means that, out of every 100,000 people, 502 were victims of crime in 2020 - a slight decrease from 551 recorded in 2019.

The most common crimes reported between CY2016 and CY2020 by category are presented in Table 2.6.1. Common assaults were the most reported type of crime. Most forms of crime were on the decrease with significant decrease of minus 25.5 percent observed for thefts of cash, followed by decrease of minus 23.9 percent for obtaining by False Pretence and a decrease of minus 22.8 percent for child neglect crimes. However, in CY2020, there was a significant increase of 26.5 percent for Domestic Violence related crimes as shown in the Table 2.6.1.

Table	2.6.1: Leading	g Crimes	by year an	d category
-------	----------------	----------	------------	------------

Crime Categories	2016	2017	2018	2019	2020	Annual %age change 2019 - 2020

Source: Uganda Police Force

Table 2.6.2 presents a trend analysis of reported, investigated and prosecuted crimes. The number of crimes reported to Police decreased from 215,224 in CY2019 to 195,931 in CY2020. However, almost three quarters (139,280 out of 195,931) of the reported cases were pending prosecution in CY2020.

## 2.6.2 Victims of Crime

Table 2.6.3 shows that, overall, there were more male (122,226) than female (75,052) victims of crime in CY2020. The majority of the victims regardless of sex were of general crimes and thefts.

CASE/CRIME	Male			Female			Total		
INCIDENCES	Adult	Juvenile*	Total	Adult	Juvenile*	Total	Adult	Juvenile*	Total
Homicides	3,438	262	3,700	723	166	889	4,161	428	4,589

## 2.6.3 Perpetrators of Crime

As indicated in Table 2.6.4, there were 74,769 crime offenders recorded in CY2020, with the males having a higher proportion than the females for both adults and juveniles. Apart from other crimes in general, the majority of the offenders of crime were involved in thefts (19,019) with no recorded offenders of terrorism.

CASE/CRIME	Adult		Juve	nile*	Total

## 2.6.4 Serious Crimes Investigated and Prosecuted

Serious crimes as defined by the UPF include Homicides, Aggravated Robbery, Defilement, Rape, Burglary, Child Stealing and Child Trafficking. Table 2.6.5 shows an increase in serious crimes reported in CY2020 (of 49,028 compared to the 46,531 serious crimes that were reported in 2019). Of the reported serious crimes in CY2020, less than half (18,864) were prosecuted. The increase in serious crimes reported was mainly as a result of an increase in the cases of Domestic violence (17,664) reported in CY2020 compared to the 13,639 cases of the same reported in CY2019

CASE/CRIME INCIDENCES	201	2018		019	2020	
	Reported	Prosecuted	Reported	Prosecuted	Reported	Prosecuted
Death (by shooting)	190	44	181	43	249	171

### 2.6.5 Traffic and Road Safety

This section covers information on traffic crashes, causalities, accident victims, vehicles involved in road accidents, causes of road accidents and the times of the crashes.

#### **Reported Road Traffic Crashes**

Road Traffic Crashes refer to accidents that could be fatal, serious or minor. An accident is said to be fatal if a death occurs at the scene of the accident and/or within one year as a result of injuries sustained in the accident.

A serious accident is one in which a person is admitted in the health facility as an "in-patient" or sustains injuries such as fractures, concussion (temporary unconsciousness or confusion caused by a blow on the head), internal injuries, crashing, severe cuts and lacerations (deep cut or tear in the skin) whether or not one is admitted in the hospital. A minor accident is where no persons are injured at all regardless of the extent of damage on the vehicle.

Table 2.6.6 shows that a total of 12,249 road traffic crashes were recorded by the UPF in FY2020. Almost threequarters (74.1 percent) of the accidents in CY2020 were either fatal or serious.

The total number of road traffic crashes CY2019 and CY2020 decreased by minus 4.7 percent

Outcome	2016	2017	2018	2019	2020	Percentage Share for 2020	2019 -2020 Percentage change
Fatal	2,981	3,051	3,194	3,407	3,269	26.7	(4.1)
Serious	7,153	6,530	6,085	5,992	5,803	47.4	(3.2)
Minor	4,340	3,663	3,526	3,459	3,177	25.9	(8.2)
Total	14,474	13,244	12,805	12,858	12,249	100	(4.7)

 Table 2.6.6:
 Reported road traffic crashes by outcome of crash, 2016 – 2020

### Number of Road Accidents by Region

As presented in Table 2.6.7, Kampala Metropolitan South had the highest number of road accidents recorded at 1,955. This could be attributed to the high population of road users within the city set up. Kidepo and Sipi on the other hand had the least number of road accidents recorded at 92 and 75 respectively.

Region	Fatal	Serious	Minor	Total
Kampala Metropolitan South	220	885	850	1,955
Kampala Metropolitan East	234	743	524	1,501

#### **Accident Severity Index**

The Accident Severity Index (CSI) is defined as the number of persons killed per 100 accidents. It is used to measure the seriousness of an accident. For every fatal or serious road traffic crash there are victims who are referred to as causalities.

Table 2.6.8 indicates that there were a total of 13,012 Casualties reported in CY2020, a decrease by about 11 percent from the number of traffic casualties reported in CY2019. In every 100 accidents that occurred, 30 persons died during CY2020. Table 2.6.8 further indicates that most casualties (64 percent) in CY2020 survived with serious injuries and 28.2 percent of the casualties were killed. Important to note that even if the number of accidents are declining, the CSI has been going up over time.

Outcome	2016	2017	2018	2019	2020	Percentage Share 2020	2019 -2020 Percentage change
Killed	3,503	3,500	3,689	3,880	3,663	28.2	(5.6)

# **Accident Victims**

Table 2.6.9 indicates that in CY2020, there was a total of 13,012 road accident victims, a decrease from 14,690 in 2019. Motocyclists followed by passengers constituted the highest number (4,268) and (4,251) respectively.

Table 2.0.3. Number of Accident victims by Road Oser Type, 2010 – 2020										
Road user Type	2016	2017	2018	2019	2020					
Passengers*	6,112	5,674	5,771	5,927	4,251					
Motor cyclists	3,717	3,847	3,454	3,796	4,268

Source: Uganda Police Force

\*Anyone traveling in an automobile, bus, train, airplane, or other conveyance, especially one who is not the driver, pilot, or the like.

Table 2.6.10 shows that of the casualties in CY2020, 13 percent were children while the majority (30 percent) were young people aged 25- 34 years. More males than females were victims of accidents, irrespective of the outcome. The seriously injured victims had the highest numbers (6,527 males and 1,843 females) followed by fatalities (2,945 males and 718 females).

Age	ge Killed S		Seriously	Seriously Injured		njured	Total	
group	Male	Female	Male	Female	Male	Female	Number	Percentage
Below 18	382	246	548	359	102	57	1694	13.0

#### **Timing of Road Accidents**

Table 2.6.11 indicates that the majority (29.8 percent) of road accident crashes occurred between 4:00pm-7:59pm in CY2020. Occurrence of the least road accident crashes was recorded between midnight and 3.59am. This could be partly attributed to the low number of road users during such hours.

Time	Fatal	Serious	Minor	Total	Percentage Share 2019
12.00 mid night - 3.59am	180	146	153	479	3.9
4.00am-7.59am	261	429	333	1,023	8.4

#### Vehicles Involved in Crashes on the Road

Table 2.6.12 shows that a total of 17,992 vehicles were involved in road accident crashes in CY2020 compared to 18,978 vehicles reported in CY2019. Of the vehicles involved in the crashes in CY2020, motor cars and motor cycles were highly affected compared to other vehicles.

Type of Vehicle	2016	2017	2018	2019	2020
Motor cars	6,815	6,251	5,690	5,972	5,167

#### **Causes of Road Accidents**

Table 2.6.13 shows that Careless driving (44 percent) and Reckless/dangerous driving (36 percent) were the major causes of road accidents. The results in the table also indicate a significant reduction in accidents resulting from Unknown causes (hit and run), Drivers under influence of drugs as well as Overloading/dangerous loading, among others. Overall, the number of road accidents was on a declining trend over the last five years.

#### Table 2.6.13: Number of Road Accidents by Causes, 2016 – 2020

Causes of Accidents	2016	2017	2018	2019	2020	Percentage Share 2020	Percentage change in 2019 - 2020

### 2.6.6 Prison Statistics

#### **Prison Population**

The Uganda Prisons Service (UPS) compiles information on prisoners by category. These prisoners are categorized into two broad categories. There are Criminal (prisoners on remand and those convicted) and Civil Prisoners (Debtors). Table 2.6.14 reflects a decrease in the percentage change in the total prison population from 7.9 percent in 2019 to minus 2.4 percent CY2020. Additionally, 50.9 percent of the Prisoners in CY2020 were convicted where as less than one percent of the prison population was as a result of failure to pay their debts. The Incarceration Rate declined from 151 prisoners per 100,000 persons in CY2019 to 143 prisoners per 100,000 persons in CY2020.

Category	2016	2017	2018	2019	2020	Percentage
CRIMINAL PRISONERS						
Remand	26,266	25,021	27,040	27,897	28,772	49.1

Source: Uganda Prisons Services

\*A debtor is an individual who for failure to pay their debts has been committed to prison.

\*\*The incarceration rate is the number of prisoners per 100,000 population.

Table 2.6.15 shows that about 98 percent of the prisoners were Ugandans and only about two percent were foreigners. Rwandan nationals accounted for 38 percent of the foreign prison population followed by Congolese nationals (22) where as prisonsers from other African countries and Non African countries were less than two percent altoghether.

Table 2.6.15: Number of Prisoners by Category, Sex and Nationality, 2020

#### **Prisoners on Rehabilitation**

While in prison, inmates undergo rehabilitation such as education training (both formal and informal), skills development as well as guidance and counseling so that they are transformed into better citizens that can adapt to life outside prison once they complete their sentence or are released from jail. Table 2.6.19 shows that **33,699** prisoners (among them **31,755** males) enrolled to undergo rehabilitation programmes in CY2020.

#### Recidivism

Recidivism is the number of re-offenders expressed as a percentage of the total number of convicts admitted in a given period. Figure 2.6.2 shows that over time, the recidivism rate has declined from 23 percent in CY2013/14 to 15.1 percent in CY2019/20. This means that the number of habitual criminals is reducing.

### Figure 2.6.2: Trend in Recidivism Rate, 2014/15 – 2019/20

Source: Uganda Prisons Service

Table 2.6.20 shows that most recidivists were perpetrators found with possession of suspected/stolen property at 27 percent in the FY2019/20. This was followed by perpetrators of Rogue & Vagabond (25%).

	F	Y2018/19			FY2019/20

### **Prison Capacity and Occupancy rate**

Overcrowding in prison cells is a serious violation of prisoners' constitutional and human rights since prisoners are entitled to a healthy environment. Prison capacity refers to the number of inmates a prison can hold within a space of 3.6m2. Table 2.6.21 shows high levels of overcrowding in prison cells across all regions in the country. Though the national Occupancy Rate had been increasing in the previous years, a significant decline in the occupancy rate was registered in CY2020 to 295.3 as compared to the 345.5 that was registered in CY2019. This implies that at a national level, 295 prisoners occupied a space that was meant to be occupied by 100 prisoners. Western Uganda

registered the highest occupancy rate of 369.5 with the lowest rate registered in Eastern (239). The details of capacity and occupancy rate by District are given in statistical Appendix Table 2.6.B.

		Prison Capacity						Occupancy Rate					
Region	2016	2017	2018	2019	2020	2016	2017	2018	2019	2020

Table 2.6.21: Prison Capacity and Occupancy Rate by region, 2015 -2020

\*Includes Luzira and Kigo prisons

#### Babies staying with their Mothers in Prison

Babies need their mothers even when the mothers are in jail. This is because every baby needs to breastfeed and develop early bonding attachments with their mother. In CY2020, a total of 220 babies were staying with their mothers in prison. Figure 2.6.3 indicates the percentage distribution by region of the babies staying with their mothers in prison, with Central region contributing the highest proportion (32.3 percent) while the least proportion was contributed by the Western region (16.4%).

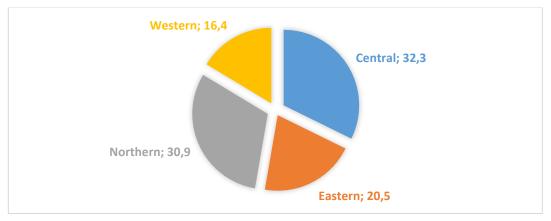

Figure 2.6.3: Distribution of babies staying with their mothers in prison by region, 2020

Source: Uganda Prison Services

#### Prison Staff strength

Prison staff are categorised into uniformed and non-uniformed staff. Uniformed staff are those who wear the Uganda Prison Service uniform while Non-uniformed staff are civilians recruited into the service as well as those transferred directly in by the Ministry of Public Service. In CY2020, the UPS had a total of 10,966 staff, with 3 in every 10 being females. The distribution of staff by category is shown in Table 2.6.22.

Non-Commissioned Officers (NCOs) were the majority (9,479) among Uniformed Staff while Junior Officers (358) were the majority among non-uniformed staff.

STAFF CATEGORY	Sex	4	
	Males	Females	TOTAL
Uniformed	7,425	2,964	10,389
Senior officers	302	68	370
Principle officers	426	114	540
NCOs	6,697	2,782	9,479
Non Uniformed	256	224	480
Senior officers	77	45	122
Junior officers	179	179	358
Total	7,681	3,188	10,869
Percentage	82	15	97

#### Table 2.6.22: Number of Prison staff by category and sex, 2020

Source: Uganda Prisons Service

#### Deaths in prison

Convicts and prisoners on remand are exposed to several health and socio-economic changes that may affect their well-being and life span while in jail. These include feeding status, access to medical treatment when sick, relationship with inmates and psychological torture, among others. Overall, Table 2.6.23 shows an increase of 5.5 percent in the proportion of prison deaths in CY2020 compared to CY2019. The increase comes after two successive years of decline in prison deaths. Details on the number of deaths in prison by district and sex are in Appendix Table 2.6C.

STAFF CATEGORY	Sex	x	TOTAL	Percentage	
	Males	Females	IOTAE	change	
2016	203	5	208	10.6	
2017	255	7	262	26.0	
2018	245	9	254	(3.1)	
2019	234	4	238	(6.3)	
2020	243	8	251	5.5	

#### Table 2.6.23: Trend in death of prisoners by sex, 2016-2020

# **CHAPTER THREE: PRODUCTION STATISTICS**

# 3.1 Agriculture and Fisheries

This section presents statistics on food crop area and production, selected cash crop production, livestock, livestock products and fish catch.

# 3.1.1 Major Cash Crops

The traditional cash crops of Uganda include Coffee, Tea, Cotton and Tobacco. Uganda produces two kinds of Coffee (Arabica and Robusta). Over the years, Robusta coffee has been produced in more quantities compared to Arabica coffee (also known as mountain coffee). In CY2020, there was an increase (15%) in the volume of coffee from 313,000 Metric Tonnes (MT) to 360,000MT. Tea production increased by 25 percent (60,000MT to 75,000MT) while Cotton production increased in CY 2020 to 35,000MT from the 33,000 produced in 2019, hence registering a six percent increment. Statistical Appendix Table 3.1 A.

# 3.1.2 Area and production of Food Crops, 2020

Uganda grows several food crops, of which 16 are major, according to the Uganda Census of Agriculture (UCA) 2008/09. These include Maize, Millet, Sorghum, Rice, Cassava, Sweet potatoes, Irish potatoes, Beans, Cow peas, Field peas, Pigeon peas, Groundnuts, Soya beans, Sim sim, Plantains and Coffee. The area under major crop groups in 2019 was Cereals (3.4M Ha), Roots and Tubers (2.4M Ha), Banana Food (668,000 Ha), Groundnuts and soya beans (896,000 Ha) and Beans (1.1M Ha). The area planted under root crops, pulses and oil crops increased by more than two percent while area planted under cereals increased by one percent.

In CY2020, the production of plantains, specifically Banana Food (matooke), increased by 4.2 percent i.e. to 9.8m MT from 9.4m MT in 2019. There was an increase (80%) in beans production from 437,000 MT to 786,000 MT in CY2020. Maize production increased by 65 percent from 2.8m MT to 4.6m MT in 2020. Details can be found in Annex Table 3.1C

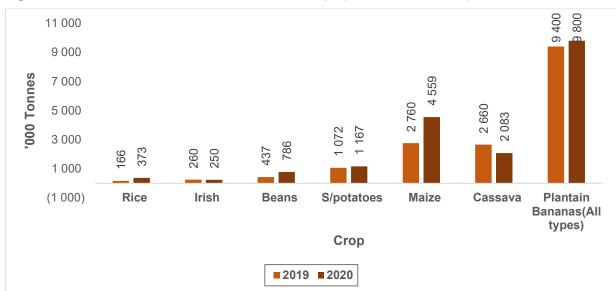

Figure 3.1.2: Production Volumes for Selected Crops (000' Metric Tonnes), 2018-2020

# 3.2 Industry Statistics

# 3.2.1 Index of Production (Manufacturing)

The Index of Production (IoP) for the Manufacturing sector in the economy measures changes in the volume of goods produced by the sector. Monthly data are compiled from manufacturing establishments that contribute about 80 percent of the manufacturing value added. The index is computed for eight broad groups as shown in Table 3.2.1 and the detailed group shown in Statistical Appendix Tables 3.2 A and B. The Index of Production recorded for the year CY2020 was 285.91. This was a 3 percent increase compared to the 3.5 percent increase for the year CY2019. The 'Bricks & Cement' group registered the highest increase (34.1%), followed by 'Textiles, Clothing and Footwear' group (23.9%) then "Chemicals, Paint, Soap & Foam Products" group (14.8%). Detailed indices by groups are shown in Tables 3.2.1.

Description						Year		Annual centage hanges
	Weights	2016	2017	2018	2019	2020	2019	2020
Total Manufacturing	1000	234.67	245.29	268.34	277.69	285.91	3.5	3
Food Processing	400	211.57	204.14	264.04	251.64	239.79	-4.7	-4.7

Miscellaneous	66	214.24	202.25	230.61	238.02	248.84	3.2	4.5

#### Table 3.2.1: Index of Production, Annual Production levels (2002=100), 2016-2020

Source: Uganda Bureau of Statistics

The volume of production for the manufacturing sector increased by 3 percent for CY2020, as shown in Table 3.2.2. The main contributors for this increase were Bricks & Cement (34.1%) which was mainly due to a 35.7 percent increase in the volume of Cement & Lime Production. Textiles, Clothing and Foot wear contributed 23.9 percent, which was mainly due to an increase in the manufacture of Textiles & Garments (98.4%). Chemicals, Paint, Soap & Foam Products contributed 14.8 percent and that was mainly attributed to an increase in the production of Chemicals & Pharmaceuticals (38.3%).

# 3.3 ENERGY

### Introduction

This section presents statistics on sources and use of energy in Uganda. The energy is either locally produced or imported. The section also provides statistics and information on import and sales of petroleum products in the country. In addition, it also presents generation and distribution as well as the prices charged for electricity.

# 3.3.1 Import of Petroleum products

The petroleum products include Petrol (PMS), Diesel (AGO), Kerosene (BIK) and Jet fuel. During the period under review, total import of petroleum products decreased by 7 percent, from 2,198,739 cubic meters in CY2019 to 2,047,237 to cubic meters in CY2020. Analysis by product shows that the import volume of petrol, diesel, Kerosene (BIK) and Jet fuel reduced by 6.7, 3.7, 14.2 and 35.8 percent respectively in CY2020 compared to CY2019, as shown in Table 3.3.2.

						2019 - 2020
YEAR	2016	2017	2018	2019	2020	Percentage
						changes
AGO	857,031	945,084	982,220	1,030,058	992,230	-3.7
PMS	811,712	894,072	930,542	1,006,824	939,529	-6.7
JET FUEL	120,902	125,962	133,519	108,391	69,608	-35.8
BIK	59,874	56,527	57,658	53,466	45,871	-14.2
TOTAL	1,849,520	2,021,645	2,103,939	2,198,739	2,047,237	-6.9
Annual percentage Changes	14	-9.3	-4.1	-4.5	6.9	

Source: Ministry of Energy and Mineral Development

### 3.3.2 Petroleum Sales

A total of 2.068 billion litres of selected petroleum products were sold in CY2020, reflecting a 7.0 percent decrease in CY2020 compared to 2.224 billion litres of sales in CY2019. Annual performance by product showed that the highest product sold was AGO (diesel), accounting for 48.1 percent. This was followed by Petrol (PMS) (45.5%), Jet Fuel (4.0%) and BIK (Kerosene) (2.4%). Details are shown in Table 3.3.2.

Table 3.3.2: Annual sales of selected	petroleum	products in	million litres	. 2016-2020
	p 0 11 0 10 4 111	p		,

Petroleum Product	2016	2017	2018	2019	2020	2019-2020 percentage change	2019-2020 Product Performance
Petrol	795,167,379	904,148,938	926,486,781	1,010,291,020	942,053,989	-6.8	45.5
Diesel	870,394,965	936,623,462	1,012,541,798	1,031,162,219	995,122,420	-3.5	48.1

#### 3.3.3: Annual Average Retail Prices for Petroleum Products

Table 3.3.3 shows that there was a general decrease in the price of petroleum products in CY2020, compared to average prices in CY2019. Analysis by products shows that there was a 5.7 percent decrease in the average prices of Petrol, 8.1 percent decrease in the average prices of Diesel and a 2 percent decrease in the average prices of Kerosene from CY2018 to CY2019, as shown in Table 3.3.3.

Product Products	2016	2017	2018	2019	2020
Petrol	3,366	3,549	4,023	4,085	3,851
Annual percentage change	-6	5.4	13.4	1.5	-5.7
Diesel	2,640	3,022	3,590	3,777	3,473
Annual percentage change	-9	14.5	18.8	5.2	-8.1
Kerosene	2,475	2,574	3,005	3,142	3,080
Annual percentage change	-8	4.0	16.7	4.6	-2.0

Table 3.3.3: Average Retail Prices per litre of selected Petroleum Products (Ugx), 2016-2020

### 3.3.4 Electricity

### 3.3.4.1: Installed Capacity

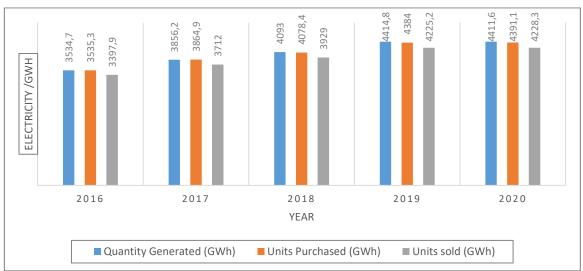

The total installed capacity of electricity power sources increased by 1.3 percent from 1252.843 MW in 2019 to 1269.053 MW in CY2020. This increase was mostly attributed by the a 19.7 percent increase in Solar PV as shown in Table 3.3.4.1 and Apendix Table 3.3 A.

Power Source						2019-2020
	2016	2017	2018	2019	2020	Percentage Change
						by Power source
Hydro Electricity	695	706.8	743.88	1,004.20	1,010.90	0.7
Thermal Electricity	136	136	101.6	101.6	101.08	-0.5
*Bagasse Electricity	64.5	76.4	96.2	96.2	96.20	0.0
Solar PV	-	18.6	40.83	50.8	60.83	19.7
Biomass			1.04	0.043	0.04	0.0
Total Installed Capacity	895.5	937.8	983.55	1252.843	1269.053	
Annual Percentage Change	0	4.7	4.9	27.4	1.3	

Source: Electricity Generating Authority

#### 3.3.4.2 Electricity Generated, Purchased and Sold

Figure 3.3.4.2 shows that, Electricity generated decreased by 0.07 percent from 4,411.8 GWh in CY2019 to 4,411.6 GWh in CY2020. This was as a result of de-commissioning six more power plants. See Appendix Table 3.3B.

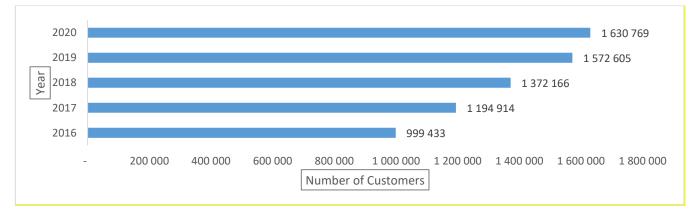

Electricity purchased by Uganda Electricity Transmission Company Limited (UETCL) from the generating companies increased by 0.16 percent from 4,384 GWh in CY2019 to 4,391 GWh in CY2020. See Appendix Table 3.3 D.

Similarly, total units of electricity sold by UETCL increased by 0.07 percent from 4,225 GWh in 2019 to 4,228 GWh in 2020., see Appendix Table 3.3 C for details

### 3.3.4.5: Number of Electricity Consumers

Figure 3.3.4.3 shows that the total number of electricity consumers increased by 3.7 percent, from 1,572,605 consumers in CY2019 to 1,630,769 consumers in CY2020. This was due to an increase in the number of customers of UMEME Uganda Limited, Uganda Electricity Distribution Company Limited (UEDCL), Pader Abim Community Multipupose Electric Cooperative Society Limited, Bundibugyo Energy Co-operative Society, Kilembe Investment Limited and Kyegegwa Rural Electricity Cooperative Society, as in Statistical Appendix Table 3.3 E.

### Figure 3.3.4.3: Total Number of Electricity Consumers, 2016-2020

# **3.4 Building and Construction Statistics**

# 3.4.1: Building Statistics

This section presents statistics on building plans submitted, approved, deferred or rejected and occupational permits issued in the country from selected Town Councils and Municipalities for the period of 2015 to 2018.

Buildings are classified on the basis of their purpose. The buildings are either residential, commercial or mixeduse (both residential and commercial on the same building), industrial, institutional and other use. Residential buildings include apartments, bungalows and dormitories. Commercial buildings include warehouses, shops, shopping malls, gas stations, markets, pharmacies, offices and supermarkets. Industrial buildings include factories, food mills, sawmills, power plants, bakeries and breweries. Institutional buildings include libraries, college, child development, primary/secondary schools, institutes, universities, hospitals, health centres, nursing home, clinics as well as police stations, army barracks and prisons. Other structures include banks, youth/child centers, museums, court halls, churches, mosques, temples, shrines, beauty salons, gym, sports club and those not anywhere categorised.

In CY2016, data was collected from thirty five (35) municipalities and ninety (90) town councils. The following year, the data was collected from forty (40) municipalities and 115 town councils, in CY2018 from thirty nine (39) municipalities and 156 town councils then in 2019 from fifty (50) municipalities and 230 town councils and in CY 2020 the sample of CY2019 was maintained. Details are shown in Tables 3.4.a to 3.4 e in appendix.

# 3.4.2: Building Plans submitted

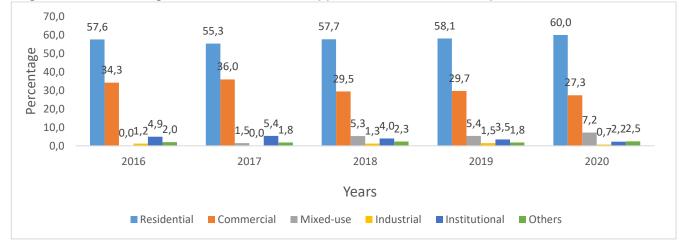

During 2020, the majority of Building Plans submitted were for residential structures (59.7%), followed by commercial structures (27.2%), mixed-use structures (6.7) and institutional structures (2.7%) while other building categories registered less than 4 percent. Details are shown in Figure 3.4.2 and Appendix table 3.4a.

#### Figure 3.4.2: Percentage Distribution of Plans Submitted to selected Municipalities and Town Councils

#### 3.4.3: Plans Approved

Statistics on Building Plans Approved in CY2020 show that 60 percent were Residential buildings, 27.3 percent were Commercial buildings, 7.2 percent were mixed-use and 2.2 percent were Institutional buildings. Compared with CY2019 plans approved, 58.1 percent were residential buildings, 29.7 percent were commercial building and 5.4 percent were for mixed-use while 3.5 percent were institutional plans. The Industrial building categories registered less than 2 percent in both CY2019 and CY2018. Details are shown in Figure 3.4.3 and Appendix Table 3.4b.

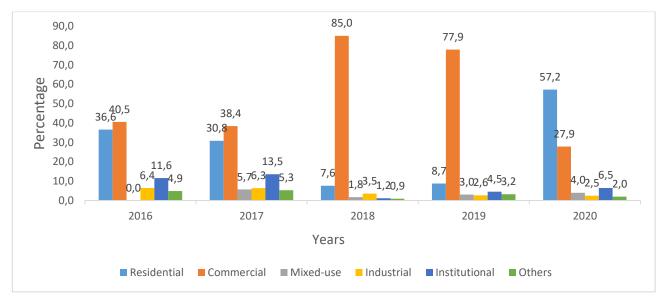

### 3.4.4: Occupational Permits Issued

An Occupation Permit is a certificate of occupancy issued by the Local Government certifying a building's compliance with applicable building codes and laws, qualifying it to be in a condition suitable for occupancy. In CY2020, about 57 percent of all the Occupation Permits were for Residential buildings, 27.9 percent for Commercial Buildings, 6.5 Institutional buildings while four percent were for Industrial buildings. Details are shown Figure 3.4.4 and Appendix Table 3.4c.

#### Figure 3.4.4: Percentage Distribution of Occupation Permits issued by selected Urban Councils

# 3.4.5: Plans Deferred

Deferred plans refer to submitted plans that are returned to the owners when they miss some details such as a land title. Of all plans deferred in CY2020, almost forty seven percent were for Residential buildings, 33.1 percent were for Commercial buildings, while 10.8 percent were mixed-use buildings. Details are shown in Figure 3.4.5 and Appendix Table 3.4d

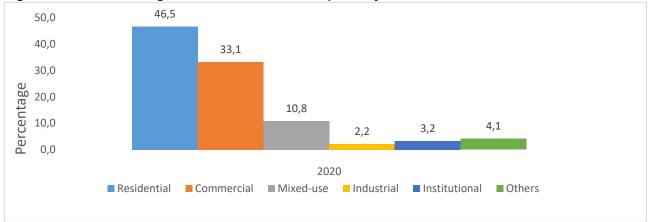

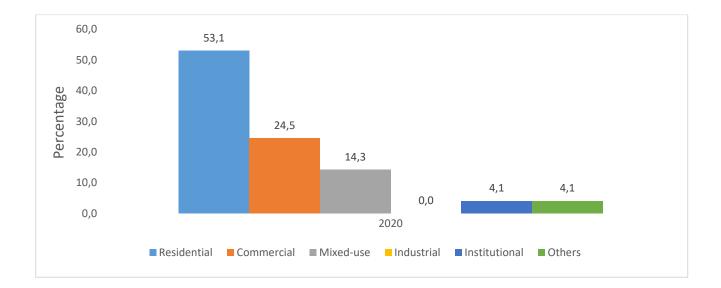

Figure 3.4.5: Percentage Distribution of deferred plans by Urban Councils in 2020

# 3.4.6 Plans Rejected

Rejected plans are plans that are completely disallowed. For example, if the proposed building is to be constructed in a wetland or forest reserve or does not have packing space for vehicles. Figure 3.4.6 shows that about 53 percent of all plans rejected in CY2020 were for residential buildings while 24.5 percent were for commercial buildings. Details are shown figure 3.4.6 and Appendix Table 3.4e

#### Figure 3.4.6: Percentage Distribution of Rejected plans by Urban Councils in 2020

### 3.4.7 Consumption of Cement

Table 3.4.7 shows the Production, Imports, Exports and Net Domestic Supply (NDS) of cement in the economy. Total Net Domestic Supply of cement registered a 20.2 percent increase in CY2020, from 2684.8 thousand tonnes in CY2019 to 3226.5 thousand tonnes. Cement imports increased to 13.8 thousand tonnes in CY2020 from 13.6 thousand tonnes in CY2019, while cement Exports increased to 525.1 thousand tonnes in 2020, from 400.7 thousand tonnes in CY2019, representing a 31.1 percent increase.

	2016	2017	2018	2019	2020	2019-2020 percentage change
Production	2,493.5	2,510.5	2,557.2	3,071.8	3,737.9	21.7
Imports	307.8	284.3	52.7	13.6	13.8	1
Exports	359.3	296.3	392.9	400.7	525.1	31.1
Net Domestic Supply (NDS)	2,442.0	2,498.5	2,217.1	2,684.8	3,226.5	20.2
Annual percentage Change in NDS	9.3	2.3	(11.3)	21.1	20.2	-4.3

Source: Uganda Bureau of Statistics

# **3.5 Mineral Statistics**

This section presents statistics on production of minerals in Uganda. Mineral statistics are categorised into two: metallic minerals and non-metallic minerals.

Metallic minerals are those that contain metals in their chemical composition and are a potential source of metal while non-metallic minerals are those that do not contain any extractable metals in their chemical composition.

### 3.5.1: Mineral Production by Quantity

During CY2020, the production of Limestone, Kaolin, Wolfram, Granite and Synthetic Aggregate experienced a percentage decrease of 25.2 percent, 96.9 percent, 92.1 percent, 44.5 percent and 48.6 percent respectively. However, the production Pozollana, Vermiculite and Colten (30% Purity) underwent a percentage increase of 17.6 percent, 46.5 percent and 2,366.5 percent respectively, as shown in Table 3.5.1

Table 3.5.1: Annual mineral Production I	by Quantity	(Tonnes), 2016-2020
--	-------------	---------------------

Mineral	2016	2017	2018	2019	2020	2019-2020 Percentage

Source: Ministry of Energy and Mineral Development

### 3.5.2: Mineral Production by Value

The Table 3.5.2 shows the value of production for selected minerals in Uganda from CY2016 to CY2020. The results show that there was a decrease in the total value of the minerals produced, from 148.1 billion shillings in CY2019 to 124.1 billion shillings in CY2020. This was mainly contributed by the decrease in Limestone and Wolfram from 113,097 and 6,301 billion shillings in CY2019 to 84,609 and 498 billion shillings in CY2020 respectively.

Mineral	2016	2017	2018	2019	2020
Non Metallic					
Limestone	144,369	147,831	107,280	113,097	84,609
Pozollana	17,779	16,644	23,167	20,168	23,725
Vermiculite	1,908	2,385	6,029	5,601	8,204
Kaolin	4,591	5,532	1,728	1,045	32
Metallic

# **3.6 Transport and Communication Statistics**

This section presents Transport and Communication statistics. The statistics provided on transport include Road, Water, Rail and Air services, while those on communication include Internet subscription, post and Telecommunications and Mobile Money transactions.

### 3.6.1 Roads transport

This sub-section presents data on the Uganda road networks categorised as National Roads, District Roads, Urban Roads and Community Access Roads. These are further sub-divided into the Paved and Unpaved roads.

### 3.6.1.2 Total Road network by category and Types

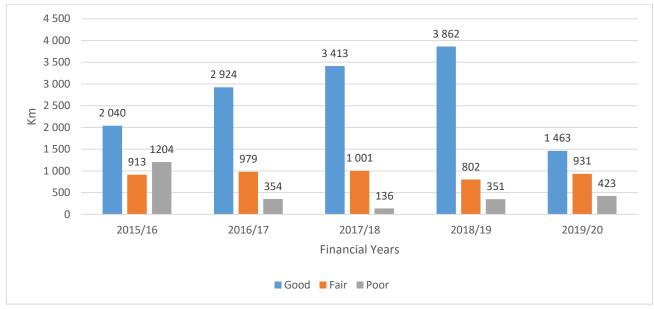

The total national road length during the FY2019/20 increased by nearly one percent, from 20,856. km in FY2018/19 to 21,010 km in FY2019/20. During the period, there was an increase in total Paved road length by 7.6, percent as shown in the Table 3.6.1.1.

Surface type	2015/16	2016/17	2017/18	2018/19	2019/20
Total Paved	4,157	4,257.00	4,551.00	5,015.95	5,398.00
Percentage change- Paved	6.1	2.4	6.9	10.2	7.6
Total unpaved	16,388	16,287.00	15,993.00	15,840	15,612
Percentage change- Unpaved	-1.4	-0.6	-1.8	-1.0	-1.4
Total National Network	20,545	20,544	20,544	20,856	21,010
Total Percentage change	0.0	0.0	0.0	1.5	0.7

Source: Uganda National Roads Authority

### 3.6.1.2 Condition of paved roads (km) under the National Road Network as at FY 2019/2020

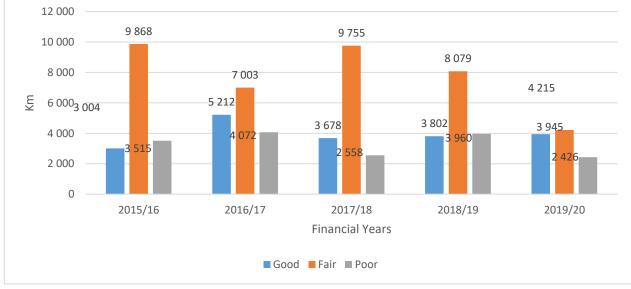

The measurement of the road condition is by the International Roughness Index (IRI). Roughness is a good indicator of the condition of the road because it affects the level of service in terms of the riding quality, speed and cost of vehicle operation and maintenance. By June 2020, the condition of paved roads in good, fair and poor was 1,463km, 931km and 423km respectively. Details are shown in Figure 3.6.1.2 and in Appendix Table 3.6.A.

### Figure 3.6.1.2 Condition of paved roads (km) as of June 2020

# 3.6.1.3 Condition of Unpaved roads (km) of the National Road Network as at FY 2019/2020

By June 2020, the condition Unpaved roads in good, fair and poor condition was 4,215km, 3,945km and 2,426km respectively. Details are shown in Figure 3.6.1.3 and in Appendix Table 3.6 B

Source: Uganda National Roads Authority

Source: Uganda National Roads Authority

# 3.6.2 Newly registered motor vehicles

Registration of new vehicles and motor cycles is conducted by the Uganda Revenue Authority for private vehicles while the Ministry of Works and Transport (MoWT) registers Government owned vehicles.

Table 3.6.2.1 presents statistics on newly registered motor vehicles and motorcycles from CY2016 to CY2020 for privately owned vehicles. Overall, the number of newly registered motor vehicles and motor cycles reduced by 0.2 percent to 145,132 in CY2020 from 145,455 recorded in CY2019.

Category	2016	2017	2018	2019	2020
Newly Registered Cars	33,750	42,005	43,764	38,182	42,284
Percentage change	22.1	24.5	4.2	-12.8	10.7
Newly Registered M/Cycles	83,131	93,027	93,213	107,273	102,848
Percentage change	5.4	11.9	0.2	15.1	-4.1
Total newly Registered	116,881	135,032	136,977	145,455	145,132
Percentage change	-4.6	15.5	1.4	6.2	-0.2

Source: Uganda Revenue Authority

### 3.6.3 Licensed Transport Vehicles for Public Use.

During CY2020, there was a notable decrease in the number of vehicles licensed to transport tourists by 63.2 percent, from 589 in CY2019 to 217 in CY2020. Similarly, the Public Service Vehicles Operators category also registered a 33.4 percent, 52.3 percent and 48.2 percent decrease in the number of Certificate of Fitness licenses issued to Boda-bodas, Country taxi and Driving Instructors License sub-groups respectively, as shown in Table 3.6.3.1. However, Inland Water Transport Vessels registered an extraordinary increase of 457.5 percent, from 127 to 708 because of the introduction by Government of periodic inspection automated equipment in CY2020.

Category	2016	2017	2018	2019	2020	2019-2020
						Percentage
						Change
Tourist	125	197	501	589	217	-63.2
Public Service Vehicles Operators						
license	11,119	17,325	18,528	16,049	17,021	6.1
Rental/Town Taxi	523	1021	731	547	115	-79.0
Boda-Boda	7,938	5,032	9016	12530	8347	-33.4
Owners transport Vehicle License	726	740	755	643	287	-55.4
Inland Water Transport Vessels	73	114	242	127	708	457.5

# 3.6.4 Air Transport

This sub-section presents data on the movement of commercial aircraft, passengers and cargo through Entebbe International Airport and aircraft movement over Uganda's air space.

#### 3.6.4.1 Aircraft Movement

Table 3.6.4.1 shows that there was a 52.3 percent decrease in the aircraft movement at Entebbe Airport in CY2020 compared to 1.3 percent rise registered in CY2019. This was as a result of decreased number of commercial aircraft landings and over flights by 56 percent and 45 percent respectively in CY2020, as shown in Table 3.6.4.1.

Aircraft Movement	2016	2017	2018	2019	2020
Commercial Aircraft Landings	28,347	29,323	32,383	32,798	14,437
Percentage Change	2.5	3.4	10.4	1.3	-56.0
Over flights at Entebbe	15,333	15,139	15,670	15,900	8,781
Percentage Change	6.6	-1.3	3.5	1.5	-44.8
Total Movements	43,680	44,462	48,053	48,698	23,218
Percentage Change	3.9	1.8	8.1	1.3	-52.3

Table 3.6.4.1: Aircraft Movements at Entebbe International Airport 2016 – 2020

#### 3.6.4.2 Passenger Air transport

The total number of passengers passing through Entebbe International Airport decreased to 571,564 (68.7%) in 2020, from 1,829,423 in 2019, as shown in Table 3.6.4.2.

Table 3.6.4.2: Number of Passengers through Entebbe International Airp	ort from 2016-2020

Passengers	2016	2017	2018	2019	2020

Total Passengers	1,549,495	1,644,702	1,697,012	1,829,423	571,564
Annual Change (%)	1.9	6.1	3.2	7.2	-68.8

Source: Civil Aviation Authority

#### 3.6.4.3 Volume of Cargo through Entebbe International airport

The volume of cargo decreased by 28.2 percent in CY2020, from 64,731 tonnes in CY2019 to 46,472 tonnes. This was predominantly as a result of a decrease in the volume of cargo loaded by 42.4 percent and volume of cargo off-loaded by nearly 2 percent in CY2020. In the same period, the volume of mails decreased by 36.4 percent in CY2020 as shown in Table 3.6.4.3.

	2016	2017	2018	2019	2020	Percentage Change
Cargo						
Off-loaded	20,182	21,593	21,687	22,642	22,226	-1.8
Loaded	39,374	47,713	41,666	42,089	24,246	-42.4
Total	59,556	69,306	63,353	64,731	46,472	-28.2
Mail						
Off-loaded	324	399	387	382.194	246	-35.6

Total	535	648	633	641.53	408	-36.4

Source: Civil Aviation Authority

# 3.6.5 Water Passenger Transport

In CY2020, there was a 74.6 percent decrease in total number of passengers transported using registered ferry operators, from 4.5 million in CY2019 to 1.2 million passengers in CY2020. Analysis by transporter noted that 98.5 percent of the passengers were transported by Uganda National Roads Authority (UNRA) ferries (1.1 million passengers), as shown in Table 3.6.5.1.

Ferry Category	2016	2017	2018	2019	2020	2019-2020 Percentage Changes	Contribution
Uganda National Roads Authority	3,171,272	3,321,643	3,604,781	3,840,899	1,137,589	-70.4	98.5
Kalangala Infrastructure Services	630,682	626,884	623,473	655,351			
MV Kalangala	40,138	46,628	46,858	53,083	17,710	-66.6	1.5
Total	3,842,092	3,995,155	4,275,112	4,549,333	1,155,299		100
Annual Percentage Change		4	7	6.4	-74.6

#### 3.6.6 Railway Transport statistics

A total of 196,935 metric tonnes was hauled in CY2020, indicating an increase in haulage of 1.7 percent compared to 193,693 metric tonnes hauled in CY2019. The Net tonnes km which is a summation of every one tonne moved one kilometre decreased, though, by 1.5 percent as well as the wagon turn around and locomotive productivity per kilometre per day. Furthermore, the number of passengers reduced by 71 percentage form 619,206 in CY2019 to 180,327 in CY2020. Details are shown in Table 3.6.6.1.

Indicator	2016	2017	2018	2019	2020	2019-2020 percentage change
Net ton-km ('000)	129,279	70,050	38,053	41,767	41,138	-1.5
Net tones	599,847	355,290	105,723	193,693	196,935	1.7
Net tonnes by rail ferries through Port Bell	-	-	-	63,949	32,237	-49.6
Net tonnes by rail ferries through Jinja Pier	-	-	-	0	26,063	-
Wagon Productivity (km/wagon '000)	-	-	-	3	4	10.6
Locomotive Availability (%)	-	-	-	47	44	-6.2
Locomotive productivity (km/loco/day)	-	-	-	20	24	16.4
Wagon availability	-	-	-	50	50	-1.0
Wagon Transit Time MSA-KLA (days)	-	-	-	19	17	-11.3

Source: Uganda Railways Corporation

# 3.7 Communication Statistics

This section presents statistics on Postal and Courier Services, and mobile money transactions.

### 3.7.1 Postal and Courier Services

The total volume of letters handled by Posta Uganda decreased by 43 percent in CY2020, from 819,574 letters in CY2019 to 467,508 letters. The biggest contributing factor to the decrease was volume of ordinary letters received from East Africa, Europe and America, which recorded a decline of 29 percent. Correspondingly, the volume of domestic letters decreased by 76.46 percent from 267,620 to 63,116. It was also noted that the volume of domestic registered mails and volumes of Express Mail Services (EMS) items dropped by 54.2 and 52.7 percent respectively. In the same way, the volume of incoming ordinary parcels handled, volume of registered letters posted and volume of registered letters received reduced by 53 percent, 50 percent and 73.2 percent respectively, as shown in Table 3.7.1.1.

#### Table 3.7.1.1: Postal and Courier Statistics 2016 – 2020

Item	2016	2017	2018	2019	2020	2019-2020 percentage change

### 3.7.2 Mobile Money Transactions

Table 2 7 2 1; Mabile Manay Transactions 2016 2020

The total number of mobile money registered customers increased by almost 5.1 percent, from almost 26.7 Million customers in CY2019 to 28.0 Million customers in CY2020. The number of transactions (information exchange) increased by 25 percent, from 2,840.9 million transactions in CY2019 to 3,549.8 million in CY2020. The value of the transactions increased by 27.2 percent, from 73,091 trillion shillings in CY2019 to 92,977 trillion shillings in CY2020, as shown in Table 3.7.2.1

Table 3.7.2.1. Wobile Woney Transaction	5, 2010-2020				
Subscribers	2016	2017	2018	2019	2020

# 3.8 Migration and Tourism

Migration is the movement of people from one place to another. It can be within a country or between countries. This section presents a summary of International movement of persons across gazetted points of entry and exit and as well as visitors to National Parks and the Uganda Wildlife Education Centre (UWEC). The information on international arrivals and departures is majorly based on the Arrival/Departure declaration cards filled at the 22 gazetted border points and augmented with data from Personal Identification Secure Comparable Evaluation System (PISCES). However, the arrival and departure data for CY2019 and CY2020 is from PISCES data for eight border points only. Those are Elegu, Malaba, Busia, Entebbe, Mutukula, Mirama Hills, Katuna and Mpondwe. These posts constitute 90 percent of the expected travellers. The PISCES data did not give a comprehensive picture for the CY2018, so it was omitted.

#### 3.8.1 International Arrivals and Departures

The PISCES, Arrival and Departure (A&D) cards show the number of movements of travellers rather than the number of travellers. The multiple movements of individual persons during a given reference period are all counted. Table 3.8.1 shows that Uganda registered about 1.3 million people arriving into and departing from the country in CY2020 compared to 2.3 million travelers recorded in CY2019, reflecting a decrease of 43% in movements. There were about 0.6 million persons entering the country (arrivals) and about 0.7 million leaving the country (departures). The number of departures was slightly higher than that of arrivals in CY2020.

	Ar	rivals			Net Movement*	Gross Movement**
Period	Number ('000s)	Annual %age Change	Number ('000s)	Annual %age Change	Number ('000s)	Number ('000s)
2015	1,730	1.8	1,710	7.1	20	3,440
2016	1,802	4.1	1,887	10.3	-85	3,688
2017	1,927	6.9	1,933	2.5	-6	3,861
2019	1,040	-	1,234	-	194	2,274
2020	629	(40)	682	(45)	(52)	1,310

\*\*Gross movement =Arrivals plus Departures

Source: Uganda Bureau of Statistics and PISCES

#### Arrivals From and Departures to the EAC- Pattern States

The East African Community (EAC) Common Market Protocol guarantees free movement of persons who are citizens of Partner States within the EAC territory. Statistics on arrivals and departures within the region is, therefore, important in monitoring the implementation of the EAC Common Market Protocol. However, the statistics provided excludes the arrivals for Uganda nationals. Table 3.8.2 shows that the number of arrivals from EAC member states to Uganda was 393,000 in CY2020 down from 403,000 in CY2019. The departures to the EAC member states increased from 308,000 in CY2019 to 334,000 in CY2020. In CY2020, the arrivals and departures were mainly from Kenya, accounting to 82% and 79% of all the arrivals and departures respectively.

Direction of movement by Country of Residence	2015	2016	2017	2018	2019	2020
Arrivals						
Burundi	46	47	45	-	45	14
Kenya	409	353	334	-	243	322
Rwanda	302	363	442	-	60	23

#### Arrivals and Departure by Residential status and port of entry, 2020

Table 3.8.3 shows that the majority of the arrivals were non-residents, constituting about three quarters (75%) of the total arrivals. Malaba port had the highest percentage of arrivals (32%) while Entebbe airport had 37 percent. On the other hand Mpondwe had the lowest percentage of arrivals and departures, constituting about one percent each.

Entry/Exit		Arriva	ls			Departure	es	
Point	Resident	Non	Total	Percent	Resident	Non	Total	Percent
		Resident				Resident		
Entebbe	82,586	78,889	161,475	25.7	100,011	151,496	251,507	36.9
Katuna	3,811	5,154	8,965	1.4	5,169	4,541	9,710	1.4
Busia	21,048	113,013	134,061	21.3	24,199	84,885	109,084	16.0
Malaba	21,389	178,058	199,447	31.7	21,132	144,029	165,161	24.2
Elegu	8,155	20,291	28,446	4.5	8,138	18,801	26,939	4.0

Table 3.8.3: Total Arrivals and Departures by Entry/Exit points and residence status, 2020

Source: Ministry of Internal Affairs.

Table 3.8.4 shows the monthly distribution of movements throughout the CY2020. The arrivals and departures were high in the first three months of the year (January to March) and, thereafter, the movements declined drastically, showing the effect of COVID 19. The movements of the females declined so much compared to that of males between March and October 2020.

		Arrivals		0	)epartures		
Month	Female	Male	Total	Female	Male	Total	
January	36,064	57,364	93,428	47,528	71,033	118,561

#### Visitor (Tourists) Arrivals

A visitor is a traveller taking a trip to a main destination outside his/her usual environment, for less than a year, for business, leisure or other personal purpose. This excludes purposes of employment. Similarly, a visitor is considered **a tourist (overnight visitor)** if his/her trip includes an overnight stay or as a **same day visitor** (excursionist) (IRTS 2008).

Table 3.8.4 shows that in CY2020, about 473,000 visitors entered Uganda through the eight ports of entry/exit. On the other hand about 485,000 visitors left the country. There was a decline in the number of visitors entering and leaving the country compared to the figures recorded in CY2019.

Year	Visitor Arrivals ('000s)	Visitor Departures ('000s)	Tourists Net Movement ('000s)
2015	1,303	1,310	-7
2016	1,323	1,359	-37
2017	1,402	1,370	32
2019*	657	746	-89
2020	473	485	(12)

Table 3.8.5: Visitor Arrivals and Departures by Residence, 2015 – 2020

Source: Uganda Bureau of Statistics. \*2019 and 2020 is based on data from PISCES

#### Country of Origin for Visitor Arrivals.

Table 3.8.6 shows that 84% of the visitor arrivals in CY2020 were mainly from the EAC Member States, followed by those from other African (5%) and Asian (4%) countries. Visitors from the EAC countries came mainly from Kenya, representing 69% of all visitor arrivals.

				••••••••••••••••••••••••••••••••••••••	
Country of Residence	2015	2016	2017	2019	2020
EAC	69	67	68	61	84
Kenya	31	27	24	37	69
Tanzania	7	7	6	9	5
Rwanda	23	27	32	7	5
South Sudan	4	3	3	4	3
Burundi	4	4	3	4	3

Source: Uganda Bureau of Statistics and Ministry of Internal affairs.

#### Visitor Arrivals by Mode of Travel

Air and road transport are the two major types of mode of transport used by visitors arrivals. Very few travelers use water transport on Lake Victoria, Lake Albert or any other cross border water body. Figure 3.8.1 shows the number of arrivals by mode of transport since 2015. Road transport has remained the most commonly used mode of transport by international arrivals in Uganda. In CY2020, about 393,000 visitors entered Uganda by road transport, constituting to about 83% of all the visitors.

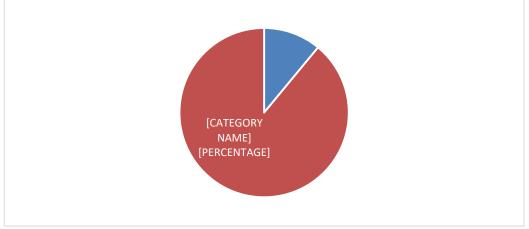

# Figure 3.8.1: Visitor Arrivals by Mode of Transport ('000s), 2015–2020

Source: Uganda Bureau of Statistics, 2020 is from Ministry of Internal affairs, PISCES

# Age-Sex Composition of Visitor Arrivals.

In CY2020, there were 473,000 visitor arrivals into Uganda of which males accounted for 89 percent (Figure 3.8.2). Most of the visitor arrivals were in the age group of 20-39 years (49.3%), followed by the age group 40-59 years (43.6%) (Appendix 3.8 H).

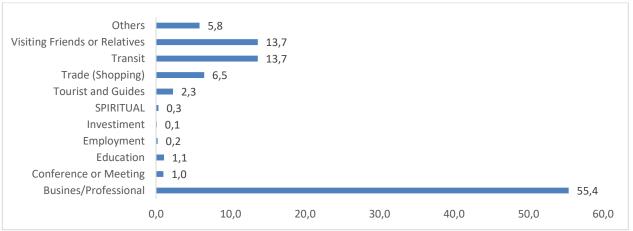

Source: Ministry of Internal affairs,

# Purpose of Visit.

The main reason for visitors into Uganda in CY2020 was business or professional work (55%). Other notable reasons were visiting friends or relatives (14%) and trading or shoping (7%).

#### Wildlife Tourism 3.8.2

Uganda has twelve National Parks and three active game reserves. These offer a wide range of tourism products including gorilla tracking, nature guided walks, village walks, butterfly and bird watching, rare fauna and flora species. Figure 3.8.3 shows that the total number of Visitors (citizens and foreigners) to the National parks of Uganda. Overall, there were 101,000 visitors to National parks and 68,000 to Uganda Wildlife Education Centre (UWEC). The results further show that Uganda experienced a decline in the number of visitors to both the National parks and UWEC in 2020 compared to 2019. Visitors to UWEC and to National parks reduced from 383,000 to 68,000 and from 324,000 to 101,000 between 2019 and 2020 respectively, as a result of the pandemic.

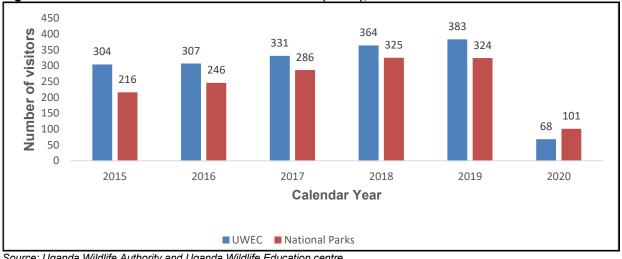

Figure 3.8.4: Visitors to National Parks and UWEC (000's), 2015 - 2020

Source: Uganda Wildlife Authority and Uganda Wildlife Education centre

Table 3.8.6 shows visitors to National parks since 2015. Murchison falls and Queen Elizabeth are the most visited national parks. Generally there was a reduction in the number of visitors in CY2020 to all national parks compared to CY2019.

				,, =		
National Parks	2015	2016	2017	2018	2019	2020

Figure 3.8.4 shows the distribution of visitors to the national parks by category. It shows that EAC residents were the major visitors (45,000) to national parks in CY2020 followed by foreign non residents (43,000) constituting 44% and 42% respectively.

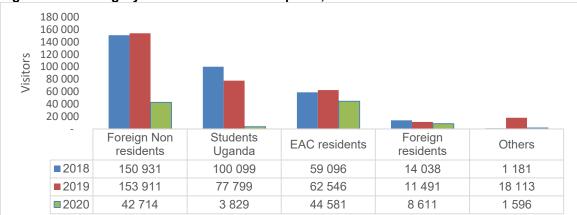

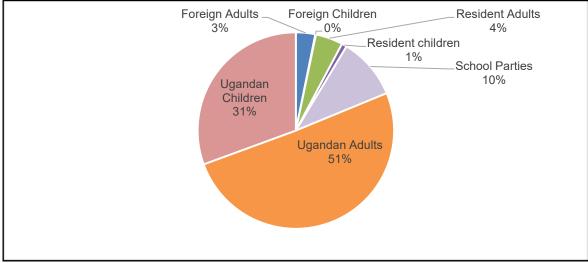

Figure 3.8.4: Category of Visitors to National parks, 2018-2020

Source: Uganda Wildlife Authority

Figure 3.8.5 shows that in CY2020 UWEC was mainly visited by Ugandans (Ugandan children and adults) constituting 82% and this pattern has remained the same since CY2015 as seen in Appendix Table 3.8 K.

### 3.8.3 Accommodation Statistics

The Bureau conducts the Accommodation survey twice a year. The statistics show guest nights, capacity and occupancy rates on a quarterly basis in hotels, holiday villages, youth hostels, campsites and commercially arranged rentals in private cottages and apartments in Uganda. The statistics are published at county level, but can be broken down to low regional level.

This section only presents room and bed occupancy rates as the key indicators from the accommodation survey. The room occupancy refers to the number of rooms occupied in relation to the available rooms whereas bed occupancy refers to number of beds occupied in relation to the available beds in a given reference period (month, quarter or year). The overall room and bed occupancy rate in CY2020 stood at about 20% each (Table 3.8.6). This implies that accommodation facilities only filled a fifth of the available rooms and beds in CY2020.

Occupancy Rate (%)	Quarters (Percent)							
	FY 20 <sup>4</sup>	17/18	FY 20 <sup>-</sup>	18/19	2019	2020		
	Qtr3 (Jan-Mar)	Qtr4 (Apr-Jun)	Qtr1 (Jul-Sept)	Qtr2 (Oct-Dec	Overall (Jan-Dec 2018)	Overall (Jan-Dec 2020)		
Room Occupancy	48.4	50.9	52.9	51.5	50.9	20.1		
Bed Occupancy	50.8	44.9	46.3	45.4	46.7	19.8		

Table 3.8.6: Overall Occupancy rates for the period 2018 and 202
--

Source: Uganda Bureau of Statistics

#### **Room Occupancy Rates by Region**

Table 3.8.7 shows that overall there was a decline in the room occupancy rates across all regions in CY2020 compared to 2019. The highest room occupancy rate in 2020 was registered in the Western region (25%) followed Northern region (23%) and Eastern region (21%). Kampala room occupancy rates declined from 52% in CY2019 to 18% in CY2020.

Table 3.8.7: Room Occupancy by F/Y Quarters and Region								
			Room Occu	upancy Rate (	%)			
Region	FY 2017/18		FY 2018/19		2019	2020		
Kegion	Qtr3 (Jan-Mar)	Qtr4 (Apr-Jun)	Qtr1 (Jul-Sept)	Qtr2 (Oct-Dec)	Overall (Jan-Dec 2018)	Overall (Jan-Dec 2020)		
Central	48.0	46.3	49.5	52.1	48.7	18.0		
Eastern	49.0	51.1	54.3	62.3	54.9	20.6		
Kampala	49.7	56.8	56.3	44.8	52.0	18.2

# **CHAPTER FOUR: MACROECONOMIC STATISTICS**

### **4.1 National Accounts**

National accounts is a measure of macroeconomic categories of production and purchase in Uganda. These systems are essentially methods of accounting used to measure the economic activities of Uganda based on the System of National Accounts (SNA) 2008 and set of accounting rules.

The section presents the performance of Uganda's economy in terms of Gross Domestic Product (GDP) for the period 2015/16 to 2020/21.

### 4.1.1 Gross Domestic Product

The revised Gross Domestic Product estimates for the Fiscal Year (FY) 2020/21 indicate that the Ugandan economy grew by 3.4 percent. This growth is 0.4 percentage points lower than the revised growth of 3.0 percent registered in FY2019/20.

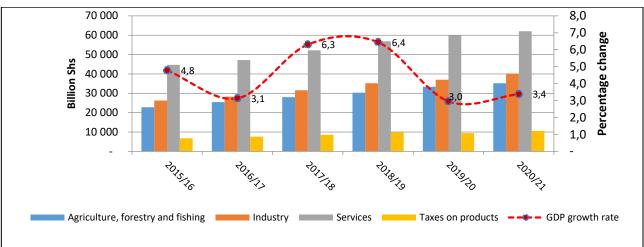

Figure 4.1: GDP in Constant prices and percentage growth rate, 2015/16 - 2020/21

### Table 4.1: Percentage growth rate in GDP, FY 2015/16 - 2020/21

	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21
GDP at market prices	4.8	3.1	6.3	6.4	3.0	3.4
Agriculture, forestry and fishing	2.8	2.8	4.4	5.3	4.8	3.8
Industry	4.6	6.8	4.8	9.1	3.3	3.4
Services	6.2	0.1	8.5	5.8	2.5	2.7
Taxes on products	2.2	10.9	4.4	4.4	-1.6	6.2

Source: Uganda Bureau of Statistics

Agriculture, forestry and fishing sector activities grew by 3.8 percent in FY2020/21 which is one percentage point lower than the previous year's growth (4.8 percent). Industry sector activities grew by 3.4 percent in FY2020/21 which is a 0.1 percentage point higher than the previous year's growth. The Services sector grew by 2.7 percent in FY2020/21 which is a 0.2 percent higher than the previous year's growth. Taxes on products registered a strong growth of 6.2 percent in FY2020/21 recovering from a decline of 1.6 percent in FY2019/20.

	2016/17	2017/18	2018/19	2019/20	2020/21
GDP at market prices					
At current prices (Billion shillings)	108,518	120,485	132,090	139,689	147,962
At constant 2009/10 prices (Billion shillings )	108,518	115,359	122,787	126,410	130,683
Constant price growth rates (%)	3.1	6.3	6.4	3.0	3.4
GDP per capita, current prices					
GDP per capita (UGS '000)	2,908	3,127	3,321	3,403	3,492
GDP per capita (US \$)	824	855	889	916	954
Memorandum items					
Mid-Year Population ('000)	37,319	38,525	39,772	41,054	42,369
Exchange rate UGS per US \$	3,530	3,659	3,736	3,715	3,656

Source: Uganda Bureau of Statistics

In nominal terms, Gross Domestic Product (GDP) stood at Uganda Shillings 147,962 billion in FY2020/21 indicating an increase of Uganda Shillings 8,273 billion from FY2019/20. The GDP per capita increased from Uganda Shillings 3,403,000 (USD916) in FY2019/20 to Uganda Shillings 3,492,000 (USD 954) in FY2020/21.

### 4.1.2 Gross Domestic Product by Broad Economic Sectors

Broadly, the structure of the economy has three sectors. One broad sector is of Agriculture, forestry & fishing while the other is Industry and the last one is Services. Services continue to be the lead contributor to GDP, accounting for 41.9 percent of the overall GDP in FY2020/21. Industry contributed 27.1 percent while Agriculture, forestry & fishing, the backbone of Uganda's economy, contributed 23.8 percent in 2020/21. Taxes on products contributed 7.2 percent in FY2020/21. Below is a detailed breakdown of the contributions to the economy by sector (See Figure 4.2 & Table 4.1 B (ii).

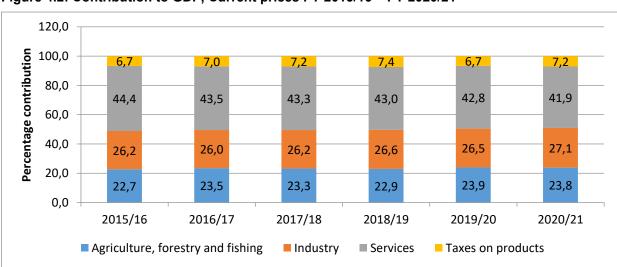

Figure 4.2: Contribution to GDP, Current prices FY 2015/16 - FY 2020/21

### 4.1.3 Agriculture, forestry and fishing sector

The value added for the agricultural activities grew by 3.8 percent in FY2020/21, from a growth of 4.8 percent in FY2019/20. The growth is attributed to favourable weather in FY2020/21. In nominal terms, the gross value added was recorded at Uganda Shillings 35,213 billion in FY2020/21, compared to the revised value added of Uganda Shillings 33,426 billion in FY2019/20. The performance of the agricultural activities was majorly driven by the good performance in food crop, cash crop and livestock activities. However, fishing activities declined by 8.8 percent in FY2020/21 compared to a small growth of 0.3 percent in FY2019/20. The sector contributed 23.8 percent to GDP in FY2020/21 compared to 23.9 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.3.1 Cash crops

The value added for cash crop growing activities grew by 7.7 percent in FY2020/21, compared to 7.8 percent growth in FY2019/20. The major drivers to this growth were the good performance in coffee (5.2%), Cotton (10.6%), Tea (36.8%) and Cocoa (18.5%) growing activities. In spite of the good performance of cash crop growing activities, a decline was registered in growing activities of sugarcane (3.3%) and Tobacco (1.4%). In nominal prices, the sector recorded a value addition of Uganda Shillings 2,904 billion in FY2020/21, compared to Uganda Shillings 2,748 billion in FY2019/20. The cash crops contributed 2.0 percent to GDP in both FY2020/21 and FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.3.2 Food crops

The value added for food crop growing activities recorded a growth of 4.1 percent in 2020/21, compared to a growth of 4.6 percent in FY2020/21. The growth in value added was realised in Bananas, Rice, Beans, Groundnuts, Sorghum, Simsim, Cassava, fruits and sunflower growing activities. On the other side, there was a decline in value added for maize and Irish potato growing activities. In nominal prices, the sector recorded a value addition of Uganda Shillings 17,011 billion in FY2020/21, compared to Uganda Shillings 16,177 billion in FY2019/20. The food crops growing activities contributed 11.5 percent to GDP in FY2020/21 compared to 11.6 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.3.3 Livestock

The livestock raring activities include keeping of animals and birds such as cattle, goats, sheep and chicken. The value added for livestock activities registered a growth of 7.8 percent in FY2020/21 compared to the 7.9 percent growth in FY2019/20. In nominal prices, the sector recorded a value addition of Uganda Shillings 5,835 billion in FY2020/21 compared to Uganda Shillings 5,268 billion in FY2019/20. The livestock keeping activities contributed 3.9 percent to GDP in FY2020/21 from 3.8 percent in FY2017/18 (See Appendix Tables 4.1 B (ii), 4.1 C (i) and 4.1 C (ii)).

#### 4.1.3.4 Forestry

The forestry activities include Logging, Gathering of non-wood forest products and Support services to forestry, among other products. The value added for forestry activities registered a growth of 2.9 percent in FY2020/21, compared to a growth of 3.3 percent recorded in FY2019/20. In nominal prices, the sector recorded a value addition of Uganda Shillings 6,102 billion in FY2020/21 compared to Uganda Shillings 5,751 billion in FY2019/20.

The forestry activities contributed 4.1 percent to GDP in FY2020/21, which was similar to FY2019/20 (See Appendix Tables 4.1 B (ii), 4.1 C (i) and 4.1 C (ii)).

### 4.1.3.5 Fishing

The fishing activities include fishing in fresh water lakes and rivers as well as fish farming. The value added for fishing activities registered a decline of 8.8 percent in FY2020/21, compared to a growth of 0.3 percent recorded in FY2019/20. This decline is mainly attributed to the decrease in fish catch in 2020. In nominal prices, the sector recorded a value addition of Uganda Shillings 3,351 billion in FY2020/21, compared to Uganda Shillings 3,462 billion in FY2019/20. The fishing activities contributed 2.3 percent to the GDP in FY2020/21, which was 0.2 percentage points lower than the 2.5 percent contribution in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.4 Industry sector

The value added for the Industry sector activities include Mining and quarrying, Manufacturing, Water and waste management activities, Electricity generation and supply as well as Construction activities. The overall industry activities grew by 3.4 percent in FY2020/21, compared to 3.2 percent in FY2019/20. This is attributed to the growth in Mining & quarrying activities which grew by 6.0 percent in FY2020/21 compared to 16.5 percent in FY2019/20. Manufacturing activities picked up with a growth of 2.2 percent in FY2020/21, from 1.3 percent in FY2019/20. In nominal terms, the sector recorded a gross value added of Uganda Shillings 40,076 billion in FY2020/21 compared to Uganda Shillings 37,004 billion recorded in FY2019/20, contributing 27.1 percent to GDP in FY2020/21 compared to 26.5 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.4.1 Mining and quarrying activities

Mining and quarrying activities include Extraction of crude petroleum and natural gas, Mining of metal ores, Other mining and quarrying as well as Mining support service activities. The value added for mining and quarrying activities grew by 6.0 percent in FY2020/21, following a growth of 16.5 percent in FY2019/20. In nominal prices, the activity recorded a value addition of Uganda Shillings 2,627 billion in FY2020/21 compared to Uganda Shillings 2,266 billion in FY2019/20. Mining and quarrying activities, the least among the Industry sector, contributed 1.8 percent to GDP in FY2020/21 compared to 1.6 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.4.2 Manufacturing activities

Manufacturing activities include manufacture of Food products, Beverages, Tobacco products, Textiles, wearing and apparel products as well as Paper and paper products. The value added for manufacturing activities grew by 2.2 percent in FY2020/21, compared to 1.3 percent recorded in FY2019/20. Manufacturing activities contributed 16.5 percent to the GDP in 2020/21. In nominal prices, the activity recorded a value addition of Uganda Shillings 24,373 billion in FY2020/21, compared to Uganda Shillings 22,064 billion in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.4.3 Electricity activities

Electricity activities include Electricity, gas and steam as well as Air conditioning supply. The value added for electricity activities grew by 11.3 percent in FY2020/21, compared to 10.9 percent recorded in FY2019/20. In nominal prices, the activity recorded a value addition of Uganda Shillings 2,134 billion in FY2020/21, compared to

Uganda Shillings 1,932 billion in FY2019/20. Electricity activities contributed 1.4 percent to GDP in FY2020/21 same as FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.4.4 Water supply activities

Water supply activities include Water supply, Sewerage, Waste management and Remediation activities. The value added for water supply activities grew by 4.8 percent in FY2020/21, compared to 4.1 percent recorded in FY2019/21. In nominal prices, the activity recorded a value addition of Uganda Shillings 3,258 billion in FY2020/21 compared to Uganda Shillings 3,119 billion in FY2019/20. Water supply activities contributed 2.2 percent to GDP in FY2018/19 same as FY2017/18 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.4.5 Construction activities

Construction activities include Construction of buildings, Civil engineering and specialised construction activities. The value added for construction activities grew by 3.3 percent in FY2020/21, compared to a growth of 3.8 percent recorded in FY2019/20. The growth has continued to be driven by both private and public construction activities. The public sector investments have continued to be dominated by civil construction of dams and roads & bridges. In nominal prices, the activity recorded a value addition of Uganda Shillings 7,685 billion in FY2020/21 compared to Uganda Shillings 7,623 billion in FY2019/20. Construction activities contributed 5.2 percent to GDP in FY2020/21 compared to 5.5 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.5 Services sector

The value added in the service sector includes Wholesale and retail trade, Repairs, transport and storage, Accommodation and food services, Information and communication, Financial and insurance activities, Real estate activities, Professional, scientific and technical services, Administrative and support services, Public administration, education, health, arts, entertainment and recreation as well as Other service activities. The overall services sector activities value added grew by 2.7 percent in FY2020/21, compared to 2.5 percent in FY2019/20. The main contributors to the growth in services sector were Public administration, Real estate activities, Information and communication then Health & social work activities. The sector contributed 41.9 percent to GDP growth in FY2020/21, compared to 42.8 percent in FY2019/20. In nominal terms, the gross value added was recorded at Uganda Shillings 62,051 billion in FY2020/21, compared to Uganda Shillings 59,840 billion recorded in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.1 Trade and repairs

Trade and repairs activities include Wholesale, retail trade and sales as well as Repair of motor vehicles. The value added for trade and repairs activities registered a decline of 0.7 percent in FY2020/21, compared to a decline of 1.3 percent recorded in FY2019/20. In nominal prices, the activity recorded a value addition of Uganda Shillings 11,728 billion in FY2020/21 compared to Uganda Shillings 11,758 billion in FY2019/20. Trade and repairs activities contributed 7.9 percent to GDP in FY2020/21 as compared to 8.4 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.2 Transport and storage activities

Transport and storage activities include Road, rail, water and air transport, Warehousing as well as Posts and courier activities. The value added for Transport and storage activities declined by 0.3 percent in FY2020/21, from

a decline of 1.7 percent in FY2019/20. This was attributed to Warehousing and support activities and to Postal services which have both contracted in the last two years. There was, however, a growth in road transport of 6.3 percent in FY2020/21, recovering from a decline of 2.1 percent in FY2019/20. In nominal terms, the activity recorded a value addition of Uganda Shillings 4,804 billion in FY2020/21 compared to Uganda Shillings 4,792 billion in FY2019/20. Transport and storage activities contributed 3.2 percent to GDP in FY2020/21, compared to 3.4 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.3 Accommodation and food activities

Accommodation and food service activities include; accommodation and restaurants activities. The value added for Accommodation and food service activities declined by 0.6 percent in FY2020/21, from a decline of 8.6 percent in FY2019/20. In nominal prices, the activities recorded a value addition of Uganda Shillings 3,549 billion in FY2020/21, compared to Uganda Shillings 3,645 billion in FY2019/20. Accommodation and food service activities contributed 2.4 percent of GDP in FY2020/21, compared to 2.6 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.4 Information and communication activities

The value added for Information and communication services grew by 11.8 percent in FY2020/21, from 19.6 percent in 2019/20. The largest contributor to the growth of Information and communication services was telecommunications (14.7 percent). In nominal prices, the activity recorded a value addition of Uganda Shillings 2,678 billion in FY2020/21 compared to Uganda Shillings 2,555 billion in FY2019/20. Information and communication service activities contributed 1.8 percent to GDP in FY2020/21 equivalent to FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.5 Financial and insurance activities

Financial and insurance activities include services of the Central bank, Financial intermediaries, Financial auxiliaries, Credit institutions and Micro-deposit taking institutions (MDI's) as well as other Financial corporations. The sector grew by 8.0 percent in FY2020/21, from a 9.6 percent growth registered in FY2019/20. In nominal prices, the activity recorded a value addition of Uganda Shillings 4,103 billion in FY2020/21, compared to Uganda Shillings 3,816 billion in FY2019/20. Financial and insurance activities contribution to GDP was 2.8 percent in FY2020/21, compared to 2.7 percent in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.5.6 Real estate activities

Real estate activities include Real estate on own or lease and Real estate on fee or contract. The sector grew by 3.9 percent in FY2020/21, compared to the 5.1 percent registered in FY2019/20. Real estate on fee or contract and Real estate on own or lease grew by 20.3 and 3.4 percent respectively. In nominal prices, the activity recorded a value addition of Uganda Shillings 9,273 billion in FY2020/21 compared to Uganda Shillings 8,907 billion in FY2019/20. Real estate activities contributed 6.3 percent to GDP in FY2019/20, which is 0.1 percentage point less than the contribution of the previous fiscal year (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.7 Professional, scientific and technical activities

Professional, Scientific and Technical services include Legal & accounting services, Head offices & management, Architectural & engineering services, Science, research and development, Advertising & market research, Veterinary services as well as Other business services. The activities grew by 2.1 percent in FY2020/21, following a growth of 2.8 percent registered in FY2019/20. In nominal prices, Professional, scientific and technical activities realised a value added of Uganda Shillings 2,964 billion in FY2020/21 compared to 2,902 billion in FY2019/20. The overall activity contributed 2.0 percent to GDP in FY2020/21, compared to 2.1 percent contribution registered in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.8 Administrative and support activities

Administrative and support activities include Rental & leasing, Employment activities, Travel, tour & reservation, Security and investigation, Buildings and landscaping as well as Office administration & business support. The activities grew by 2.3 percent in FY2020/21, compared to 7.5 percent growth registered in FY2019/20.

In nominal prices, the activity recorded a value addition of Uganda Shillings 2,840 billion in FY2020/21, compared to Uganda Shillings 2,577 billion in FY2019/20. Administrative and Support activities contributed 1.9 percent to GDP in FY2020/21, compared to 1.8 percent contribution registered in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.5.9 Public administration activities

This includes Public administration, Defence and Compulsory social security services. The activities grew by 12.6 percent in FY2020/21, from 16.2 percent growth in FY2019/20. The activities contribution to GDP was recorded at 3.0 percent, from 2.8 percent in FY2019/20. In nominal prices, the activity recorded a value addition of Uganda Shillings 4,455 billion in FY2020/21 compared to Uganda Shillings 3,865 billion in FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.10 Education activities

Education services comprise of both private and public services. The activities declined by 4.2 percent in FY2020/21, compared to a decline of 2 percent in 2019/20. The continuous decline is attributed to the closure of the majority of school activities in the two periods. (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

In nominal prices, the activity recorded a value addition of Uganda Shillings 5,565 billion shillings in FY2020/21 compared to Uganda Shillings 5,767 billion shillings in FY2019/20. Education activities contributed 3.8 percent to GDP in FY2020/21, compared to 4.1 percent contribution registered in FY2019/20.

#### 4.1.5.11 Human health and social work activities

Human health and social work activities include Public health, Private health and Social work. The activities grew by 7.1 percent in FY2020/21, compared to a 1.0 percent growth registered in FY2019/20. In nominal prices, Human health and Social work activities realised a value addition of Uganda Shillings 5,078 billion in FY2020/21 compared to Uganda Shillings 4,496 in FY2019/20. The share of the activities to GDP was recorded at 3.4 percent in FY2020/21 from 3.2 percent recorded in 2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

#### 4.1.5.12 Arts, entertainment and recreation activities

Arts, Entertainment and Recreation activities include Creative, arts & entertainment, Libraries, archives and museums, Gambling and betting as well as Sports, amusement and recreation activities. The activities declined by 13.7 percent in FY2020/21, compared to a decline of 8.1 percent registered in FY2019/20. In nominal prices, Arts, Entertainment and Recreation activities realised a value addition of Uganda Shillings 229 billion in

FY2020/21 compared to Uganda Shillings 251 in FY2019/20. The share of the activities to GDP remained constant at 0.2 percent in FY2020/21 and FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.5.13 Other service activities

Other Service activities include Membership organisations, Computers & personal goods repair as well as Computers and personal goods repair. This activity grew by 2.9 percent in FY2020/21, compared to a 1.4 percent registered in FY2019/20. In nominal prices, Other service activities realised a value addition of Uganda Shillings 3,679 billion in FY2020/21, compared to 3,455 in FY2019/20. The share of the activities to GDP remained constant at 2.5 percent in FY2020/21 and FY2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.5.14 Activities of households as employers

Activities of households as employers grew by 2.7 percent in FY2020/21, compared to a 2.8 percent registered in FY2019/20. In nominal prices, Activities of households as employers realised a value addition of Uganda Shillings 1,107 billion in FY2020/21, compared to Uganda Shillings 1,053 in FY2019/20. The share of the activities to GDP was recorded at 0.7 percent in FY2020/21, from 0.8 percent recorded in 2019/20 (See Appendix Tables 4.1 B(ii), 4.1 C(i) and 4.1 C(ii)).

### 4.1.6 GDP by Expenditure

GDP by expenditure approach measures the allocation of total production during the year among alternative uses and, therefore, the expenditure approach takes into account three main aggregates. The aggregates are Final Consumption Expenditure (Household, Government, Non-Profit Institutions Serving Households (NPISH)), Gross Capital Formation, and the Net Exports (Exports less Imports). Below is an explanation of the expenditure sectors of GDP.

### 4.1.6.1 Final Consumption Expenditure (FCE)

The Final Consumption Expenditure (FCE) recorded a growth of 6.6 percent in FY2020/21, compared to 3.2 percent in FY2019/20. The FCE in nominal terms was recorded at Uganda Shillings 122,348 billion. The share of the FCE recorded at 82.7 percent of the GDP in FY2020/21 compared to 80.7 percentage in FY2019/20 (See Appendix Tables 4.1 J(i) and 4.1 J(ii)).

### 4.1.6.2 Households Final Consumption Expenditure (HFCE)

The household final consumption expenditure accounted for about 82.9 percent of the final consumption expenditure in FY2020/21. The HFCE grew by 7.1 percent in FY2020/21 compared to 3.2 percent. In nominal terms, the HFCE was estimated at Uganda Shillings 101,477 billion in FY2020/21. The share of HFCE stood at 68.6 percent of GDP in FY2020/21 (See Appendix Tables 4.1 J(i) and 4.1 J(ii)).

### 4.1.6.3 Government Final Consumption Expenditure (GFCE)

The government final consumption expenditure accounted for about 12.0 percent of the final consumption expenditure in FY2020/21. The GFCE recorded a further growth of 6.5 percent in FY2020/21, following a strong growth of 12.7 percent in FY2019/20. In nominal terms, the GFCE was estimated at Uganda Shillings 14,730 billion in FY2020/21, from Uganda Shillings 13,286 billion in FY2019/20. The contribution of GFCE to GDP stood at 9.9 percent of GDP in FY2020/21 (See Appendix Tables 4.1 J(i) and 4.1 J(ii)).

### 4.1.6.4 Gross Fixed Capital Formation (GFCF)

Gross fixed capital formation consists of expenditure on Dwellings, Other buildings and structures, Buildings other than dwellings, Other structures, Land improvements, Machinery and equipment, Transport equipment, Information and Communication Technologies (ICT) equipment, Other machinery and equipment, Research and development, Mineral exploration and evaluation then Computer software and databases. In FY2020/21. Gross fixed capital formation recorded a growth of 4.4 percent from a decline of 0.1 percent in FY2019/20. The GFCF contributed 23.3 percentage points to the total GDP by expenditure in FY2020/21. Construction (Dwellings, other structures) have a share of 60.7 percent of GFCF recorded in FY2020/21 compared to 61.8 percent in FY2019/20. In nominal terms, the GFCF was estimated at 34,538 billion shillings in FY2020/21 from 32,852 billion shillings in FY2019/20 (See 4.1 Appendix Tables J(i) and 4.1 J(ii)).

### 4.1.6.5 Exports and imports of goods and services

Export of goods and services declined by 0.7 percent in FY2020/21 compared to a decline of 1.2 percent recorded in FY2019/20. However, Export of goods grew by 12.5 percent while services declined by 30.3 percent in the period under study.

Import of goods and services grew by 20.6 percent in FY2020/21 compared to the growth of 0.4 percent recorded in FY2019/20. Import of goods grew by 33.3 percent while services contracted by 0.3 percent in the period under study (See Appendix Tables 4.1 J(i) and 4.1 J(ii)).

In nominal terms, the value of exports of goods and services was recorded at 20,253 billion shillings in FY2020/21 from 20,396 billion shillings in the previous year. The value of imports of goods and services was recorded at 30,786 billion shillings in FY2020/21 from 25,533 billion shillings in FY2019/20 (See Appendix Tables 4.1 J(i) and 4.1 J(ii)).

### 4.1.7 GDP by Institutional sectors

The Gross Domestic Product (GDP) is disaggregated by the five (5) institutional sectors. Those are Household/informal production, General Government, Non-Profit institutions serving households, Financial and Non-financial corporations. The economy grew by 3.4 percent in 2020/21, from 3.0 percent in 2019/20. This was due to a 2.0 percent growth registered by Non-financial corporations in 2020/21 compared to 0.8 percent recorded in 2019/20. General government and Financial corporations registered a slow growth (6.8% and 7.3% respectively) in 2020/21, compared to 13.9 percent and 8.6 percent respectively in 2019/20. Non-profit institutions serving households registered a growth of 2.1 percent in 2020/21, compared to a growth of 6.7 percent in 2019/20. In terms of contribution, the Household/informal production sector continued to be the main contributor, accounting for 51.8 percent to the overall GDP.

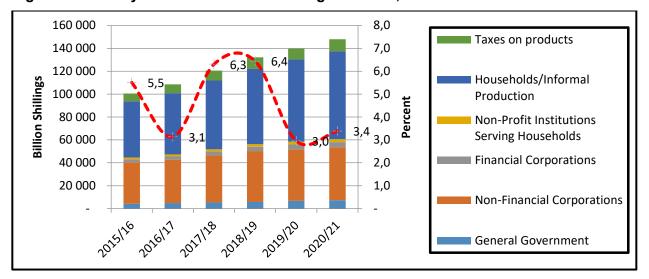

Figure 4.5 GDP by institutional sectors and growth rate, 2015/16 -2020/21

### 4.1.7.1 Household/Informal production

The households sector covers people living independently in residential accommodation and those living in communal establishments. The households sector also includes self-employed (market producers) who do not form part of quasi-corporations, as well as individuals or groups of individuals who produce goods and non-financial services for their own final use. The Household sector was estimated at Uganda Shillings 76,694 billion in FY2020/21, contributing 51.8 percent to GDP. In real terms, the sector grew by 3.5 percent from Uganda Shillings 62,795 billion in FY2019/20 to Uganda Shillings 64,963 billion in FY2020/21.

### 4.1.7.2 General Government

The sector includes Government departments and agencies, Central government, Local governments, the State education system, the National health service, the Armed forces and the Police. Non-departmental public bodies are also included in the General government sector.

In nominal terms, General government was estimated at Uganda Shillings 7,352 billion in FY2020/21, contributing 5.0 percent to GDP. In real terms, the sector grew by 6.8 percent from Uganda Shillings 6,313 billion in FY2019/20 to Uganda Shillings 6,740 billion in FY2020/21

### 4.1.7.3 Non-Profit institutions serving households

Non-profit institutions serving households (NPISH) are institutions that provide goods and services, either free or below the market prices. They mainly derive their income from grants and donations and are not controlled by government. For example, charity organisations, Trade unions, Religious organisations, Associations and Political parties. The NPISH sector was estimated at Uganda Shillings 2,607 billion in FY2020/21, contributing 1.8 percent to GDP. In real terms, the sector grew by 2.1 percent from 2,460 billion shillings in FY2019/20 to 2,511 billion shillings in FY2020/21. The sector was mainly driven by Human health and social work services as well as Education.

### 4.1.7.4 Financial corporations

The Financial corporations sector consists of institutional units that are independent legal entities and market producers whose principal activity is the production of financial services. Such institutional units comprise all corporations and quasi corporations that are principally engaged in financial intermediation and auxiliary financial activities. The Financial Corporations sector was estimated at Uganda Shillings 4,414 billion in FY2020/21, contributing 3.0 percent to GDP. In real terms, the sector grew by 7.3 percent, from Uganda Shillings 3,862 billion in FY2019/20 to Uganda Shillings 4,142 billion in FY2020/21.

### 4.1.7.5 Non-Financial corporations

The sector players produce goods and services for the market and do not, as a primary activity, deal in financial assets and liabilities. This sector includes both public and private retailers, manufacturers, utilities, business service providers (such as accountancy and law firms), caterers, haulage companies, airlines, construction companies and farms, among others. Non-Financial Corporations sector was estimated at Uganda Shillings 46,272 billion in FY2020/21, contributing 31.3 percent to GDP. In real terms, the sector grew marginally by 2.0 percent from Uganda Shillings 42,795 billion in FY2019/20 to Uganda Shillings 43,630 billion in FY2020/21. The sector was mainly driven by Manufacturing, followed by Trade & repairs services, Real estate activities, Education and Construction services.

### 4.1.8 Balance of Payments

Balance of Payments (BoP) statement summarises all transactions between a country's residents and its nonresidents involving Goods, services and income; Financial claims on and liabilities to the rest of the world; as well as Transfers such as gifts. Within the BoP, there are three separate categories under which different transactions are categorised: Those are; the Current account, the Capital account and the Financial account. The overall BoP balance stood at a deficit United States Dollars 182 million in 2020/21 following a previous deficit of United States Dollars 146 million recorded in 2019/20 (See Appendix Table 4.1N)

### 4.1.8.1 Current Account Balance

The Current account is the sum of the Balance of trade (goods and services exports less imports), Net income from abroad and Net current transfers. The Current account balance registered a deficit of United States Dollars 4,135 million in 2020/21 compared to a deficit of United States Dollars 2,504 million in 2019/20 translating into United States Dollars 1,631 million deficit over the period. This was mainly attributed to the growing deficit noted in Net export of services from United States Dollars 1,260 million in 2019/20 to United States Dollars 2,052 million in 2020/21. Goods and primary income balances also significantly contributed to the current account deficit (See Appendix Table 4.1N)

### 4.1.8.2 Capital and Financial Account Balance

The Capital account, combined with the Financial account, represents the transfer of capital to help pay for the current account, which includes the Trade of goods and services. Capital account measures the inflow and outflow of short-term and long-term capital transfers. These are mainly Non-produced and Non-financial assets such as Land, Leases, Licenses, Grants and Market assets (eg trade names, copyrights etc). The capital account position grew from United States Dollars 69 million surplus recorded in 2019/20 to United States Dollars 171 recorded in 2020/21.

Financial account components include Direct investment, Portfolio investment and Reserve assets, which are broken down by sector. The Financial account shows a Net borrowing position of United States Dolars 2,910 million in 2020/21, up from United States Dollars 1,623 million recorded in 2019/20. This was attributed to an increase in other investment from from United States Dollars 974 Million in 2019/20 to from United States Dollars 2,004 Million in 2020/21 and portfolio investment balance contracted from from United States Dollars 321 Million in 2019/20 to a deficit of from United States Dollars 43 Million in 2020/21. (See Appendix Table 4.1N)

### 4.2 Price Statistics

### 4.2.1 Consumer Price Index (CPI)

This section presents statistics on Consumer Price Indices (CPIs) for goods and services consumed by households within Uganda. The national CPI covers eight urban centres of Kampala, Jinja, Mbale, Masaka, Mbarara, Gulu, Arua and Fort Portal. Apart from Kampala, each of the urban centres has an independent consumption basket of goods and services. Kampala, however, is decomposed into 3 consumption baskets. These are for Kampala High Income (KHI), Kampala Middle Income (KMI) and Kampala Low Income (KLI). Therefore, the Uganda National CPI is a composition of 10 consumption baskets.

### 4.2.1.1 Headline Inflation

Headline Inflation is the measure of the relative change in prices of all goods and services for all the 10 consumption baskets. The Calendar Year (CY) 2020 registered a higher annual average inflation (3.8%) compared to the annual average inflation (2.9%) for CY2019, as shown in Figure 4.2.1. The increase recorded in CY2020 was majorly attributed to the annual average Core inflation that registered 4.7 percent in CY2020 compared to 3.6 percent recorded for CY2019, (See Statistical Appendix Table 4.2A).

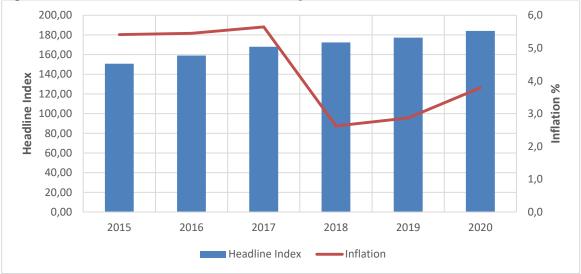

Figure 4.2.1: Headline Index and Annual Average Inflation 2015 –2020

Masaka recorded the highest annual average inflation rate (5.4%) in CY2020, compared to 4.5 percent recorded in CY2019. This was followed by Arua (5.0%) in CY2020 compared to 1.4 percent recorded for the CY2019. The lowest annual average inflation for the CY2020 was recorded in Mbale (2.7%), compared to 1.0 percent that was observed in CY2019.

The FY2019/20 registered an annual average inflation of 3.0 percent compared to the 3.1 percent recorded during the FY2018/19, (see Statistical Appendix Table 4.2 A).

### 4.2.1.2 Core Inflation

Core Inflation, sometimes referred to as Underlying Inflation, measures relative changes in the prices of all goods and services in the consumption expenditure basket excluding fresh fruits, fresh vegetables, dried vegetables and fresh milk. Also excluded are tobacco leaves, electricity, petrol, diesel, paraffin, charcoal, propane gas, metered water and un-metered water. The annual average Core Inflation increased to 4.7 percent in CY2020, from the 3.6 percent recorded during the CY2019, as shown in Figure 4. 2.3. The increase in Core inflation was attributed to increases in prices of Transport, Health, and Alcoholic beverages during the CY2020, compared to CY2019, (See Statistical Appendix Tables 4.2 A).

The annual average core inflation for the FY2019/20 decreased to 3.1 percent, from the 3.8 percent recorded during the FY2018/19 (see Statistical Appendix Table 4.2 A).

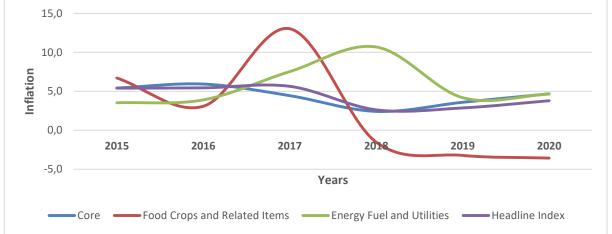

Figure 4.2.3: Headline, Core, Food Crops and EFU Average Annual Inflation 2015 – 2020

### 4.2.1.3 Food Crops Inflation

As shown in Figure 4.2.3, the annual average Food Crops inflation for CY2020 decreased to minus 3.6 percent, from minus 3.2 percent recorded for the CY2019. The decrease in the annual average food crops inflation is attributed to the Corona Virus Disease 2019 (COVID19) pandemic during the CY2020, which disrupted the exportation of fresh food products. The FY2019/20, registered a higher annual average food crops inflation of minus 0.7 percent, compared to the minus 4.4 percent recorded for FY2018/19 (see Statistical Appendix Table 4.2 A).

### 4.2.1.4 Energy, Fuel and Utilities (EFU) Inflation

The Energy, Fuel and Utilities (EFU) sector comprises of Petrol, Diesel, Charcoal, Firewood, Kerosene, Liquefied gas propane, Electricity, Water charges from NWSC and Water Charges – other sources. During the CY2020, the annual average EFU inflation increased to 4.6 percent, from 4.2 percent recorded during the CY2019, (see Statistical Appendix Table 4.2 A).

The FY2019/20 registered a lower annual average EFU inflation (6.0%) compared to the 7.3 percent registered in FY2018/19, (see Statistical Appendix Table 4.2 A).

### 4.2.1.5 Major Inflation drivers during the Calendar Year 2020

During CY2020, the national annual average Index rose by 3.8 percent. The main driver was Transport that registered 14.5 percent in CY2020 compared to 7.8 percent recorded for CY2019. Other drivers were Food and Non-Alcoholic Beverages that registered 1.8 percent in CY2020 compared to minus 0.2 percent in CY2019, and Housing, Water, Electricity, Gas and Other Fuels registered 4.0 percent in CY2020 compared to 2.9 percent in CY2019, (See Statistical Appendix Table 4.2 E).

### 4.2.2 Producer Price Index – Manufacturing & Utilities

The Producer Price Index for Manufacturing and Utilities (PPI-M&U) is an index that measures changes in the prices of a basket of products either as they leave their place of production (Output Price Index) or as they enter the production process (Input Price Index). The current computed PPI-M&U is an Output Price Index valued at Basic prices with a base period as July 2009 to June 2010. It covers the Manufacturing Sector both for the Local and Export Market (Combined) as well as the Utility Sector for the Local Market.

### 4.2.2.1 PPI-M&U (Combined) Annual Percentage Changes, (Calendar) Year 2016-2020.

The PPI-M&U (Combined) registered an annual average increase of 2.8 percent from 178.05 recorded in CY2019 to 182.98 for the CY2020. The rise in the producer prices was due to a price increment in PPI-Manufacturing Sector by 3.1 percent. The rise in producer prices under the Manufacturing Sector was mainly driven by the Food Products (7.0 percent), Other Non-Metallic Products (1.2 percent), and Wearing Apparel (3.7 percent) as represented in Table 4.2.1 and in Statistical Appendix-Table 4.2 P.

2010-100	Table 4.2.1 PPI-M&U (Combined) Annual Percent	age Changes	s, Calendar Year 2016-20	020; July 2009 to Jun
2010-100	2010=100			

Industry Group	Base period Weights	2016	2017	2018	2019	2020
Index						
PPI-Manufacturing and Utilities	1000.00	173.40	184.41	182.17	178.05	182.98
PPI-Manufacturing Indices	921.40	174.02	184.61	181.51	176.77	182.23

### 4.2.2.2 PPI-M&U (Combined) Annual Percentage Changes, FY 2015/16-2019/20.

The PPI-M&U (Combined) registered an annual average increase of 0.7 percent from an average index of 179.31 in FY2018/19 to 180.49 in FY2019/20. The price increment was driven by a rise in prices under the Manufacturing and Utility sectors. For FY2019/20, the price increase in the Manufacturing Sector was mainly due to Food Products (3.1%), Other Non-Metallic Mineral Products (2.9%) and Wearing Apparel (3.5%). Under the Utility sector, the price increases were driven by Electricity power generation, as represented in Table 4.2.2 and Statistical Appendix-Table 4.2 S.

### 4.2.2.3 PPI-M (Local) Annual Percentage Changes, (Calendar) Year 2016-2020.

The PPI-M (Local) for the CY2020 increased by 2.1 percent from an annual average of 172.03 in CY2019 to 175.62 to CY2020. The Annual increment is mainly attributed to the rise in prices of Food (4.8%), Chemical Products (0.7%), Wearing Apparel (3.7%) and Other Non-Metallic Mineral Products (0.9%), as represented in Table 4.2.3 and Statistical Appendix-Table 4.2 Q.

### 4.2.2.4 PPI-M (Local) Annual Percentage Changes, (Fiscal) year 2015/16 to 2019/20

In FY2019/20, the PPI-M (Local) on average rose by 0.2 percent, from an average index of 172.69 in FY2018/19 to 173.11. The Annual increment of 0.2 percent was mainly attributed by price increment in Food Products (0.8 percent), Other Non-metallic Mineral Products (6.2 percent) and Wearing Apparel (3.4 percent), as represented in Table 4.2.4 and Statistical Appendix-Table 4.2 R.

### 4.2.2.5 PPI-M (Export) Annual Percentage Changes, CY2016-2020.

The PPI-M (Export) for the CY2020 registered an annual increment of by 6.0 percent from an annual average of 194.63 in CY2019 to 206.30. The Annual increment was mainly attributed by rise in prices of Food Products (10.7 percent) as represented in Table 4.2.5 and Statistical Appendix-Table 4.2 R.

### Table 4.2.5 PPI-M (Export) Annual Percentage Change, calendar year 2016-2020; July 2009 to June 2010=100

### 4.2.3 The Producer Price Index-Hotels & Restaurants

The Producer Price Index for Hotels and Restaurants (PPI-H&R) measures the average change in the prices that Hotel and Restaurant Service providers receive for their services.

It is an Output Price Index, designed to reflect the price trend of a constant well-defined and representative basket of services provided by hoteliers. The Index is divided into the Accommodation and the Catering services. The Catering services are further divided into the Food and snacks and the Drinks, as shown in Table 4.2.7. The prices collected exclude all taxes and other levies. The base period for this index is the first quarter of CY2008 and covers a sample of 100 hotels and restaurants across the country.

### 4.2.3.1 Annual Average Producer Price Changes

The Annual Average Producer Prices for the Hotels and Restaurants Sector dropped by 0.1 percent in CY2020, compared with the previous increase of 1.8 percent for the CY2019. The Accommodation sub-sector dropped by 1.4 while the Catering services sub-sectors also rose by 0.5.

The overall drop is mainly due to the drop in the Accommodation subsector and is attributed to the after effects of the lockdown from April 2020. However, the Catering services subsector registered a rise and this could be due to door to door deliveries in the same period, as shown in Table 4.2.7 and Statistical Appendix Table 4.2Z.

### Table 4.2.7: PPI-H&R: Annual Percentage Changes Calendar Year, 2015-2019

### **4.2.4 Construction Sector Indices**

The Construction Sector Index (CSI) is an input price index which measures the cost of a given set (basket) of construction goods and services, relative to their cost in the base period. This basket includes the costs of materials, equipment and labour as inputs to the construction sector. The first quarter (January-March) of CY2006 is the base period for the CSI.

#### 4.2.4.1 CSI Composition

The CSI is composed of Basic Heading and Composite Indices. Basic Headings are the smallest sets of goods and services which are used to develop Composite Indices. Each Basic Heading covers a reasonably homogeneous set of goods and services, which are maintained over time. For example, items within a Basic Heading are likely to be made from the same material. A list of Basic Headings is given in Statistical Appendix Table 4.2 AB.

### 4.2.4.2 Annual Changes

The average prices in the construction industry decreased by 2.01 percent in CY2020, compared to CY2019, as shown in Table 4.2.8. The sub-sector that observed the highest average price change over CY2020 was the Civil works (6.51%) greatly influenced by the roads gravel where prices decreased by 8.75 percent on average. All Buildings had an average price change of 0.89 percent, with the prices of Residential Buildings and Non Residential Buildings decreasing by 1.26 percent and 0.67 percent respectively.

Over the period under review (2016-2020), average prices in the overall construction sector registered the highest increase of inputs in CY2016 (3.6%), followed by an increase of 2.5 percent in CY2018. All Buildings had the highest increase in average prices of inputs in CY2016 (5.54%), followed by 1.93 percent in CY2018 and the lowest increase (0.5%) was registered in CY2019. The average price of inputs into Civil works registered the highest increase (4.91%) in 2018, followed by 2.65 percent in CY2017.

				<u> </u>

## 4.3 External Trade

The section presents merchandise import and export flows between Uganda and the rest of the world as compiled from the Customs Department of the Uganda Revenue Authority (URA) and from Non-Customs data sources. The complementary Non-Customs data sources include Commodity Authorities and the Informal Cross-Border Trade (ICBT) survey. The data compiled from customs and commodity authorities is herein referred to as formal exports and imports, whereas data collected from the ICBT survey is referred to as informal exports and imports. The informal trade transactions are the ones that do not go through any official clearance and documentation processes required by the customs laws. The ICBT survey provides informal trade flows between Uganda and her neighbours (Kenya, Rwanda, D. R. Congo, South Sudan and Tanzania). It covers 20 border posts and four bus terminals in Kampala.

It is important to note that, **the informal trade statistics** contained herein for the CY2020 is only for the months of January to March. This was because all Ugandan borders were closed in the bid to cub down the spread of the Covid19 and surveys were suspended.

The compilation of External Trade Statistics is based on the General Trade System and coded according to Harmonised Commodity Description and Coding System Classification (HS Codes) 2017 and the Standard International Trade Classification (SITC Rev4).

### 4.3.1 Summary of External Trade Statistics

During the CY2020, total International Merchandise Trade was United States Dollars 12,554.5 million representing a 6.0 percent increase in international trade in goods from United States Dollars 11,849.4 million recorded in CY2019. Total export earnings (Formal and Informal exports combined) increased by 4.7 percent to United States Dollars 4,286.8 million from United States Dollars 4,095.7 million recorded in CY2019. Similarly, the total imports bill increased by 6.6 percent to United States Dollars 8,267.7 million in CY2020, from US\$ 7,753.8 million registered in CY2019. The overall annual trade deficit increased to United States Dollars 3,980.9 million in CY2020 from United States Dollars 3,658.1 million recorded in CY2019. (See Table 4.3.1)

### Table 4.3.1: Summary of External Trade Statistics Flows (US\$ Million), 2016-2020

Trade Flow	2016	2017	2018	2019	2020
Informal Exports	419.2	549.0	546.6	531.9	137.8*
Formal/Official exports.	2,482.3	2,901.6	3,087.4	3,563.8	4,149.0
Total Exports	2,901.5	3,450.7	3,633.9	4,095.7	4,286.8
Informal Imports	64.9	80.7	60.0	57.8	17.2*
Formal/Official imports.	4,829.5	5,595.9	6,729.4	7,696.0	8,250.5
Total Imports	4,894.3	5,676.6	6,789.4	7,753.8	8,267.7
Total trade	7,795.9	9,127.2	10,423.4	11,849.4	12,554.5
Trade Balance	(1,992.8)	(2,225.9)	(3,155.5)	(3,658.1)	(3,980.9)
% change (Exports)	8.8	18.9	5.3	12.7	4.7
% change (imports)	(12.5)	16.0	19.6	14.2	6.6
% change (total trade	(5.6)	17.1	14.2	13.7	6.0
% change (trade balance)	(31.9)	11.7	41.8	15.9	8.8

**Note: Informal figures for 2020 are for January to March 2020** Source: Uganda Bureau of Statistics

### 4.3.2 Exports

In 2020, Formal exports earnings were United States Dollars 4,149.0 million while informal exports earnings were worth United States Dollars 137.8 million. The informal export earnings were greatly affected by the COVID-19 pandemic which led to the suspension of the surveys for the months of April to December 2020. The closure of the borders did not affect the formal exports since cargo that goes through Customs offices was allowed to move. For the period under review, Formal exports progressively increased from United States Dollars 2,482.3 million in CY2016 to United States Dollars 4,149.0 million in CY2020.

### 4.3.3 Exports by Destination

The Middle East was the leading region of final destination of Uganda's exports, accounting for 43.6 percent of exports in CY2020. This compared to 30.1 percent registered in CY2019. The main country of destination within the Middle East sub-continent was United Arab Emirates and its export revenue increased from United States Dollars 1,196.0 million in CY2019 to United States Dollars 1,844.8 million in CY2020, accounting for 43.0 percent of total exports.

The African continent was the second destination of Uganda's exports, followed by Europe and then Asia for the period under review. In CY2020, total exports to the African continent were worth United States Dollars 1,556.2 million, accounting for 36.3 percent of total exports in comparison to US\$ 1,873.4 million recorded in CY2019. The Common Market for Eastern and Southern Africa (COMESA) regional bloc was the main destination, accounting for 23.8 percent of total exports revenue. In the COMESA bloc, the leading country of destination for Uganda's exports in CY2020 was the Kenya, accounting for 11.4 percent. This was followed by the Democratic Republic of Congo (D.R.Congo), accounting for 8.0 percent. See Appendix Tables 4.3 F and 4.3 G.

European continent was the third destination of Uganda's exports, accounting for 12.4 percent of the total exports in 2020 compared to 16.0 percent registered in CY2019. The European Union (EU) bloc was the main destination for Uganda's exports in Europe. However, its market share decreased slightly to 11.6 percent during CY2020, from 12.5 percent registered in CY2019. The major destination countries in the EU bloc were Italy, Netherlands, Germany and Belgium, representing about 8.9 percent of the market share in CY2020. See Appendix Table 4.3 G.

The average market share for the Asian continent for the period under review (2016 to 2020) was 6.6 percent, with main export destination countries in CY2020 being India (1.3 percent), Hong Kong (0.9 percent) and China (0.9 percent). It is important to note that, with proper export promotion strategies these countries could absorb more exports since they are among the main sources of Uganda's imports and hence a need to narrow the trade deficits.

### 4.3.4 Performance of Formal Commodity Exports

Gold and Gold compounds were Uganda's leading commodity export. Their revenue increased to United States Dollars 1,819.3 million in CY2020 from United States Dollars 1,257.8 million in CY2019. Its share to the total formal exports increased from 35.3 percent in CY2019 to 43.8 percent in CY2020. Coffee was the second most exported commodity. Its value increased to United States Dollars 515.5 million in CY2020 from United States Dollars 438.5 million generated in CY2019, as indicated in Appendix Table 4.3 A. Coffee contributed 12.4 percent to total formal export earnings in 2020, from the 12.3 percent recorded in CY2019. Fish and Fish products were the third highest

value of exports, although their value decreased from United States Dollars 174.2 million in CY2019 to United States Dollars 124.9 million in CY2020. Petroleum Products came fourth, with their export receipts decreasing to United States Dollars 72.7 million in CY2020 from United States Dollars 127.1 million generated in CY2019, See Appendix Tables 4.3 A and 4.3 B.

### 4.3.5 Imports

The total imports bill increased by 6.6 percent to United States Dollars 8,267.7 million in 2020 from United States Dollars 7,753.8 million registered in CY2019. The Formal and informal import bills in CY2020 stood at United States Dollars 8,250.5 million and United States Dollars 17.2 million respectively, from United States Dollars 7,696.0 million and United States Dollars 57.8 million recorded in CY2019.

### 4.3.6 Total Imports by Regional blocs

During the period under review, the Asian continent was the main source of Uganda's merchandise imports, with an import bill of United States Dollars 3,339.2 million in CY2020 compared to United States Dollars 3,043.7 million recorded in CY2019. Its market share to total imports increased to 40.4 percent in CY2020 from 39.3 percent in CY2019.

The African continent was the second main source, with imports worth United States Dollars 2,897.1 million in CY2020 (35%) of total imports compared to United States Dollars 2,099.4 million in CY2019. Imports from the COMESA regional bloc increased by 31.2 percent to United States Dollars 1,327.1 million in CY2020, from United States Dollars 1,011.4 million in CY2019, while those from other Africa (besides COMESA) increased from United States Dollars 1,088.0 million in CY2019 to United States Dollars 1,570.0 million in CY2020.

The Middle East was the third biggest region of origin of Uganda's imports, although its market share to total imports decreased to 10.5 percent in CY2020 from 17.1 percent realized in CY2019, See Appendix Tables 4.3 L and 4.3 M. The EU bloc was forth with import expenditure increasing from United States Dollars 559.5 million in CY2019 to United States Dollars 785.6 million in CY2020. The European Union (EU) represented 9.5 percent of market share of total imports in CY2020 in comparison to 7.2 percent in CY2019.

China, India, Kenya, Tanzania and United Arab Emirates (UAE) were the main countries from where Uganda imported her merchandise in CY2020. They constituted a market share of about 52.4 percent. China was the leading country of origin for Uganda's merchandise imports (United States Dollars 1,352.0 million) in CY2020, representing a share of 16.4 percent of total imports compared to United States Dollars 1,256.6 million recorded in CY2019. India was the second biggest country of origin (United States Dollars 959.1 million) in CY2020 compared to United States Dollars 855.1 million recorded in CY2019. This represented a market share of 11.6 percent in CY2020. Kenya came third (9.4%) though its import bill slightly decreased to United States Dollars 780.4 million in CY2020 from United States Dollars 792.0 million in CY2019. Tanzania followed (9.0%) and its import bill increased from United States Dollars 476.2 million in CY2019 to United States Dollars 743.7 million in CY2020. Imports from United Arab Emirates declined from United States Dollars 822.4 in 2019 to United States Dollars 495.9 million in CY2020. See Appendix Table 4.3 L and Table 4.3 M.

### 4.3.7 Main Products Formally Imported

Non-monetary gold was the main imported product into the country, with the imports expenditure increasing from United States Dollars 1,317.3 million in CY2019 to United States Dollars 1,841.9 million in CY2020. The proportion of Non-monetary gold imports to total formal imports was 22.3 percent in CY2020 compared to 17.1 percent recorded in CY2019. Petroleum products (which include petrol, diesel, paraffin, aviation fuel etc.) came second, with an import expenditure decreasing from United States Dollars 1,227.6 million in CY2019 to United States Dollars 950.8 million in CY2020. The proportion of petroleum products to total imports stood at 11.5 percent in CY2020, compared to 16.0 percent in CY2019. Road vehicles (including air-cushion vehicles) were the third most imported commodities, with an import bill slightly decreasing to United States Dollars 513.4 million in CY2020 from US\$ 514.8 million recorded in CY2019. The increase in vehicle imports have direct implication on demand for petroleum products, hence the need to build a refinery in Uganda to curtail future demand for these products. Iron and steel imports came fourth, although their imports bill decreased to United States Dollars 341.1 million in 2020 from United States Dollars 356.2 million registered in CY2019. The other products which contributed significantly to the country's import bill during 2020 were Medical and pharmaceutical products (United States Dollars 359.3 million), Plastics in primary forms (United States Dollars 293.4 million), Cereals and cereal preparations (United States Dollars 292.6), Machinery specialized for particular industries (United States Dollars 263.4 million) and vegetable fats (United States Dollars 274.4), See Table 4.3.2; Appendix Table 4.3.N and Table 4.3 O.

SITC2	Description	2016	2017	2018	2019	2020
33	Petroleum, petroleum products and related materials	775.0	1,017.1	1,291.2	1,227.6	950.8

Source: Uganda Bureau of Statistics

### 4.3.8 Total Trade Balance performance

The country continued to experience trade deficits, with an annual increase of 8.8 percent registered in CY2020 compared to 15.9 attained in 2019. The deficit generally grown over the period under review, with the lowest trade deficit of United States Dollars 1,992.8 million being registered in 2016, and the highest of United States Dollars 3,980.9 million recorded in CY2020. See table 4.3.1.

### 4.3.9 Informal Exports and Imports

This section presents informal trade flows, highlighting the nature of products transacted, the direction of trade and performance of border posts as recorded during ICBT surveys for the months of January to March 2020. Due to the COVID-19 pandemic, ICBT monitoring for the rest of CY2020 was not done. Total informal trade for the months of January to March 2020 was United States Dollars 155 million of which Informal exports were United States Dollars 137.8 million while informal imports were United States Dollars 17.2 million in CY2020. See table 4.3.1 above.

### 4.3.10 Informal Exports by Country of Destination

During CY2020, most of the informal exports were destined for the D. R. Congo and for Kenya (55.9% and 17.4% respectively). The biggest composition of the informal exports in CY2020 was manufactured goods (62.7%) followed by agriculture (38.2%). Most of the manufactured commodities were destined to the D. R. Congo and South Sudan (68.2% and 12.5% respectively) while most of the agricultural commodities were exported to DR. Congo (77%) and Kenya (24%). See figure 4.3.2 and Appendix Table 4.3P & 4.3 Q.

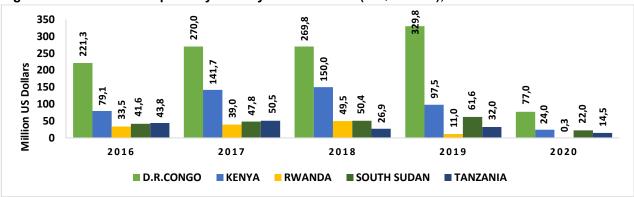

Figure 4.3.2: Informal Exports by country of destination (US\$ Million), 2016 to 2020

### 4.3.11 Performance of Informal Exports by Border Station

Mpondwe border post has been the leading exit point for Uganda's informal merchandise for the period under review. In CY2020, the Export receipts through Mpondwe were United States Dollars 41.7 million for the months of January to March 2020, accounting for 30.2 percent of informal goods exported. This was followed by Busia border with export receipts estimated at United States Dollars 19.3 million (14.0%), Elegu with United States Dollars 21.4 million (15.5%) and Mutukula with United States Dollars 14.2 million (10.3%). The four border posts of Mpondwe, Busia, Elegu and Mutukula had a combined share of about 70.1 percent of the total informal export revenue in CY2020, See Table 4.3.3 below

Customs/Year	2016	2017	2018	2019	2020		
Mpondwe	137,054	171,745	149,303	189,943	41,664		
Busia	66,060	117,406	133,130	84,113	19,331

Table 4.3.3: Informal Exports by Border Station ('000 US \$), 2015- 2019

Note: Figures for 2020 are for January to March 2020 Source: Uganda Bureau of Statistics

### 4.3.12 Informal Imports by Country of origin

The D.R.Congo was the leading source of Uganda's informal imports in CY2020, followed by Kenya as shown in Table 4.3.4. Informal imports from Rwanda increased from United States Dollars 1.7 million in CY2019 to United States Dollars 3.2 million in CY2020. The increase was mainly attributed to the re-opening of the Rwanda-Uganda borders. Informal imports from South Sudan remained generally low with values estimated at US\$ 0.2 million in 2020 compared to US\$ 5.3 million recorded in 2019.

Country/Year	2015	2016	2017	2018	2019	2020
D.R. Congo	18,271	20,267	28,709	23,294	23,513	7,195
Kenya	31,872	26,612	27,352	24,968	23,324	5,873
Rwanda	1,164	2,495	3,187	4,830	1,687	3,086
Tanzania	10,694	12,986	19,111	3,670	3,952	833

### 4.3.13 Performance of Informal Imports by Border Stations

Throughout the period under review, Busia, Mpondwe and Paidha have remained the main entry points for Uganda's informally imported commodities, registering import bills estimated at United States Dollars 4.5 million, United States Dollars 1.3 million and United States Dollars 1.9 million respectively in CY2020 (Table 4.3.5). During CY2020, informal imports that entered through Busia border accounted for 26.4 percent in comparison to 27.3 percent recorded in CY2019, Paidha accounted for 11.3 percent in CY2020 compared to 13.2 percent recorded in CY2019 and proportion of informal imports through Mpondwe border reduced to 7.4 percent in CY2020 from 15.4

percent registered in CY2019. Other leading Import entry points in CY2020 included Suam River, Malaba, Bunagana, Kikagati and Odramachaku.

		Year			
Customs	2016	2017	2018	2019	2020
Busia	18,479	17,647	15,697	15,760	4,536
Mpondwe	6,550	9,806	10,163	8,897	1,264
Paidha	6,416	9,325	4,995	7,644	1,934

# 4.4 Government Finance Statistics (GFS)

### 4.4.0 Introduction

This section provides information on the fiscal operations of the General Government. Fiscal operations include the revenue, expenditure and financing of government institutional units. Government revenue is further analysed by type of revenue while Government expenditure is analysed by economic and functional classification according to GFS Manual 2014. The fiscal statistical information is critical in guiding policy and decision makers to analyse the impact of the fiscal operations at the level of a government, institutional sector and other sectors of the economy.

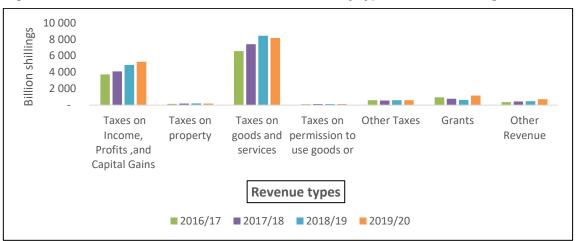

Government Finance Statistics (GFS) coverage is currently restricted to the General Government sector which comprises of Central Government and Local Government (134 districts, 41 municipalities and 203 town councils) and also non-profit institutions that are controlled and financed by the government (Extra budgetary units).

### 4.4.1 Central Government Revenue.

In the FY2019/20, the net Central Government revenue (excludes tax refunds and government taxes) was Uganda Shillings 18,434 billion compared to Uganda Shillings 17,262 billion collected in the FY2018/19. This was a 6.8 percent increment in the net central government revenue.

During the period under review, the largest contributor to the total Central Government revenue was Tax revenue, accounting for 87.0 percent registered in the FY2019/20 while Non-Tax revenue contributed only 13.0 percent. Among the Tax revenue, the taxes on goods and services had the largest contribution (Uganda Shillings 8,118 billion), accounting for 44.4 percent of the total revenue in the FY2019/20. This was followed by Taxes on Income, Profits, and Capital gains (Uganda Shillings 5,272 billion), accounting for 28.6 percent of the total revenue while the lowest contribution from the tax revenue was Taxes on permission to use goods or perform activities (0.7 percent). (See Figure 4.4.1)

Among the Non-Tax revenue, the largest contribution to the total Central Government revenue was from Other revenue (6.7%) in the FY2019/20. [See figure 4.4.1 and Appendix Tables 4.4 B (a) & (b)].

### Figure 4.4.1: Trends in Central Government Revenue by type in Billion Shillings, 2016/17 -2019/20.

Table 4.4.1: General Government Expenditure for FYs 2018/19 and 2019/20 in million shillings

Sector	2018/19	Percent	2019/20	Percent
Local Government Expenditure	3,775,287	15.3	4,020,438	16.6
Central Government excluding Transfers to Local Government and arrears	20,967,950	84.7	20,252,706	83.4
Grand Total	24,743,237	100.0	24,273,145	100.0

Source: Uganda Bureau of Statistics

General Government Expenditure (excluding arrears) for the FY2019/20 was Uganda Shillings 24,273.1 billion compared to Uganda Shillings 24,743.2 billion in the FY2018/19. In the FY2019/20, Local Government Expenditure accounted for 16.6 percent of the total General Government expenditure while Central Government Expenditure (excluding arrears and Local Government Transfers) accounted for 83.4 percent. [See table 4.4.3 and Appendix Tables 4.4 C (a & b), 4.4 D (a & b), & 4.4 J (a & b)].

Table 4.4.2: Functional classification of General Government Expenditure for FY 2018/19 and FY 2019/20,
Million shillings

Functional classification	2018/19	Percent	2019/20	Percent
General Public Services	6,762,547	27.3	7,321,940	27.3
Defense	2,406,383	9.7	4,150,246	9.7
Public order and safety	1,507,342	6.1	1,699,667	6.1
Economic Affairs	8,258,833	33.4	5,105,725	33.4

Housing and Community amenities	1,029,775	4.2	403,399	4.2
Health	1,528,415	6.2	2,222,315	6.2
Recreation, Culture, and religion	4,837	0.0	20,287	0
Education	2,606,366	10.5	2,946,731	10.5
Social Protection	390,564	1.6	263,262	1.6
Total	24,743,236	100.0	24,273,145	100

Source: Uganda Bureau of Statistics

Table 4.2.2 shows that there was a 1.9 percent decrease in the General Government Expenditure in comparison to the expenditure of Uganda Shillings 24,743.25 billion in FY2018/19. Economic affairs sector took the highest expenditure of General Government expenditure and this is mainly attributed to the development of transport sector. [See table 4.4.3 and Appendix Tables 4.4 C (a & b), 4.4 D (a & b), & 4.4 I (a & b)].

### 4.4.2 Central Government Expenditure

Central government expenditure increased by 38.4 percent from Uganda Shillings 20,968 billion for the FY2018/19 to Uganda Shillings 29,013 billion for FY2019/20. A Comparison between FY2018/19 and FY2019/20 shows that recurrent expenditure increased by 21.7 percent, development expenditure increased by 48.6 percent and the donor expenditure increased by 57.7 percent.

For the FY2019/20, the recurrent expenditure of Uganda Shillings 11,991 billion accounted for 41.3 percent, development expenditure of Uganda Shillings 8,262 billion accounted for 28.5 percent and the donor expenditure of Uganda Shillings 8,760 billion accounted for 30.2 percent of the overall Central Government expenditure.

General public services accounted for the highest percentage of the recurrent (49.2%) and donor expenditure (48.0%) while Economic affairs accounted for the highest percentage of the development expenditure (41.9%). [See table 4.4.3 and Appendix Tables 4.4 C (a & b) & 4.4 D (a & b)].

Table 4.4.3 Summary of Central Government Expenditure for FYs 2018/19 and 2019/20 by Functional
Classification

Functional Expenditure		2018/19'		2019/20
Recurrent	Shs.Million	Percentage share	Shs.Million	Percentage share

Total (Central Government expenditure)	20,967,951		29,013,020	

Source: UBOS

Note: Central government expenditure excludes transfers to Local government.

### 4.4.3 Local Government Revenue

During the FY2019/20, total Local government revenue was Uganda Shillings 4,211.8 billion of which Uganda Shillings 3,584 billion was revenue from the districts while Uganda Shillings 627.8 billion was revenue from municipalities. Grants remained the major source of Local government revenue, accounting for 96.3 percent of total Local Government revenue. Locally raised revenue accounted for only 2.2 percent of the total Local Government revenue, of which raised taxes accounted for 1.6 percent while the other non-tax revenue accounted for 98.4 percent. [See Appendix Tables 4.4 I (i&ii)].

### 4.4.4 Local Government Expenditure

In FY2019/20, Local Government total expenditure rose to Uganda Shillings 4,020.4 billion from Uganda Shillings 3,775.2 billion in the FY2018/19. This was a 6.5 percent increase in local government expenditure. The Education sector took the largest proportion of Local government expenditure (43.5%), followed by public administration (29.1%). The Health sector accounted for 14.5 percent of the total Local Government expenditure. The smallest expenditure at the Local Government was in the Public Order and Safety sector. [See Appendix Tables 4.4 J (i&ii)].

### 4.5 Banking and Currency

This section presents Statistics on the performance of the banking sector for the period July 2019 - June 2020.

### 4.5.1 Depository Corporations Survey

The Depository Corporation Survey covers Credit and Micro Finance deposit taking institutions and deposits excluded from broad money. These deposits comprise of loan insurance fund held by individuals at credit institutions and Micro Deposit Taking Institutions (MDIs).

The Net Foreign Assets (NFA) which shows a country's level of indebtedness, increased by 16.9 percent from Uganda Shillings 13,878 billion as at June 2019 to 16,224 billion shillings as at June 2020. The Net Domestic Assets (NDA) grew by 31.4 percent from Uganda Shillings 10,535 billion in June 2019 to Uganda Shillings 13,845 billion in June 2020. Domestic claims and claims on other sectors each increased from Uganda Shillings 20,084 billion to Uganda Shillings 24,316 billion and Uganda Shillings 16,112 billion to Uganda Shillings 17,421 billion over the period under review, respectively.

#### Money Supply

Money supply, which indicates the total stock of money circulating in an economy, includes currency, notes, money in deposits and liquid assets. Money supply (M1) includes money in circulation and local currency in deposits in banks increased by 26.6 percent from Uganda Shillings 10,018 billion in June 2019 to Uganda Shillings 12,678 billion in June 2020. This was attributed to the increase in currency in the hands of the people and transferable deposits from Uganda Shillings 3,993 billion in June 2019 to Uganda Shillings 4,877 billion in June 2020 and Uganda Shillings 6,025 billion in June 2019 to Uganda Shillings 7,801 billion in June 2020 respectively.

Money supply (M2) includes M1 plus savings and time deposits. It increased by 24.9 percent from Uganda Shillings 17,279 billion in June 2019 to Uganda Shillings 21,575 billion in June 2020.

Money supply (M3) is the broadest level of money supply. It includes money supply M2 and foreign currency deposits. It increased by 23.2 percent from Uganda Shillings 24,405 billion shillings in June 2019 to Uganda Shillings 30,069 billion in June 2020. This is partly due to a 19.1 percent increase in foreign currency deposits, from Uganda Shillings 7,133 billion in June 2019 to Uganda Shillings 8,494 billion in June 2020 (see Appendix Table 4.5A)

### 4.5.2 Commercial Banks Assets and Liabilities

The total assets of commercial banks increased by 18.0 percent from Uganda Shillings 30,559 billion as at June 2019 to Uganda Shillings 36,060 billion as at June 2020. Particularly, assets in loans, advances and overdrafts increased from Uganda Shillings 14,151 billion in June 2019 to Uganda Shillings 16,049 billion in June 2020. In addition, deposit assets increased from Uganda Shillings 2,663 billion in June 2019 to Uganda Shillings 3,685 billion in June 2020. Total Commercial banks liabilities increased by 18.1 percent from Uganda Shillings 25,591 billion as at June 2019 to Uganda Shillings 30,223 billion as at June 2020. Additionally, total Capital increased from Uganda Shillings 4,968 billion in June 2019 to Uganda Shillings 5,837 billion in June 2020, translating into a 17.5 percent increase over the period. Overall, net capital increased from Uganda Shillings 4,594 billion in June 2019 to Uganda Shillings 5,406 billion in June 2019. This represents a 17.7 percent increase in net capital.

Total deposit liabilities increased by 21.2 percent from Uganda Shillings 21,031 billion in June 2019 to Uganda Shillings 25,488 billion in June 2020. This was attributed to an increase in demand, savings and time deposits over the period by 26.9 percent, 24.8 percent and 6.3 percent respectively (See Appendix Table 4.5B & C)

### 4.5.3 Commercial Banks outstanding Loans and Advances

The total outstanding loans and advances in local currency to the private sector increased by 12.2 percent, from Uganda Shillings 8,853 billion in June 2019 to Uganda Shillings 9,930 billion in June 2020. Sectors that registered notable increase in loans and advances as at June 2020 include Transport and communication (36.3 percent), Community, social and other services (43.8 percent), Agriculture (17.5 percent), Business services (22.7 percent) as well as Building, mortgage and construction (21.1 percent). Although Mining and quarrying declined by 26.3, loans and advances to the private sector generally increased over the period. Loans and advances to Trade (17.6 Percent), Building, mortgage and construction (19.3 percent) and Personal and household (25.7 percent) continued to dominate accounting for over 60 percent of the total loans and advances to private sector. On the other hand, foreign currency denominated loans and advances to the private sector (in shillings) grew by 15.5 percent from 5,298 billion shillings in June 2019 to 6,119 billion shillings in June 2020. Over 65 percent of the total loans disbursed as at June 2020 went to the manufacturing (19.1 percent), trade (15.9 percent) and Building, mortgage and construction (24.0 percent). This implies that more forex loans were advanced to the Building, mortgage and construction sector as opposed to the shilling denominated loans which were advanced to the personal and household sector over the period under review. (See Appendix Table 4.5D & E)

### 4.5.4 Structure of Interest Rates

The Central Bank Rate (CBR), which is the rate at which commercial banks can borrow from the Central Bank, decreased to 7.0 percent in June 2020 from 10.0 percent in June 2019. In the same way, Commercial bank rate decreased to 11.0 percent in June 2020 from 15.0 percent in June 2019. On annualised basis, the CBR averaged 7.7 percent in 2020 compared to an average of 9.7 percent recorded in 2019. Additionally, Rediscount rate, the rate of discounting a short term negotiable debt instrument for a second time, increased to 11.1 percent in 2020 from 13.7 percent recorded in 2019.

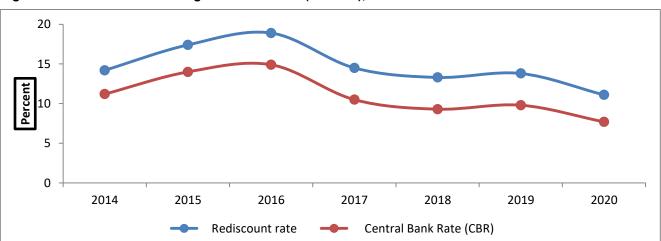

Figure 4.5A: Annualised Average Interest Rates (Percent), 2014-2020

Treasury bills are government bonds or debt securities with maturity of less than a year. The 91 days Treasury Bills rate decreased to 8.3 percent in June 2020 from 9.0 percent in June 2019. Similarly the 182 days Treasury Bills rate decreased to 9.8 percent in June 2020 from 10.1 percent in June 2019. On the other hand, 364 days Treasury Bills rate increased to 11.2 percent in June 2020 from 10.5 percent in June 2019.

Deposit rate (foreign currency) increased to 1.6 percent in June 2020 from 1.4 percent in June 2019 while lending rate decreased from 6.4 percent in June 2019 to 5.5 percent in June 2020. On annualised basis, foreign currency deposit and lending rates decreased to 1.3 and 5.9 percent in 2020 from 1.4 and 8.0 percent in 2019 respectively (See Appendix 4.5F & G)

### 4.5.5 Exchange Rates

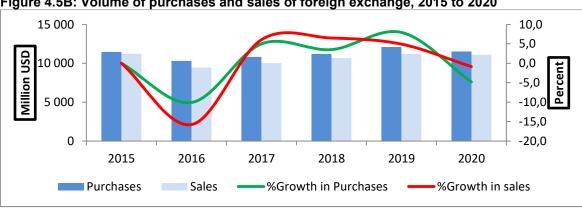

The average buying rate for foreign exchange (US dollar) depreciated from Uganda Shillings 3,690 in 2019 to Uganda Shillings 3,704 in 2020. Likewise, the average selling rate depreciated from Uganda Shillings 3,703 in 2019 to Uganda Shillings 3,717 in 2020. The Bureau mid-rate also depreciated from an average of Uganda Shillings 3,699 in 2019 to an average of Uganda Shillings 3,711 in 2020. Furthermore, the interbank mid-rate (official) depreciated from an average of Uganda Shillings 3,704 in 2019 to an average of Uganda Shillings 3,718 in 2020, as reflect in Table 3.5.

Table 3.5: Annual Foreign Exchange Rates (Uganda shillings per US\$), 2015-2020.

Exchange rates	2015	2016	2017	2018	2019	2020
Buying rate (weighted)	3,226	3,407	3,596	3,707	3,690	3,704
Selling rate (weighted)	3,242	3,422	3,643	3,730	3,709	3,717
Bureau mid-rate	3,234	3,414	3,620	3,719	3,699	3,711
Inter-bank mid-rate	3,246	3,420	3,611	3,728	3,704	3,718

Source: Bank of Uganda

Total volume of foreign exchange purchases across commercial banks (Inter-bank) and forex bureaux decreased by 4.8 percent from United States Dollars 12,085 million in 2019 to United States Dollars 11,506 million in CY2020. In the same way, total volume of foreign exchange sales across commercial banks (Inter-bank) and forex bureaux decreased by 0.9 percent from United States Dollars 11,197 million in 2019 to United States Dollars 11,100 million in CY2020

Purchase of forex has continued to outweigh total sales, with a difference of United States Dollars 406 million. Notably, growth in purchases was higher than that of sales in CY2019 .The low sales of forex can partly be explained by the continued loss of value (depreciation) of the local currency against the US dollar (See Appendix 4.5H &I)

## 4.6 Insurance

This section presents statistics on insurance services that include the number of life insurance and non-life insurance policies issued. The statistics cover the period 2012 to 2019.

#### 4.6.1 Life Insurance Incomings and Outgoings

Life insurance refers to all policies that cover human related risks. Life policies issued include Individual, Group, Medical and the Deposit Administrative Plan (DAP).

Gross premium incomings increased by 27.3 percent in CY2019 from Uganda Shillings 217 billion in CY2018 to Uganda Shillings 276 billion in CY2019. This was attributed to the increase in premium incomings. Life individual rose from Uganda Shillings 102 billion in 2018 to Uganda Shillings 156 billion in CY2019, DAP that had declined by 17.9 percent in 2018 registered an increase of 17.4 percent from Uganda Shillings 16 billion to Uganda Shillings 19 shillings in CY2019 and medical from Uganda Shillings 32 billion in CY2018 to Uganda Shillings 36 billion in CY2019.

However, the Life group insurance category declined by 3.6 percent in gross premium incomings in the same period, from Uganda Shillings 66 billion in 2018 to 63 billion in 2019. (See Table 4.6 A).

The Life insurance for reinsurance outgoings category decreased by 0.8 percent, from Uganda Shillings 34.5 billion in CY2018 to Uganda Shillings 34.2 billion in CY2019. The main contributor to the decline was the medical insurance category that decreased from Uganda Shillings 18 billion in CY2018 to Uganda Shillings 12 billion in CY2019. The life individual insurance category grew from Uganda Shillings 2 billion in 2018 to Uganda Shillings 3 billion in CY2019 (see statistical Appendix Table 4.6 B).

The Net Incurred claims on life insurance registered 15.1 percent increase in CY2019 compared to 31.4 percent registered in CY2018. The value of life paid and outstanding claims increased from Uganda Shillings 57 billion in 2018 to Uganda Shillings 66 billion in CY2019. The major contributor to the increase was the life individual insurance category that increased from Uganda Shillings 15 billion in CY2018 to Uganda Shillings 45 billion in CY2019 (See Appendix table 4.6 D).

#### 4.6.2 Non-Life Insurance Incomings and Outgoings

Non-life insurance refers to policies that cover non-human related risks. These policies include fire, marine/aviation, motor and miscellaneous accidents.

The value of non-life Insurance premium incomings increased from Uganda Shillings 333 billion shillings in CY2018 to Uganda Shillings 340 billion in CY2019, representing a growth of 2.2 percent. Marine insurance registered an increase of 19.8 percent in CY2019 from an earlier decline of 0.9 percent in CY2018, Fire insurance recorded 19.9 percent increase from Uganda Shillings 955 billion to Uganda Shillings 114 billion; the Motor insurance category recorded a 4.0 percent increase from Uganda Shillings 144 billion to Uganda Shillings 150 billion in CY2019.

However, the Miscellaneous accidents category in the Non-life insurance premium incomings recorded a decline of 40.0 percent in CY2019. (Appendix table 4.6E).

The outgoings in form of reinsurance registered a growth of 18.9 percent in CY2019, from Uganda Shillings 136 billion to Uganda Shillings 162 billion. The major contributors to the growth were Fire reinsurance that increased by 21.0 percent in CY2019, from Uganda Shillings 75 billion to Uganda Shillings 91 billion and Marine/Aviation increased by 23.7 percent from Uganda Shillings 22 billion to Uganda Shillings 27 billion in CY2019. (See Statistical Appendix table 4.6 F).

Non-Life premium income declined by 9.0 percent in CY2019 from Uganda Shillings 195 billion to Uganda Shillings 177 billion in CY2019. The decline was attributed to the decrease in Miscellaneous accidents and marine/aviation by 73.5 percent and 7.9 percent respectively. However, fire and motor insurance increased by 6.8 percent and 5.4 percent respectively. (See Appendix table 4.6 G).

The Net incurred claims on Non-life insurance increased by 22.4 percent in CY2019 from a decline of 5.8 percent in CY2018. The main drivers for the increase were Miscellaneous accidents which rose from Uganda Shillings 2 billion to Uganda Shillings 7 billion and Fire insurance that increased from Uganda Shillings 7 billion to Uganda Shillings 13 billion in CY2019. (See Appendix table 4.6 H).

Tanning and dressing of leather; dressing and dyeing of fur	11.84	236.71	212.16	216.04	182.45	144.69
MANUFACTURE OF PAPER & PAPER PRODUCTS	3.72	265.86	265.99	280.83	289.00	276.86
Manufacture of pulp, Paper & Paperboard	3.72	265.86	265.99	280.83	289.00	276.86
MANUFACTURE OF CHEMICALS & CHEMICAL PRODUCTS	7.95	233.36	232.51	219.43	224.67	198.81
Manufacture of Soap, Detergents, cleaning and Polishing preparations	7.95	233.36	232.51	219.43	224.67	198.81
MANUFACTURE OF PHARMACEUTICALS, MEDICINAL CHEMICAL & BOTANICAL PRODUCTS	2.92	213.60	219.97	228.14	232.95	198.45
Manufacture of Pharmaceuticals, medicinal chemical and botanical products	2.92	213.60	219.97	228.14	232.95	198.45
MANUFACTURE OF RUBBER & PLASTIC PRODUCTS	3.51	185.99	192.76	198.81	203.64	195.27
Manufacture of Plastic products	3.51	185.99	192.76	198.81	203.64	195.27
MANUFACTURE OF OTHER NON-METALLIC MINERAL PRODUCTS	24.84	149.49	153.25	154.45	106.11	104.63
Manufacture of Cement, Lime and Plaster	24.84	149.49	153.25	154.45	106.11	104.63

### Table 4.2Z PPI-Hotels & Restaurants Annual Indices (Jan-Mar, 2008=100)

Industry Group	Weights	2016	2017	2018	2019	2020
Hotels and restaurants	10000	169.73	177.16	187.25	190.65	203.88
Accommodation	3375	152.42	159.49	164.15	165.28	167.05
Catering Services	6625	210.28	218.34	232.23	238.50	262.03
Accommodation	3375	152.42	159.49	164.15	165.28	167.05
Hotel Accommodation (rooms, suites etc.)	2675	152.25	161.45	168.23	168.43	166.65
Other Hotel Services (e.g. conference halls)	700	169.96	175.03	175.55	178.80	189.45
Catering Services	6625	210.28	218.34	232.23	238.50	262.025
Food and Snacks	3075	222.13	228.02	229.95	232.20	282.25
Buffet	695	211.46	210.40	218.45	226.08	327.40
A la Carte (specific foods)	1190	223.12	229.34	230.08	231.33	250.35
Snacks ( light bites, coffee, tea)	1190	257.43	286.94	303.93	315.60	328.35
Drinks	3549	184.48	192.73	196.70	202.55	221.15
Beer	893	178.69	183.44	184.55	188.95	197.28
Soft Drinks (sodas) & mineral water	1309	176.79	191.08	201.60	215.98	233.45
Wines & Spirits	1347	198.41	198.61	200.08	200.48	240.1

	Weight	2016	2017	2018	2019	2020
Whole sector	100	234.65	237.77	243.74	244.92	240.00
All Buildings	80	230.28	232.62	237.11	238.29	236.18
Residential Buildings	30	206.67	211.35	217.19	217.62	214.88
Formal	15	241.43	245.91	252.17	251.85	247.09
Own-account	15	172.62	177.74	183.00	183.98	182.83
Non-Residential Buildings	50	244.54	245.36	248.92	250.60	248.92
